

ANTI ROLL BAR LINKS – UPRATED DOUBLE BALL JOINTED - PAIR

Triumph Stag
Triumph 2000/2500/2.5Pi
Triumph TR6

Part Number: **1521431ABJ**

Using a hole cutter as illustrated below.

Mark the diameter and expand the hole in the bracket to 16 dia.

Turn the eccentric bush to the 12 o'clock position to give as much height and joint clearance as possible.

For the attachment to the antiroll bar, the joint goes onto the lower surface of the bar and the top hat bush on top.

Hold the ball joint studs with a Hex key and tighten up all fixings.
