Foreword by Graham Robson

I have always been a fan of Triumph TRs, and because I drove the new TR7s before I made any instant judgements, I immediately realised what was in the designers' minds. In many ways they were always the best of the breed - and they certainly sold in the largest numbers.

When the TR7 and TR8 models were in production they had a controversial reputation, and some noisy critics always stated that they would never achieve classic status. I am absolutely delighted to note that they were wrong.

Clearly they are now more popular than ever before, and the demand for parts - some standard and some special - is stronger than ever. In the past, far too many desirable cars have gradually rotted away because the makers have lost interest in them - in the case of the TR7 and TR8 Rimmer Bros did not let this happen. You will only need to skim through these pages to realise what effort has gone into sourcing and re-manufacturing parts, to cover every aspect of these cars, so that owners can always keep them on the road, and restore them to 'as-new' condition. Now, more than ever before, updating and improving these sports cars is well worthwhile.

When the TR7s and TR8s were still on the new car market, their styling may have aroused a lot of comment, but their performance and road-holding capabilities were never in doubt. As the first of a long line of TRs to be totally engineered with an eye to exhaust emission and other safety regulations in the 1970s, they are ideally suited to motoring conditions in today's environment.

This is a vast catalogue which reflects the huge stocks held by Rimmer Bros, and it reflects their dedication to the marque. However, I know this could not have been achieved without a great deal of help and encouragement from British Motor Heritage, and without the co-operation of the one-make Clubs catering for these machines. Everything you need to improve your TR7 or TR8 is probably in stock at Rimmers, right now. All you have to do is ask...

Graham Robson

HELPING YOU CARE FOR YOUR TRIUMPH

Although the TR7 initially met with rather a mixed reception (some loved it, but others didn't), the number of cars which still grace our roads is a testament to the long-term appeal of the design.

Many thousands of enthusiasts still take pleasure in restoring and maintaining their TR7, TR7 16v Sprints and TR8's. To help in this process, the one absolute essential is to have access to a reliable source of parts. As the years go by, parts become more and more difficult to find. Happily, however, this is where we at Rimmer Bros come into our own.

Supplying parts for classic Triumph cars is the job for which our company has been created... and we think it's a job we do better than anyone else.

MEMBERS OF BRITISH MOTOR HERITAGE

British Motor Heritage is an organisation committed to the preservation of the cars which have special places in our motoring history. One of the ways in which it pursues this objective is by helping to ensure that replacement parts are available and are of sufficient quality. Stringent standards are necessary to meet the requirements of Heritage approval, and the highest accolade for any company involved with the supply of parts for classic cars is to have Heritage approval. Rimmer Bros were invited to Heritage membership in 1987 and are approved for Triumph and Rover SD1 models.

THE CARS WE SPECIALISE IN

As well as supplying parts for your TR7 & TR8, we also concentrate on TR2/3/4/4A, TR5/250, TR6, 2000/2500/2.5Pi, Stag, Spitfire, GT6, Dolomite, Herald, Vitesse, Rover SD1, Range Rover, Discovery, Freelander, Defender, 90/110 and Land Rover 'Series' vehicles. Additionally, we also supply parts for MG Rover cars - Rover 100/200/400/600/800/25/45/75/ZT & MGF. Please refer to inside rear cover for details on all our catalogues.

RIMMER BROS

UK · WORLDWIDE · THE

SO WHERE DO WE GET OUR PARTS

Wherever possible we supply original stock from BL/Rover sources - lots of parts are still manufactured. Where this fails, we sometimes have parts re-manufactured. We have Heritage approval to do this, because we have satisfied them as to our quality control standards, and we use original tooling and factory drawings where these are available. Where original parts are unavailable and the cost of re-manufacture is prohibitive, we may supply a suitable alternative or in certain cases offer a used (non safety critical) part.

THE STOCK WE NEED TO GIVE THE SERVICE YOU NEED

Our degree of specialisation means two things. Firstly, our people know the cars we're dealing with inside and out, and can give you any advice you might need regarding part selection.

Secondly, we are able to stock in depth just about any part you might need. Triumph House is our latest HQ, acquired in 1991. With nearly 50,000 square feet of warehousing alone, it is a cavernous building, and it needs to be! It currently contains more than 350,000 recorded part numbers with over 25,000 stock lines, and we hold as many of each as necessary to make it almost impossible to run out of stock.

All other aspects of our operation receive equal emphasis. A truly efficient mail order and stock control system. The latest racking and storage facilities for fast and accurate "order picking". Careful packaging and despatch procedures.

THE PEOPLE YOU'RE DEALING WITH

This company really is owned by two brothers named Rimmer. Bill and Graham started their business from humble beginnings in the early 1980s, and it has grown to be one of the leading organisations of its kind in the world, supplying parts Worldwide to an ever growing list of customers.

Both Bill and Graham still work full-time in the business, helped now by over 50 members of staff.

The main qualification of membership of our staff is a recognition that our customers, and our company reputation, depend on our ability to get every aspect of our service right first time.

COMMITMENT TO CUSTOMER SERVICE

Helpful - Accurate - Fast - Efficient

The overall objective at Rimmer Bros is to achieve customer satisfaction at all times.

Our people know your car well, and every member of our staff is dedicated in helping to preserve Classic Cars.

Our computer system gives up-to-the minute information regarding availability and the price of any item. We have an enviable reputation for despatching goods when the customer needs it, quickly and efficiently.

We try to make all our systems and documentation easy to follow and use, and make sure that our catalogues and price guides really do help our customers choose the right parts easily, first time.

TRADE MARKS & LOGOS: The 'Triumph' and 'Heritage' logos used herein are registered Trade Marks of British Motor Heritage Ltd, and are used with their license under the special 'Heritage' approval scheme.

ILLUSTRATIONS: The factory line drawings of parts are also reproduced under license from British Motor Heritage Ltd.

Lincoln, LN4 2NA, England.

THIS CATALOGUE & OUR PRICE GUIDE

There are no prices in this catalogue. Use it to select the parts you need, then check their cost by referring to the separate Price Guide (or CD rom) which represents the other half of our ordering system. The price guide is updated and reprinted more frequently, but we ask that you confirm all prices when ordering. It may also list additional parts (new lines) that we have introduced since this catalogue was printed, and it has more detailed information about ordering & delivery methods. It also has information on warranties and a 'Trouble Shooter Guide'.

ORDERING BY PHONE

Please quote your home postcode and part numbers where possible. This gives instant access to our computerised records and stock control system. If you have any difficulty in selecting the parts you need, our expert staff can help.

UK Payment for Phone Orders

(See also "Overseas Orders & Payment.")

When you have checked on price, availability and delivery costs you can place your order by phone using Visa, MasterCard, Delta/Connect, Maestro, Solo, American Express, Diners Club, or JCB. You will merely need to tell us the card number, expiry date (or issue number), cardholder's full name and registered card address.

After Hours Ordering Service

We operate a 24-hour answering/ordering service which is available to card holders out of normal hours for both UK and Overseas customers. Just leave all necessary details on our telephone voice mails, ie your vehicle type, year, model, the parts and/or the part numbers you require, plus your name, address (inc. postcode), credit card details and delivery address (if different).

Writing out these details before phoning usually helps a caller to give us clear instructions. If at all possible, please also leave a daytime telephone number.

ORDERING BY E-MAIL AND THE INTERNET

For Internet surfers our web site holds details on all our parts catalogues and has an on line ordering facility. Use our E-Mail address for sending your order or parts enquiry. State if you require us to confirm prices, as they can sometimes alter at short notice.

E-Mail:
sales@rimmerbros.co.uk

Order through our website using our **secure** on-line ordering system!

All the latest news, special offers, products and prices just a 'click' away.

ORDERING BY POST

Triumph House, Sleaford Road, Bracebridge Heath, Lincoln, LN4 2NA, England.

We ask you to phone first if at all possible - to check your parts selection, and to advise of delivery charges. Because prices and availability sometimes change, we can also confirm the exact remittance needed avoiding unnecessary delays. If you have not been able to telephone, please give us all possible information - car type/year, RH or LH, front/rear etc - so we can check your selection (including your name, address and postcode) in all correspondence.

Use our Order Form if you can. It asks specifically for all the details we might need. Please photostat or request additional copies of the order form if required.

UK Payment for Post Orders

(See also "Overseas Orders & Payment.")

Send your remittance with the order. The 'Pricing' section in the Price Guide tells you how to calculate the amount.

We accept payment by personal cheque even if the cheque guarantee card limit is exceeded. All we require is your full name and address on the back of the cheque along with your cheque card number and for business cheques, a relevant letterhead. Cheques or P.O.s made out "Rimmer Bros Ltd" please.

Note, if you are unsure as to the exact amount to send, you can write across the top of your cheque, "Cheque Value Not To Exceed £...". You can post us your credit card details if you prefer. If you send cash, note that we cannot accept responsibility for any loss, so registered mail is essential. Bank drafts and Building Society cheques are also accepted. For Bank Transfer information see Price Guide.

