Many thanks to Mick Caswell and Duckworths Land Rover for making these vehicles available to us.

HELPING YOU CARE FOR YOUR DISCOVERY

Since the early 1980s, Rimmer Bros have specialised in supplying parts for classic Triumph cars. In addition, we have been supplying stainless steel exhaust systems for Land Rovers and other four-wheel-drives since 1984. In 1993, we added to our range of mail order parts catalogues when we began stocking parts for the Rover SD1.

Then, in the summer of 2000, to celebrate 30 years of Range Rover production, we launched our comprehensive parts catalogue for the Classic Range Rover. This was a natural progression, not only because Range Rover vied for showroom space alongside Triumph Stags and Rover Vitesse during its 30 years, but also because a vast number of Range Rovers were powered by the Rover V8 engine, a subject in which we specialise!

Which brings us to this, our latest catalogue. We could hardly ignore the Discovery when we already specialise in the Rover V8 engine and stock a comprehensive range of parts for the Range Rover.

This catalogue, caters for all Discovery models produced between 1989 and 1998. These vehicles have become known as 200 series (1989 to 1994) and 300 series (1994 to 1998), after the 200 & 300Tdi diesel engines fitted during the respective periods of production. They have sold in huge quantities, proven themselves as working vehicles and family cars, school-run favourites and rugged off-roaders and, along the way, established a cult following.

Our customers are owners, garages and other specialists looking for a fast, reliable source of original and high quality aftermarket parts and accessories, available by mail order. We have the latest technology to ensure orders are processed instantly and despatched promptly to wherever you are - UK, or worldwide.

Our aim with this catalogue is to apply our unique mail order parts service to the Discovery, helping you to maintain and enhance your vehicle.

THIS CATALOGUE

We have endeavoured to keep the parts listings as comprehensive as possible, whilst concentrating on the items most frequently called for. Prices are listed in our separate Price Guide. If the parts you require are not shown, please contact our sales office, where our staff will be pleased to check availability and price for you.

Although this catalogue caters for all Series 1 Discovery to 1998, we can also supply parts and accessories for the Series 2 model, 1998 onwards. Please enquire if you have any specific requirements.

Our Series 2 catalogue will be published in due course.

MEMBERS OF BRITISH MOTOR HERITAGE

British Motor Heritage is an organisation committed to the preservation of the cars which have special places in our motoring history. One of the ways in which it pursues this objective is by helping to ensure that replacement parts are available and are of sufficient quality.

BRITISH MOTOR
HERITAGE APPROVED

Stringent standards are necessary to meet the requirements of Heritage approval, and the highest accolade for any company involved with the supply of parts for classic cars is to have Heritage approval.

Rimmer Bros were invited to Heritage membership in 1987.

THE CARS WE SPECIALISE IN

As well as looking after your Discovery and Range Rover, we also specialise in Triumph - TR2-TR8, Stag, Spitfire, GT6, 2000/2500/2.5Pi, Herald, Vitesse, Dolomite & Rover SD1.

**RIMMER
BROS**

UK · WORLDWIDE · THE INDEP

SO WHERE DO WE GET OUR PARTS?

Wherever possible we supply original stock from Rover/Land Rover sources - lots of parts are still manufactured. We also offer quality aftermarket parts in certain cases as an alternative to original equipment; often, there can be significant cost savings.

PART NUMBERS

In general, we use Land Rover part numbers to identify original equipment (OE) Land Rover parts. When an alternative to the OE is offered (aftermarket), then the part number is identified with a 'P' suffix. There is also equivalence with certain Rover and Triumph numbers where we list the Rover/Triumph number.

RA, RB, RD & RX prefixes denote a Rimmer Bros derived part, where no original part number exists.

An 'R' suffix denotes 'reconditioned', usually sold on an exchange basis.

THE STOCK WE NEED TO GIVE THE SERVICE YOU NEED

Our degree of specialisation means two things:

Firstly, our people know the cars we're dealing with inside and out, and can give you any advice you might need regarding part selection.

Secondly, we are able to stock in depth just about any part you might need. Triumph House is our latest HQ, acquired in 1991. With nearly 50,000 square feet of warehousing alone, it is a cavernous building, and it needs to be! It currently contains more than 100,000 recorded part numbers with over 30,000 stock lines, and we hold as many of each as necessary to make it almost impossible to run out of stock.

All other aspects of our operation receive equal emphasis. A truly efficient mail order and stock control system. The latest racking and storage facilities for fast and accurate "order picking". Careful packaging and despatch procedures.

THE PEOPLE YOU'RE DEALING WITH

This company really is owned by two brothers named Rimmer. Bill and Graham started their business from humble beginnings in the early 1980s, and it has grown to be one of the leading organisations of its kind in the world, supplying parts Worldwide to an ever growing list of customers.

Both Bill and Graham still work full-time in the business, helped now by over 50 members of staff.

The main qualification of membership of our staff is a recognition that our customers, and our company reputation, depend on our ability to get every aspect of our service right first time.

COMMITMENT TO CUSTOMER SERVICE

Helpful - Accurate - Fast - Efficient

The overall objective at Rimmer Bros is to achieve customer satisfaction at all times.

Our people know your car well, and every member of our staff is dedicated in helping to preserve Classic Cars.

Our computer system gives up-to-the minute information regarding availability and the price of any item. We have an enviable reputation for despatching goods when the customer needs it, quickly and efficiently.

We try to make all our systems and documentation easy to follow and use, and make sure that our catalogues and price guides really do help our customers choose the right parts easily, first time.

Errors & Omissions Excepted. All parts offered subject to availability. All part numbers, illustrations and photographs used in this catalogue are intended for reference/identification purposes only, and are not necessarily an exact representation of the goods supplied. Whilst we make every effort to ensure the accuracy of product descriptions in this catalogue, they are based upon information supplied by the manufacturer/distributor at the time of publication. There may be occasions due to circumstances beyond our control - when specifications are changed, or when goods become temporarily unavailable. Certain part numbers have been superseded to an alternative number when a later version or updated specification is offered.

ADDRESS DETAILS

Rimmer Bros, Triumph House,
Sleaford Road, Bracebridge Heath,
Lincoln, LN4 2NA, England.

OUR CUSTOMER CARD

*Your Passport to the
Finest Parts Service*

This really is the easy way to order the parts you need.

By quoting your UK home postcode or customer number every time you contact us, allows our staff to instantly confirm your personal details, allowing us to process your order, surcharge refund or query quickly & efficiently saving your time and phone costs.

If your card isn't to hand when you call us, don't worry, our computer system can quickly locate your details.

YOUR CUSTOMER NUMBER

Your customer number appears on every invoice document that you receive. Also, as a customer card holder, you will automatically receive our latest price guide, catalogues and details of any special offers that we may have.

To help us maintain our standards of service & customer records, please inform us if you have moved, changed phone number, vehicle type or you have sold your vehicle, by using the coupon at the rear of the price guide or by informing us next time you call.

The Rimmer Brothers customer card is not a credit, debit or charge card.

Enter your customer number here for easy reference

THIS CATALOGUE & OUR PRICE GUIDE

There are no prices in this catalogue. Use it to select the parts you need, then check their cost by referring to the separate Price Guide which represents the other half of our ordering system. The price guide is updated and reprinted more frequently, but we ask that you confirm all prices when ordering. It may also list additional parts (new lines) that we have introduced since this catalogue was printed, and it has more detailed information about ordering & delivery methods. It also has information on warranties and a 'Trouble Shooter Guide'.

ORDERING BY PHONE

Please quote part numbers and your UK home postcode or customer number where possible. This gives instant access to our computerised records and stock control system. If you have any difficulty in selecting the parts you need, our expert staff can help.

UK Payment for Phone Orders

(See also "Overseas Orders & Payment.")

When you have checked on price, availability and delivery costs you can place your order by phone using Visa, American Express, Diners Club, MasterCard, Switch, Solo, JCB or Delta/Connect. You will merely need to tell us the card number, expiry date (or issue number), cardholder's full name and registered card address.

After Hours Ordering Service

We operate a 24-hour answering/ordering service which is available to card holders out of normal hours for both UK and Overseas customers. Just leave all necessary details on our telephone answering machines, ie your vehicle type, year, model, the parts and/or the part numbers you require, plus your Rimmer Bros customer number or your name, credit card and address details (as for ORDERING BY PHONE).

Writing out these details before phoning usually helps a caller to give us clear instructions. If at all possible, please also leave a daytime telephone number.

ORDER BY PHONE

USE YOUR CARD.....

01522 543210

ORDERING BY POST

Triumph House, Sleaford Road, Bracebridge Heath, Lincoln, LN4 2NA, England.
Or use, PO Box 678, Lincoln LN4 2XQ.

We ask you to phone first if at all possible - to check your parts selection, and to advise of delivery charges. Because prices and availability sometimes change, we can also confirm the exact remittance needed avoiding unnecessary delays. If you have not been able to telephone, please give us all possible information - car type/year, RH or LH, front/rear etc - so we can check your selection (including your Rimmer Bros customer number) in all correspondence.

Use our Order Form if you can. It asks specifically for all the details we might need. Please photostat or request additional copies of the order form if required.

UK Payment for Post Orders

(See also "Overseas Orders & Payment.")

Send your remittance with the order. The 'Pricing' section in the Price Guide tells you how to calculate the amount.

We accept payment by personal cheque even if the cheque guarantee card limit is exceeded. All we require is your full name and address on the back of the cheque along with your cheque card number and for business cheques, a relevant letterhead. Cheques or P.O.s made out "Rimmer Bros Ltd" please. Note, if you are unsure as to the exact amount to send, you can write across the top of your cheque, "Cheque Value Not To Exceed £...". You can post us your credit card details if you prefer. If you send cash, note that we cannot accept responsibility for any loss, so registered mail is essential. Bank drafts and Building Society cheques are also accepted. For Bank Transfer information see Price Guide.

ORDERING BY FAX

UK CUSTOMERS: 01522 567600 OVERSEAS CUSTOMERS: +44 1522 567600

See also "Overseas Orders & Payment."

Another facility for customers who wish to make enquiries, or order by credit, debit or charge card. Again, we will need your Rimmer Bros customer number, or the credit cardholders full name and registered card address. Plus fullest possible car/parts details - as for orders by post.

ORDERING BY E-MAIL AND THE INTERNET

For Internet surfers our web site holds details on all our parts catalogues and has an on line ordering facility. Use our E-Mail address for sending your order or parts enquiry. State if you require us to confirm prices, as they can sometimes alter at short notice.

www.rimmerbros.co.uk

E-Mail: LRsales@rimmerbros.co.uk

ORDER

COLLECTING IN PERSON

If you wish to 'call and collect', you will always be made welcome at our shop and sales counter during business hours. Our Visitor Information Centre has lots of interesting details of each production model and the factories where they were produced.

Customers drive here regularly from all over Europe. Lincoln is a historic Cathedral city and is an excellent place to visit. We're about 2 miles south of Lincoln on the A15 Lincoln to Sleaford road (see map on back cover). We advise you to pre-check by phone that we have the part/s you want in stock.

We accept payment by credit card, cash, bank draft, travellers cheque, building society cheque, and personal cheque (when presented with a cheque card) even if the cheque card limit is exceeded, and by business cheque with accompanying letterhead. Bring along your customer card or quote the number for a speedy transaction!

PRICING

For full information and details on prices, VAT, & VAT exempt export sales, please refer to the latest Price Guide. Written quotations are available on request, for parts and/or delivery charges. Please confirm all prices when ordering - prices and availability can sometimes change at short notice. Up to date prices can be found on our web site.

OVERSEAS ORDERS & PAYMENT

We supply parts to classic car owners Worldwide. We have thousands of customers in Europe and regularly send parts as far afield as Australia, North America, Africa and the Far East. Delivery costs of course, vary greatly (depending on size/weight/urgency). We can quote accurately for the cost of parts and delivery once your requirements are known.

Our Multi-language European Order Forms explain how to order parts in English, Italian, German, Spanish and French.

Payment By Export Customers:

There is a choice of payment methods for customers overseas;

- A) Credit card, Debit card or Charge card.
- B) Bank cheque - in ££s sterling (Drawn on a London Bank)
- C) Travellers Cheques (signed) - in ££s sterling.
- D) Giro Cheques in ££s sterling.
- E) By Bank Transfer - see Price Guide.

PLEASE NOTE THAT ALL TRANSACTIONS MUST BE IN ££s STERLING.

PLEASE QUOTE YOUR RIMMER BROS CUSTOMER NUMBER IN ALL CORRESPONDENCE WHERE POSSIBLE.

CHOICE OF DELIVERY METHODS

(For Further Information/Cost Details, Please Refer to Price Guide)

UNITED KINGDOM

There are numerous delivery options for the UK mainland ranging from Post (first class or parcel post) to overnight carrier services. We can advise of the best method of despatch when you telephone. The type of service that we recommend depends upon the size, weight and urgency of the parts you require.

Our price guide indicates the approximate costs, and we will confirm the final invoice total at the end of the call if required.

WORLDWIDE (NON EC COUNTRIES)

We started exporting parts Worldwide in 1982, and since then we have gained an excellent reputation for our speed & efficiency of service.

Delivery costs are based on size, weight, and method of delivery. We have discounted rates with well known carriers, so costs are kept to a minimum. Send us a list of the parts you need (using post, phone, fax or E-Mail), tell us quantities and urgency, and we will work out the best delivery method and quickly advise you of the cost.

Written quotations are available on request.

EC COUNTRIES

The European Community Single Market permits the free movement of goods between all EC countries. This allows us to provide a superb service to all our customers within the EC, with the benefits of improved delivery - via lower charges and easier documentation. Deliveries can be easily arranged using air or surface transport. Our Price Guide indicates approximate costs.

LAND ROVER *Discovery*

If the Land Rover utility initiated the Solihull 4x4 line in 1948, it was the Range Rover which broadened its possibilities in 1970. But the vehicle which finally took the Land Rover marque into the mainstream car market was the Discovery, announced in 1989.

Today, early Discoverys are at the very core of the Land Rover enthusiast movement, and the vehicle's sales success as a current model has been eclipsed only by the less expensive Freelander, which provided Land Rover with a fourth model-line from 1998.

Two key factors brought the Discovery into being. The first was the sudden collapse of Land Rover's traditional overseas markets for its utility vehicles in the early 1980s. Partly caused by political changes, this was made worse by the overseas expansion of the Japanese motor industry, which seized on its opportunity and undercut Land Rover's prices. The second key factor was the rapid rise of the family 4x4 market during the 1980s. Ironically, it was the Range Rover which had demonstrated the potential here (though it was not then really a family-oriented vehicle) and the demand which Solihull was unable to meet was satiated by cheaper 4x4 vehicles – again from the Japanese manufacturers.

Land Rover management settled on a strategy which involved moving the Range Rover up-market into the luxury class and tackling the family 4x4 market head-on with a new product at a price to compete with the Japanese. This strategy was agreed in 1985-1986, and the new vehicle had to be on sale in 1989 if Land Rover was to meet its business targets. So the Discovery was developed with record speed, both cost and time being saved by building it on the chassis of the existing Range Rover.

1989

It was important in the beginning to create an image for the Discovery which was very different from that of the Range Rover. So the first Discoverys had "three-door" bodies (with two side doors and a tail door) and large, colourful side decals intended to give them a fresh and youthful appeal. Their bright Sonar Blue upholstery reinforced the message, and a wide range of custom-designed accessories enabled buyers to personalise their vehicles to a high degree. A bargain-basement entry-level showroom price was a further help. At this stage, petrol Discoverys had the carburettor 3.5-litre V8 engine which had been gradually replaced in Range Rovers by more powerful injected engines in the mid-1980s. But relatively few people were attracted by this thirsty engine, and most Discoverys had the new 200 Tdi turbocharged direct-injection diesel which, though fairly noisy, was both gutsy and frugal. Whichever engine was fitted, the gearbox was always a five-speed LT77 type.

1990-1991

The first 12 months of Discovery sales allowed the vehicle to create its own image, and also enabled Land Rover to reposition the Range Rover more firmly in a higher price bracket. With the 1991 models, introduced in autumn 1990, the company's real strategy for the Discovery became clear.

For the 1991 season, the original three-door models were supplemented by five-doors (four side doors plus one tail door). More soberly dressed, these were aimed squarely at the family buyer, but benefited from the youthful and adventurous image which the three-doors had already established. A Bahama Beige trim option toned down the interior, and side decals were absent for most markets. While the Tdi remained the more popular engine choice, the carburettor V8 disappeared in favour of a more powerful, injected 3.5-litre engine. Models with this were called V8i types.

1995-1998

Relatively few changes were made to the classic Discovery over the remaining years of its life. However, Land Rover did play mix-and-match with the options in order to create new variants, and a notable one was the sporty XS five-door which was announced in mid-1995. Distinguished by special upholstery, special side graphics and special wheels, this model had its own appeal – though in truth its sporting pretensions were all in the eye of the beholder.

These, though, were difficult years for Land Rover. The runaway success of the Discovery forced the company to increase production volumes, and the assembly lines were stretched to the limit. It was perhaps no surprise that this extra pressure on production led to an increased number of assembly problems, and Discovery build quality took a nose-dive in the mid-1990s. There were well-publicised failures of the R380 gearbox, water leaks into the body, and dashboards which curled up in the sun. Land Rover's owners since 1994, the German BMW company, publicly described these failings as a disgrace.

This was the period of special editions which helped to keep alive sales of a vehicle which was now in its final years. There were dozens of different ones, each one designed to appeal to a particular market segment in the country where it was released. In Australia and North America, new model names (S, SE and SE7) appeared on the vehicles, and in Britain the un-badged mid-range model gained GS badges for 1998. Right at the end, "50th Anniversary" editions in various countries celebrated 50 years of the Land Rover marque – but it was time for the first-generation or classic Discovery to move over.

1992

The five-doors helped the Discovery to surpass Land Rover's own sales expectations of the Discovery, and from now on changes to the Discovery were driven by customer demand rather than by Land Rover's own assumptions about what would sell. So from mid-1992 a four-speed automatic option was introduced for those who wanted it, but with the V8 engine only.

1993

For markets where high taxes made the V8i unsaleable but customers wanted petrol engines, Land Rover next introduced a 2-litre four-cylinder engine developed from the T-series used in Rover cars. Discoverys with this were known as Mpi models (the letters stood for Multi-point injection), and the engine remained available until 1996 – always with manual transmission – although it was never a strong seller.

Meanwhile, the V8i models switched to the more powerful 3.9-litre engine already used in the Range Rover. Also made available for the 1994 models introduced in mid-1993 was the combination of Tdi diesel engine and four-speed automatic gearbox. This was also the year when the Freestyle Choice option of front-and-rear anti-roll bars with alloy wheels on lower-profile tyres brought improved on-road handling to the Discovery. And from the spring, customers could buy a Discovery Commercial, based on the three-door model and as stylish a van as any business could wish for.

1994

The Discovery was not originally designed with the North American market in mind, but buying patterns across the Atlantic and the vehicle's mass acceptance in Europe and elsewhere persuaded Land Rover to look for further sales there. However, the original Discovery needed further development before it could be sold in North America. In particular, it needed more luxury features and it needed airbags to meet US safety legislation. So by March 1994, a facelifted Discovery was ready, incorporating all these features and many others. In most markets, these new models were known as 1995 models.

The airbags – optional on most models outside North America – were incorporated into a redesigned fascia. There were cosmetic changes front and rear (mainly affecting the lamps), and new upholstery fabrics. These included leather for the first time, which was made standard on a new top model called the ES.

Outside North America, the most important change was to the much more refined 300 Tdi diesel engine – a development of the 200 Tdi which offered no more power or torque but could meet forthcoming emissions legislation. All Discoverys with manual gearboxes gained the slicker R380 type in place of the older LT77 (which had become an LT77S in 1991 when its synchromesh was improved).

Some people call the 1995 and later model Discoverys "300 series" types after the 300 Tdi engine. However, Land Rover never used that name and it is clearly inappropriate for the V8i and Mpi models built in this period.

Series II

In its place came the radically redeveloped Series II range. Still looking like a Discovery with the characteristic stepped roofline, the new models nevertheless took Land Rover's mid-range model into new territory. As the Range Rover moved up-market once again and the Freelander arrived to occupy the bottom end of the Discovery's traditional market, so the new Discovery moved almost imperceptibly up the market itself.

With the Series II Discovery, Land Rover had succeeded in moving the Discovery into the price bracket once occupied by the Range Rover, but also in bringing with it the wider audience which the original Discovery had created. And that Series II Discovery – a thoroughly excellent vehicle in every respect – will no doubt one day occupy a place in enthusiasts' hearts like the one which the original of the breed does now.

VEHICLE IDENTIFICATION

To ensure the parts that you order are correct for your Discovery, you will need to know exactly when the vehicle was manufactured. Although the registration document will tell you when it was first registered, this may have been some time after it was actually built. The most accurate way to determine your Discovery's age (along with information relating to its specification) is by the chassis number (also called the VIN - Vehicle Identification Number). You can find this number on your registration document, as well as two different places on the vehicle:

1. On a plate riveted to the panel in front of the radiator.
2. Stamped onto the chassis, front right hand side, visible inside the wheelarch just forward of the road spring.

The VIN number contains details about where your vehicle was manufactured, the year of manufacture and also the vehicle specification (see the chart above). The VIN number for a 1990, 3 door V8 would begin **SALLJGBV7GA**, followed by the 6-figure serial number. This information is broken down as follows:

SAL	Manufacturer code for Land Rover
LJ	Vehicle code for Discovery
G	Type code = standard 100 inch wheelbase
B	Type code = 3 door body
V	Engine code = 3.5, carb V8
7	Steering & transmission code = rhd 5sp manual
G	model year = 1990
A	Assembly location = Solihull

Model year codes

(note: from 21 April 1995, an additional series of VIN numbers was introduced, starting with MA500000, and running alongside the existing numbers)

GA	1990 Oct 1989 to Sept 1990
HA	1991 Oct 1990 to Sept 1991
JA	1992 Oct 1991 to Sept 1992
KA	1993 Oct 1992 to Sept 1993
LA	1994 Oct 1993 to March 1994
MA	1995 April 1994 to Sept 1995
TA	1996 Oct 1995 to Sept 1996

**200TDI
ENGINE
GASKET
SETS**

Gaskets & Oil Seals - V8

Head gasket set

- 3.5 litre (to 1990)
 - tin head gaskets (1) **GUG1066HS**
 - composite head gaskets* (1) **GUG1066HSC**
- 3.9 litre (1990-94)
 - 3 rows of cylinder head bolts.
 - tin head gaskets (1) **RB7447**
 - composite head gaskets* (1) **RB7447C**
- 4.0 & 4.6 litre (1995 on)
 - 2 rows of cylinder head bolts with composite head gaskets. (1) **RA1233**

*Composite head gaskets are thicker than standard tin gaskets and will therefore lower the engine's compression ratio. Ideal for raising compression ratio when heads/block faces have been skimmed. (Not applicable to 1995 on).