ORDERING BY FAX

UK CUSTOMERS: 01522 567600 OVERSEAS CUSTOMERS: +44 1522 567600

See also "Overseas Orders & Payment."

Another facility for customers who wish to make enquiries, or order by credit, debit or charge card. Again, we will need your name, address (inc. postcode), credit card details and delivery address (if different). Plus fullest possible car/parts details - as for orders by post.

ORDER

COLLECTING IN PERSON

If you wish to 'call and collect', you will always be made welcome at our shop and sales counter during business hours. Our Visitor Information Centre has lots of interesting details of each production model and the factories where they were produced.

Customers drive here regularly from all over Europe. Lincoln is a historic Cathedral city and is an excellent place to visit. We're about 2 miles south of Lincoln on the A15 Lincoln to Sleaford road (see map on back cover). We advise you to pre-check by phone that we have the part/s you want in stock.

We accept payment by credit card, cash, bank draft, travellers cheque, building society cheque, and personal cheque (when presented with a cheque card) even if the cheque card limit is exceeded, and by business cheque with accompanying letterhead.

PRICING

For full information and details on prices, VAT, & VAT exempt export sales, please refer to the latest Price Guide. Written quotations are available on request, for parts and/or delivery charges. Please confirm all prices when ordering - prices and availability can sometimes change at short notice. Up to date prices can be found on our web site.

OVERSEAS ORDERS & PAYMENT

We supply parts to classic car owners Worldwide. We have thousands of customers in Europe and regularly send parts as far afield as Australia, North America, Africa and the Far East. Delivery costs of course, vary greatly (depending on size/weight/urgency). We can quote accurately for the cost of parts and delivery once your requirements are known.

Our Multi-language European Order Forms explain how to order parts in English, Italian, German, Spanish and French.

Payment By Export Customers:

There is a choice of payment methods for customers overseas;

- A) Credit card, Debit card or Charge card.
- B) Bank cheque - in ££s sterling (Drawn on a London Bank)
- C) Travellers Cheques (signed) - in ££s sterling.
- D) Giro Cheques in ££s sterling.
- E) By Bank Transfer - see Price Guide.

PLEASE NOTE THAT ALL TRANSACTIONS MUST BE IN ££s STERLING.

CHOICE OF DELIVERY METHODS

(For Further Information/Cost Details, Please Refer to Price Guide)

UNITED KINGDOM

There are numerous delivery options for the UK mainland ranging from Post (first class or parcel post) to overnight carrier services. We can advise of the best method of despatch when you telephone. The type of service that we recommend depends upon the size, weight and urgency of the parts you require.

Our price guide indicates the approximate costs, and we will confirm the final invoice total at the end of the call if required.

WORLDWIDE (NON EC COUNTRIES)

We started exporting parts Worldwide in 1982, and since then we have gained an excellent reputation for our speed & efficiency of service.

Delivery costs are based on size, weight, and method of delivery. We have discounted rates with well known carriers, so costs are kept to a minimum. Send us a list of the parts you need (using post, phone, fax or E-Mail), tell us quantities and urgency, and we will work out the best delivery method and quickly advise you of the cost.

Written quotations are available on request.

EC COUNTRIES

The European Community Single Market permits the free movement of goods between all EC countries. This allows us to provide a superb service to all our customers within the EC, with the benefits of improved delivery - via lower charges and easier documentation. Deliveries can be easily arranged using air or surface transport. Our Price Guide indicates approximate costs.

NEW & RECONDITIONED PARTS

Almost every part we list is sold brand-new, but in many instances we also offer you the facility to buy "Reconditioned" (usually giving us your old component in part-exchange).

Where there is a reconditioned version of a part, you will find the letter 'R' added at the end of the part number.

EXCHANGE SURCHARGES (REFUNDABLE)

Where parts are sold on an exchange basis, an "Exchange Surcharge" is applied - a deposit in effect, which is refunded to you when your old unit is received by us. This system allows you to make an exchange without having to send the old unit first ... it can often prevent your vehicle being off the road. The amount of the Exchange Surcharge is shown in the Price Guide in italics below the part number.

Before returning your old unit, please telephone our customer service dept on 01522 568000 in order to obtain a return authorisation number. See reverse of invoice for full details of return procedure. Units must be drained of oil, water and be serviceable; we reserve the right to retain all or part of the surcharge if the unit is irreparable, damaged, incomplete or not identical to the type supplied.

SELECTED USED PARTS

We are often asked for parts that are no longer available, where the cost of re-tooling or re-manufacturing is prohibitive, and there is little or no chance of the part becoming available. We have also found that some customers prefer the option of being able to buy a (non safety critical) used alternative, where perhaps the cost of a new part is unjustified.

Over the years, we have acquired many parts which are suitable for re-sale. You will find these parts listed in the Price Guide under the same part number reference as new but with a 'U' suffix. All used parts have been cleaned and inspected and are sold as serviceable when fitted.

"Errors & Omissions Excepted. All parts offered subject to availability. All part numbers, illustrations and photographs used in this catalogue are intended for reference/identification purposes only, and are not necessarily an exact representation of the goods supplied. Whilst we make every effort to ensure the accuracy of product descriptions in this catalogue, they are based upon information supplied by the manufacturer/distributor at the time of publication. There may be occasions - due to circumstances beyond our control - when specifications are changed, or when goods become temporarily unavailable." Certain part numbers have been superseded to an alternative number when a later version or updated specification is offered.

VEHICLE PRODUCTION SUMMARY

TR7 - TR7 16v Sprint - TR8

The Following information has been compiled and supplied by Anders Clausager of the Heritage Motor Centre (Gaydon), and is reproduced by kind permission of the British Motor Industry Heritage Trust Ltd. Our thanks to them.

1) SPEKE BUILT CARS, 1975 TO 1978:

1a; 1975 and 1976 model years, North American coupes:

- ACL/1 (January 1975) to ACL/7248 (Sept' 1975), 1975 model year.
- ACL/10001 (Sept' 1975) to ACL/34099 (Oct' 1976), 1976 model year.

1b; 1976-78 coupes for home market, Europe and rest of World:

- ACG/1 (June 1975) to ACG/4688 (Oct' 1976)
NB: approx' only 50 cars built in 1975
- ACG/10001 (Oct' 1976) to ACG/23406 (June 1977).
- ACG/25001 (June 1977) to ACG/27053 (August 1977).
Note: some sources also quote a series starting from 30001, but this did not exist
- ACG/35001 (August 1977) to ACG/37661 (May 1978).

1c; 1977 and 1978 model year, North American coupes:

- ACW/1 (Sept' 1976) to ACW/17115, 1977 model year.
- ACW/30001 (June 1977) to ACW/33051, 1978 model year.
- ACW/40001 (Aug' 1977) to ACW/44328, 1978 model year.
(44328: May 1978)

1d; TR7 Sprint coupe with 16 valve engine:

- ACH/1 to ACH/700, (February to October 1977).
NB; not all numbers issued

1e; TR7-V8 coupe for North America, 1977 and 1978 model year:

- ACN/1 to ACN/1116, (February to October 1977).
NB; not all numbers issued

1f; TR7 convertible for North America:

- ACT/1 to ACT110, (April-May 1978). *(NB; not all numbers issued)*

2) CANLEY BUILT CARS, 1978 TO 1979:

2a; TR7 coupe for home market, Europe and rest of World:

- TCG/100001 to TCG/115893, October 1978 to October 1979.
NB; TCG and TCW models shared one series of commission numbers

2b; TR7 coupe for North America:

- TCW/100001 to TCW/115604, October 1978 to October 1979.
NB; TCW and TCG models shared one series of commission numbers

2c; TR7 convertibles for North America:

- TCT/100001 to TCT/105825, (January to June 1979), 1979 model year.
- TCT/110001 to TCT/115897, (June to October 1979), 1980 model year.
NB; 1979 models had their own commission number series, 1980 models shared the same series of numbers with TCG and TCW type coupes

2d; TR8 coupes for North America:

- TCN/150001 to approx' TCN/150198, 1978 model year.
- TCN/160001 to approx' TCN/160142, 1979 model year.
Some cars were re-numbered from 150000 series to 160000 series. it is doubtful that all numbers in the series quoted were in fact issued

2e; TR8 convertibles for North America.

- TCV/200001 onwards, 1979 model year. *(Exact number built unknown)*

3) CANLEY BUILT CARS WITH VIN PREFIX NUMBERS, 1979 - 1980:

3a; - Prefixes have eight characters starting with TP, and ending with AT.

3b; - Series of Numbers:

- VIN 200001 to 215080 (October 1979 to August 1980).
- VIN 402001 to 402026* (May 1980 to June 1980).
**This represents one batch of "1981" models built at Canley, compare to 'Solihull built cars' below*

3c; - All TR7 and TR8 models share the same series of numbers.

4) SOLIHULL BUILT CARS WITH VIN PREFIX NUMBERS, 1980 - 1981:

4a; - Prefixes have eight characters starting with TP, and ending with AA.

4b; - From May 1981, "1981" models have an additional three letters in front of the eight-character prefix, ie; SAT.

4c; - North American export models in 1981 have different style prefixes to meet US legislative requirements.

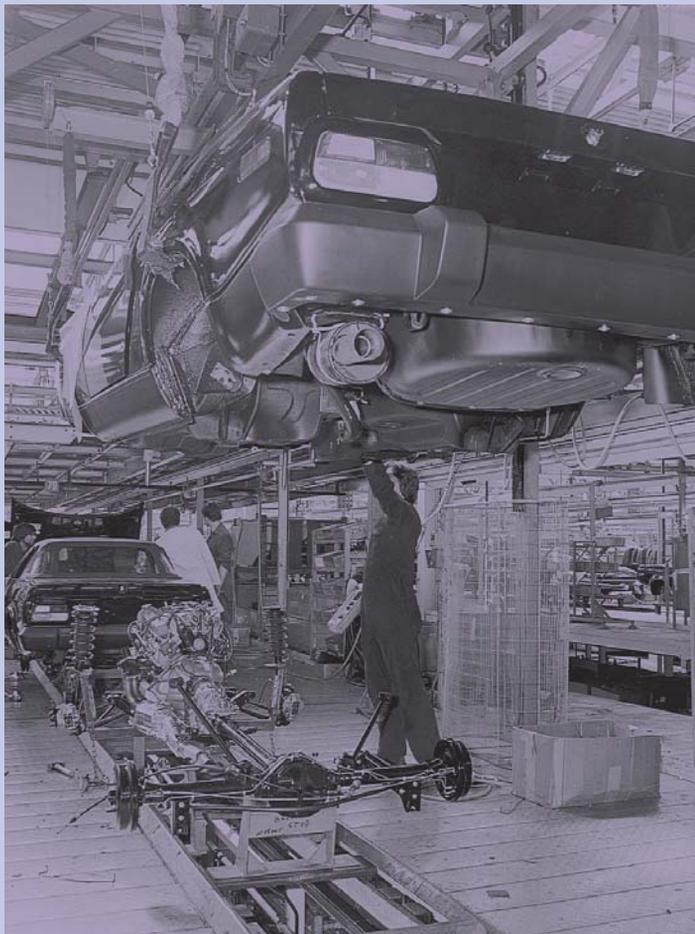

4d; - Series of Numbers:

- VIN 400001 to 401918 (April 1980 to September 1980), "1980" models.
These were mostly "Limited Edition" models for North American markets
- VIN 402027 to 405636 (September 1980 to May 1981), "1981" models.
- VIN 406001 to 408534 (May 1981 to October 1981), "1981" models.

4e; - All TR7 and TR8 models share the same series of numbers.

SERVICE KIT

Engine Service Kits

Kits are for vehicles fitted with standard ignition etc, and include; plugs, points, air/oil filters, condenser & fan belt. Deluxe kits also include distributor cap & rotor arm. (Suffixed 'D' on part no.)

- Engine Service Kit with Standard Oil Filter (1) **RB7044**
- Engine Service Kit with Spin-on Oil Filter (Conversion) (1) **RB7032**

Description Qty Req. Part No.

QUICK REFERENCE

Engine Gaskets & Seals

Head Gasket Set;
 With Standard Head Gasket (1) **GEG1220**
 With Extra Thick Head Gasket (1) **GEG1220XT**
Gasket is 0.020" (0.55mm) thicker than standard.

Head Gasket only;
 Standard Gasket (1) **GEG3304**
 Extra Thick Gasket (1) **GEG3304XT**
Gasket is 0.020" (0.55mm) thicker than standard.

Sump Gasket Set (With oil seals) (1) **GEG278**
 Sump Gasket only (1) **GEG555**

Oil Seals;
 Crankshaft Front (Timing cover) (1) **UKC3344**
 Rear (1) **143148**

Inlet Manifold Gasket (1) **AJM679**
 Exhaust Downpipe Gasket (1) **GEG732**
 Exhaust Manifold Gasket Set (1) **RB7006**
Manifold to cylinder head-If required.

Cam Cover Gasket (1) **GEG447**
 'U' shaped End Plug (Cam Cover) (2) **144488**

Thermostat Gasket (1) **GTG103**
 Core Plug Set (1) **RB7000**
For block & cylinder head.

For full details please refer to relevant sections.

Description Qty Req. Part No.

RECONDITIONED FULL ENGINE SPECIFICATION

All our Reconditioned 'Full Engines' have a high rebuild specification and are suitable for unleaded fuel.

- Crankshaft Re-ground
- New Cam Chain, Tensioner & Guides
- New Main Bearings
- New Inlet Valves
- New Thrust Washers
- New Exhaust Valves
- Cylinder Block Re-bored
- New Valve Springs
- New Pistons & Rings
- New Valve Guides
- New Big end Bearings
- New Oil Seals
- Camshaft Re-profiled
- New Oil Pump & Switch
- New Cam Followers
- Sump & Timing Cover Fitted

BENCH TESTING

Apart from having a multitude of new parts & components fitted - and with a 12 Month/12,000 Mile Warranty - our engine units are run on a test bed after assembly. During the test-run period (at varying engine speeds), all external joints and seals are checked, and the water temperature and oil pressure are monitored to verify correct operation. After the bench test, the engines undergo a final inspection and are prepared for sale.

NOTE: All units are drained of oil & water before despatch.

Our Full Engines are assembled ready to accept manifolds, water pump and other ancillaries. Additional installation information and running-in details are supplied with every unit. We can also supply a 'Full Engine Build-up Kit' that includes all necessary gaskets/oil filter etc, enabling you to install the full engine in your vehicle. Alternatively, fitting can be arranged locally in Lincoln if required, please enquire for details & costs.

Please note; if you are comparing prices may we suggest that specifications are also compared.

TR7 ENGINE REBUILD KIT - WITH NEW UNLEADED HEAD!

FOR THE DIY ENTHUSIAST!

This kit includes everything you are likely to need, including a brand new unleaded spec cylinder head shell (kit is also available less the head if required). We assume you'll have the block re-bored (or buy one of our new blocks) and any other machining work done as required.

Please note that your crankshaft and camshaft are required in exchange. For export customers, the crankshaft or camshaft can be removed from the kit, a price adjustment made, allowing you to have the re-grinding done locally.

- Kit Contents:-**
- Crankshaft - re-ground (Exchange)
 - Bearing shells to suit
 - Thrust washers (+.005")
 - Piston set (HC)
inc. rings/pins, oversize +.020". (or standard size if buying new block). Please state if +.040" required
 - Oil Pump & filter
 - Sump gasket set inc. oil seals
 - Timing chain kit (chain, tensioner & guides)
 - Chain sprockets (engine set)
 - Cylinder head shell (new) - unleaded spec
 - Head assembly kit
inc camshaft recon (exchange), followers, valves (unleaded spec) & springs.
 - Head studs and nuts (set 5)
 - Head gasket set
 - Water pump overhaul kit
 - Core plug engine set
- TR7 Engine Rebuild Kit (1) **RB2001**

RECONDITIONED SHORT ENGINE SPECIFICATION

All our Reconditioned 'Short Engines' are built to the following specification;

- Crankshaft Re-ground
- Cylinder Block Re-bored
- New Main Bearings
- New Pistons & Rings
- New Big end Bearings
- New Oil Pump Supplied
- New Thrust Washers

Please note; The jackshaft (Part No 215207) is not supplied with a short engine. Additional installation information & running-in details are supplied with every unit. Don't forget that we supply all the necessary gasket sets/components etc, required to build-up a short engine.

Description Qty Req. Part No. Description Qty Req. Part No. Description Qty Req. Part No.

Full Engines

Full Engine (UK Specification);

See 'Specification' and 'Build-up' information.

- Reconditioned (Unleaded) (1) **RB7008R**
- New (Unleaded) (1) **RB7008**
Using 10/10 crank.

Engine Build-up Kit

Inc gaskets, oil filter etc.

- (1) **RB7012**

Full Engine (USA Specification);

USA spec Full Engines are built with low compression pistons.

The cylinder head has provision for installing the air rail.

- Reconditioned (Unleaded) (1) **RB7020R**
- New (Unleaded) (1) **RB7020**
Using 10/10 crank.