Head gasket only

- 3.5 litre (to 1990)
 - tin gasket (2) **GEG340**
 - composite gasket* (2) **GEG340C**
- 3.9 litre (1990-94)
 - tin gasket (2) **RB7448**
 - composite gasket* (2) **RB7448C**
- 4.0 & 4.6 litre (1995 on)
 - 2 rows of cylinder head bolts.
 - tin gasket (2) **ETC7819**
 - composite gasket* (2) **ERR7217**

*Composite head gaskets are thicker than standard tin gaskets and will therefore lower the engine's compression ratio. Ideal for raising compression ratio when heads/block faces have been skimmed. (Not applicable to 1995 on).

Inlet manifold gasket;

Composite inlet manifold gaskets are more expensive but provide a superior seal to the original tin type gasket. No modifications are necessary.

- tin (1) **ERC3990**
- composite (1) **ERR7306**
- End seal - manifold gasket;
 - for tin gaskets (2) **AJM645**
 - for composite gaskets (2) **ERR7283**
- Sump gasket set;
 - all models to 1991 (1) **GUG1538CS**
 - all models 1992 onwards (1) **STC1639**
- Sump gasket only (all models) (1) **AJM539**
- Seal - rear main bearing cap **611089**
Cruciform seal.
- Crankshaft oil seal (rear) (1) **ERR2640**
- Timing cover oil seal (front) (1) **ERR6490**
- Timing cover gasket;
 - up to 1994 (VIN LA) (1) **ERR4936**
 - 1995 (VIN MA) on (1) **ERR7280**
- Rocker cover gasket;
 - cork type (2) **GEG436**
 - moulded rubber type (2) **GEG436UPR**

Gaskets & Oil Seals - TDI

Gasket set

For a complete engine rebuild, order one of each set.
Note: cylinder head gaskets are **not** included.

- 200Tdi

Drivebelts

Timing belt;		
200Tdi	(1)	ETC8550
300Tdi	(1)	ERR1092
2.0Mpi	(1)	LHN10016

TECHNICAL NOTE

Ancillary Drivebelts

V8 engines up to March 1994 (VIN LA) are fitted with separate drivebelts for each ancillary component, giving a total of four belts when air conditioning is fitted: one each for the water pump, alternator, power steering and air conditioning.

For the 1995 model year, introduced in March 1994 (known as '300 Series'), a single 'serpentine' belt drives all the ancillaries.

200Tdi engines have a common belt for the water pump and power steering and separate belts each for the alternator and air conditioning if fitted.

300Tdi engines (from March 1994) have one belt driving the water pump, alternator and power steering and a separate belt for air conditioning if fitted.

2.0Mpi engines have a single 'serpentine' belt driving all ancillaries.

PLUS ANY COMPONENT INFORMATION.

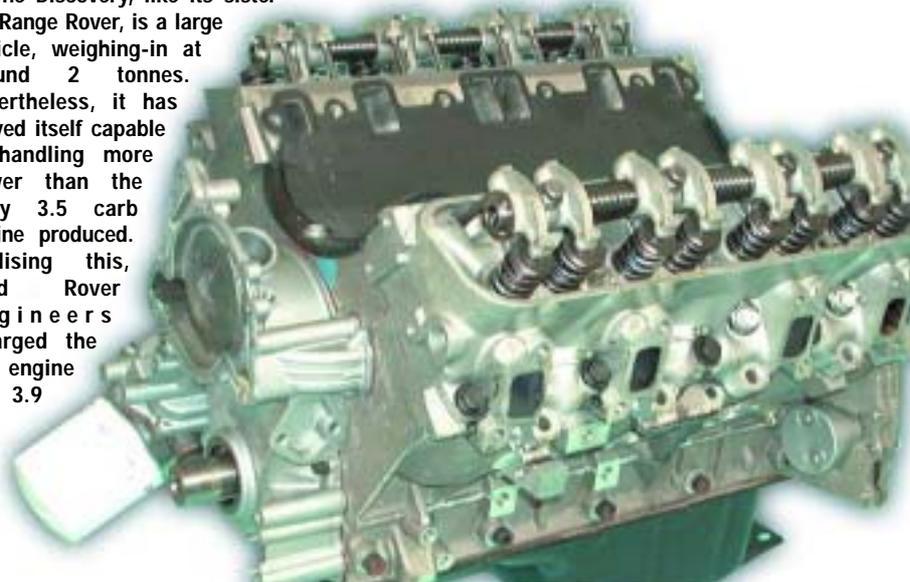

V8 Engine

INTRODUCTION

Only one engine has been fitted to the Discovery continuously from its introduction in 1989 to the present: Land Rover's all-aluminium, pushrod V8. Essentially the same engine as fitted to Rover's big saloons of the sixties and seventies, the V8 has been produced in vast quantities over the years.

The reasons for the engine's tremendous success are obvious: simplicity, reliability, light weight and adaptability: it has been fuel injected, supercharged, turbocharged and run on LPG. It has powered circuit racers, drag racers, rally cars and off-roaders. And last but not least, parts are cheap and readily available.

The Discovery, like its sister the Range Rover, is a large vehicle, weighing-in at around 2 tonnes. Nevertheless, it has proved itself capable of handling more power than the early 3.5 carb engine produced. Realising this, Land Rover engineers enlarged the V8 engine to 3.9

litres, gaining nearly 40% more power & torque with no loss of fuel economy. For the Range Rover even bigger versions of the engine followed, which boosted power & torque without any adverse effect on the long life and reliability of the V8 and proved beyond doubt that the way to more power is to enlarge the engine.

With this in mind, we have developed a range of Standard and Performance specification engines for the Discovery, based on a choice of sizes: 3.5, 3.9, 4.6, 4.8 & 5.2 litres. Power outputs range from 150bhp of the standard 3.5 to over 300bhp from the 5.2 Performance engine, and all will fit into any V8 Discovery.

All you have to do is decide how much power you'd like!

Standard Full Engines

Standard engines are the perfect choice for anyone looking to replace a worn-out engine. Suitable for carb or efi applications, manual or automatic transmissions and built to run on unleaded fuel as well as LPG. These engines are a straight swap, enabling the existing ancillaries and fuel system to be retained. 3.9 litre engines are a popular replacement for 3.5 (carb or efi). Alternatively, a standard 4.6 engine works very well in place of a high-mileage 3.9 efi (the ecu will require remapping to suit).

Standard engines are available in 3.5, 3.9 & 4.6 litre versions.

Performance Full Engines

Performance engines are built to the same high specifications as our Standard versions, but incorporate certain modifications to increase power and torque. Ideal for the driver who requires more performance from their vehicle, these engines feature a higher lift, longer duration camshaft, Vernier timing chain and improved cylinder heads fitted with larger valves. To gain maximum benefit from these engines, we recommend the fuel system, exhaust and air filter be uprated to suit. (For example, a 3.9 efi vehicle fitted with a Performance 4.8 engine, would also benefit from a remapped ecu, stainless steel sports exhaust and K&N air filter) Performance engines are available in 3.9, 4.6, 4.8 & 5.2 litre versions.

Engine Components

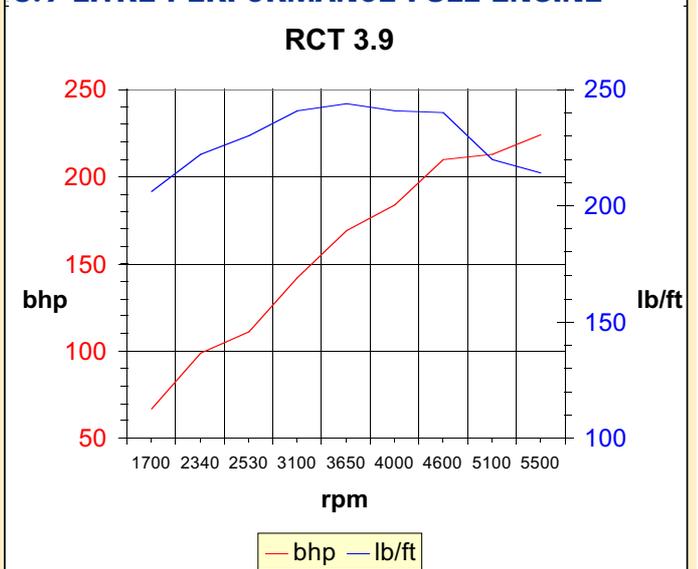

If you would prefer to rebuild or modify your own engine, we list a very comprehensive range of standard and uprated engine components. You will find everything you need in the following pages, from a core plug to a 4.8 litre crankshaft.

Power Outputs

The chart below is a guide to the maximum power outputs of our range of V8 engines. These figures are intended only as an indication of the performance potential of each engine, to help you make the right choice. In reality, power figures may vary considerably, depending on final application. Choice of induction system, exhaust and intended rpm range all have a significant effect on final power output. To achieve the required power output, it may be necessary to modify the fuel system, particularly on fuel injection engines. See 'Fuel' section for details. Each performance engine is supplied with a dyno test sheet, giving actual power figures. All engines are bench tested.

Standard Engines	Max. Power (est)
3.5 litre standard	165bhp
3.9/4.0 litre standard	200bhp
4.6 litre standard	240bhp
Performance Engines	
3.9 litre RCT performance	225bhp
4.6 litre RCT performance	260bhp
4.8 litre RCT performance	280bhp
5.2 litre RCT performance	300+bhp

3.9 LITRE PERFORMANCE FULL ENGINE

DISCOVERY V8 ENGINE NUMBERS

engine no.	details	fuel system	approx. date

38D00001	3.9, lo comp, auto	efi	1994 on

V8 Engine Number Identification

We have included a reference chart of V8 engine numbers from 1989 onwards, which will help you to identify the engine fitted to your Discovery. The engine number is stamped on the left hand side of the block deck, adjacent to the dipstick tube.

The chart also contains a brief description of features, such as compression ratio and gearbox type, and also the approximate year. Therefore, if your engine has been changed at some time, it should still be possible to identify it correctly.

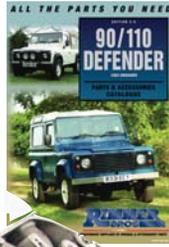

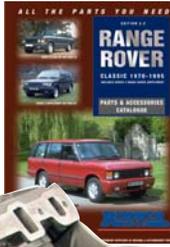

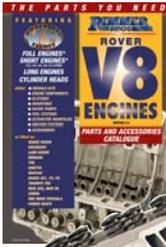

To ensure you receive the correct parts, please have your engine number available before ordering.

V8 ENGINE UPDATE

REVISED ENGINE SPECIFICATION AND LISTINGS LONG AND FULL ENGINES

March 2005

APPLICABLE TO THE FOLLOWING CATALOGUES:-

Description Qty Req Part No.

V8 Engines - Standard 'Long' Units

The following listings replace those on page 7 in our V8 Engine catalogue.

ALL APPLICATIONS.
Supplied less timing cover, sump, & rocker gear.
Exchange unit must be 'Like for Like'.
Surcharge will only be refunded upon receipt & inspection of suitable old unit.

3.5 Litre Long Engine (1) **RB8000R**
Exchange.

Includes recon block, small journal crank (short keyway), 3/3 cylinder heads, cam, followers and timing gear.

Installation Kit (1) **RB8003**
Includes oil, filter, gaskets etc.

3.9 Litre Long Engine (1) **RB8001R**
Exchange.

Includes recon/relined block (not cross bolted), small journal crank (long keyway), 3/4 cylinder heads, cam, followers and timing gear.

Installation Kit (1) **RB8003**
Includes oil, filter, gaskets etc.

4.0 Litre Long Engine (1) **ERR5012STRG**
GEMS' type

Exchange.
Suitable for Series 2 (P38A) Range Rover/Discovery/TVR/Morgan etc ('95 on).

Non 'GEMS' type (1) **ERR5012STRNG**
Exchange.

Suitable for all **Non** Series 2 (P38A) Range Rover/Discovery/TVR/Morgan etc (to '95).

IDENTIFICATION: 'GEMS' Efi uses a crank sensor pick-up on rear of engine block (1995 on).

SPECIFICATION: Exchange. Rebuilt large journal cross bolted block with 'Top Hat' liners, large journal crank, cylinder heads, cam, followers and timing gear. Crank spacer STC1893SPACER is required for non-serpentine timing covers.

Installation Kit (1) **RB8003**
Includes oil, filter, gaskets etc.

4.6 Litre Long Engine (1) **ERR5013STRG**
GEMS' type

Exchange.
Suitable for Series 2 (P38A) Range Rover/Discovery/TVR/Morgan etc ('95 on).

Non 'GEMS' type (1) **ERR5013STRNG**
Exchange.

Suitable for all **Non** Series 2 (P38A) Range Rover/Discovery/TVR/Morgan etc (to '95).

IDENTIFICATION: 'GEMS' Efi uses a crank sensor pick-up on rear of engine block (1995 on).

SPECIFICATION: Exchange. Rebuilt large journal cross bolted block with 'Top Hat' liners, large journal crank, cylinder heads, cam, followers and timing gear. Crank spacer STC1893SPACER is required for non-serpentine timing covers.

Installation Kit (1) **RB8003**
Includes oil, filter, gaskets etc.

Description Qty Req Part No.

V8 Engines - Performance 'Long' Units

The following listings replace those on page 8 in our V8 Engine catalogue.

ALL APPLICATIONS.
Supplied less timing cover, sump, & rocker gear.
Exchange unit must be 'Like for Like'.
Surcharge will only be refunded upon receipt & inspection of suitable old unit.

4.0 Litre Performance Long Engine (1) **RB8004R**
Exchange.

Please specify if 'GEMS' or Non 'GEMS' block required and intended vehicle application. Rebuilt large journal cross bolted block with 'Top Hat' liners, large journal crank, cylinder heads, cam, followers and timing gear. Crank spacer STC1893SPACER is required for non-serpentine timing covers.

Note: all units neutrally balanced. Crank pulley & flywheel can also be balanced at extra cost.

Installation Kit (1) **RB8003**
Includes oil, filter, gaskets etc.

4.6 Litre Performance Long Engine (1) **RB8005R**
Exchange.

Please specify if 'GEMS' or Non 'GEMS' block required and intended vehicle application. Rebuilt large journal cross bolted block with 'Top Hat' liners, large journal crank, cylinder heads, cam, followers and timing gear. Crank spacer STC1893SPACER is required for non-serpentine timing covers.

Note: all units neutrally balanced. Crank pulley & flywheel can also be balanced at extra cost.

Installation Kit (1) **RB8003**
Includes oil, filter, gaskets etc.

4.8 Litre Performance Long Engine (1) **RB8006R**
Exchange.

Please specify if 'GEMS' or Non 'GEMS' block required and intended vehicle application. Rebuilt large journal cross bolted block with 'Top Hat' liners, large journal crank, cylinder heads, cam, followers and timing gear. Crank spacer STC1893SPACER is required for non-serpentine timing covers.

Note: all units neutrally balanced. Crank pulley & flywheel can also be balanced at extra cost.

Installation Kit (1) **RB8003**
Includes oil, filter, gaskets etc.

5.2 Litre Performance Long Engine (1) **RB8007R**
Exchange.

Please specify if 'GEMS' or Non 'GEMS' block required and intended vehicle application. Rebuilt large journal cross bolted block with 'Top Hat' liners, large journal crank, cylinder heads, cam, followers and timing gear. Crank spacer STC1893SPACER is required for non-serpentine timing covers.

Note: all units neutrally balanced. Crank pulley & flywheel can also be balanced at extra cost.

Installation Kit (1) **RB8003**
Includes oil, filter, gaskets etc.

V8 Short Engines

Addendum to page 9 in our V8 Engine catalogue.

All other Short Engines remain unchanged.
Note: All Short Engines are exchange.

4.6 Litre Rebuilt Short Engine - High compression (1) **STC1893HCR**
Pre-series 2 (P38A) Range Rover applications (to '95).

4.8 Litre Rebuilt Short Engine (1) **RB7676R**

5.2 Litre Rebuilt Short Engine (1) **RB7682R**

PLEASE NOTE: These units are supplied with a 'Rebuilt' large journal cross bolted block with 'Top Hat' liners. All other parts are new. Part numbers are suffixed 'R'.

LONG ENGINE

This update sheet lists the revised range of engine units that we now supply and is an addendum to our V8 Engine Catalogue (edition 2.2), Range Rover Catalogue (edition 2.2), Discovery Catalogue (edition 2.0), Defender Catalogue (edition 2.0), and our Rover SD1 Catalogue (edition 2.2).

The engine listings for both full and long engines along with their part numbers have changed. The following listings substitute both Standard and Performance units. There is also minor revision to Short Engines.

Due to on-going old core shortages and availability of Full Engines suitable for reconditioning, we now only supply 'Long Engines' for immediate delivery. Long Engines are supplied less timing cover, sump and rocker gear so you will need to re-use your existing units (It is important that your timing cover is suitably inspected, overhauled or replaced as necessary. Additionally, the Rocker gear should be stripped, cleaned and checked for wear - all components are available at low cost - refer to catalogue).

We will be pleased to recondition customer's own units (to 'full' engine specification) on request and can quote to do so on an individual basis.

The range of long engines listed is much simplified since they are now suitable for all applications both saloon car and 4x4 vehicle. Please note that for 1995 on applications: Range Rover Series 2 (P38A), Discovery, TVR and Morgan, the 'GEMS' type engine is required which has a crank sensor pick-up (for the ignition timing) at the rear of the block casting and is fitted with a camshaft with no provision for the distributor drive making it unsuitable for earlier applications.

Triumph House, Sleaford Road, Bracebridge Heath, Lincoln LN4 2NA.

Tel: 01522 568000. Fax: 01522 567600. E-mail: sales@rimmerbros.co.uk www.rimmerbros.co.uk

RCT V8 - A NEW NAME IN ROVER V8 ENGINES

Rimmer Bros have teamed up with Racetorations, the Gainsborough-based race & rebuild specialist, to produce (exclusively) a range of V8 full engines, short engines and cylinder heads (both Standard and Performance).

The RCT brand brings in new levels of specification, quality, performance and engineering excellence at an affordable price.

Racetorations have a worldwide reputation for meticulous preparation;

you can therefore be assured that these units have been built to the highest possible standards using the correct parts.

Whether it's a standard 3.5 or a mind-blowing 5.2 Performance full engine, quality is second to none.

Each engine comes with a 12 month guarantee and is bench run.

Performance engines are also supplied with a dyno (power output) test sheet.

V8 Engines - Standard

SEE ALSO 'NEW FACTORY TURN-KEY ENGINES'.

New 'long' engine

New long engines are essentially a 'stripped' full engine (ie not as complete as a 'full' engine). Comprising of new cross-bolted short engine fitted with new heads (less rocker gear and cam) they are obviously cheaper, than the comparative 'full' engine. It is essential to ensure that the build-up of a 'long' engine is carried out properly, ensuring that all components such as rocker gear, cam followers, timing gear, cam, oil pump, timing cover, sump etc are checked/overhauled/replaced to validate our warranty. Suitable for carb or efi vehicles, please state model/year when ordering to ensure correct heads are fitted.

4.0 litre	(1)	ERR5012ST
4.6 litre	(1)	ERR5013ST

New 'full' engine;

New full engines comprise: new short engine (new block/crankshaft/bearings/pistons/conrods) fitted with new camshaft and followers, new timing gear, new oil pump & oil pressure switch, new cylinder heads & rocker gear. Suitable for carb or efi vehicles.

3.5 litre	(1)	RA1227
3.9 litre	(1)	RA1228
4.6 litre	(1)	RA1229

Recon 'full' engine;

Recon full engines comprise: reconditioned block, rebored with new pistons, new cam bearings, reground crankshaft, new bearings, new camshaft & followers, new timing gear, new oil pump gears & pressure switch, recon cylinder heads with new valves, guides (inc latest type seals) & springs. New rocker shafts & rockers. Fitted with timing cover and sump. Suitable for carb or efi vehicles.

3.5 litre	(1)	RA1227R
3.9 litre	(1)	RA1228R
4.6 litre	(1)	RA1229R

Inc. new short engine.

Note: Full Engine units (which are supplied less water pump and other ancillaries) are usually sold on an exchange basis (Recon) or outright (New). Please refer to Price Guide. The old unit must be an identical type otherwise a surcharge will apply.

All full engines, including 4.6 units, are suitable as direct replacements for any V8 engine. Existing ancillaries can be re-used and all threads and fixings are compatible. Note that modifications to the fuel system may be required if replacing a 3.5 or 3.9 engine.

Note: All standard engines are bench run and are compatible with unleaded fuel and lpg.

For manual transmission vehicles, we recommend fitting a new clutch while the engine is being replaced.

Engine installation kit (1) RA1236
Includes running-in oil, oil filter, gaskets etc.

New Factory 'Turn-key' Engines

We are pleased to be able to offer brand new, factory supplied V8 turn key engines.

'Turn-key' Engines

Turn-key engines are available in two capacities: 4.0 & 4.6 litre. As the name suggests, these engines are supplied ready to fit, including ancillaries and injection system.

Both engines are based on the latest factory specification, the 4.6 benefiting from a cross-bolted block and crank-driven oil pump. The 4.0 litre engine comes fitted with a Lucas constant energy distributor ignition system, Lucas Hotwire fuel injection and single serpentine belt ancillary drive.