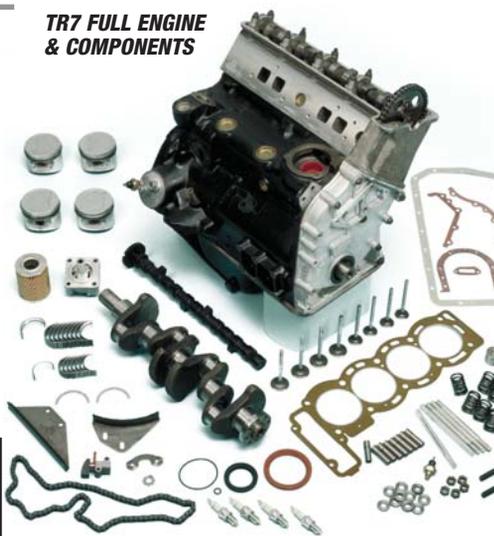

Engine Build-up Kit

Inc gaskets, oil filter etc.

- (1) **RB7012**

For Engine oils & Anti-freeze please refer to Accessories.

TR7 FULL ENGINE & COMPONENTS

'NEW' Full Engines

Over the years we have been constantly 'buying-up' large stocks of Brand New Short Engines and Cylinder Heads from Factory sources (these supplies are now almost exhausted). So, for the discerning owner who would prefer a New engine to reconditioned, you now have the choice.

Our Full Engines are actually built-up using a New Short Engine & Cylinder Head shell, with new components used throughout* (exceptions may include the sump pan and timing cover, when serviceable reconditioned units may be fitted). Full Engines are assembled ready to accept manifolds, water pump & other ancillaries. Additional installation information and running-in details are supplied with every unit.

We can also supply a 'Full Engine Build-up Kit' that includes all necessary gaskets/oil filter etc, enabling you to install the full engine in your vehicle. Alternatively, fitting can be arranged locally in Lincoln if required, please enquire for details & costs.

Bench Testing - New Full Engines

Bench testing can also be carried out on new engines at an additional cost, please enquire for details.

New Short Engines

New* Short engines are supplied less the oil pump & jackshaft.

The warranty on new engines is that of our reconditioned units - please refer to the 'Warranties' section in our price guide.

*A reground 10/10 crank is used for both new full and short engines. These units are normally built to order.

ENGINE BALANCING

We offer an engine balancing service for Full or Short engines, which includes crankshaft & conrods, and if required, crankshaft pulley, flywheel & clutch. Please enquire for details.

Full Engine Build-up

When building up a Full Engine to a complete assembly, check the condition of your old water pump, if unsure, replace or overhaul with a reconditioning kit.

The condition of the radiator is crucial to ensure proper and efficient cooling - either replace or have tested professionally (see Warranties), as are all the hoses and thermostat, we strongly recommend these are examined carefully, or replaced as a matter of course. Engine mountings, clutch etc, should also be inspected and renewed where necessary.

Ensure correct strength anti-freeze is used in the cooling system. Carburettors should be in good working order with mixture & balance set correctly.

Please familiarise yourself with the running-in and head re-torquing instructions on the card supplied with every engine unit. If this card has become separated from the engine when you take delivery, please contact us.

TECHNICAL TIPS & RELATED COMPONENTS

Short Engines

See 'Specification' and 'Build-up' information.

All short engines supplied less jackshaft.

Short Engine (UK Specification);

High compression - 9.25:1.

See also Low compression Short Engines.

- Reconditioned (1) **RB7026R**
Includes new oil pump.
- New (1) **RB7026**
Using 10/10 crank. Supplied less oil pump.

Short Engine (USA Specification);

Low compression - 8.00:1.

- Reconditioned (1) **RB7031R**
Includes new oil pump.
- New (1) **RB7031**
Using 10/10 crank. Supplied less oil pump.

Note; using a low compression short engine (or pistons) can help prolong engine life. This may be useful to UK/European customers if the cylinder head has been 'overskipped', resulting in too high a compression ratio. See 'Cylinder Head & Fittings' for details of our extra thick (+ 0.020"/0.55mm) head gasket. For Engine oils & Anti-freeze please refer to Accessories.

TR7 SHORT ENGINE & COMPONENTS

Short Engine Build-up

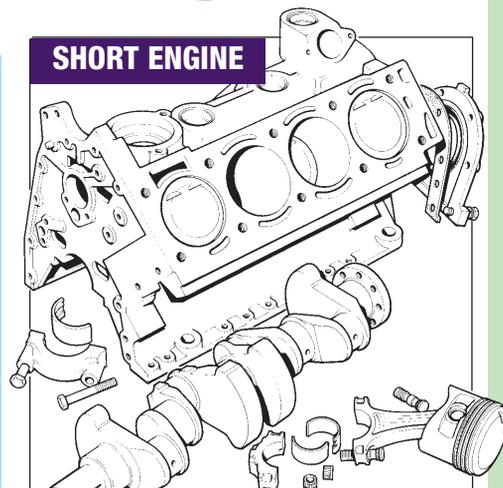

When building up a short engine to a complete assembly, check the condition of timing chain, guides, tensioner, sprockets, water pump (replace or overhaul with reconditioning kit), jackshaft, cylinder head face (for flatness), valves, guides, cam followers, camshaft etc, and replace where necessary.

We supply all these components separately if required along with gasket sets, oil seals, spigot bush, oil filter etc.

The condition of the radiator is crucial to ensure proper and efficient cooling - either replace or have tested professionally (see Warranties), as are all the hoses and thermostat, we strongly recommend these are examined carefully, or replaced as a matter of course.

Ensure correct strength anti-freeze is used in the cooling system. Carburettors should be in good working order with mixture and balance set correctly.

CRANKSHAFT & FLYWHEEL

TR7 - Early & Late Flywheels

From engine number CG8894 all TR7's fitted with 5 speed gearboxes were produced with a modified flywheel, engine plate and different engine plate attachment setscrews (with countersunk head). As this later modified flywheel is now the only type available, early 5 speed & 4 speed vehicles can be fitted with this later flywheel, but only with the corresponding setscrews. The early type engine plate will require minor (but easy) modifications to accept the six later type countersunk head setscrews (part No 144281) in lieu of the bolts GHF120.

Spin-on Oil Filter Conversion

This kit converts the standard 'Bowl' type Filter to the more efficient 'Spin-on' Cartridge type which makes filter changing easier & cleaner.

RECOMMENDED FOR ALL OWNERS!

- Adaptor (1) **RB7016**
Vehicles without engine oil cooler
- Adaptor (1) **RB7048**
Vehicles with engine oil cooler.
- Oil Filter Cartridge (1) **RR1243**
- Service kit for adaptor (1) **RB7016SK**
Replacement O' rings.

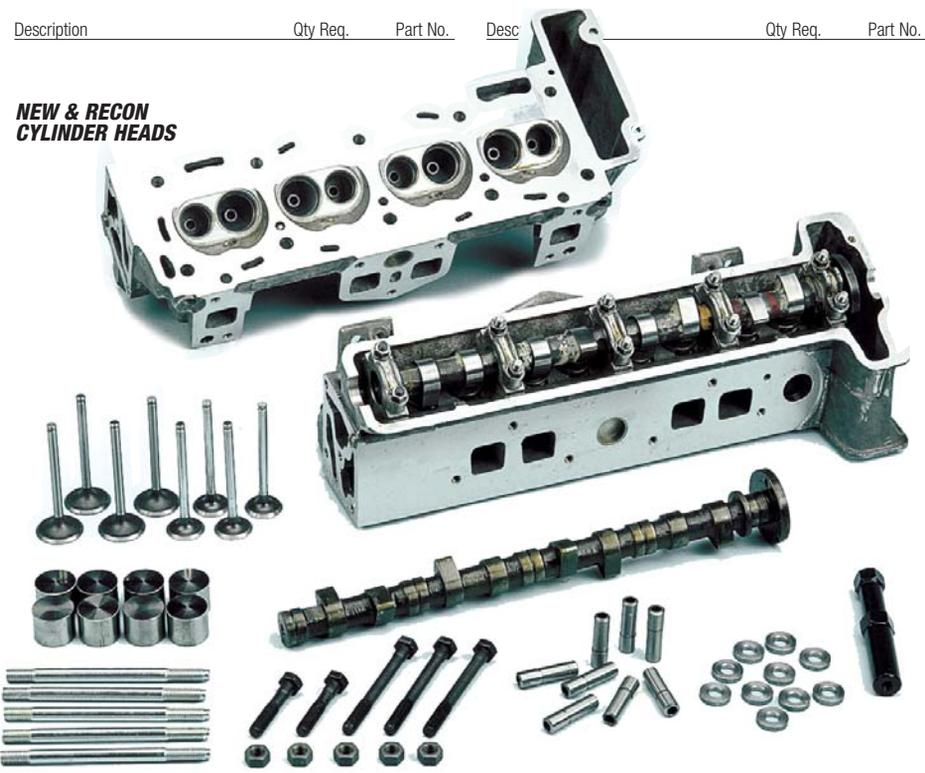

Oil Pressure Gauge Kit

- Oil Pressure Gauge Kit (1) **RX1351/0**
- 'T' Piece (1) **RX1352**
- Use if retaining oil pressure warning light.*
- Bracket (for remote mounting of gauge)(1) **RB7050**

TECHNICAL JOTTINGS

**UK & European Models
Compression Ratio too High ?**

If your cylinder head has been 'over-skimmed' resulting in too high a compression ratio, or you just want to lower the compression (and help prolong engine life), then you may wish to consider rebuilding your engine using low compression pistons. This can also be achieved by using a thick head gasket (+ 0.020"/0.55mm).

NEW & RECON CYLINDER HEADS

CYLINDER HEAD Specification
Reconditioned Cylinder Heads
 Reconditioned cylinder heads are supplied 'shimmed up' ready to fit, and include re-profiled cam, new valves & guides, valve springs & camshaft followers.
New Cylinder Heads
 Same as for reconditioned heads, but with a brand new head shell.
All Heads are suitable for Unleaded Fuel.

Oil Filler Cap	(1)	GFE6015
Seal only - Oil Filler Cap	(1)	RS1441
Gasket-Camshaft Cover	(1)	GEG447
Nut-Special (Camshaft cover)	(4)	147737
'Cup' Washer	(4)	147738
Sealing Ring	(4)	148090
Screw	(2)	SE504051
Washer	(2)	GHF331

Head Bolt (Long)	(3)	UKC9871
Head Bolt (Short)	(2)	144762
Washer	(10)	UKC9786

For 149080 stud & bolts UKC9871 & 144762.

Cylinder Head & Fittings

Cylinder Head Assembly; (UK Specification)
 Ready to fit (shimmed).
 Complete with valves, cam etc. Unleaded specification.

Reconditioned	(1)	RB7011R
New	(1)	RB7011

Cylinder Head Assembly; (USA Specification)
 Ready to fit (shimmed).
 Complete with valves, cam etc. Unleaded specification.
 Modified for use with EGR valve pipework.

Reconditioned	(1)	RB7022R
New	(1)	RB7022

Cylinder Head Shell (New)
 New, bare shell fitted with valve seats & guides

UK Spec	(1)	TKC4522
USA Spec	(1)	TKC4522EGR

With provision for EGR pipework.

Cylinder Head Rebuild Kit (1) **RB7035**
 Kit includes; Camshaft, followers, valves, valve springs, guides & core plugs.
 Also available less camshaft (RB7035NC).

Head Gasket Set;

With Standard Head Gasket	(1)	GEG1220
With Extra Thick Head Gasket	(1)	GEG1220XT

Gasket is 0.020" (0.55mm) thicker than standard.

Head Gasket only;

Clutch/Brake Fluid

Clutch/Brake Fluids;	
Standard (Dot 3) (1 Litre)	(a/r) GBF103
Silicone (0.5 Litre)	(a/r) RX1327
Silicone (1 Litre)	(a/r) RX1326

SILICONE CLUTCH/BRAKE FLUID

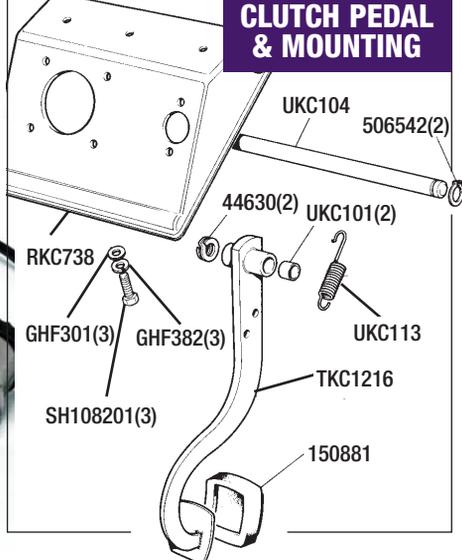

Unlike 'normal' clutch/brake fluids, Silicone fluid does not absorb moisture. This will avoid corrosion in the system (and under strenuous braking conditions tends not to Boil'). Also it won't harm paintwork if split.

Note; before filling with Silicone brake fluid, the entire hydraulic system should be flushed out.

Description Qty Req. Part No.

STANDARD COOLING FAN, VISCOS COUPLING & IDLER PULLEY.

TECHNICAL JOTTINGS

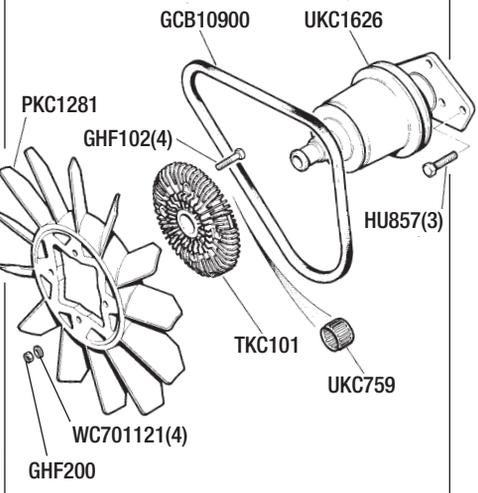

Water Pump Identification

If unsure as to the type of pump fitted to your vehicle, the pump cover will have to be removed to check the number of vanes on the impeller (note: pumps & covers cannot be interchanged between 6 & 12 vane types, a 12 vane pump must be fitted with a 12 vane cover).

A water pump extraction tool (part No RB7009 or RB7009PRO), is usually required to extract the pump from the cylinder block (or improvise). If the pump is difficult to remove, it may leave the brass cage in the cylinder block, this may be prised out carefully. The pump spindle bush (part No 145022), located in the cylinder block, should be replaced as a matter of course.

Description Qty Req. Part No.

COOLING FAN/PULLEY & FITTINGS

RADIATOR & FITTINGS

Radiator & Fittings

See also; Radiator Hoses & Fittings, Expansion Bottle/Header Tank.

RADIATOR ASSEMBLY

New radiators are 100% BRAND NEW. Reconditioned radiators are fitted with a Brand New core.

Radiator (ACG/TCG Vehicles);

Vehicles 1975 to 1979

All ACG/TCG commission numbers fitted with either Plastic Expansion Bottle, or Steel (Rh mounting) Header Tank.

- Standard-New (3 row core) (1) **RKC137**
- Standard-Recon (3 row core) (1) **RKC137R**
- Uprated-New (4 row core) (1) **RKC137UR**
- Uprated-Recon (4 row core) (1) **RKC137RUR**

Radiator (VIN Vehicles);

Vehicles 1979 onwards

All vehicles from VIN 200001 fitted with Steel (Lh mounting) Header Tank.

- Standard-New (3 row core) (1) **PKC1359**
- Standard-Recon (3 row core) (1) **PKC1359R**
- Uprated-New (4 row core) (1) **PKC1359UR**
- Uprated-Recon (4 row core) (1) **RKC1359RUR**
- Kenlowe Electric Fan Kit (1) **RB7065**

Not suitable for air-con vehicles.

- Anti-freeze (Unipart) (1 Litre) (a/r) **GAC2018**
- Anti-freeze (Unipart) (5 Litre) (a/r) **GAC2019**
- Holts Radweld (250ml) (a/r) **RX1508**

RADIATOR FITTINGS

Thermostat Housing;

- Vehicles 1975 to 1978 (1) **UKC6916**
All ACG commission numbers fitted with Plastic expansion bottle.
- Vehicles 1978 to 1979 (1) **ULC2000**
All TCG commission numbers fitted with Steel (Rh mounting) Header Tank.
- Vehicles 1979 & Future (1) **ULC2111**
All vehicles from VIN 200001 fitted with Steel (Lh mounting) Header Tank.

Setscrew (Thermostat housing to manifold);

- Vehicles 1975-1978 (2) **GHF163**
All ACG commission numbers.
- Vehicles 1978 on (Rh-Short) (1) **GHF163**
- Vehicles 1978 on (Lh-Long) (1) **GHF164**
All TCG/VIN commission numbers.

Washer-Spring (2) **GHF332**

Filler Plug;

- Brass type (1) **ARA2634B**
- Plastic type (1) **ARA2634P**
- Sealing Ring (1) **607025A**

Heater to water pump/inlet manifold.