The 4.6 engine comes fitted with a Lucas GEMS engine management and fuel injection system and single serpentine belt ancillary drive. Ancillaries include: alternator, starter motor, water pump, power steering pump and all pulleys. Engine mounting brackets are also fitted. Turnkey engines are supplied outright, with no exchange surcharge.

New turn-key engine;

4.0 litre	(1)	ERR5012BA
4.6 litre	(1)	ERR5013BA

V8 Full Engines - Performance

Performance engines are available in 3.9, 4.6, 4.8 & 5.2 litre capacities. They are built to the same high specifications as our Standard versions, but incorporate certain modifications to increase power and torque. Ideal for the driver who requires a little (or a lot!) more from their vehicle, these engines are available in a choice of power outputs to suit any requirement and any budget.

Specification

We start with a strengthened bottom end, carefully balanced to ensure smooth, vibration-free running.

3.9 litre engines are based on a reconditioned, late-type block, which is rebored and fitted with new 94mm cylinder liners. (Note: we sometimes use brand new 3.9 short engines, depending upon price & availability). The crankshaft is reground and micro-polished, fitted with heavy duty bearings and held securely by ARP mains cap studs, which help prevent movement at high revs.

Con rods are carefully weighed and matched in sets - again to help internal balancing - and are fitted to 94mm high compression pistons.

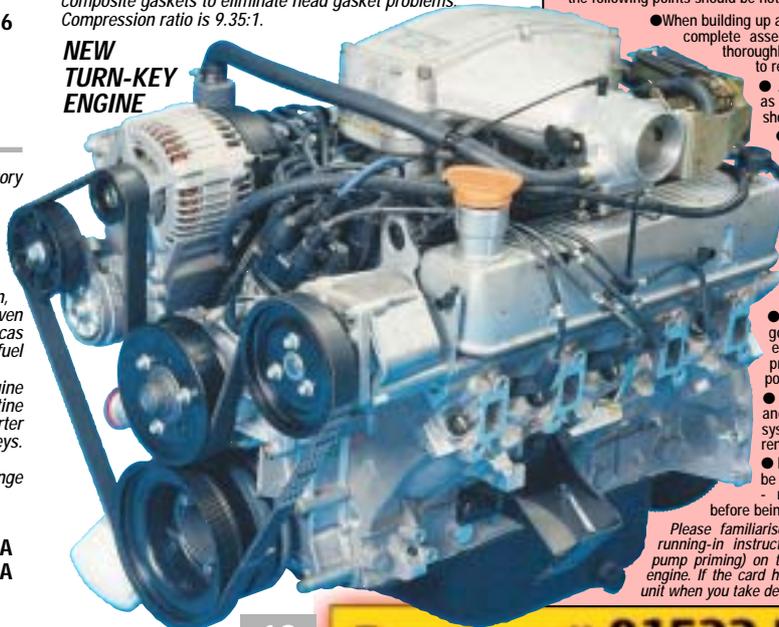

4.6 litre engines are built around latest specification short engine assemblies, which feature larger bearing journals, fully counter-balanced cranks, cross bolting of the main bearing caps (preventing movement at high revs) and careful internal balancing of the short engine assembly.

4.8 litre engines are based on the latest factory x-bolted, 4.6 litre large bearing blocks (94mm bore). The stroke is extended to 86mm, using a cross-drilled, billet steel crank. Special 94mm forged pistons are fitted along with new steel con rods, heavy duty bearings and ARP studs ensure a strong and reliable bottom end.

5.2 litre engines are based on the latest factory x-bolted, large bearing blocks. The standard liners are replaced with 'top hat' liners, the bore is increased to 96mm and the stroke is extended to 90mm, using a cross-drilled, billet steel crank. Special 96mm forged pistons (with valve cut-outs) are fitted, along with new steel conrods. The cylinder heads are unique to this engine and are fitted with ultra - big valves (1.68" inlet, 1.45" exh). CR is 9.35:1.

Cylinder heads for 3.9, 4.6 & 4.8 litre Performance engines are the same: we use late-type heads, which are reworked to improve the engine's ability to "breathe". Modifications include gas-flowing the heads, equalising the combustion chambers and matching the opening of the ports to the inlet and exhaust manifold gaskets. We then recut the valve seats and fit larger valves (41.4mm inlet, 35.5mm exhaust), special valve springs and shortened valve guides (with the latest type stem seals), along with new rocker shafts. Finally, we use composite gaskets to eliminate head gasket problems. Compression ratio is 9.35:1.

NEW TURN-KEY ENGINE

Camshafts are specially selected to get the most from our Performance engines whilst being tractable enough for inner city driving. 4x4 engines have high-torque camshafts which suit both manual and automatic gearboxes equally well. However, we will happily fit any hydraulic camshaft of your choice to one of our Performance engines by special arrangement.

Camshaft followers are the High-rev hydraulic type and cam timing is set and maintained with pre-stretched, duplex chains and adjustable vernier steel gear sets. We also fit a new distributor drive gear.

Oil pump covers are refaced, modified to prevent the relief valve sticking and fitted with a new relief valve and spring.

Timing Cover and sump are fully reconditioned and fitted.

To gain maximum benefit from our Performance engines, we recommend that the fuel system, exhaust and air filter be uprated to suit. This catalogue contains a full range of uprated fuel system components, tubular exhaust manifolds and K&N air filters for most Rover V8 applications. If you are unable to find the part you need, please contact our sales department.

All Performance engines are 9.35:1 compression ratio and are suitable for unleaded fuel.

Performance 'full' engine - V8 (exchange);

Fitted with performance cam and big valve cylinder heads. Compression ratio is 9.35:1. Suitable for carb or efi vehicles.

3.9 litre	(1)	RA1230R
4.6 litre	(1)	RA1231R
4.8 litre	(1)	RA1232R
5.2 litre	(1)	RA1339

Note: Full Performance Engines (which are supplied less water pump and other ancillaries) are usually sold on an exchange basis (Recon) or outright (New). Please refer to Price Guide. The old unit must be an identical type otherwise a surcharge will apply.

All full engines, including 5.2 units, are suitable as direct replacements for any Discovery V8 engine. Existing ancillaries can be re-used and all threads and fixings are compatible. Note that modifications to the fuel system may be required if replacing a 3.5 or 3.9 engine.

Note: all performance engines are bench run and supplied with a dyno (power output) sheet.

For manual transmission vehicles, we recommend fitting a new clutch while the engine is being replaced.

Engine installation kit (1) RA1236
Includes running-in oil, oil filter, gaskets etc.

ENGINE BUILD-UP NOTES

To avoid contamination from worn-out parts, our full engine assemblies are supplied with sump and timing cover fitted. However, the following points should be noted:

● When building up a short or long engine to a complete assembly, it is essential that you thoroughly examine every part you intend to re-use.

● All ancillary components, such as water pump, alternator etc, should be in perfect condition.

● The cooling system should be flushed (including the heater) and the radiator & hoses checked and replaced if necessary.

● The correct ratio of antifreeze (minimum 33%) MUST be maintained at all times.

● Engine oil coolers should be flushed of old oil.

● The fuel system should be in good order and the exhaust emissions checked professionally as soon as possible.

● All engine & gearbox mountings and also the clutch operating system - should be checked and renewed as required.

● Finally, any other components to be re-used - such as rocker covers - must be thoroughly cleaned before being refitted.

Please familiarise yourself with the important running-in instructions (including details of oil pump priming) on the card we supply with every engine. If the card has become separated from the unit when you take delivery, please contact us.

V8 Short Engines

Recon Short Engine units are sold on an exchange basis. The old unit must be a suitable type (not Rover P5, P6, MGB V8 & early Range Rover ie with 12mm spark plug reach) otherwise a surcharge will apply. New Short Engines are normally outright - refer to us for latest information.

3.5 litre;

new short engine

Comprises: new block/crankshaft/bearings/pistons/con rods (assembled). Less - camshaft & followers.

8.13:1 CR (1) **ETC7714**

9.35:1 CR (1) **RB7121**

recon short engine (exch)

Comprises: recon block, rebored with new pistons/new cam bearings/reground crank & new bearings (assembled). Less - camshaft & followers.

8.13:1 CR (1) **ETC7714R**

9.35:1 CR (1) **RB7121R**

3.9 litre;

new short engine

(1) **RB7487**

Comprises: new block, crankshaft, bearings, pistons, con rods (assembled). Less - camshaft & followers.

recon short engine (exch) (1) **RB7487R**

Comprises: recon block, rebored, relined & fitted with new pistons & rings, new cam bearings/reground crank & new bearings (assembled). Less - camshaft & followers.

recon short engine uprated (1) **RB7487RUR**

(Exch). As above but also includes strengthened bottom end, micro-polished crank, heavy duty bearings, ARP mains cap studs, weighed and matched con-rods. Less - camshaft & followers.

4.0 litre - new short engine

Series 2 Range Rover application.

Note: unsuitable for use with pre '95 heads (results in low CR).
Comprises: new cross-bolted block/new crankshaft/bearings/pistons & con-rods (assembled). Less - camshaft & followers.

8.13:1 CR (1) **STC1890**

9.35:1 CR (1) **STC1891**

4.6 litre - new short engine

Series 2 Range Rover application.

Note: unsuitable for use with pre '95 heads (results in low CR).
Comprises: new cross-bolted block/new 82mm stroke crankshaft/bearings/pistons & con-rods (assembled).

Less - camshaft & followers.

8.13:1 CR (1) **STC1892**

9.35:1 CR (1) **STC1893**

4.6 litre - new short engine - high compression

Pre-Series 2 Range Rover application. Suitable for pre '95 Range Rover heads with 36cc combustion chambers.

Comprises: new cross-bolted block/new 82mm stroke crankshaft/bearings/high compression pistons/conrods (assembled). Less - camshaft & followers.

Note: STC1893 spacer also required when fitting distributor driven oil pump type front timing cover. Sump pan may require relieving to allow swing clearance for front web of crank.

9.35:1 CR (1) **STC1893HC**

4.8 litre - new short engine

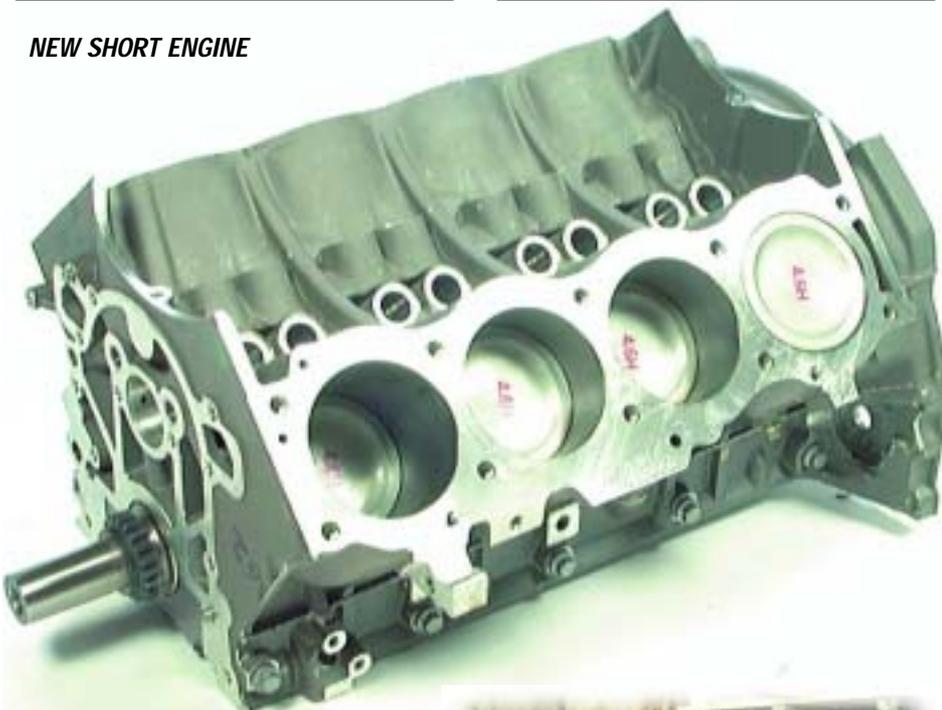

Comprises: new cross-bolted, large bearing block (94mm bore), long stroke (86mm) Billet steel crank, forged pistons, steel conrods, heavy duty bearings, ARP studs (assembled). Less - camshaft & followers.

Note: STC1893 spacer also required when fitting distributor driven oil pump type front timing cover. Sump pan may require relieving to allow swing clearance for front web of crank.

9.5:1 CR (1) **RB7676**

When fitted with pre '95 heads with 36cc combustion chambers.

ENGINE fitting
SERVICE

We are pleased to be able to offer a fitting service for either our full or short engines. Please contact us for a quotation or to discuss your requirements.

OUR CHARGES ARE VERY REASONABLE!

To allow your new or reconditioned engine to correctly 'bed-in', Castrol running-in oil, part number RX1417 (5 litres) should be used for the first 1000 miles.
This is a requirement of the warranty for reconditioned engines.

CONVERT YOUR ENGINE FROM 3.5 LITRE TO 3.9 LITRE USING OUR PISTONS AND LINERS!

V8 ENGINE REBUILD KIT 3.5 OR 3.9 LITRE

FOR THE DIY ENTHUSIAST!

These kits include all the components needed for a 3.5 litre engine rebuild or conversion to 3.9 litres. You will need to have any necessary machining work carried out, such as reboring (plus re-sleeving for 3.9 litres) and cylinder head re-facing etc.

The kits are based on the Land Rover V8 engine; please note that your crankshaft is required in exchange. For export customers, the crankshaft can be removed from the kit and a price adjustment made, allowing you to have the grinding done locally.

We can also offer kits using performance components.

Please enquire.

	3.5 LITRE	3.9 LITRE
Part Number	RB2028/3.5	RB2028/3.9

Kit Contents:-

- Crankshaft - reground (*exchange*)
- Bearing shells to suit
- Piston set including rings and pins:
 - 3.5 litre (+ 0.020") (9.75:1)
 - 3.9 litre (standard) (9.35:1)
- Piston liner set (*3.9 litre only*)
- Oil Filter
- Sump gasket set inc oil seals
- Timing chain, crank sprocket, cam sprocket
- Camshaft and 16 followers
- Valves - Engine set (16)
- Valve guides (16)
- Valve stem oil seal (inlet) (8)
- Valve springs (16)
- Rocker shaft (2)
- Rocker arms (16)
- Head gasket set
- Core plug engine set

V8 ENGINE COMPONENTS

V8 Cylinder Block Components

Cylinder block - bare;		
3.5 litre	(1)	ERC6934
3.9 & 4.2 litre	(1)	ERR7350
4.0 & 4.6 litre	(1)	ERR7349
<i>Series 2 Range Rover type.</i>		
Cylinder liner set - 3.9 litre	(1)	RB7486
<i>Set of 8 liners for converting 3.5 engines to 3.9 litre bore. Also suitable for replacing the liners in an existing 3.9 litre (or larger capacity) engine.</i>		
Liner & piston set - 3.9 litre	(1)	RB2029
<i>As above, but kit includes standard size 9.35:1 compression pistons and rings for 3.9 conversions.</i>		

Head gasket set - V8;		
3.5 litre models (1970 - 1992)		
tin head gaskets	(1)	GUG1066HS
composite head gaskets*	(1)	GUG1066HSC
3.9/4.2 litre models (1990 - 1994)		
<i>3 rows of cylinder head bolts.</i>		
tin head gaskets	(1)	RB7447
composite head gaskets*	(1)	RB7447C
3.9/4.2/4.0 & 4.6 (1995 on)	(1)	RA1233
<i>2 rows of cylinder head bolts. With composite head gaskets.</i>		
5.2 litre	(1)	RB7684

Head gasket only- V8;		
3.5 litre models (1970-1992)		
tin gasket	(2)	GEG340
composite gasket*	(2)	GEG340C
3.9/4.2 litre models (1990-1994)		
<i>3 rows of cylinder head bolts.</i>		
tin gasket	(2)	RB7448
composite gasket*	(2)	RB7448C
3.9/4.2/4.0 & 4.6 (1995 on)		
<i>2 rows of cylinder head bolts.</i>		
tin gasket	(2)	ETC7819
composite gasket*	(2)	ERR7217
5.2 litre	(1)	RB7685

*Composite head gaskets are thicker than standard tin gaskets and will therefore lower the engine's compression ratio. Ideal for raising compression ratio when heads/block faces have been skimmed. (Not applicable to 1995 on).
 Approximate gasket thicknesses are as follows:
 Standard (tin) gaskets 0.5mm
 Composite gaskets 1.2mm

Sump gasket set;		
all models to 1991	(1)	GUG1538CS
all models 1992 onwards	(1)	STC1639
Sump gasket only	(1)	AJM539
Seal - rear main bearing cap	(2)	611089
<i>Cruciform seal.</i>		
Crankshaft oil seal (rear)	(1)	ERR2640
Timing cover oil seal (front)	(1)	ERR6490
Core plug set - all engines	(1)	RB7105
Cam bearing set;		
all engines except 4.0 & 4.6	(1)	RTC5918
4.0 & 4.6 models	(1)	STC1961
Dowel - bellhousing flange	(2)	602141
Drain tap - block	(2)	602915
Drain plug	(2)	129077
<i>Alternative to tap.</i>		
Core plug	(2)	612898
<i>Lower bellhousing flange.</i>		

Bolt - main bearing cap	(10)	602130
<i>All models.</i>		
Stud kit - main bearing cap	(1)	RB7456
<i>Used instead of standard main bearing bolts, studs provide superior clamping for main bearing caps, preventing them from coming loose. (Engine set).</i>		
Cross-bolt - main bearing cap	(9)	FB110137
<i>4.0 & 4.6 litre engines.</i>		
Hex-screw - main bearing cap	(1)	SS110555
<i>4.0 & 4.6 litre engines.</i>		
Oil seal - for FB110137	(9)	ERR3330
Oil seal - for SS110555	(1)	ERR3331
Stud - front of block	(1)	252513
<i>Except 4.0 & 4.6 litre engines.</i>		
Plug - front of block	(4)	602147
Hex-screw - main bearing cap	(1)	603143
<i>Early engines.</i>		
Core plug - rear of block	(1)	154545
<i>Later models - replaces breather.</i>		
Core plug - side & rear of block	(8)	602152
Core plug - camshaft rear	(1)	602146
Threaded plug;		
all engines except 4.0 & 4.6	(2)	602212
4.0 & 4.6 engines	(2)	ERR4314

TECHNICAL NOTE

Composite Head Gaskets

The advantage of using composite gaskets is that they provide a superior seal compared to tin gaskets. However, composite head gaskets are thicker than standard tin gaskets and therefore have the effect of **lowering** the engine's compression ratio when used as a direct replacement. To calculate their effect on your engine's compression ratio, see the figures below.

Other factors which influence the compression ratio are the size of the piston bowl and the combustion chamber in the cylinder head, as well as the amount of material which may have been 'skimmed' from the head faces.

Removing material from the head and block faces in isolation will not compensate for composite head gaskets and may lead to inlet manifold alignment problems.

Approx. thickness:
 Standard tin gaskets 0.5mm
 Composite gaskets 1.2mm

Typical effect on compression ratio:
 Standard tin gaskets 3cc
 Composite gaskets 10cc

V8 Sump Pan/Oil Pick-up & Dipstick

Sump pan	(1)	ERR4633
Sump gasket set	(1)	GUG1538CS
Sump gasket only	(1)	AJM539
Sump bolt/washer	(16)	SH505051
Drain plug - sump	(1)	603659
Washer - sump drain plug	(1)	213961
Oil pick-up strainer	(1)	ERR3677
Oil screen	(1)	602070A
Gasket - pick-up strainer	(1)	90602068A
Setscrew - strainer to block	(2)	253407
Spring washer - setscrew	(2)	GHF331
Dipstick	(1)	ERR1922
Dipstick tube	(1)	ERR4556
O-ring - dipstick tube	(1)	602545

V8 Crankshaft

Crankshaft;

3.5 & 3.9 litre;		
3.9 litre up to the following engine nos only:		
35D08928B, 36D25155B, 37D01932B, 38D27238B.		
new (no shells)	(1)	612989A
reground (Including shells)	(1)	612989R
3.9 litre	(1)	ERR4060
Above engine nos. onwards.		
4.0	(1)	ERR5090
4.6	(1)	ERR5091
4.3 & 4.8 litre 'stroker' kits*;		
See Info box.		
4.3 litre kit	(1)	RB7678
4.8 litre kit	(1)	RB7677

'Stroker' Kits

These kits enable you to enlarge the cubic capacity of your existing engine by increasing the stroke, hence the name 'stroker'. The kits comprise a brand new, high quality crankshaft, conrods and pistons (with bearings and piston rings supplied).

The stroke is increased from the standard 3.5/3.9 engine's 71.1mm to a massive 86mm, (longer than the standard 4.6 litre stroke of 82mm) giving a capacity of 4.3 litres on a 3.5 engine and 4.8 litres on a 3.9 engine. Both engines require a 20 thou rebore before fitting. Finally, a small amount of grinding is required to the bottom of two cylinder liners (full instructions supplied) to allow clearance for crank rotation.

The result of the extra stroke is a huge increase in torque, even on an otherwise standard engine. Alternatively, you have the basis of a high performance engine, to which you can add our fully modified, big valve cylinder heads, uprated camshaft and sports exhaust system.

If you would prefer, you can send us your 3.5 or 3.9 block and we will do the work for you. Please contact our sales department for a fitted price.

Main bearing set;

all models except 4.0 & 4.6 litre engines		
standard size	(1)	RTC1718
oversize + 0.010"	(1)	RTC1718.010
oversize + 0.020"	(1)	RTC1718.020
oversize + 0.030"	(1)	RTC1718.030
oversize + 0.040"	(1)	RTC1718.040
oversize + 0.060"	(1)	RTC1718.060
4.0 & 4.6 litre	(1)	STC1425
Note: The latest bearing sets feature thrust plates only on the upper half of centre bearing.		

Main bearing set - heavy duty;

all models except 4.0 & 4.6 litre engines		
standard size	(1)	RB7452
oversize + 0.010	(1)	RB7452.010
oversize + 0.020	(1)	RB7452.020

Bolt - main bearing cap	(10)	602130A
All engines.		

Stud kit - main bearing cap	(1)	RB7456
Used in our Performance engines instead of standard main bearing bolts, these ARP studs provide far superior clamping for main bearing caps, preventing them from coming loose. (Engine set).		

Cross-bolt - main bearing cap	(9)	FB110137
4.0 & 4.6 litre engines.		

Hex-screw - main bearing cap	(1)	SS110555
4.0 & 4.6 litre engines.		

Oil seal;		
for FB110137	(9)	ERR3330
for SS110555	(1)	ERR3331

Crankshaft oil seal (rear)	(1)	ERR2640

V8 OIL PUMP COMPONENTS

V8 Oil Pump & Filter

<i>See Technical Note</i>		
Oil pump cover (body)	(1)	BHM1554
<i>To VIN LA081990 (1994). See photo.</i>		
Oil pump cover/remote take-off	(1)	R01105
<i>Very low profile oil pump cover & relief valve housing for maximum clearance. Use with remote oil filter mounting kit.</i>		
Remote oil filter mounting kit	(1)	RB7116
<i>Allows mounting of oil filter away from engine. Kit includes filter housing, hoses & mountings.</i>		
Bolt - pump mounting;		
7/8"	(3)	602910
1 1/4"	(2)	602912
1 9/16"	(1)	602913
Oil pump repair kit	(1)	RTC2044
<i>All models with separate oil pump. Includes pressure relief valve & spring.</i>		
Up-rated pressure relief valve spring	(1)	RB7457
<i>For separate oil pump models. Increases oil pressure by approx. 10 psi.</i>		
Oil pump shaft & drive gear	(1)	ERC1351A
<i>To VIN LA081990 (1994).</i>		
Idler gear - oil pump	(1)	614037
<i>To VIN LA081990 (1994).</i>		
Gasket - oil pump	(1)	90602072A
<i>To VIN LA081990 (1994).</i>		
Blanking plug	(1)	151203
<i>Pressure switch outlet.</i>		
Washer	(1)	STC4104
<i>For blanking plug.</i>		
Oil pressure switch	(1)	AMR2092
<i>All models.</i>		
Washer	(1)	243967
<i>For pressure switch.</i>		
Oil pressure gauge kit	(1)	RX1351
<i>Aftermarket capillary type. Includes gauge & fittings.</i>		
Oil & water pressure gauge kit	(1)	RX1351W
<i>Aftermarket capillary type. Includes oil & water gauge & fittings.</i>		
Bracket - oil pressure gauge	(1)	RB7050
Oil filter	(1)	ERR3340

V8 OIL COOLER & THERMOSTAT

V8 Oil Cooler

If high oil temperatures are a problem, for example when towing, the V8 engine will benefit from the fitting of an oil cooler. We recommend fitting a thermostat at the same time. Note: An oil cooler was incorporated into the coolant radiator with the introduction of the 3.9 litre engine.

Oil cooler kit	(1)	RA1089
<i>All 3.5 litre engines.</i>		
Thermostat - oil cooler	(1)	RS1456
Oil cooler take-off - 3.9 engine;		
manual gearbox	(1)	ERC8501
automatic gearbox	(1)	ERR2490
Adaptor - oil filter	(1)	ERC2226
O-ring	(1)	ERR852

TECHNICAL NOTE

Oil Pump & Timing Cover

There are two types of oil pump for the V8 engine fitted to the Discovery. The first was fitted from 1989 to VIN LA (approx. March 1994) and is a camshaft-driven oil pump, incorporated into the lower right hand of the timing cover, with a removable housing for the relief valve and oil filter.

From VIN MA (April 1994), the oil pump was changed to a crank-driven type, incorporated into a redesigned timing cover without the need for a separate relief valve housing.

The two types are not easily interchangeable, as the later design requires a longer crankshaft nose to accommodate the oil pump gears.

OIL PUMP COVER, BHM1554

CYLINDER HEADS

V8 Standard Cylinder Heads

Cylinder head assembly (recon);

Exchange.
Complete with new valves, valve guides, springs & valve stem oil seals. Less rocker gear. Cylinder heads are sold individually. Suitable for unleaded fuel.

- carb models (2) **RB7095R**
- efi models (2) **RB7462R**

Cylinder head - new (bare);
Outright sale.

- 3.5 engines
 - carb (2) **ERC3346**
 - efi
 - up to engine no 23D08767D(2) **ETC8622**
 - 23D08768D to VIN LA081990(2) **ERR3649**
 - VIN MA081991 (1995) on (2) **LDF001020**
- 3.9 engines
 - up to VIN LA081990 (1994) (2) **ERR4602**
 - VIN MA081991 (1995) on (2) **LDF001020**

V8 Performance Cylinder Heads

Our Performance cylinder heads are carefully modified in order to gain the maximum power from your engine: The 'throat' area of the cylinder head is opened out to suit the larger valve size; the ports are carefully enlarged and blended for optimum flow; the seats are narrowed and cut at 3 angles to ensure perfect valve sealing; new, shortened and profiled valve guides are fitted along with the latest hi-tech valve stem seals; the combustion chambers are measured and equalised to within 0.5cc. Finally, the mating faces (including the inlet manifold face) are milled to guarantee a perfect seal. Valve sizes are: Inlet - 41.4mm, Exhaust - 35.5mm.

Performance cylinder heads are fitted with single valve springs. However, double valve springs can be fitted on request. Performance heads are supplied in pairs (less rocker gear) and are suitable for unleaded fuel. Exchange units must be of the same type otherwise a surcharge will apply.

- Performance cylinder heads (1) **RB7467R**
Sold as a matched pair only.
Exchange. Use with composite head gaskets.

PORTING A PERFORMANCE HEAD

PERFORMANCE CYLINDER HEADS

V8 Head Gaskets

Head gasket set - V8;

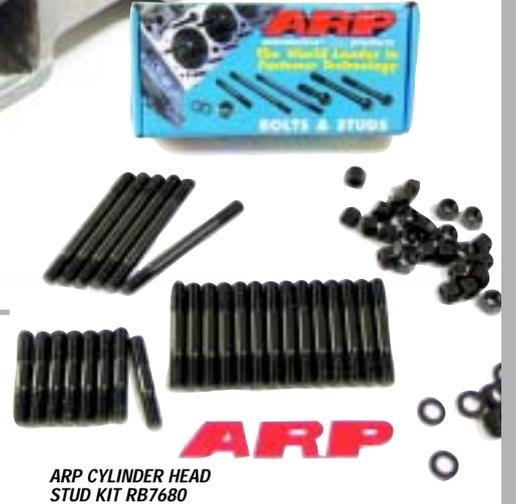

- 3.5 litre models (1970 - 1992)
 - tin head gaskets (1) **GUG1066HS**
 - composite head gaskets* (1) **GUG1066HSC**
- 3.9/4.2 litre models (1990 - 1994)
 - 3 rows of cylinder head bolts.
 - tin head gaskets (1) **RB7447**
 - composite head gaskets* (1) **RB7447C**
- 3.9/4.2/4.0 & 4.6 (1995 on)
 - 2 rows of cylinder head bolts.
 - With composite head gaskets. (1) **RA1233**
- 5.2 litre (1) **RB7684**

Head gasket only- V8;

- 3.5 litre models (1970-1992)
 - tin gasket (2) **GEG340**
 - composite gasket* (2) **GEG340C**
- 3.9/4.2 litre models (1990-1994)
 - 3 rows of cylinder head bolts.
 - tin gasket (2) **RB7448**
 - composite gasket* (2) **RB7448C**
- 3.9/4.2/4.0 & 4.6 (1995 on)
 - 2 rows of cylinder head bolts.
 - tin gasket (2) **ETC7819**
 - composite gasket* (2) **ERR7217**
- 5.2 litre (1) **RB7685**

*Composite head gaskets are thicker than standard tin gaskets and will therefore lower the engine's compression ratio. Ideal for raising compression ratio when heads/block faces have been skimmed. (Not applicable to 1995 on).

Approximate gasket thicknesses are as follows:
Standard (tin) gaskets 0.5mm
Composite gaskets 1.2mm

ARP CYLINDER HEAD STUD KIT RB7680

V8 Cylinder Head Bolts

Bolt - cylinder head - all engines except late

- 3.9, 4.0 & 4.6;
(See note below.)
 - long (7/16" UNC x 3.9") (6) **602193**
 - medium (7/16" UNC x 2.7") (13) **602192**
 - tapped bolt (7/16" x 2.7") (1) **602450**
For dipstick retainer.
 - double-ended bolt (7/16" x 2.7")(1) **602200**
Later models.
 - short (7/16" x 2 1/4") (8) **602191**

Bolt - cylinder head - late 3.9, 4.0 & 4.6;
These bolts can be identified by their flanged head. They do not need a separate washer and can be used on earlier engines. However, they are not re-usable and must be replaced once removed.

- long (96mm) (6) **ERR2944**
 - medium (66mm) (14) **ERR2943**
- Note: the outer row of short bolts, or "outrigger" bolts, has not been used since 1995.

- Washer - cylinder head bolts (28) **602098**
- Cylinder head ARP stud kit (1) **RB7680**
See photo.

<i>Rear of LH rocker cover.</i>		
Cap - breather filter (efi) (1)		ERC3208
Plug lead retainer (where fitted) (2)		603672
<i>Holds 4 leads.</i>		

TECHNICAL NOTE

Lifter Preload

The term "lifter preload" refers to the position of the pushrod seat in the lifter (or cam follower) when the engine has been assembled and the lifter is positioned on the heel of the cam (the opposite side to the lobe). Correct lifter preload is vital to the efficient running and long life of the engine and must be checked whenever a non-standard component, which might alter the distance between the rocker arm and the lifter (such as a high lift cam or performance cylinder head), has been fitted. Check the lifter preload as follows: With the lifters empty of oil, assemble the rocker shaft & pushrod components. Check for signs of wear, particularly on the underside of the rocker shafts and pushrods. replace worn components. Checking each lifter in turn (remember to position the lifter on the heel of the cam), measure the gap in the lifter between the pushrod seat and the bottom of the circlip groove. The clearance should measure .020" minimum and .060" maximum. If the clearance is greater than .060", use the appropriate pedestal shims (part no. 603734SH) to reduce it. Remember to use the same thickness shims under each rocker pedestal of a shaft to avoid distortion or breakage.

CAMSHAFT

V8 Camshaft & Kits

We stock a full range of standard camshafts, representing good value for money.

In addition, we offer uprated camshafts in 2 different profiles: Mild Road and Fast Road.

- **Mild Road** will give a small increase in power and torque without loss of fuel economy.
- **Fast Road** gives greater power at higher revs with a slight loss of low-rev torque.

Although considered to be the first step towards "uprating" the engine, changing the camshaft alone may not achieve the desired results. We recommend, in fact, that you consider the camshaft as one element of an engine upgrade, which might also include, for example, uprated cylinder heads and a sports exhaust. Having decided what attributes your engine will need - good low-end torque for towing or a smooth idle for automatic transmission - you can then select the appropriate components from these pages.

All camshafts are interchangeable, but adjustments to the fuelling may be required when fitting uprated camshafts to efi vehicles.

Camshaft - standard;

3.5 litre	(1)	ETC6099
3.9 litre	(1)	ERR5924

Camshaft - uprated;

Mild Road	(1)	RB7444
-----------	-----	---------------

Straight swap for standard cam. No machining required. Use also Anti pump-up followers ERC4949HD and single springs RB7454.

Fast Road	(1)	RB7445
-----------	-----	---------------

*Machining required to valve guides & spring platforms.
* See Camshaft Kits if fitting without modified heads.*

Cam follower - hydraulic - all models;

standard		
each	(16)	ERC4949A
set of 16	(1)	ERC4949AK
heavy duty		
each	(16)	ERC4949HD
set of 16	(1)	ERC4949HDK

Designed to resist "pumping-up" until approx. 6500rpm.

Cam retaining collar

	(1)	ERR5926
--	-----	----------------

Fitted from VIN MA137710 (1995).

Set screw - retaining collar

	(2)	SH505061
--	-----	-----------------

Camshaft kit - standard;

3.5 litre		
kit 1	(1)	RB7125

Includes standard cam & 16 standard followers.

kit 2	(1)	RB7489
-------	-----	---------------

Includes standard cam, 16 standard followers, timing chain, timing cover gasket & oil seal, 2 rocker cover gaskets, inlet manifold gasket & 2 inlet manifold seals.

3.9 litre

kit 1	(1)	RA1424
-------	-----	---------------

Includes standard cam & 16 standard followers.

kit 2	(1)	RA1425
-------	-----	---------------

Includes standard cam, 16 standard followers, timing chain, timing cover gasket & oil seal, 2 rocker cover gaskets, inlet manifold gasket & 2 inlet manifold seals.

Camshaft kit - performance;

*Suitable for all engines.
Kits include camshaft, anti pump-up followers, uprated valve springs, spring retaining caps, timing disc, cam lube & installation instructions.*

kit 1 - Mild Road	(1)	RB7441
-------------------	-----	---------------

*Power band: 1000 - 4500 rpm
Valve lift: In 11.20mm Exh 11.20mm
Timing: In 23/59 Exh 59/23.*

kit 2 - Fast Road	(1)	RB7442
-------------------	-----	---------------

*Power band: 1500 - 5000 rpm
Valve lift: In 11.91mm Exh 12.44mm
Timing: In 31/73 Exh 78/40.*

Installation kit - camshaft

Includes: standard timing chain, timing cover gasket & oil seal, inlet manifold gasket & seals and 2 rocker cover gaskets. Suitable for all engines.

Gasket - inlet manifold - all models;

tin	(1)	ERC3990
composite	(1)	ERR7306

End seal - manifold gasket

for tin gasket	(2)	AJM645
for composite gasket	(2)	ERR7283

Clamp - end seal

	(2)	602076
--	-----	---------------

Screw - seal clamp

	(2)	602236
--	-----	---------------

**CAM OVERHAUL KIT
RB7489**

V8 Performance Camshaft Components

Cam followers (hydraulic) - heavy duty

Designed to resist "pumping up" until approx 6500rpm.

each	(16)	ERC4949HD
set of 16	(1)	ERC4949HDK

Cam lube

	(1)	RX1358
--	-----	---------------

Essential when installing a new cam & followers.

Timing disc (protractor)

	(1)	RX1359
--	-----	---------------

Pedestal shims

	(1)	603734SH
--	-----	-----------------

Includes three sets of shims of different thickness.

Use to set "lifter preload" when fitting cams with higher lift than standard.

Cam bearing set

	(1)	RTC5918
--	-----	----------------

Woodruff key - camshaft

	(1)	ERC2838
--	-----	----------------

V8 Timing Chain

Timing chain - all models;

standard	(1)	ERC7929
adjustable - kit	(1)	RB7449

Includes vernier camshaft sprocket, crank sprocket and double roller chain. Also includes timing protractor and Allen key. Allows extremely accurate cam timing whilst eliminating wear common in original parts.

Chain only - double roller

	(1)	RB7450
--	-----	---------------

Camshaft sprocket;

standard - nylon teeth	(1)	610289
vernier type - steel teeth	(1)	610289V

Crankshaft sprocket - all models

	(1)	90602372
--	-----	-----------------

Spacer - camshaft

	(1)	ERC2839
--	-----	----------------

Distributor drive gear - camshaft

	(1)	614188A
--	-----	----------------

Washer - camshaft

	(1)	ERC6552
--	-----	----------------

Bolt - camshaft;

7/16" UNF x 1 1/8"		
standard	(1)	602227A
thrust - uprated	(1)	602227UR

M12 x 30mm (metric alternative)

	(1)	ERC5749
--	-----	----------------

Cam retaining collar

	(1)	ERR5926
--	-----	----------------

Fitted from VIN MA137710 (1995).

Set screw - retaining collar

	(2)	SH505061
--	-----	-----------------

Woodruff key - camshaft

	(1)	ERC2838
--	-----	----------------

V8 Timing Cover & Fittings

Timing cover;

carb & efi up to VIN LA081990(1) up to 1994.		ETC7385
--	--	----------------

VIN MA081991 (1995) onwards(1)		ERR6814
--------------------------------	--	----------------

Gasket - timing cover;

all engines up to 1994	(1)	ERR4936
------------------------	-----	----------------

all engines 1995 (VIN MA) on	(1)	ERR7280
------------------------------	-----	----------------

Timing cover oil seal (front)

	(1)	ERR6490
--	-----	----------------

Retainer - oil seal

	(1)	247766
--	-----	---------------

Screw - retainer

	(8)	78782
--	-----	--------------

Timing pointer - all models

	(1)	ETC7345
--	-----	----------------

Screw - timing pointer

	(2)	HU755
--	-----	--------------

Washer

	(2)	WM600041
--	-----	-----------------

Bolt - timing cover to block;

regular bolts		
5/16" UNC x 3"	(1)	BH505241

5/16" UNC x 3 1/8"	(1)	602388
--------------------	-----	---------------

5/16" UNC x 1 1/8"	(1)	SH505091
--------------------	-----	-----------------

flange head bolts

5/16" UNC x 3 1/8"	(5)	FB505251
--------------------	-----	-----------------

5/16" UNC x 3 7/8"	(1)	FB505311
--------------------	-----	-----------------

5/16" UNC x 4 3/4"	(3)	FB505381
--------------------	-----	-----------------

Nut - timing cover retaining

	(1)	NH605041
--	-----	-----------------

Dowel - water pump locating

	(2)	602201
--	-----	---------------

TECHNICAL NOTE

Timing Covers

There are two types of timing cover fitted to the V8 Discovery (see also Technical Note on Oil Pumps, on previous pages).

The first type, fitted to carb & efi vehicles up to VIN LA (1994), incorporates a housing for the camshaft-driven oil pump gears on the lower right hand side of the cover. These gears are actually driven off the end of the distributor which is, itself, driven by a skew gear on the camshaft.

The later type - fitted from VIN MA (April 1994) - features a crank-driven oil pump. Known also as the "intermediate" timing cover, it differs from the Series 2 Range Rover (Pegasus) type in that it has a provision for a distributor - driven, as before, by a camshaft gear.

Although the oil pump design of the later covers is a big improvement over the earlier ones, they cannot easily be retro-fitted to earlier vehicles, as the crank-driven oil pump requires a long-nose crankshaft, not fitted to earlier engines.

STANDARD CHAIN & SPROCKETS

**ADJUSTABLE

CHAIN KIT**

Engine Identification - Tdi

200Tdi engines begin 12L, with a serial no.
300Tdi engines begin with one of the following:

- 17L
- 18L
- 19L
- 20L
- 21L
- 22L

depending on engine & transmission type, followed by a serial no.

200/300Tdi Performance Uprate Kit

We can supply a WBH Performance Engine Uprate Kit for the 200/300Tdi engine. The kits are available to special order only and comprise a modified cylinder head, injector pump and turbo boost capsule. The result is a 30% gain in power over a standard engine, which equates to 150bhp and 250ft/lb of torque (200Tdi figures. 300Tdi are better still) Fuel consumption is unaffected, with tests showing an average 29mpg over long distances and 26mpg around town. 200/300Tdi Performance Uprate Kits are available for DIY fitting or, alternatively, we can arrange fitting locally. Please contact our Sales Department for details, including a full test report. Quote part no. RA1436.

2.0Mpi	(1)	STC1646

Clutch Slave Cylinder

Slave cylinder;

LT77 gearbox		
All manual vehicles up to 1994 (VIN LA)		
up to VIN KA045958 (1993) (1)	TKC2786P	
VIN KA045959 (1993) on (1)	FTC2498	
R380 gearbox	(1)	FTC5072
All manual vehicles from 1995 (VIN MA) on.		
Repair kit - slave cylinder;		
up to VIN KA045958 (1993) (1)	514244	
VIN MA (1995) onwards	(1)	STC2818
Push rod - slave cylinder;		
V8		
with LT77 gearbox (to VIN LA)(1)	571160	
with R380 gearbox (VIN MA on) (1)	FTC3913	
Tdi & 2.0Mpi		
with LT77 gearbox (to VIN LA)(1)	FRC3417	
with R380 gearbox (VIN MA on)(1)	FTC3912	
Fixing clip - pushrod;		
V8	(1)	576723
Tdi & 2.0Mpi	(1)	FRC3327
Bleed screw - slave cylinder	(1)	606733
All models.		

Clutch Flexi Hose

Flexible hose - clutch;

V8 & 2.0Mpi	(1)	NRC2211
Tdi	(1)	NTC3400
Clutch damper - Tdi models	(1)	STD10002

CLUTCH FLUID

Clutch Fluid

Fluid - clutch & brake;

Unipart (Dot 3) - 1 litre	(A/R)	GBF103
silicone fluid		
Replaces conventional clutch and brake fluid. Will not harm paintwork if spill.		
0.5 litre	(A/R)	RX1327
1 litre	(A/R)	RX1326
Pedal rubber - clutch	(A/R)	575818
All models.

without air con	(1)	RA1094
with air con	(1)	RA1095
Tdi - all models		
	(1)	RA1096

KENLOWE HOTSTART

Kenlowe Engine Hot Start & Interior Pre-Heater Systems

The ultimate in comfort & convenience: Kenlowe Engine Hotstart is a mains-powered pre-heater and coolant pump. Fitted in a convenient position in the engine bay, Hotstart rapidly heats the engine to operating temperature and holds it there, eliminating the engine wear, extra fuel costs and de-icing ritual associated with cold winter mornings. Kenlowe Interior Pre-Heater works in conjunction with Hotstart, pre-heating the car's interior (as well as demisting iced-up windows) before you even turn on the ignition, making the start of your journey safer and more comfortable.

Kenlowe 'Hotstart'

FUEL SYSTEM V8 - CARB - EFI

FUEL SYSTEM V8 - 4 Barrel Carb

**HOLLEY
CARB KIT**

V8 - 4 Barrel Carb Conversion Kits

Suitable for all engine sizes.

Complete conversion kits for all V8 Discoverys.

Kits include: 4 barrel carb, inlet manifold, chromed 14" air cleaner (can be substituted with K&N air cleaner at extra cost), thermostat housing and accelerator cable kit.