Oil Cooler Kit (Engine)

Oil Cooler Kit <i>Kit includes radiator, hoses & fittings. Thermostat supplied separately.</i>	(1)	RB7060
Thermostat	(1)	RS1456

COOLING SYSTEM ADDITIVE

- 30°F lower operating temperature
- 50% quicker warm up time
- Safe with water/antifreeze mixture
- Safe with cast iron, alloy engines and heads
- Increased engine life!
- 100% biodegradable, non corrosive, non toxic
- For use in all water cooled engines

A MUST FOR ALL OWNERS

Radiator Relief

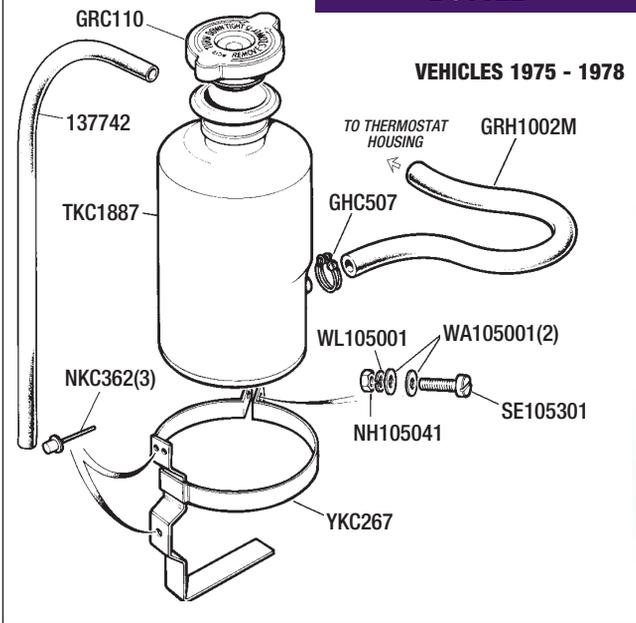

Radiator relief allows your radiator to transfer heat more efficiently, reducing your engines operating temperature (which is obviously controlled by the thermostat) by up to 30°F. You therefore have 'a little bit in hand' for those hot days stuck in traffic. This proven coolant additive will also cut engine warm-up time in half which will reduce engine wear which is most extreme when the engine is cold. Fully compatible with water and anti-freeze and is safe with cast iron and all alloys.

RADIATOR RELIEF (946ml)	RX1461
<i>Treats 1 engine.</i>	

HOSE KITS FOR ALL MODELS (RB7004 SHOWN)

PLASTIC EXPANSION BOTTLE

Expansion Bottle & Header Tank

Vehicles 1975-1978

Kenlowe Engine HotStart & Interior Pre-Heater System

The Ultimate in Comfort & Convenience.
"Year round comfort, safety, economy - even on the coldest morning."

Kenlowe 'HotStart'
Engine & Interior Pre-Heater (1) **RX1361**
This is a mains powered pre-heater and coolant pump. Fitted in a convenient position in the engine bay. Hotstart rapidly heats the engine to operating temperature and holds it there, eliminating the engine wear, extra fuel costs and de-icing associated with cold mornings. The cars's interior is also pre-heated before you even turn on the ignition, making the start of your journey even more comfortable.

TECHNICAL JOTTINGS

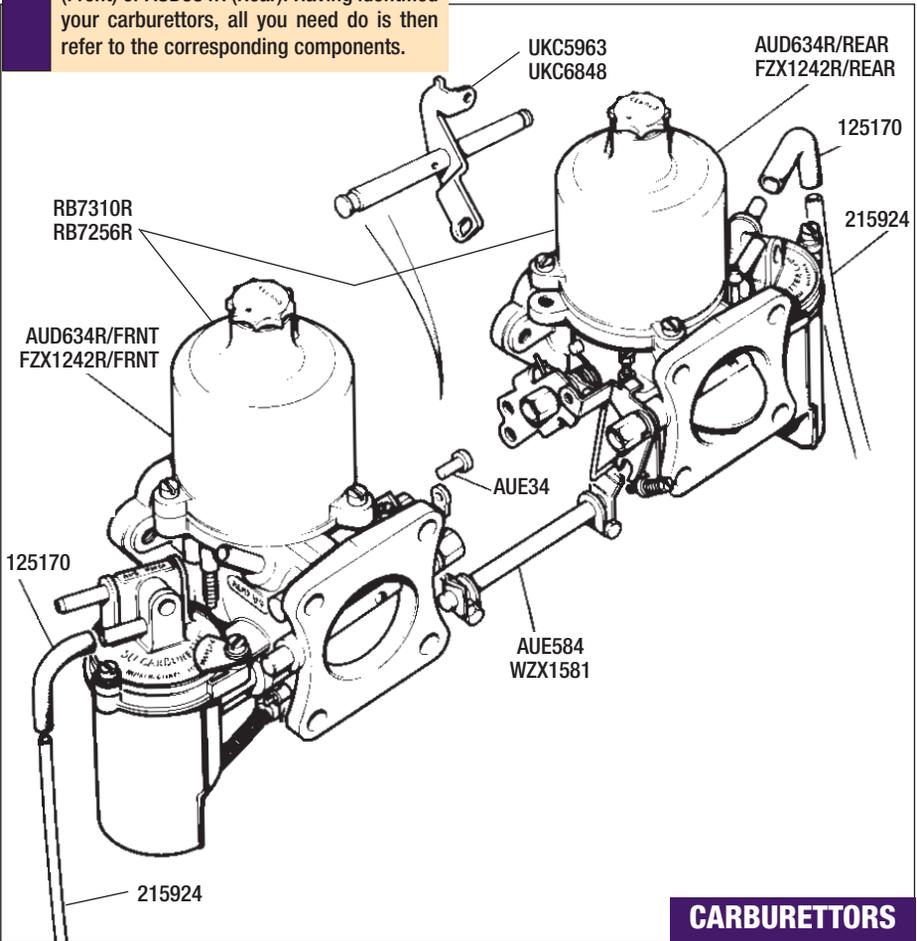

SU's or Strombergs fitted

SU HS6 carburettors were fitted to UK and European specification vehicles only. For the USA, Canada, Australia and Japanese markets, Stromberg CD150s were fitted (either single or as twin). Fuel Injection was also offered on vehicles for these countries. Our catalogue does not cover these areas, however, if you have any specific requirements please contact our sales office, where we can consult factory parts listings and advise you accordingly.

TECHNICAL JOTTINGS

SU HS6 Carburettor Overhaul & Identification

It is quite straightforward (with the help of a workshop manual) to service and overhaul your carburettor(s) using the service items listed in this section. With the tightening of the MOT regulations regarding 'Exhaust Emissions', it is important that they are maintained in good order. We can recondition your own SU carburettors, or we can supply reconditioned units - on a strict exchange basis. The listings here however, are primarily for identification purposes, they will also show if you have the correct type fitted (engine numbers are quoted to help identify original factory specification, and relate to carb's fitted when the vehicle was new and not subsequent replacements). To check, they can be positively identified by a silver tag which is located on the float chamber and marked with the part number, ie; AUD634F (Front) or AUD634R (Rear). Having identified your carburettors, all you need do is then refer to the corresponding components.

Carburettors (SU HS6)