See also fuel pump section for details of our Facet type electric fuel pump, which may be required in addition to the 4 barrel carb kits, depending on application.

Holley/Offenhauser conversion;
390cfm carb with auto choke

Kit 1 (1) **RB7262**

With 3" deep air cleaner.

Kit 2 (1) **RB7262L**

With 2" deep air cleaner for extra bonnet clearance.

**WEBER- EDELBROCK
PERFORMER CARB KIT**

Weber/Edelbrock Performer conversion;
500cfm carb with manual choke

Kit 1 (1) **RA1323**

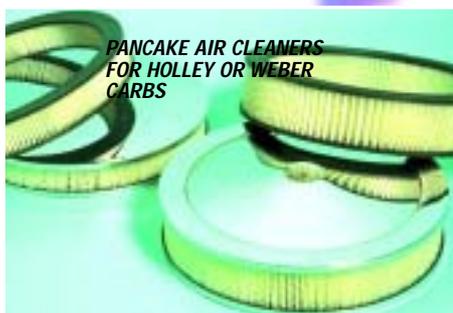

With 3" deep air cleaner.

Kit 2 (1) **RA1323L**

With 2" deep air cleaner for extra bonnet clearance.

V8 - 4 Barrel Carb Components

Carburettor only		
Weber 500	(1)	RA1335
Holley 390	(1)	RB7254
Jets - 390 carb (pair)	(1)	RB7254J
Overhaul kit - Holley 390 carb	(1)	RB7254H
Holley Stud/Nut/Washer Set	(1)	RB7254S
Gasket (Carb to manifold) (Holley & Weber)	(1)	RB7181
Inlet manifold - 4 barrel carb		
Suitable for Weber & Holley carbs		
Offenhauser 360°	(1)	RB7314
Dual Plane. Lowest bonnet clearance.		
Offenhauser/JWR (Dual Port)	(1)	RA1336
Edelbrock performer	(1)	RA1337
Dual Plane. High Torque.		
Gasket - inlet manifold;		
tin	(1)	ERC3990
composite	(1)	ERR7306
End seal - manifold gasket		
for tin gasket	(2)	AJM645
for composite gasket	(2)	ERR7283
Thermostat housing;		
cast iron	(1)	RB7322
chromed	(1)	RB7437
Gasket - thermostat housing	(1)	GTG116
Accelerator cable kit (Holley/Weber)	(1)	RB7278
Manual choke conversion kit (Holley)	(1)	RB7184
Auto choke conversion kit (Weber)	(1)	RA1323ACH
Manual choke cable (Holley)	(1)	RB7290

**PANCAKE AIR CLEANERS
FOR HOLLEY OR WEBER
CARBS**

V8 - 4 Barrel Air Cleaners

Air cleaner kit;
14" diameter chromed 'pancake' type, complete with filter,
suitable for Weber & Holley. See also K&N filter assys.

standard - 3" deep (1) **RB7438**

'low-rider' - 2" deep (1) **RB7439**

For extra bonnet clearance.

Replacement element - air cleaner;

standard element (1) **RB7438EL**

3" deep (1) **RB7439EL**

2" deep

K&N element (1) **RB7438ELK**

3" deep (1) **RB7439ELK**

2" deep

Adaptor - breather pipe (1) **RB7654**

Air cleaner base to flame trap/breather.

K&N V8 - 4 Barrel Air Cleaners

See following pages for applications on standard V8 carbs
and diesel K&N's.

K&N Holley & Weber 4 barrel carbs

Pancake (14") filter assembly, bolts directly on to carb.

May also be fitted with 'X-stream' filter top (lid).

recessed type (assembly) **RA1397**

Sits low on carb for extra bonnet clearance.

N.B. for use with manual choke only.

flat type (assembly) **RA1398**

2 1/4" deep, fits either manual or automatic choke.

'X-stream' air flow (lid only) **RA1399**

For maximum air flow. Replaces standard pancake

K&N lid. Available in black, blue, red or polished.

N.B. K&N filter assembly (recessed or flat type) must

be purchased separately.

300Tdi	(1)	ESR1445K&N
Cleaning fluid (1 litre)	(a/r)	RX1346
<i>For cleaning filter element.</i>		

Fuel Pump - all models

The fuel pump fitted to both carb & efi petrol-engine Discovery models is located inside the fuel tank and is integral with the fuel level sender unit. However, the fuel pumps are not interchangeable, as carburettor engines have a low pressure pump and efi vehicles a high pressure item. The difference between the two is visible from outside: low pressure pumps have a yellow locking ring and high pressure, a red one. Discoverys fitted with the Tdi engine have a conventional, engine-mounted, mechanical lift pump.

Fuel pump - petrol;		
carburettor	(1)	PRC7128
efi - V8 & 2.0 Mpi		
up to VIN KA065556 (1993)	(1)	PRC9409

250ml bottle	(a/r)	RX1348
400ml aerosol	(a/r)	RX1349

FUEL SYSTEM COMPONENTS

STAINLESS STEEL EXHAUSTS

Lifetime Guarantee

The exhaust system is guaranteed for the lifetime of the vehicle whilst the vehicle remains in the ownership of the original purchaser of the exhaust. The guarantee is not transferable. In the rare event of a claim, we will replace or repair, free of charge, any part of a system that should fail in service due to defective materials or workmanship.

It should be noted that it is quite normal for discolouration to occur on external surfaces after a few months of use. This can be removed with wire wool if required and will not affect the guarantee.

The purchaser undertakes to ensure that all engine and exhaust mountings, brackets, clamps, etc, are checked for condition at least once a year and replaced if necessary. Our guarantee does not extend to cover failure due to mis-use, neglect, incorrect installation or failure of a related component.

The warranty covers the exhaust system only. Our prices are kept low for DIY installation, so our liability cannot extend to cover garage labour, recovery, hire car or any other consequential or associated costs. The warranties are in addition to, and do not affect your statutory consumer rights.

For any claim, we will need reference to our original sales invoice. Acceptance of goods is deemed to be an acceptance of these terms.

This guarantee does not apply to catalysis.

STAINLESS STEEL EXHAUSTS - A GREAT INVESTMENT. EXHAUSTS ALSO AVAILABLE IN MILD STEEL.

Mild & Stainless Steel

HOW TO IDENTIFY MILD OR STAINLESS STEEL EXHAUSTS USING THE PRICE GUIDE

If you require a FULL standard system, then the part number (beginning RA) in the Price Guide will have an MS suffix (for Mild Steel) or SS (for Stainless Steel).

If you need only a part system or single component, refer to the accompanying table, where the part numbers are shown separately.

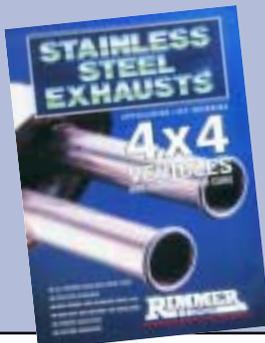

Sports Systems are only available in Stainless Steel.

THE BENEFITS OF STAINLESS STEEL

Stainless Steel exhausts may cost a little bit more than a mild steel equivalent, but the small additional outlay is far outweighed by the advantages of a lifetime's trouble free motoring. If you are planning to keep your vehicle for any length of time, it is a first class investment.

- Tough, Reliable, Long Lasting.
- Quiet operation.
- Vehicle Re-sale value enhanced.
- Designed to outlast vehicle lifetime.
- Cost effective.

As well as systems for Classic cars, Rimmer Bros have been supplying Stainless Steel exhausts to owners of 4x4 vehicles the world over for many years, and due to customer demand, we can now supply stainless steel exhaust for most popular cars.

At our prices why fit mild steel?

Phone for a copy of our Stainless Steel Exhaust Catalogue today.

Tel: 01522 568000

Our stainless steel exhaust systems are guaranteed for as long as you own the vehicle.

STAINLESS STEEL DISCOVERY - V8 SPORTS EXHAUST SYSTEM

FOR INCREASED POWER, TORQUE, LOOKS, AND DRIVER APPEAL.

Sports Exhaust System Stainless Steel - V8 Models

*Available for all Discovery V8 (pre August '95, see note below) models, our stainless steel Sports Exhausts comprise tubular manifolds with large-bore, single pipe systems and sports silencers. Designed to increase power & torque, Sports Systems also enhance the look of your Discovery as well. The sound is pure V8, but comfortably refined inside the car at cruising speeds. Each system include fitting instructions, gaskets and fittings to assemble the system using existing mounting positions.

Also available: manifold fitting kit and Thermo-tec manifold wrap. See panels.

Sports exhaust - V8;			
3.5 litre (carb)			
up to VIN GA (Sept 1990)	(1)	RD1007	
3.5 litre (Efi)			
VIN HA (Oct 1990) on	(1)	RD1009	
From introduction of tubular gearbox crossmember.			
3.9 litre (Sept 1993 on)	(1)	RD1009	

Note: Catalyst equipped vehicles (1992/3 on). Our sports system could be used to replace the catalyst exhaust system on UK cars registered prior to August 1995 (subject to any change of legislation, please enquire). Current MOT emissions limits could allow non cat equipped vehicles to pass an MOT (providing the engine is set up and tuned correctly) up to this registration date. Our manifolds have provision for lambda sensors. Blanking plugs are supplied with all systems if lambdas are not fitted.

DISCOVERY Sports exhaust manifold fitting kit
Manifold Fitting Kit EF1001
 Kit includes:
 16 studs, nuts, washers. (Used to replace original bolts to enable easier installation of manifolds).

EXHAUST - V8 SPORTS

ENHANCEMENTS FOR SPORTS EXHAUST

Our Sports Exhaust Systems are designed to give an increase in power & torque on an otherwise unmodified vehicle. The way they achieve this is by helping the engine to 'breathe out' more efficiently. Naturally, they work just as well (or even better) on modified engines, since most modifications are designed to make the engine breathe more efficiently. Fitting K&N air filters at the same time as our Sports System will help the engine to 'breathe in' more efficiently - by removing the restrictive standard air filter - yielding even better results. (For K&N filters, see our Fuel Section). To gain maximum benefit from our Sports

System, particularly in large capacity V8s (3.9 or even 4.6 litre versions), fit our Big Valve Performance cylinder heads. These heads are ported and gas-flowed to help the engine achieve optimum efficiency. (For Performance cylinder heads, refer to our V8 Engine Section). Finally, don't forget your fuel system: all this extra efficiency will be lost if your carbs are worn out or your injection system is not up to scratch! The original carbs should be adequate for an otherwise unmodified 3.5 engine fitted with a Sports System and K&N filters (provided they are correctly set up). For the same vehicle fitted with modified cylinder heads or a bigger engine,

however, we would recommend fitting either a Holley or Weber 4 barrel carb (see our Fuel Section). Similarly, standard Efi vehicles will need no modifications to the injection system when fitting a Sports Sytem and K&N. If further modifications are being considered, such as a change of camshaft, Performance cylinder heads or a bigger engine, we strongly recommend a remapped ecu to provide the correct fuelling. We can remap your existing ecu to suit your engine's requirements exactly, giving crisper throttle response, more power and torque and better fuel efficiency, (see our Electrical Section).

EXHAUST INSULATION WRAP

Thermo-Tec Insulating Wrap gives safety with performance.

Tubular manifolds, by design, produce a vast amount of heat in the engine compartment. This increases the possibility of electrical/ignition components not working effectively and promotes a higher risk of fire (if any combustible material comes in to contact with the manifold), not to mention the likelihood of severe burns when working on the engine! By wrapping your tubular manifold with Thermo-Tec insulating wrap you can overcome all these risk factors. Thermo-Tec keeps the heat within the manifold so the exhaust gases have a much higher velocity, this induces negative pressure (scavenging) which increases air intake flow, resulting in better performance & economy. It also reduces under bonnet exhaust noise.

Technical Notes:
 Thermo-Tec heat wrap - which is race & rally proven - comes in rolls 2" wide x 50ft long and moulds to the contours of the manifold. Being a silica based fabric (it does not contain asbestos or carcinogens), it is unaffected by oil or water, withstands temperatures up to 1000 degrees celsius and reduces under bonnet temperatures by up to 70%.
Snap-Strap Retaining Kit
 We strongly recommend that you use Snap-Straps to retain the insulation. These are stainless steel straps with a narrow profile (for tight spots) that you cut to length and fasten with snap type heads. Alternatively you can skin your knuckles and use hose clips!

THERMO-TEC INSULATION WRAP - 2"x50' ROLL	(2 Req)	RX1382
THERMO-TEC SNAP-STRAP KIT STAINLESS STEEL	(1 Req)	RX1383

Full System Standard - Mild & Stainless Steel

See also: 'Part Systems' for catalyst equipped vehicles.

HOW TO IDENTIFY MILD OR STAINLESS STEEL EXHAUSTS USING THE PRICE GUIDE

If you require a FULL standard system, then the part number (beginning RD) in the Price Guide will have an MS suffix (for Mild Steel) or SS (for Stainless Steel).

If you need only a part system or a single component, please refer to the relevant section

Full system - V8 - 3.5 litre;

Carb (non catalyst)

To VIN GA 467181. Twin tailpipes

fitting kit	(1)	RD1001FK

FULL STAINLESS STEEL SYSTEM 3.5 V8 (CARB) RD1002

Part System Standard - Mild & Stainless Steel

Listed below are part systems for catalyst and non catalyst-equipped vehicles.

Catalysts are normally quite durable, so it is unlikely that you need to replace the full system including catalysis. An MOT emissions failure or a rattle will usually indicate the need to replace the catalysis and perhaps the full system. Likewise, downpipes on Efi non-cat vehicles can have a long life, so you may wish to consider replacing the system rear of the downpipe(s).

Part system - V8 - 3.5 litre;

Efi - 9/90 on - downpipe (twin) back (non cat)

VIN GA 467182 on.

mild steel	(1)	ESR230
stainless steel	(1)	LR1122
fitting kit	(1)	EK1009

Efi - 9/90 on - cat back

VIN GA 467182 on. Single tailpipe.

mild steel	(1)	NTC7426
stainless steel	(1)	LR1085
fitting kit	(1)	EK1009

Part system - V8 - 3.9 litre;

3.9 - 9/90 to 1995 - cat back

to VIN MA 135999.

mild steel	(1)	NTC7426
stainless steel	(1)	LR1085
fitting kit	(1)	EK1009

3.9 - 1995 to 9/96 - cat back

VIN MA 136000 to VIN VA.

mild steel	(1)	NTC7426
stainless steel	(1)	LR1085
fitting kit	(1)	EK1009

3.9 - 10/96 on - cat back

from VIN VA 703237 to VA534104.

mild steel	(1)	NTC7426
stainless steel	(1)	LR1085
fitting kit	(1)	EK1009

Part system - 2.0 MPi;

MPi - all models - cat back

mild steel	(1)	ESR1699
stainless steel	(1)	LR1086
fitting kit	(1)	EK1047

MORE STOCK EVERY DAY

If the part you require is not listed here, please phone and enquire. By now we might well have it. For prices, terms & conditions etc, please refer to our latest price guide.

FITTING KITS

Fitting kits include gaskets, sealing rings, 'U' bolts, mounting rubbers, nuts & bolts to assemble the systems; using original hanger points. Mounting brackets and special support components are not included.

Part system - Diesel - 200 TDi;

Note: all part systems are suitable for all derivatives including commercial.

200 TDi - 11/89 to 9/90 (intermediate pipe back)

to VIN GA 460229.

mild steel	(1)	NTC6791 + NTC7119
stainless steel	(1)	LR1110
fitting kit	(1)	EK1001

200 TDi - 10/90 to 3/94 (intermediate pipe back)

from VIN GA 460230 to MA81992.

mild steel	(1)	ESR238
stainless steel	(1)	LR1110
fitting kit	(1)	EK1001

Part system - Diesel - 300 TDi;

Note: all part systems are suitable for all derivatives including commercial.

300 TDi - 04/94 on (non catalyst - downpipe back)

VIN MA 81992 on.

mild steel	(1)	ESR2391
stainless steel	(1)	LR1104
fitting kit	(1)	EK1001

300 TDi - 04/94 on (cat back)

VIN MA 81992 on.

mild steel	(1)	ESR2390
stainless steel	(1)	LR1104
fitting kit	(1)	EK1001

Sports Tdi

Sports - Stainless Steel

Part system - Diesel - 200/300TDi;

Systems comprise straight through pipe to replace centre silencer and standard rear silencer & tailpipe. Front pipe or intermediate pipe not included.

200TDi - 11/89 to 03/94 (intermediate pipe back)

to VIN MA 81992.

stainless steel	(1)	LR1110S
fitting kit	(1)	EK1001

300TDi - 04/94 (downpipe/cat-back)

VIN MA 81992 on.

stainless steel	(1)	LR1104S
fitting kit	(1)	EK1001

Sports - Stainless Steel

Part system - Diesel - TD5 (series 2);

Systems comprise centre silencer & rear silencer with straight through design and 3" dia rolled tailpipe.

TD5 - series 2 (downpipe/cat-back)

1998 on

stainless steel	(1)	RD1035
fitting kit	(1)	RD1035FK

Individual System Components

Standard - Mild & Stainless Steel

This section lists individual exhaust components in both mild steel and stainless steel. Use it to select the appropriate parts if you are not replacing the whole system.

V8 DOWNPIPE/CATALYST ASSEMBLY - ORIGINAL EQUIPMENT. ALSO AVAILABLE AS AFTERMARKET REPLACEMENT. REFER TO LISTINGS THIS PAGE. DON'T FORGET WE ALSO SELL CATALYSTS IN FULL SYSTEMS - SEE OPPOSITE

INTRODUCTION

We supply fully reconditioned manual gearboxes (and transfer boxes) from stock.

This section also includes a range of gearbox Service Kits, comprising the most commonly needed parts - synchro rings, bearings, oil seals & gaskets - for a straightforward gearbox overhaul. We have avoided listing every single component associated with manual gearboxes, because there is a point beyond which DIY gearbox repair is no longer cost-effective, and replacement with an off-the-shelf reconditioned unit would almost certainly be cheaper. Also, since gearboxes are large and fairly complex, replacement may prove simpler in the long run. Nevertheless, if there is an item which you require that is not listed, please contact our sales department.

GEARBOX IDENTIFICATION

To identify the type of gearbox/transfer box fitted to your Discovery, refer to the serial number stamped on the unit itself:

The 5-sp gearbox fitted to Discovery is either the LT77 unit or the R380, which replaced the LT77 in 1994.

Both types of gearbox have identification numbers according to which engine they mate to, as follows:

- 57A - V8 carb
- 53A - V8 efi
- 55A - Tdi
- 59A - 2.0 Mpi

Then follows the serial number and finally, a suffix letter: D, E, F, G or H for LT77 and IJ & K for R380.

All gearboxes have a separate LT230T transfer boxes.

Manual Gearbox Unit

Gearbox assembly.

New (N), Factory recon (E), Aftermarket recon (R).

Less transfer box, bellhousing & gear lever.

LT77 5-sp		
V8 models	(1)	FRC6197
4 cylinder models	(1)	FRC8572
R380 5-sp		
V8 models	(1)	RA1100
4 cylinder models		
2.0 Mpi	(1)	TRC103040
200/300 Tdi	(1)	RA1101

Service Kits

Service kits include the parts normally required to recondition a high-mileage gearbox - (main box) bearings, synchro rings, oil pump gears, oil seals & gaskets, and (transfer box) rear oil seal.

Service kit:

LT77 5-sp;		
up to gearbox no.0132346D	(1)	RA1251
from gearbox no.0132347D		
up to gearbox suffix F	(1)	RA1252
gearbox suffixes F & G	(1)	RA1253
gearbox suffix H	(1)	RA1254
R380 5-sp	(1)	RA1256

Gaskets & Oil Seals

Gasket set - LT77	(1)	RTC6797
Oil seal - front - LT77 & R380	(1)	UKC1060
Oil seal - rear;		
LT77	(1)	ICV100000
R380	(1)	FTC2383

Gearlever Housing Kit

Gearlever housing kits contain parts which are prone to wear, resulting in vague gear selection.

Gearlever housing kit:

LT77	(1)	RA1259
<i>Inc: Spherical nylon bush, oil seals, gaskets, lever springs, 2 x lower lever pins and plungers & springs.</i>		
R380	(1)	RA1260
<i>Inc: lever springs, lower pins, spherical bush and oil seals.</i>		

Reverse Light Switch

Switch - reverse light;		
LT77	(1)	PRC2911
<i>Located in lever housing.</i>		
R380	(1)	AMR3918
<i>Located in rear extension.</i>		
Locknut - reverse switch - LT77	(1)	NT110041
Washer - reverse switch - R380	(1)	232042

Speedo Cable

See 'Transfer Gearbox' section.

Mountings

See 'Engine & Gearbox Mountings' section.

Clutch Housing/Operation

THE EASY WAY TO ORDER AND GET
THE RIGHT PARTS YOU NEED QUICKLY

HELP US TO HELP YOU

If you are not sure which part/part number you require,
to help ensure you receive the correct component,
wherever possible please quote:

MODEL, YEAR, CHASSIS AND/OR ENGINE NUMBER
PLUS ANY COMPONENT INFORMATION.

PROPSHAFT, UJ & GAITER

INTRODUCTION

The Discovery's front axle is an extremely rugged beam axle design, comprising a one-piece steel tube with a separate cast steel differential housing.

All of the component parts of the axle, such as the differential assembly, halfshafts and C.V. joints, can be removed and replaced with the axle in situ. It is rare for a vehicle to require a complete replacement axle and for this reason we have avoided listing full axle assemblies. Nevertheless, if you should require a complete unit, please contact our sales department for price & availability (remembering to quote the year and VIN number of your vehicle, along with the serial number of the axle).

D.I.Y. overhaul of the differential assembly is not really viable, due to the specialist tools and skills required, so we have listed complete differential assemblies, both new and reconditioned.

SERIAL NUMBER

The serial number of the front axle is stamped on the front or top of the axle casing, on the left hand side (roughly in line with the axle breather).

Serial numbers comprise a 3-figure code, identifying the axle type, followed by the serial number and then a suffix letter (A, B or C).

The final drive ratio for all models is 3.54:1.

IMPORTANT - ABS

ABS was introduced in March 1994 for the 1995 model year (VIN MA), necessitating some changes to the front halfshafts and C.V joints. In order to simplify this complicated area, we have divided the relevant parts into two categories: non-ABS vehicles and ABS-equipped vehicles. It is important to bear this in mind when ordering parts, due to the safety-critical nature of ABS-related components.

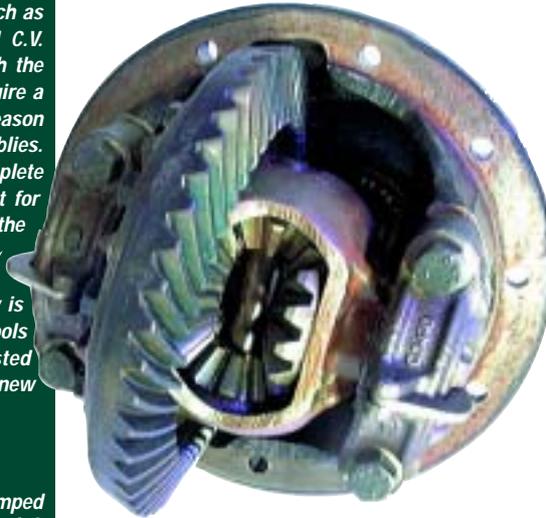

MORE STOCK EVERY DAY

If the part you require is not listed here, please phone and enquire. By now we might well have it. For prices, terms & conditions etc, please refer to our latest price guide.

HELP US TO HELP YOU

If you are not sure which part/part number you require, to help ensure you receive the correct component, wherever possible please quote:
MODEL, YEAR, CHASSIS AND/OR ENGINE NUMBER PLUS ANY COMPONENT INFORMATION.

Halfshaft - Front

There are two different types of halfshaft/C.V. joint assembly: Up to VIN JA032850 (1992), drive is conveyed from the differential via a 10 spline halfshaft, which engages into a C.V. joint inside the swivel housing. Drive is then transmitted through a separate outer shaft (known as the 'driving member'), which engages in the C.V. joint at its inner end and bolts to the wheel hub at its outer end. From VIN JA032851, a halfshaft is employed, as before (either 10 or 24 spline), but the C.V. joint into which it engages now incorporates the outer shaft as one complete assembly. The outer end of the C.V. joint/shaft is splined to engage in the outer hub, thereby transmitting drive. Vehicles with ABS employ the later type of combined C.V. joint/shaft. However, ABS assemblies are not interchangeable with non-ABS.

Halfshaft & C.V. joint assembly - non ABS;

Gasket - outer hub	(2)	571752

Gear Oil

EP90 gear oil - 0.5 litre	(A/R)	GGL190
Swivel grease (sachet)	(2)	STC3435
<i>For use instead of EP90 in swivel housings. Comes in pre-measured dispenser sachet.</i>		
<i>Once-only application - no need to top-up.</i>		

LUBRICANTS & CAPACITIES

Oil type		
Differential (front & rear)	EP90	
Swivel housing	EP90 or STC3435	
Oil capacity		
Differential (front & rear)	1.7 litres (3 pints)	

INTRODUCTION

The Discovery's rear axle - like the front - is an extremely rugged beam axle design, comprising a one-piece steel tube with a separate cast steel differential housing.

All of the component parts of the axle, such as the differential assembly, and halfshafts, can be removed and replaced with the axle in situ. It is rare for a Discovery to require a complete replacement axle and for this reason we have avoided listing full axle assemblies. Nevertheless, if you should require a complete axle, please contact our sales department for price & availability (remembering to quote the year and VIN number of your vehicle, along with the serial number of the axle).

D.I.Y. overhaul of the differential assembly is not really viable, due to the specialist tools and skills required, so we have listed complete differential assemblies, both new and reconditioned.

SERIAL NUMBER

The serial number of the rear axle is stamped on the rear or top of the axle casing, on the left hand side (roughly in line with the axle breather).

Serial numbers comprise a 3-figure code, identifying the axle type, followed by the serial number and then a suffix letter (A, B, C etc.).

The final drive ratio for all models is 3.54:1.

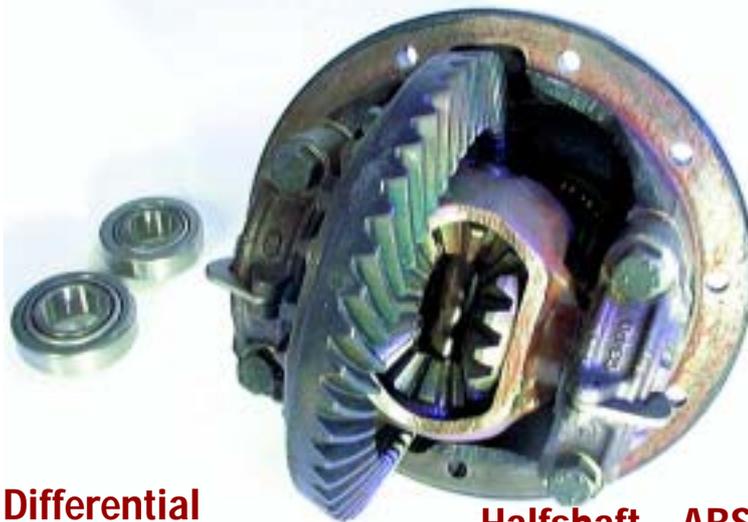

IMPORTANT - ABS

ABS was introduced in March 1994 for the 1995 model year (VIN MA), necessitating some changes to the rear axle. In order to clarify the differences, we have divided the relevant parts into two categories: non-ABS vehicles and ABS-equipped vehicles.

It is important to bear this in mind when ordering parts due to the safety-critical nature of ABS-related components.

Rear Axle

Rear Axle assembly	Please enquire
Breather pipe	(1) FTC2176
Banjo bolt - breather pipe	(1) 595478
Copper washer - banjo bolt	(1) 232039
Washer - axle drain plug	(1) 515599

Differential

*Note: early differentials accept 10-spline halfshafts while later units accept 24-spline shafts. In addition, some rear differentials from March 1994 are fitted with a 3-bolt flange, which accepts the rubber coupling on the rear propshaft. Please check your axle/VIN number and refer to the following list before ordering:

10 Spline Differentials
28S axles up to 28S44171
32S axles up to 32S29121

24 Spline Differentials - 4-bolt flange
28S44172 onwards
32S29122 onwards

24 Spline Differentials - 3-bolt flange
Certain models from VIN MA081992 (March 1994)
- check before ordering.

Differential assembly - front;

N = New
E = Factory reconditioned
R = Rimmer Bros reconditioned
Complete & ready to fit to axle.

POLYURETHANE BUSHES

Polyurethane bushes are a popular alternative to the standard rubber items due to their benefits: superior performance, increased life expectancy (up to 5 times as long as rubber), resistance to oil and grease contamination and ease of fitting. Polyurethane bushes are available as an alternative to most individual suspension bushes and are listed, where available, after the standard item. Complete kits are also available in the Suspension Packages section.

NUT & BOLT KITS

Most of the nuts used in the suspension components of your Discovery are of the "locking" type, with a nylon insert. These nuts should be renewed each time they are undone. At the same time, it is good practice to replace any bolts that show signs of wear or corrosion. To simplify this job, we offer a comprehensive suspension nut & bolt kit, which contains all of the nuts and bolts required. Please see our Suspension Packages section.

SUSPENSION BUSH & BOLT KITS

STANDARD & POLYURETHANE

STANDARD BUSH KITS - Direct replacement of original bushes. Kits contain complete vehicle sets of standard suspension bushes, including: Front: radius arm-to-axle, radius arm-to-chassis, panhard rod. Rear: top link-to-chassis, bottom link-to-axle, bottom link-to-chassis. Also included: top and bottom shock absorber bushes, front and rear, plus anti-roll bar bushes where appropriate.

POLYBUSH KITS - original 'Polybush' suspension bushes are available in two types, Classic (red) and Comfort (blue), both equally suitable for Discovery. Classic are the original polyurethane bushes, giving a firmer ride and more positive handling; Comfort bushes are designed to combine the smoothness and comfort of the factory-fitted rubber bushes with the long life and easy-fit of the Polybush Classic.

POLYURETHANE BUSH KITS (ALTERNATIVE) - these high quality bushes are made from 80 shore hardness polyurethane (black) and offer a performance somewhere between the 'Polybush'; Classic (red) and Comfort (blue).

Both polyurethane kits are supplied as vehicle sets (excluding shock absorber, anti-roll bar & A-frame bushes - see 'Supplementary Polyurethane Bush Kits'), they are simple to fit replacements which will outperform and outlast the original rubber bushes many times over. Polyurethane bushes are also available singularly (black) - refer to individual listings on appropriate page(s).

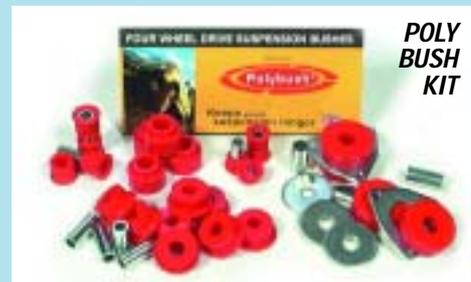

Note: Although polyurethane suspension bushes can be DIY fitted by hand, requiring no special tools, a hydraulic press is needed to remove the old rubber bushes.

BOLT KITS contain all the nuts & bolts necessary when renewing the suspension bushes

	Standard Bush Kit	Polyurethane Bush Kit 'Poly Bush'			Bolt Kit

BOLT KIT

Up-rated Shock Absorbers & Springs

The standard shock absorbers and springs fitted to Discovery are a cost-effective compromise between ride comfort, handling, load carrying and towing ability.

We recommend fitting up-rated suspension components if any of the following applies to you:

1. You wish to improve handling.
2. You regularly tow large trailers or carry heavy loads for extended periods.
3. You have improved the performance of your Discovery (for example, fitting one of our RCT engines).
4. You find the vehicle floats and wallows excessively, (see also anti-roll bar kits, below).
5. You regularly use the vehicle off-road.

We stock up-rated shock absorbers by Bilstein, De Carbon, Koni and Gaz. Bilstein and De Carbon are heavy duty, non-adjustable gas shock absorbers offering vastly superior damping abilities and extended life compared to original equipment.

Koni shock absorbers offer similar benefits, plus they are adjustable for damping rate whilst fitted to the vehicle.

Gaz shock absorbers are also adjustable on car with 36 fine-tune settings, zinc-plated bodies, individually tested and supplied with a 3-year warranty (British made).

We recommend changing the vehicle's springs at the same time. You can choose from up-rated springs of standard ride height - recommended for normal road use - or raised ride height (front 30mm, rear 40mm higher), which are recommended for heavy towing and extra ground clearance when off-roading.

Our kits show just about every combination to suit your requirements - and they save you money too!

BILSTEIN Updated Steering Damper

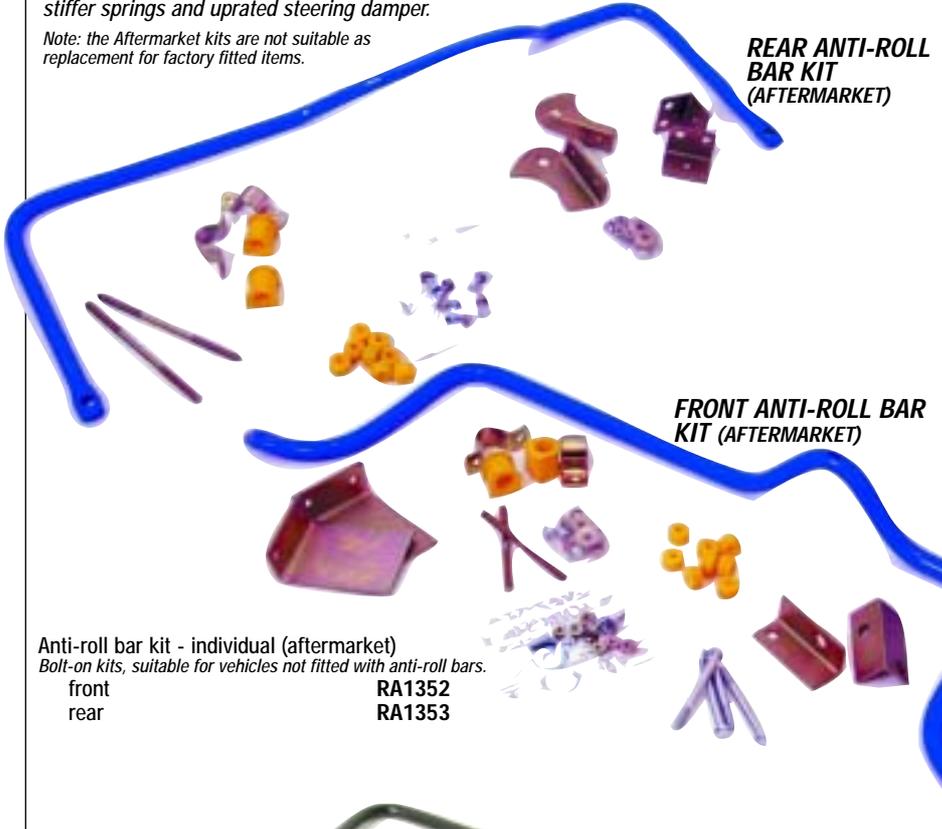

Used on its own or in conjunction with updated suspension and bush kits, updated steering dampers improve the 'feel' and accuracy of the steering.

Updated steering damper -Bilstein STC786UR

Anti-roll bars

Anti-roll bars were factory fitted on certain models from 1992 and on all models from 1994. Fitting anti-roll bars decreases the amount of pitch and roll during hard cornering by controlling suspension travel. However, anti-roll bars will limit axle articulation when off-roading, for the same reason. For vehicles used mostly on road, anti-roll bars will transform the handling, steering and braking; particularly when used in conjunction with our polyurethane bush kits, updated shock absorbers, stiffer springs and updated steering damper.

Note: the Aftermarket kits are not suitable as replacement for factory fitted items.

REAR ANTI-ROLL BAR KIT (AFTERMARKET)

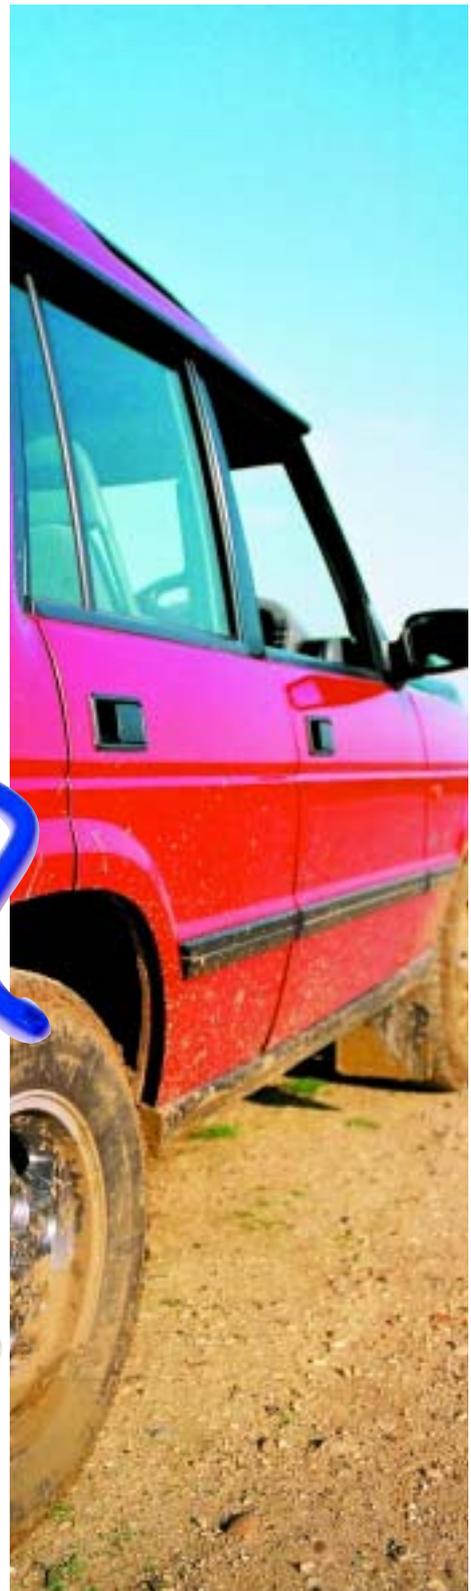

FRONT ANTI-ROLL BAR KIT (AFTERMARKET)

Anti-roll bar kit - individual (aftermarket)
Bolt-on kits, suitable for vehicles not fitted with anti-roll bars.

vehicles from March 1993 on (1) STC8156AA

SUSPENSION PACKAGES - Updated

INTRODUCTION

We offer the superb range of genuine Land Rover Alloy Wheels to enhance & upgrade your classic Discovery. Made from M25 Alloy they are x-ray checked to ensure maximum safety with performance and are designed and developed specifically for the Discovery ensuring peace of mind in all situations.

You will find that our combined wheel/tyre packages offer great value for money - and convenience. Special low-cost carriage also applies for wheel/tyre sets.

When fitting alloys to your Discovery for the first time, check that the wheel studs are suitable for alloys by looking for a slot or a triangle marking on the end of the stud. Studs marked in this way have a larger head, necessary for the fitting of alloy wheels. Similarly, alloys require suitable wheelnuts and can not be fitted using nuts from steel wheels.

ALLOY WHEEL & WHEEL-TYRE PACKAGES

SPORTS

'Sports'
Land Rover Alloy Wheel (5 spoke)
Silver, less centre & nuts (7Jx16)
Wheel only (each) **STC8126**
Wheel set (4) **STC8126K**

'Sports'
Land Rover Alloy Wheel (5 spoke) & Tyre
Silver, less centre & nuts (7Jx16).
Fitted with a Goodyear Wrangler 205R16 tyre & balanced.
Note: optional 235/70R16 tyre can also be fitted at additional cost.
Wheel & tyre (each) **STC8126T**
Wheel & tyre set (4) **STC8126KT**

FREESTYLE

'Freestyle'
Land Rover Alloy Wheel (5 spoke)
Silver sparkle, less centre & nuts (7Jx16).
Also known as 'Tornado' style. Also available in grey/silver.
Wheel only (each) **ANR5307MNH**
Wheel set (4) **ANR5307MNHK**

'Freestyle'
Land Rover Alloy Wheel (5 spoke) & Tyre
Silver sparkle, less centre & nuts (7Jx16). Also available in grey/silver. Fitted with a Goodyear Wrangler 205R16 tyre & balanced. Note: optional 235/70R16 tyre can also be fitted at additional cost.
Wheel & tyre (each) **ANR5307MNHHT**
Wheel & tyre set (4) **ANR5307MNHKT**

STYLED

'Styled'
Land Rover Alloy Wheel (5 spoke)
Silver, less centre & nuts (7Jx16).
Also available colour coded at extra cost.
Wheel only (each) **RTC9526**
Wheel set (4) **RTC9526K**

'Styled'
Land Rover Alloy Wheel (5 spoke) & Tyre
Silver, less centre & nuts (7Jx16). Fitted with a Goodyear Wrangler 205R16 tyre & balanced. Also available colour coded at extra cost. Note: optional 235/70R16 tyre can also be fitted at additional cost.
Wheel & tyre (each) **RTC9526T**
Wheel & tyre set (4) **RTC9526KT**

CYCLONE

'Cyclone'
Land Rover Alloy Wheel (5 spoke)
Silver, less centre & nuts (7Jx16).
Also available in red or green at additional cost.
Wheel only (each) **NTC7739MUE**
Wheel set (4) **NTC7739MUEK**

'Cyclone'
Land Rover Alloy Wheel (5 spoke) & Tyre
Silver, less centre & nuts (7Jx16). Also available in red or green at additional cost. Fitted with a Goodyear Wrangler 205R16 tyre & balanced. Note: optional 235/70R16 tyre can also be fitted at additional cost.
Wheel & tyre (each) **NTC7739MUET**
Wheel & tyre set (4) **NTC7739MUETKT**

ALLOY WHEEL & WHEEL-TYRE PACKAGES

CASTOR

'Castor'
Land Rover Alloy Wheel (5 spoke)
Silver sparkle, less centre & nuts (7Jx16).
Wheel only (each) **NTC9976MNH**
Wheel set (4) **NTC9976MNHK**

'Castor'
Land Rover Alloy Wheel (5 spoke) & Tyre
Silver sparkle, less centre & nuts (7Jx16).
Fitted with a Goodyear Wrangler 205R16 tyre & balanced.
Note: optional 235/70R16 tyre can also be fitted at additional cost.
Wheel & tyre (each) **NTC9976MNHT**
Wheel & tyre set (4) **NTC9976MNHKT**

DEEP DISH

'Deep Dish'
Land Rover Alloy Wheel (5 spoke)
Silver sparkle, less centre & nuts (7Jx16).
Wheel only (each) **ANR3631MNH**
Wheel set (4) **ANR3631MNHK**

'Deep Dish'
Land Rover Alloy Wheel (5 spoke) & Tyre
Silver sparkle, less centre & nuts (7Jx16).
Fitted with a Goodyear Wrangler 205R16 tyre & balanced.
Note: optional 235/70R16 tyre can also be fitted at additional cost.
Wheel & tyre (each) **ANR3631MNHT**
Wheel & tyre set (4) **ANR3631MNHKT**

DRAGON

'Dragon'
Aftermarket Alloy Wheel (6 spoke)
Silver, includes centre & nuts (7.5Jx16).
Wheel only (each) **RD1144**
Wheel set (4) **RD1144K**

'Dragon'
Aftermarket Alloy Wheel (6 spoke) & Tyre
Silver, includes centre & nuts (7.5Jx16).
Fitted with a Goodyear Wrangler 205R16 tyre & balanced.
Note: optional 235/70R16 tyre can also be fitted at additional cost.
Wheel & tyre (each) **RD1144T**
Wheel & tyre set (4) **RD1144KT**

Wheel Nuts, Centres & Studs - for Alloys

Wheel Nuts (standard) - plain
each **NRC7415**
set of 20 **NRC7415K**
Wheel Nuts (standard) - with S/S cap
each **ANR2763MMM**
set of 20 **ANR2763MMMK**
Wheel Nut Kit (inc spare wheel spacers) **RTC9563AA**
Includes 23 wheel nuts (with s/s caps)
and 3 spacers for mounting alloy spare wheel.
Wheel Nuts (locking)
Not suitable for 'Deep Dish' Alloy wheels.
set of 5 **STC8843AA**
set of 5 +16 standard plain nuts **STC8843AAK**
set of 5 +16 standard nuts with s/s cap **STC8843AAKS**
Wheel Centre Cap (with logo) **ANR2391**
Available in silver sparkle, quicksilver,
Westminster (dark) grey or pewter.
Wheel Stud (if required)
for Alloy wheels (each) (20) **FRC5926**

STEEL WHEEL & WHEEL-TYRE PACKAGES

ORIGINAL STEEL

'Original Steel'
Land Rover Steel Wheel (Grey, less nuts) (7Jx16).
Wheel only (each) **NTC5193PM**
Wheel set (4) **NTC5193PMK**

'Original Steel'
Land Rover Steel Wheel & Tyre
Grey, less nuts (7Jx16).
Fitted with a Goodyear Wrangler 205R16 tyre & balanced.
Wheel & tyre (each) **NTC5193PMT**
Wheel & tyre set (4) **NTC5193PMKT**

MODULAR STEEL

'Modular Steel'
Aftermarket Steel Wheel (Grey, less nuts) (7Jx16).
Wheel only (each) **RD1145**
Wheel set (4) **RD1145K**

'Modular Steel'
Aftermarket Steel Wheel & Tyre
Grey, less nuts (7Jx16).
Fitted with a Goodyear Wrangler 205R16 tyre & balanced.
Wheel & tyre (each) **RD1145T**
Wheel & tyre set (4) **RD1145KT**

Wheel Nuts & Studs

Wheel Nuts (steel wheels)
standard - each **NTC7396**
standard - set of 20 **NTC7396K**
locking - set of 5 **RTC9535**
locking - set of 5 +
15 standard nuts **RTC9535K**
Wheel Stud (if required)
for Steel wheels (each) (20) **576841**

18" WHEELS FOR YOUR SERIES 1 DISCOVERY?