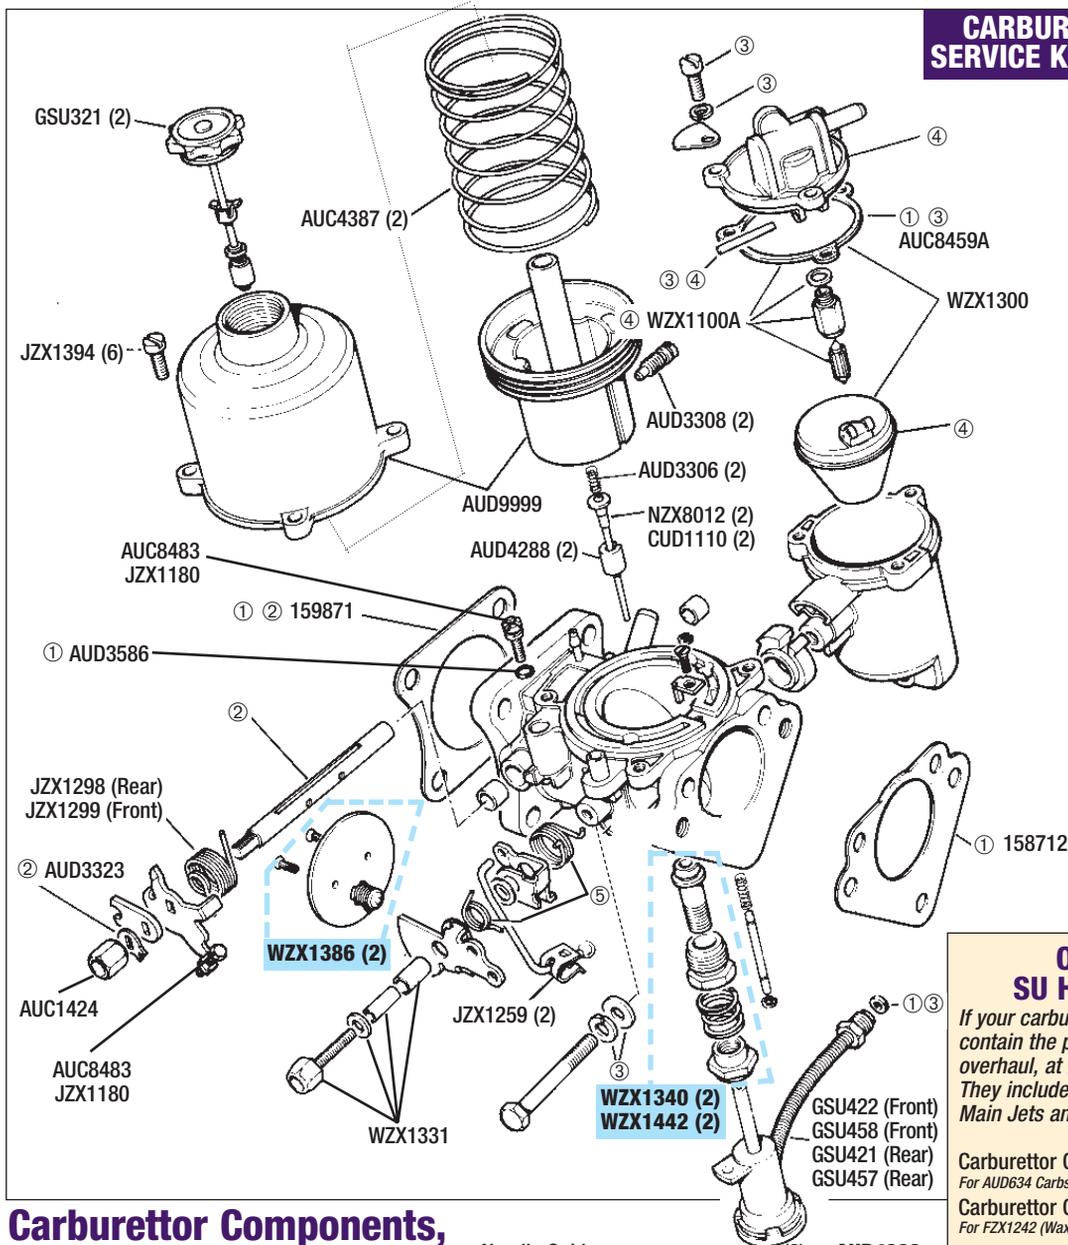

Note; Reconditioned carb's are sold on an exchange basis. It is advisable to fit reconditioned carburettors in pairs.

- Carburettors (Pair) (Reconditioned);
 - To Engine No CG2715 (1) **RB7310R**
 - From Engine No CG2716 (1) **RB7256R**

Carburettor Components, Service Kits & Float Chambers (SU HS6)

COMPONENT IDENTIFICATION NUMBERS

Where there is a 'circled-number' (alongside a BL part number and/or part) in this 'Carburettor Components' illustration, it denotes the item is available either separately, or as part of a kit. Where a 'circled-number' appears on its own, then that component is available only as part of a service kit.

CARBURETTOR COMPONENTS

Kits are 'per carburettor' unless stated otherwise.

Air Cleaner - Standard

See also; **Engine Breather** and **EXHAUST-Manifold & Fittings**.

AIR CLEANER-STANDARD (Early vehicles to 1978)

- Twin air intake pipes.
- Air Cleaner Assembly (1) **RKC1736**
- Air Filter
 - Standard (1) **GFE1040**
 - K&N (Replacement for standard filter) (1) **GFE1040KN**
- Rubber Seal (Air cleaner lid sealing) (1) **RTC312A**
- Setscrew (6) **SH505061**
- Washer-Spring (6) **GHF332**
- Gasket (Air cleaner to carburettor) (2) **158712**
- Intake Hose (Flexible) (2) **614347**

AIR CLEANER-STANDARD Vehicles 1978 on to VIN 200526, and Late Vehicles 1980 onwards from VIN 200527.

- Single 'Hot' air intake pipe.
- Air Cleaner Assembly;
 - Vehicles 1978 to VIN 200256 (1) **PKC533**
 - Late Vehicles from VIN 200527*(1) **PKC1319**
- Air Cleaner Assembly Outer only;
 - Late Vehicles from VIN 200527*(1) **RKC3141**
- Air Filter*
 - Standard (1) **GFE1040**
 - K&N (Replacement for standard filter) (1) **GFE1040KN**

*Note: The later type air cleaner assembly (VIN 200527 onwards) used a different air filter (GFE1095) & rubber seal (AEU1704). The air filter listed (GFE1040) will fit all applications.

- Rubber Seal (Air cleaner lid sealing) (1) **RTC312A**
- Setscrew (6) **SH505061**
- Washer-Spring (6) **GHF332**
- Heat Control Valve (Sensor unit) (1) **AEU1307**
- Retaining Clip (For AEU1307) (1) **RTC311A**
- Gasket (Air cleaner to carburettors) (2) **158712**
- Flexible Hose (1) **TKC1106**
- Hot air intake from manifold.
- Retaining Strap (1) **UKC4636**

INFORMATION LABELS (All Vehicles)

- Information Label-Air Cleaner (1) **RB7097**
- Information Label Kit (1) **RB7091**

See also; **ACCESSORIES**.
CAR set includes the following labels; Tyre pressures, Engine Data, E11, Air Box, Headlamps, Unipart, Brake Data, and Hood instructions. The labels are also available separately.

K & N FILTERS ARE RE-USABLE & HELP IMPROVE PERFORMANCE

Air Cleaner - K&N

K&N AIR FILTERS

For improved engine breathing & performance. **THEY LOOK GOOD TOO!**

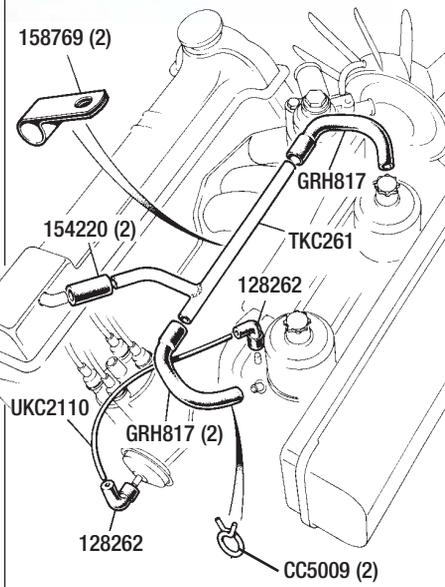

- K&N Air Filter (2) **RB7070**
- Cleaning Fluid (K&N filters/1 litre) (a/r) **RX1346**
Use to clean elements when servicing.
- Element Oil (K&N filters); (a/r) **RX1347**
Use to re-oil filter elements after cleaning.
- 1fl ounce Sachet (a/r) **RX1347**
- 250ml Bottle (a/r) **RX1348**
- 400ml Aerosol (a/r) **RX1349**

Note: When fitting 'K&N' Air Filters and/or Tubular Exhaust Manifold, the carb needles may need to be changed. See also; Carburettor Components, EXHAUST-Tubular Exhaust Manifold, and Sports Exhaust System.

K&N AIR FILTER CONVERSION KIT
 For improved engine breathing & performance
 See Photo.

- K&N Filter Kit 'A' (1) **RB7367**
Use with standard exhaust manifold. Includes pair of K&N filters. NB: adjust standard carb needles to suit if required.
- K&N Filter Kit 'B' (1) **RB7368**
Use with tubular exhaust manifold. Includes pair of K&N filters and carb needles. To suit tubular manifold application

ENGINE BREATHER

Engine Breather

- Breather Pipe-Steel (1) **TKC261**
- Retaining Clip (2) **158769**
- Breather Hose (2) **GRH817**
- Breather Hose-Straight (1) **154220**
- 'Corbin' Clip (2) **CC5009**
- Vacuum Pipe (Carb to distributor) (1) **UKC2110**
- Rubber Elbow (Vacuum pipe) (2) **128262**