Using our wheel hub PCD adaptor kit, it is possible to fit 'Series 2 Discovery' 18x8J wheels to your Series 1 Discovery (300 series, April 1994 on only).

Easily fitted by bolting to existing hubs using existing alloy wheel nuts. A further set of Discovery Series 1 alloy wheel nuts is required to fit the wheels to the adaptors.

It should be noted that the wheels will 'fill the arches' flush with the bodywork.

Wheel Hub Adaptor Kit RAI1389
Set of 4 adaptors including instructions.
Please refer to previous page for additional alloy wheel nuts required when fitting adaptors

18" TRIPLE SPORTS ALLOYS FITTED TO SERIES 1 DISCOVERY (APRIL '94 ON, 300 SERIES) USING HUB ADAPTOR KIT.

Wheel Nuts & Centres - 18"

Nuts & centres (Series 2 Discovery)
Note: the wheel nuts listed below are suitable for fitment to Series 2 (1998 on) Discovery only. Not for use with hub adaptors for Series 1 Discovery. Wheel centres are suitable for all 18" wheel applications.

- wheel nuts (standard) - Series 2 only;
 - each **ANR3679**
 - set of 20 **ANR3679K**
- wheel nuts (locking) - Series 2 only;
 - set of 4 **STC8513**
 - set of 4 + 16 standard nuts **STC8513K**
- wheel centre cap (with logo) - 18" wheel
 - grey (with logo) - each **ANR3522MNH**
 - green (Land Rover badge) - each **RRJ100140MNH**

18" ALLOY WHEEL & WHEEL-TYRE PACKAGES

We offer a superb range of alloy wheels to enhance and upgrade your Series 1 Discovery (see hub adaptors) or series 2 Discovery.

You will find that our combined wheel/tyre packages offer great value for money - and convenience. Special low cost carriage also applies for wheel/tyre sets.

HURRICANE

'Hurricane'
Land Rover alloy wheel (10-spoke)
Silver sparkle, less centre & nuts (8J x 18).
wheel only (each) **RRC111130MNH**
wheel set (4) **RRC111130MNHK**

'Hurricane'
Land Rover alloy wheel (10-spoke) & tyre
Silver sparkle, less centre & nuts (8J x 18).
Fitted with quality 255/55 R18 tyre and balanced.
wheel & tyre (each) **RRC111130MNHHT**
wheel & tyre set (4) **RRC111130MNHKT**

MONDIAL

'Mondial'
Land Rover alloy wheel (5-spoke)
Silver sparkle, less centre & nuts (8J x 18).
wheel only (each) **RRC115410MNH**
wheel set (4) **RRC115410MNHK**

'Mondial'
Land Rover alloy wheel (5-spoke) & tyre
Silver sparkle, less centre & nuts (8J x 18).
Fitted with quality 255/55 R18 tyre and balanced.
wheel & tyre (each) **RRC115410MNHHT**
wheel & tyre set (4) **RRC115410MNHKT**

TRIPLE SPORT

'Triple Sport'
Land Rover alloy wheel (6-spoke)
Silver, less centre & nuts (8J x 18).
wheel only (each) **STC8516**
wheel set (4) **STC8516K**

'Triple Sport'
Land Rover alloy wheel (6-spoke) & tyre
Silver, less centre & nuts (8J x 18).
Fitted with quality 255/55 R18 tyre and balanced.
wheel & tyre (each) **STC8516T**
wheel & tyre set (4) **STC8516TKT**

COMET

'Comet'
Land Rover alloy wheel (6-spoke)
Silver, less centre & nuts (8J x 18).
wheel only (each) **RRC000930MCM**
wheel set (4) **RRC000930MCMK**

'Comet'
Land Rover alloy wheel (6-spoke) & tyre
Silver, less centre & nuts (8J x 18).
Fitted with quality 255/55 R18 tyre and balanced.
wheel & tyre (each) **RRC000930MCMT**
wheel & tyre set (4) **RRC000930MCMKT**

TYRES

Original tyre sizes on Discovery are 205R16 for both steel and alloy wheels.

A popular alternative is to fit 235/70R16 (wider section) which increases the vehicle track by some 60mm and thereby improves handling. These tyres should only be fitted in vehicle sets to the tubeless alloy wheels (and not steel wheels). The rolling radius of 235/70R16 is the same as the original tyre and so will not affect gearing, speedo etc. No modifications are required.

We can offer various makes of tyre depending upon availability.

Also listed below is the tyre for the 18" Series 2 wheel.

Tyre size	
205 R16	205R16
235/70 R16	235/70 R16
255/55 R18 (18" wheel)	255/55R18

Please call or refer to price guide for manufacturer options and prices.

MUDFLAPS

Tyre Pump **523638A**

INTRODUCTION

The Discovery is equipped with disc brakes all round. On vehicles up to 1993, solid front discs of 299mm (11.77") diameter are fitted. On vehicles from 1994 onwards, front discs are vented and are of 298mm (11.73") diameter. All vehicles have solid rear discs of 290mm (11.42") diameter.

ABS was introduced in 1994 as standard equipment on ES models and optional on all other models.

UPDATED BRAKES

We have 3 kits available for updating the Discovery, depending on the year of the vehicle and whether just the front or the front & rear are to be improved. All of the kits contain grooved (handed) discs - ventilated at the front and solid at the rear - and carbon/kevlar pads.

To complement our updated brake kits, but also suitable for standard brakes, we stock stainless steel braided brake hoses, which improve brake line pressure and brake pedal feel.

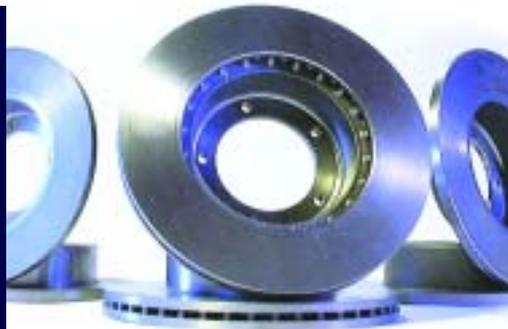

IMPORTANT

This section contains a full listing of standard replacement brake system components, including discs, calipers, pads, master cylinders and ABS system components.

For rigid brake pipes, see our Copper Brake Pipe Kits. These are convenient kits which contain everything you will need to replace your vehicle's brake lines.

Finally, to complete the job you will need brake fluid. As well as standard DOT 4 fluid, we offer silicone fluid. Although more expensive than conventional fluid, we recommend silicone brake fluid due to the following advantages:

1. Silicone fluid is DOT 5 rated.
2. It is completely harmless to paintwork if spilled.
3. Unlike conventional fluid, silicone fluid does not absorb moisture, so its performance never degrades, plus it won't corrode your brake components from the inside.

Updated Brake Kits

We have 3 kits available for updating the brakes on Discovery, depending on the year of the vehicle and whether just the front or the front & rear are to be improved. All of the kits contain grooved (handed) discs - ventilated at the front and solid at the rear - and carbon/kevlar pads.

To complement our updated brake kits, but also suitable for standard brakes, we stock stainless steel braided brake hoses, which improve brake line pressure and brake pedal feel.

KIT 1 Updated Front Brake Kit RA1357

Converts solid front discs to ventilated. Includes brand new, ventilated 4-pot calipers, ventilated, updated EBC turbo groove front discs (handed with curved grooves & dimples), a set of EBC Kevlar (green stuff) pads (fast road) and pad retaining kit.

KIT 2 Updated Front Brake Kit RA1358

Suitable for vehicles with existing ventilated front discs. Includes ventilated, updated EBC turbo groove front discs (handed with curved grooves & dimples), and a set of EBC Kevlar (green stuff) pads (fast road).

KIT 3 Updated Rear Brake Kit RA1359

Suitable for all vehicles. Includes solid, updated EBC turbo groove rear discs (curved grooves & dimples), and a set of EBC Kevlar (green stuff) pads (fast road).

SERVICE ITEMS

EBC Turbo groove brake discs - updated.		
front (vented) - pair		RA1394
rear (solid) - pair		RA1395
EBC Kevlar (green stuff) pads - fast road.		
Pads will also fit standard discs but we recommend fitting with EBC turbo groove discs for maximum benefit. Note: front pads suitable only for ventilated discs.

automatic	(1)	ANR2941	

Brake Pipes

We have listed below a copper brake pipe kit (non-ABS only), which contains a full vehicle set of rigid brake pipes, including caliper pipes. If you require any individual pipes or ABS brake pipes, please contact our sales department.

Copper Brake pipe kit - non ABS	(1)	RD1060
---------------------------------	-----	--------

Vehicles up to VIN LA (1994).

Aeroquip brake hose kits
Replace those rubber flexible hoses with these stainless steel braided hoses for firmer brake pedal pressure.

Non ABS vehicles		
1989-1992 (to JA) (5 hoses)	RD1100	
1993-1994 (KA to LA) (5 hoses)	RD1101	
1995 on (MA on) (3 hoses)	RD1102	
ABS vehicles		
1994 on (all) (4 hoses)	RD1103	

Steering Box

Steering box;		
up to VIN JA018110 (1992)		
rhd	(1)	NTC8416
lhd	(1)	NTC8417
VIN JA018111 onwards		
rhd	(1)	STC2846
lhd	(1)	STC2845
Seal kits - steering box;		
output shaft seal kit	(1)	STC2848
complete steering box seal kit(1)		STC2847
Bolt - steering box to chassis	(4)	BX112201
Drop arm - steering box;		
up to VIN JA018109 (1992)		
rhd	(1)	STC1044
lhd	(1)	STC1045
VIN JA018110 (1992) on		
rhd	(1)	NTC9236

Nut - drop arm	(1)	NT614041
Balljoint - drop arm	(1)	STC3295
Nut - balljoint	(1)	NC112041
Tie bar - steering box;		
Up to VIN LA081464 (1994)		
rhd	(1)	594947
lhd	(1)	594946
VIN LA081465 (1994) on	(1)	ANR2994
Rhd & lhd.		

TECHNICAL NOTE

Steering Wobble

If you are experiencing steering wheel wobble, particularly after hitting a bump or pot-hole, there could be a number of possible causes:

- 1. Worn steering damper.** Remove and test by working the damper in and out. There should be plenty of resistance. If not, replace the unit.
- 2. Worn steering column universal joints.** Have an assistant turn the steering wheel while you observe the joints. There should be no visible play.
- 3. Worn drop-arm ball joint.** Firmly holding the bottom of the balljoint, try to detect any side-to-side movement. If there is any free-play, replace the balljoint.
- 4. Worn steering linkage balljoints.** Wear in any of the steering system balljoints will cause unwanted steering play. If necessary, split the balljoint from its socket to test for free-play. Replace any worn balljoints.
- 5. Incorrectly adjusted swivel bearing pre-load.** (see Front Axle section). The upper swivel pin preload is set with shims. Too loose and the steering will feel vague, too tight and the steering will feel stiff. The procedure for checking and adjusting the pre-load is given in the Haynes workshop manual (see Accessories section).

Power Steering Pump

Power steering pump;		
V8		
up to VIN JA34313 (1992)	(1)	ANR2003

glovebox (1) ADU2066

Bulb - interior lamp;

centre & front	(1)	586438
rear	(1)	RTC3633
loadspace	(1)	STC1203
glovebox	(1)	RTC3633

Switch - interior lights;

courtesy switch (door pillar)	(5)	AAU1908
glovebox switch	(1)	YUE10005

Door open lamp - tailgate (1) PRC8749

MORE STOCK EVERY DAY

If the part you require is not listed here, please phone and enquire. By now we might well have it. For prices, terms & conditions etc, please refer to our latest price guide.

Electric Windows

Motor - window lift;

front

up to 1991 (VIN HA)

rh	(1)	RTC3820
lh	(1)	RTC3821

1992 (VIN JA) to VIN MA137189 (1995)

rh	(1)	RTC6641
lh	(1)	RTC6640

VIN MA137190 (1995) onwards

rh	(1)	STC2886
lh	(1)	STC2885

rear

up to VIN MA137189 (1995)

rh	(1)	RTC3816
lh	(1)	RTC3817

VIN MA137190 (1995) onwards

rh	(1)	STC2885
lh	(1)	STC2886

Switch - electric window - up to 1994 (VIN LA);

front (tunnel console)

window lift

driver's	(2)	PRC5255
passenger's		
up to VIN JA013672 (1992)(2)		PRC5254
VIN JA013673 on	(2)	PRC5255

window lift isolator (1) PRC4754

rear door switch

up to 1994 (VIN LA)	(2)	PRC3912
1995 (VIN MA) on)		
rh	(1)	PRC5254
lh	(1)	PRC5255

Switch - electric window - 1995 (VIN MA) on;

window lift	(4)	AMR2496
window lift isolator	(1)	AMR2497

rear door

rh	(1)	PRC5254
lh	(1)	PRC5255

Electric Sunroof

Motor assembly (1) EGQ100230

Control switch;

front	(2)	AMR2471
rear	(1)	AMR3652

Isolator switch (front) (1) AMR3653

Control unit - sunroof - 1995 on (1) AMR2128

Electric Door Mirrors

Please note: mirror assemblies listed here are for UK market vehicles. For markets with different mirror assemblies, please enquire.

Door mirror - electric;

up to 1994 (VIN LA)

Heated mirror, convex glass.

rh	(1)	BTR5202
lh	(1)	BTR5203

1995 (VIN MA) on

rh	(1)	CRB108800
lh	(1)	CRB108810

Mirror glass only;

Heated, convex.

up to 1994 (VIN LA)

rh	(1)	MTC6538
lh	(1)	MUC1609

1995 (VIN MA) on

rh	(1)	CRD100640
lh	(1)	CRD100650

Motor assembly - electric mirror

Switch - mirror adjustment;

up to 1994 (VIN LA)

Centre console.	(1)	PRC6829
-----------------	-----	---------

1995 (VIN MA) on

Central panel.	(1)	AMR2498
----------------	-----	---------

Electric Seats

Motor - electric seat

(8)	STC2936
-----	---------

Gearbox assembly - electric seat;

fore & aft

inner rh	(1)	RTC5786
----------	-----	---------

outer rh	(1)	RTC6411
----------	-----	---------

inner lh	(1)	RTC5623
----------	-----	---------

outer lh	(1)	RTC6412
----------	-----	---------

recline

rh	(1)	RTC5789
----	-----	---------

lh	(1)	RTC5790

1995 (VIN MA) on

(1)	AMR3382
-----	---------

Switches & Controls

IGNITION SWITCH

Ignition lock & switch;

up to VIN LA (1994)

(1)	STC981
-----	--------

VIN MA (1995) on

(1)	STC1435
-----	---------

Ignition switch only;

up to VIN LA (1994)

(1)	PRC3408
-----	---------

VIN MA (1995) on

(1)	STC1746
-----	---------

Shear bolt - ignition lock;

up to VIN LA (1994) (M8 x 20)

(2)	NTC4610
-----	---------

VIN MA (1995) on (M8 x 12)

(2)	STC2867
-----	---------

STEERING COLUMN STALKS

Indicator, horn & dip stalk;

up to VIN GA (1990)

(1)	RTC6618
-----	---------

VIN HA (1991) to VIN LA (1994)

(1)	STC865
-----	--------

VIN MA (1995) on

(1)	STC4017
-----	---------

Wash/wipe stalk;

up to VIN GA (1990)

(1)	PRC8724
-----	---------

VIN HA (1991) to VIN LA (1994)

(1)	STC866
-----	--------

VIN MA (1995) on

(1)	STC4016
-----	---------

Hazard warning switch

Up to VIN LA (1994) - column-mounted.

(1)	RTC5691
-----	---------

Bulb - hazard warning

(1)	RTC3635
-----	---------

DASH PANEL SWITCHES

Instrument surround switches - up to 1994 (VIN LA);

heated rear window

(1)	PRC8395
-----	---------

rear fog

(1)	PRC8392
-----	---------

rear wash

up to VIN GA440892 (1990)

(1)	PRC6943

ROOF-MOUNTED SWITCHES

Electric sunroof control switch;

front

(2)	AMR2471
-----	---------

rear

(1)	AMR3652
-----	---------

Isolator switch (front)

(1)	AMR3653
-----	---------

Cigar Lighter & Clock

Cigar lighter assembly;

up to 1994 (VIN LA)

(1)	PRC9410
-----	---------

1995

Cruise Control

Note: SRS refers to Supplementary Restraint System (air bags), fitted from 1995 (VIN MA) only.

Control unit - cruise control;		
petrol engines	(1)	AMR1173
diesel engines (1996 on)	(1)	AMR5441
Vacuum unit - cruise control	(1)	PRC6260
Switch - cruise control;		
vehicles without SRS - steering wheel		
accelerator/set	(1)	PRC5797
reset/cancel	(1)	PRC6590
vehicles with SRS		
set/resume (steering wheel)	(1)	AMR3361
enable/disable (central panel)	(1)	AMR3752
pedal switch	(1)	ERR2622
1995 (VIN MA) onwards.		

AIR HORNS RX1381

Horns

Horn;		
high note		
up to 1994 (VIN LA)	(1)	YEB10026
1995 (VIN MA) onwards	(1)	AMR3337
low note		
up to 1994 (VIN LA)	(1)	YEB10027
1995 (VIN MA) onwards	(1)	AMR3338
Air horns (pair)	(1)	RX1381
Including fittings.		

Fuses

Fuse - plastic blade type (pack of 5);		
3 amp	(1)	GFS3103
5 amp	(1)	GFS3105
7.5 amp	(1)	GFS3107
10 amp	(1)	GFS3110
15 amp	(1)	GFS3115
20 amp	(1)	GFS3120
25 amp	(1)	GFS3125
30 amp	(1)	GFS3130
Fuse extractor - blade type	(1)	PRC4412
Fusebox cover - underbonnet	(1)	AMR3258
1995 (VIN MA) onwards.		
Fusible link - 1995 onwards;		
100A (blue)	(1)	STC1757
60A (yellow)	(1)	STC1758
40A (green)	(1)	STC1759
30A (pink)	(1)	STC1760

Relays

Main relays & flasher units;		
up to VIN LA (1994)		
green relay	(4)	DRC1820A
yellow relay	(4)	YWB10027
flasher unit		
up to VIN HA002488 (1991)	(1)	PRC5082
VIN HA002489 on	(1)	PRC8878
dim-dip control unit	(1)	PRC8123
efi relay (aluminium)	(1)	AFU2913
heater plug relay (diesel)	(1)	PRC6913
headlamp wash delay	(1)	YWM10003
wiper delay unit - front		
up to VIN JA (1992)	(1)	AMR2341
VIN KA (1993) on	(1)	YWC10152
wiper delay unit - rear		
up to VIN JA020963 (1992)	(1)	PRC7404
VIN JA020964 on	(1)	YWC10153
VIN MA (1995) on;		
left hand footwell		
horn (yellow)	(1)	YWB10027
aux. key position (yellow)	(1)	YWB10027
rear wiper (green)	(1)	DRC1820A
alarm sound (yellow)	(1)	YWB10027
alarm hazard warning	(1)	AMR1088
dim-dip (yellow)	(1)	YWB10027
right hand footwell		
control unit - fan timer	(1)	AMR3076
efi (aluminium)	(2)	AFU2913
fuel pump - Tdi		
- up to VIN WA746541 ('98)	(1)	AFU2913
- VIN WA746542 onj	(1)	YWB100790
air con clutch	(1)	YWB10027
cooling fan (Mpi)	(1)	YWB10027
air con logic	(1)	YWB10027
starter	(1)	YWB10027
front wiper - green	(1)	DRC1820A
passenger footwell hinged bracket		
dim-dip	(1)	YWB10027
power wash	(1)	YWB10027
ABS warning	(1)	DRC1820A
ABS pump (black)	(1)	AMR3773
ABS valve	(1)	YWB10027
air con fans	(1)	YWB10027
cruise control		
- manual	(1)	PRC9666
- auto	(1)	DRC1820A
fog lamps - front	(1)	YWB10027
fog lamps rear	(1)	DRC1820A
behind glovebox		
heated windscreen	(1)	AMR3773
under lh front seat		
electric seat	(2)	YWB10027
glow plug timer	(1)	PRC6913

Instruments

Speedometer & rev counter			<i>Please Enquire</i>
Bulb & holder assembly - instrument illumination;			
up to 1994 (VIN LA)

set of 4 RD1148K

Suspension Packs

Refer to 'Suspension' pages 44-46 for details on various suspension packages, bush kits (including poly bush) etc.

Anti-roll bars

Anti-roll bars were factory fitted on certain models from 1992 and on all models from 1994.

Fitting anti-roll bars decreases the amount of pitch and roll during hard cornering by controlling suspension travel. However, anti-roll bars will limit axle articulation when off-roading, for the same reason.

For vehicles used mostly on road, anti-roll bars will transform the handling, steering and braking; particularly when used in conjunction with our polyurethane bush kits, uprated shock absorbers, stiffer springs and uprated steering damper.

Note: the Aftermarket kits are not suitable as replacement for factory fitted items.

Anti-roll bar kits - individual (Aftermarket)

Bolt on kits. Suitable for vehicles not fitted with anti roll bars.

AEROQUIP HOSES
- CAR SET

Uprated Brake Kits

We have 3 kits available for uprating the brakes on Discovery, depending on the year of the vehicle and whether just the front or the front and rear are to be improved. All of the kits contain grooved (handed) discs - ventilated at the front and solid at the rear - and carbon/kevlar pads.

To complement our uprated brake kits, but also suitable for standard brakes, we stock stainless steel braided brake hoses, which improve brake line pressure and brake pedal feel.

KIT 1

Uprated Front Brake Kit

RA1357

Converts solid front discs to ventilated.

Includes brand new, ventilated 4-pot calipers, ventilated, uprated EBC turbo groove front discs (handed with curved grooves & dimples), a set of EBC Kevlar (green stuff) pads (fast road) and pad retaining kit.

KIT 2

Uprated Front Brake Kit

RA1358

Suitable for vehicles with existing ventilated front discs

Includes ventilated, uprated EBC turbo groove front discs (handed with curved grooves & dimples), and a set of EBC Kevlar (green stuff) pads (fast road).

KIT 3

Uprated Rear Brake Kit

RA1359

Suitable for all vehicles.

Includes solid, uprated EBC turbo groove rear discs (curved grooves & dimples), and a set of EBC Kevlar (green stuff) pads (fast road).

SERVICE ITEMS

EBC Turbo groove brake discs - uprated.

front (ventilated) - pair

RA1394

rear (solid) - pair

RA1395

EBC Kevlar (green stuff) pads - fast road.

Pads will also fit standard discs but we recommend fitting with EBC turbo groove discs for maximum benefit. Note: front pads suitable only for ventilated discs.

Kenlowe Engine Hot Start & Interior Pre-Heater Systems

The ultimate in comfort & convenience: Kenlowe Engine Hotstart is a mains-powered pre-heater and coolant pump. Fitted in a convenient position in the engine bay, Hotstart rapidly heats the engine to operating temperature and holds it there, eliminating the engine wear, extra fuel costs and de-icing associated with cold winter mornings.

Kenlowe Interior Pre-Heater, working in conjunction with Hotstart, pre-heats the car's interior (as well as demisting iced-up windows) before you even turn on the ignition, making the start of your journey safer and more comfortable.

K&N Air Filters

Air filter - K&N;

K&N offer superior filtration, an improvement in air flow and many times longer life than standard elements. In addition, they can be cleaned and re-used.

Available for both carburettor and efi petrol models, as well as diesel-engine Discoverys, they replace the original air intake box and paper element and require no alterations to the fuel system on a standard engine (with standard exhaust).

K&N Filters are proven in both competition and off-road environments.

Vehicle Security

'Dis-Car-Nect'
Starter Immobiliser RX1356
Replacement Screw Knob RX1356K
Replacement Fuse RX1356F

HOW DOES 'DIS-CARNECT' WORK?
 When leaving your car, simply remove the knob to isolate the starter circuit. The 16amp by-pass fuse will maintain current to all other electrical circuits - stereo memories, alarm etc. Because the starter motor draws over 150amps, any attempt to connect (hot-wire) the starter motor will instantly cause the by-pass fuse to blow, this immobilises the car until the knob is replaced. If this should happen, simply replace the 16amp fuse at your convenience. As an added advantage, the 'Dis-Car-Nect' will also prevent battery drain if you intend to store your car, simply unscrew the knob and remove the fuse. For extra security you can unscrew and remove the immobiliser knob completely.

Battery Conditioner

The battery charger that turns on and off, automatically.

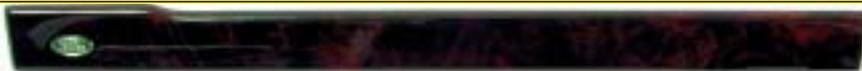

Suitable for all 12 volt batteries (from 5AH to 100AH), this superb product constantly revitalises the battery cells - helping to extend cell life, without the danger of overcharging.

Battery Conditioner Kit RX1410
 Comes complete with all fittings, connector kit and operating instructions.

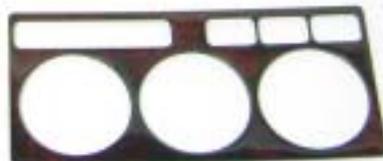

- LOOK AT THESE BENEFITS;**
- Designed to be left connected for long periods.
 - Use without disconnecting vehicle electrics.
 - L.E.D. battery condition display.
 - Thermal cut-out facility.
 - 12 month guarantee.

Can also be used for these applications providing they use a 12 volt battery:
 Caravans, lawn mowers, motorbikes, motor boats, wheel chairs and general leisure use.

Air helper springs **RA1371**
Designed for vehicles which regularly tow or carry heavy loads. Air helper springs ensure the vehicle remains at its optimum ride height.

The air helper springs kit comprises of an axle set of airbags, bushes, fittings & instructions.

Available separately, the compressor kit allows the air helper springs to be inflated/deflated from inside the vehicle.

Air lift compressor kit **RA1372**

Trailer Board

Trailer board (4') (Including 4m cable) **RX1513**

VIDEO TRAVELLER

KIDS BORED? WANT TO WATCH VIDEOS OR PLAY GAMES ON THE MOVE?

Video Traveller is ideal for cars, vans, trucks, motor homes, caravans and boats. Comes complete with travel bag carry case, offering total portability - **simply plugs into a cigar lighter socket!**

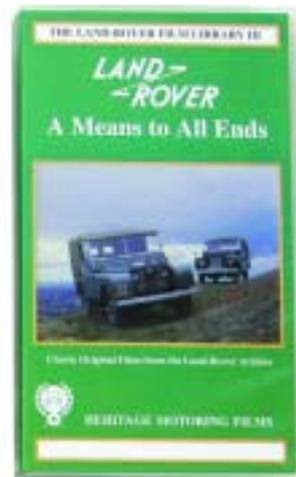

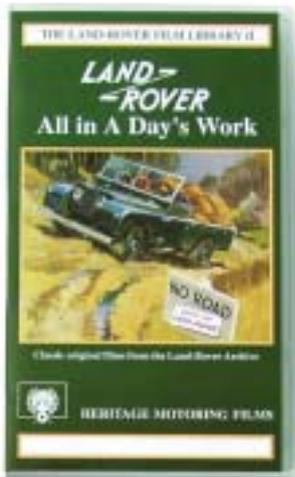

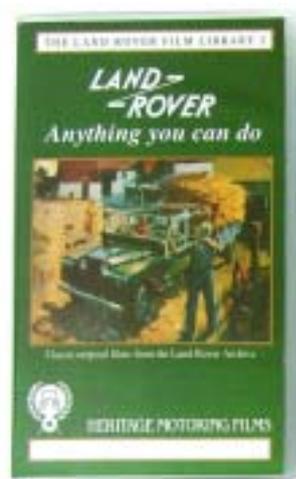

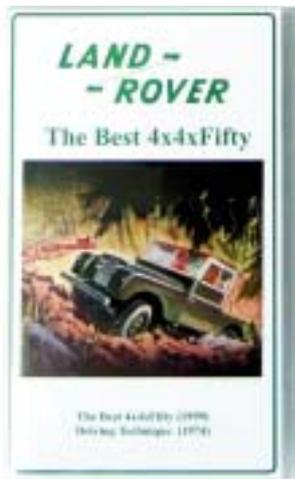

Also includes straps for suspending around car headrests. Simply position between front seats offering in-car entertainment for rear seat passengers!

Combined video player with 5" colour monitor

- Dual sound with twin speakers and twin headphone sockets. (Headphones not supplied).
- A/V input for games or camcorder
- Colour, brightness & contrast control with on screen display.
- Backlit controls
- Simply plugs into cigar lighter socket
- Mains adaptor also included.
- Dimensions: 250mm W x 122mm H x 285mm D.
- Suitable for VHS videos (not USA & certain countries).

**GREAT
VALUE!
RX1438**

Videos

We are pleased to offer a selection of VHS (PAL) videos from the 'Heritage Motoring Films' Library. Essentially, original films from the Land Rover archives edited and enhanced for you to enjoy at home!

'The best 4x4 x fifty' LL1006
50 minutes (approx). Originally made for Land Rover North America in 1999 to celebrate 50th Anniversary. Sir Ranulph Fiennes explores 50 years of Land Rover history including contributions by Spen King, Geoff Miller, Tom Barton & Roger Crathorne. From first models to the luxury series 2 Range Rover, this film portrays the history of Land Rover in a very personal fashion. Also includes driving techniques film.

'Anything you can do' LL1005
53 minutes from archives dating back to 1955, 1956, 1957 & 1958 including 'newsreel' type footage.

'All in a day's work' LL1003
56 minutes including 'newsreel' film from 1957/8, overland to Singapore (1956), special equipment (1964), unusual military prototypes (1967) and Rover Pacific review NZ (1955).

'A means to all ends' LL1004
61 minutes including promotional film for S3 (1973), South America tour (1959), 21st anniversary versatility demonstration (1969).

Also available from Haynes is this action packed overview of the modern and historic roles of Land Rover & Range Rover.

'Best of British - Land Rover' (60 minutes). RD1033

Workshop Manuals - Factory

Original factory type publications.

- Discovery workshop manual; 1989-1994 (VIN LA) **RD1019**
844 pages.
Over 1,000 illustrations.
Including 3.5 & 3.9 V8, 2.0MPi & 200TDi models.
- 1995-1998 (VIN MA on) **RD1020**
1058 pages. Over 1,000 illustrations.
Including 3.9 & 4.0 V8, 2.0MPi & 300TDi series 1 models.
- 1995-1998 (VIN MA on) **RD1021**
1,282 pages. Fully illustrated.
Including 3.9 & 4.0 V8, 2.0MPi & 300TDi series 1 models.
Also includes detailed 300TDi engine & transmission overhaul section.
- 1995-1998 (VIN MA on) **RD1022**
1110 pages. Fully illustrated.
Including 3.9 & 4.0 V8, 2.0MPi & 300TDi series 1 models.
Also includes V8 engine overhaul section including 3.5, 3.9, 4.0, 4.2 & 4.6.
- V8 engine official overhaul manual **RD1024**
152 pages. Covers 3.5, 3.9, 4.0 4.2 & 4.6 engine units (exc. carbs, starters & bolt on parts).
- 300TDi engine & transmission official overhaul manual **RD1023**
224 pages. Covers 300TDi, R380 gearbox & LT230T transfer box.

Discovery electrical troubleshooting manual **LRL0046ENG**
Factory publication covering electrical systems on the 300 series Discovery (April '94 - VIN MA onwards)

Parts Books - Factory

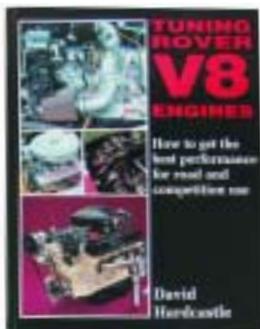

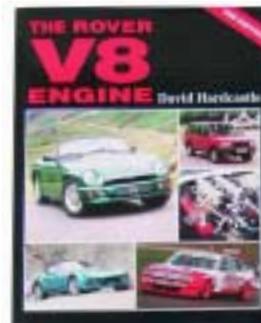

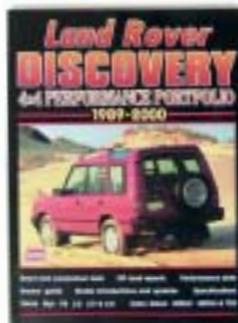

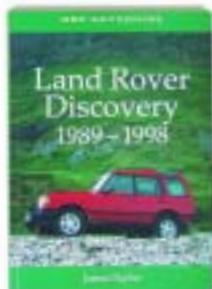

Original Land Rover factory publications.

- Discovery - all models (to '98) **RTC9947CF**
Published Dec 1998. 1,060 pages (approx). Covers all series 1 Discovery (1989 to 1998). Shrink wrapped. Binder available separately.
- Ring binder - suitable for parts book **RTC9946**

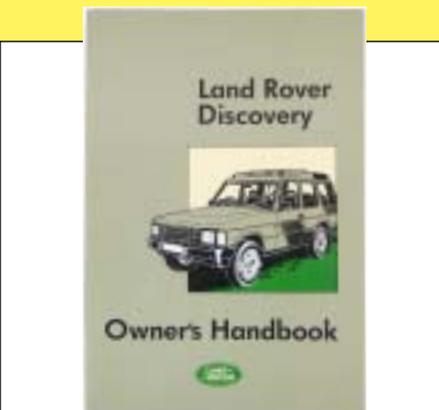

Haynes Manuals

- Workshop manual - Discovery (to '98) **RD1015**
411 pages. Covers all series 1 Discovery (1989 to 1998) including commercial. Note: 2.0MPi engine not covered.
- Restoration manual - Discovery **RD1016**
192 pages, 900 illustrations. By Dave Pollard.

Reference & Information Books

- Land Rover Discovery **RD1025**
128 pages. The story of the Discovery '89-'98. By James Taylor.
- Discovery performance portfolio **RD1018**
140 pages, over 250 illustrations. Road & off road tests, comparisons, design & development, specifications, data, buying guide. Covers all models 1989-2000 including series 2.
- The Rover V8 engine **RX1429**
208 pages. By David Hardcastle.
- Tuning Rover V8 engines **RX1430**
208 pages. By David Hardcastle.
- Driving techniques - Range Rover & Land Rover, 32 pages **RA1404**
Official booklet guide for off-roading.
- Winning in safety, 104 pages. **RA1405**
Complete guide to winning techniques.

Owner's Handbooks

Original factory type publications. Includes operating information on driving controls, instruments, care maintenance & general data. Certain publications also available in other languages - please enquire for price & availability.

- Discovery 1989-90 (inc 3.5 V8 & 200TDi) **RD1017-90**
256 pages.
- 1991 model year (all models) **RD1017-91**
- 1992 model year (all models) **RD1017-92**
- 1993 model year (all models) **RD1017-93**
- 1994 model year (all models) **RD1017-94**
- 1995 model year (all models) **RD1017-95**
- 1996 model year (all models) **RD1017-96**
- 1997 model year (all models) **RD1017-97**
- 1998 model year (all models) **RD1017-98**

Personal Organiser

- Land Rover personal organiser Superb value! 14 x 20cm (6 rings) in dark burgandy with Land Rover badge.
- binder only **STC50440**
- binder & diary insert **STC50440K**

'CONCOURS' SPECIALIST WHEEL CLEANER

The 'Concours' specialist wheel cleaning system will help you care for your Classic's wheels.

Suitable for all Steel, Alloy and Wire wheels (including painted & chromed), 'Concours' wheel cleaning system uses a unique 2-stage process that not only cleans, but gives wheels a superb lasting finish that helps to protect them, making them easier to care for and clean in the future.

'Concours' Wheel Cleaning Kit **RX1405**

Kit includes: special cleaning solution (580ml), wooden handled cleaning brush & dispenser, finishing/protection solution (180ml), 2 pair of disposable gloves.

Cleaning solution breaks down brake dust & road grime. Brush & dispenser gets into all those awkward places. Finishing/protection solution leaves wheels like new.

Snow chains (axle set)

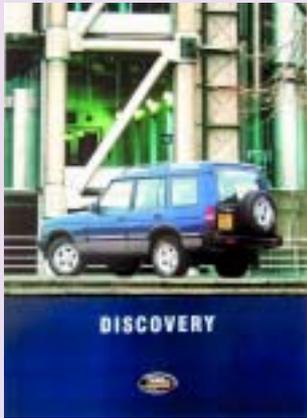

- 205 x 16 tyre
- 235 x 16 tyre

The conception of the club took place at the Town and Country Festival, NAC Stoneleigh in August 1999. The occasion was the celebration of 10 years since the launch of the Discovery. A group of enthusiasts, supported by Dunsfold Land Rover Trust, LRO, LRM, Heritage Motor Centre Gaydon and Land Rover, assembled a selection of vehicles ranging from the 3 known surviving prototypes, through the press fleet vehicles, 300 series and the then new Series 2, including cut away and Camel Trophy variants.

Eight months later, in north Lancashire, the founding members officially held the first meeting of the organising committee. The club is known as DOC as much as by its full title of Discovery Owners Club. The club is now a member of the ARC (Association of Rover Clubs) and is affiliated to GLASS (The Green Lanes Association).

The club aims to cater for all tastes and type of owner, who find that the Discovery is just what they need. We have heavily modified off-roaders, family cars, (with or without caravan!) right through to lots of the newer series 2 vehicles. The club aims to provide a community within which enjoyment of the vehicle can be enhanced and often made cheaper.

There are different levels of interaction starting with Discourse, the full colour newsletter published four times per annum, DOCnotes and DOCstuff which are interim fact-sheets to keep people up to date with events and for sale/wanted and the discussion forum, which is on line and instant (like being in a pub with 2-300 other Discovery owners).

The club attends most of the mainstream Land Rover events throughout the year to act as focal point and social centre for members as well running a couple of national events of its own each year. But the real power is in the local sections, which have regular meetings and organise local events in their own areas.

The best way to find out more is to log on to the web site at:-

www.discoveryownersclub.com

NOTES

ACKNOWLEDGEMENTS

Rimmer Bros would like to thank the members of the Discovery Owners Club who kindly volunteered their vehicles for location photography in this catalogue and British Motor Industry Heritage Trust (BMIHT) at Gaydon for allowing us to reproduce photographs from their vast libraries. Thanks also to Kevin Hall for the loan of his 300Tdi for various location photographs around Bracebridge Heath and Duckworths Land Rover for use of their vehicles around Market Rasen.

We also gratefully acknowledge our suppliers for allowing us to use certain photographs in these pages.

Finally, special thanks to James Taylor, Editor of Land Rover Enthusiast magazine and renowned Land Rover historian, who wrote the introduction to our Discovery catalogue.

Errors & Omissions Excepted. All parts offered subject to availability. All part numbers, illustrations and photographs used in this catalogue are intended for reference/identification purposes only, and are not necessarily an exact representation of the goods supplied. Whilst we make every effort to ensure the accuracy of product descriptions in this catalogue, they are based upon information supplied by the manufacturer/distributor at the time of publication. There may be occasions - due to circumstances beyond our control - when specifications are changed, or when goods become temporarily unavailable. Certain part numbers have been superseded to an alternative number when a later version or updated specification is offered.

NEW & RECONDITIONED PARTS

Almost every part we list is sold brand-new, but in many instances we also offer you the facility to buy "Reconditioned" (usually giving us your old component in part-exchange).

Where there is a reconditioned version of a part, you will find the letter 'R' added at the end of the part number.

EXCHANGE SURCHARGES (REFUNDABLE)

Where parts are sold on an exchange basis, an "Exchange Surcharge" is applied - a deposit in effect, which is refunded to you when your old unit is received by us. This system allows you to make an exchange without having to send the old unit first ... it can often prevent your vehicle being off the road. The amount of the Exchange Surcharge is shown in the Price Guide in italics below the part number.

When returning your old unit, please send with it a note of your customer number, name, address and our *invoice/ document number*. Without this we cannot make the refund. Units must be drained of oil, water and be complete and serviceable; we reserve the right to retain all or part of the surcharge if the unit is irreparable or damaged.

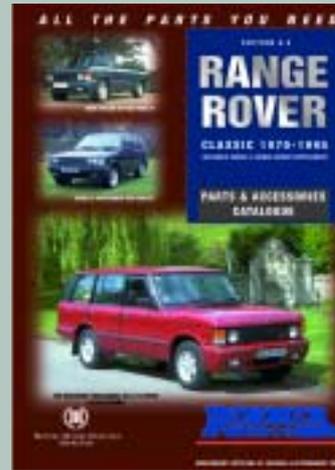

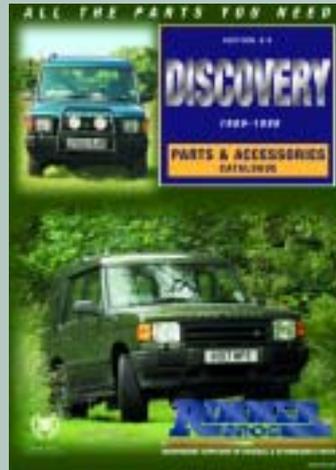

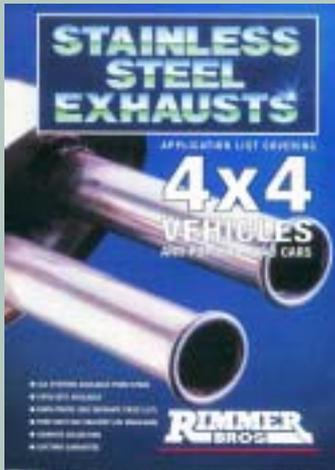

SELECTED USED PARTS

We are often asked for parts that are no longer available, where the cost of re-tooling or re-manufacturing is prohibitive, and there is little or no chance of the part becoming available. We have also found that some customers prefer the option of being able to buy a (non safety critical) used alternative, where perhaps the cost of a new part is unjustified.

Over the years, we have acquired many parts which are suitable for re-sale. You will find these parts listed in the Price Guide under the same part number reference as new but with a 'U' suffix. All used parts have been cleaned and inspected and are sold as serviceable when fitted.