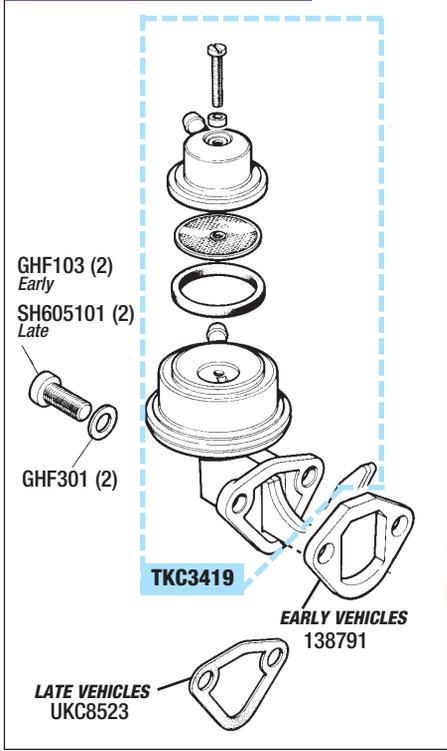

AIR CLEANER BOX - RKC1736

FUEL HOSE KIT RB7001

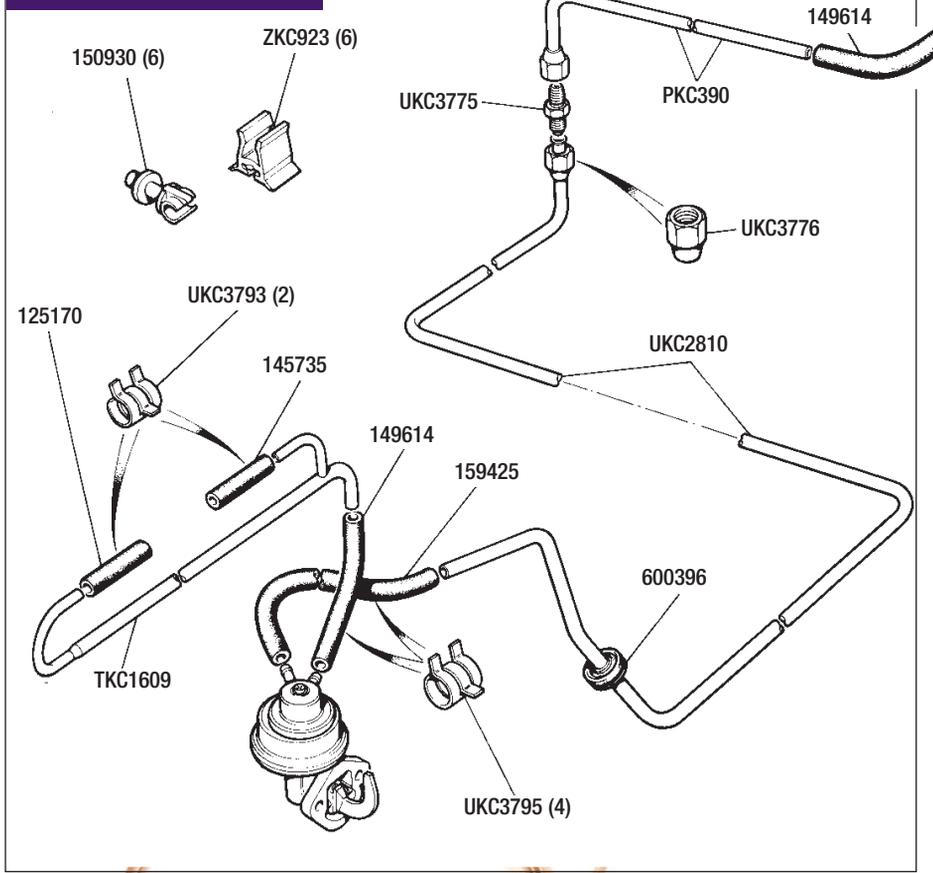

Description Qty Req. Part No.

Fuel Pipes & Fittings

- Fuel Pipe Kit (1) **RB7112**
Complete Kit from Tank to Carb's inc; copper pipe, unions & clips.
- Fuel Hose Kit (1) **RB7001**
Inc rubber hoses & clips for tank, pump and carbs.
- Hose/Connector (to fuel tank) (1) **149614**
- Fuel Pipe-Steel (1) **PKC390**
Tank to main fuel pipe.
- Connector (male/male) (1) **UKC3775**
- Sleeve Nut (1) **UKC3776**
- Fuel Pipe-Steel (1) **UKC2810**
Main fuel pipe, underside of vehicle.
- Clip (Fuel pipe to body) (6) **ZKC923**
- Grommet (1) **600396**
- Hose/Connector (1) **159425**
Main pipe to pump.
- Clamp (Hose to pipe) (4) **UKC3795**
- Hose/Connector (1) **149614**
Pump to carburettor feed pipe.
- Feed Pipe (to carburettors) (1) **TKC1609**
- Clip (6) **150930**
Fuel pipe to air cleaner.
- Clamp (Pipe to hose) (2) **UKC3793**
- Hose/Connectors; (1) **125170**
Feed pipe to carb's.
- Front Carburettor (1) **125170**
- Rear Carburettor (1) **145735**

EXHAUST FITTING KITS, BRACKETS & MOUNTING.

Description Qty Req. Part No. Description Qty Req. Part No. Description Qty Req. Part No.

Stainless Steel Exhaust Systems - Standard

Exhaust System (Stainless steel)
Includes front pipe, silencer, & tail pipe.

- with Standard Tailpipe (1) **RB7015**
- with Large Bore Tailpipe (1) **RB7015LB**
- Fitting Kit (1) **RB7015FK**
- Includes all items marked * under Mild Steel Exhaust System & Components
- Front Pipe (1) **GEX1599SS**
- Centre Silencer (1) **GEX3550SS**
- Rear Tail Pipe
- Standard Tail Pipe (1) **GEX3673SS**
- Large Bore Tail Pipe (1) **GEX3673LBSS**

GUARANTEED FOR LIFE
All our Stainless Steel Exhausts have a Lifetime Guarantee.

Please refer to 'warranties' in our latest price guide for full details.

WHY NOT UPGRADE YOUR STANDARD EXHAUST TO STAINLESS STEEL? EXHAUST SYSTEM RB7015.

Sports Stainless Steel Exhaust Systems

Sports Exhaust System inc Manifold
Including stainless steel tubular manifold.

- RHD Vehicles (1) **RB7021**
- LHD Vehicles (1) **RB7021LHD**
- Fitting Kit (1) **RB7021FK**
- Includes clamps, rear hanger, support rings, manifold gaskets & jointing compound.

Sports Exhaust System (1) **RB7049**
Less stainless steel tubular manifold.
System couples directly to our Tubular Sports Manifold, or can be adapted to fit Standard Front Pipe using adaptor sleeve.

- Adaptor Sleeve (1) **RB7024**
Allows sports system to couple to standard front pipe.
- Fitting Kit (For RB7049) (1) **RB7049FK**
Includes clamps, rear hanger, support rings & jointing compound.

LARGE BORE STAINLESS STEEL SPORTS EXHAUST SYSTEM. COMPLETE KIT RB7021 & EXHAUST FITTINGS (RB7021FK).

IMPORTANT NOTE:
When fitting Sports Exhaust System and/or 'K & N' Air Filters, the carb metering needles may need to be changed, and/or the carbs re-adjusted. Refer to Fuel System, Carburettor Components.

OUR SPORTS EXHAUST TUBULAR MANIFOLD IS AVAILABLE IN STAINLESS STEEL.

Tubular Manifold Stainless Steel

Tubular Extractor Manifold - Stainless Steel;
For 8 valve engines only. For TR7 Sprint 16v manifold please refer to Sprint Conversions.

- RHD Vehicles (1) **RB7073SS**
- LHD Vehicles (1) **RB7073SSLHD**
- Gasket Set (1) **RB7006**
Tubular manifold to cylinder head.
- Bolt (Manifold to head) (7) **GHF165**
- Washer-Spring (For GHF165) (7) **GHF333**
- Jointing Compound (a/r) **GCH112**

IMPORTANT NOTE:
When fitting Sports Tubular Manifold and/or 'K & N' Air Filters, the carb metering needles may need to be changed, and/or the carbs re-adjusted. Refer to Fuel System, Carburettor Components.

EXHAUST INSULATING WRAP

Thermo-Tec exhaust insulating wrap reduces under bonnet temperatures by as much as 70%, this increases air intake and exhaust gas velocity which adds performance. Retaining the heat in the exhaust protects you from mechanical burns and it will also help to prevent under bonnet fires. Any electrical components which are close to the manifold will be less prone to heat failure, increasing their life and performance. As an added benefit, under bonnet noise is also reduced! Thermo-Tec contains no asbestos or carcinogens.

The Snap Strap Installation Kit secures Thermo-Tec exhaust insulation wrap to your tubular manifold/s. A stainless steel high temperature material designed better than hose clamps and is easier to use.

Also recommended is Hy-cote paint. This preserves and protects the exhaust wrap after installation. Extra resins and binders seal the pores, toughen the surface and help extend the life of the wrap.

- Exhaust Insulating Wrap - 2" x 50' (1) **RX1382**
- Snap Strap Exhaust Wrap Installation Kit (1) **RX1383**
- Hy-Cote Paint, Aerosol (400ml) (1) **RX1432**
Available in black or aluminium.

CATALOGUE INFORMATION
GEARBOXES
 To help you identify and order the correct parts easily and quickly, we have listed 4 speed manual, 5 speed manual, and automatic gearboxes separately, along with their relative components and ancillaries.

Manual Gearbox

4 Speed Manual

Gearbox (Reconditioned)	(1)	UKC4023R
<i>Note: Gearbox is supplied Less bellhousing, speedo pinion & housing, reverse light switch, and the 3 (small) front lower tension springs, which fit between the casing and bellhousing.</i>		
Bellhousing	(1)	UKC1984
Spring-Tension (3)	(3)	137532
<i>Bellhousing to gearbox casing.</i>		
Gasket	(1)	UKC4128
<i>Bellhousing to gearbox casing.</i>		
Gearbox Mounting	(1)	TKC1044
Unipart EP90 Gear Oil (0.5 litre)	(a/r)	GGL190
<i>Gearbox capacity - 1.1 Litre.</i>		

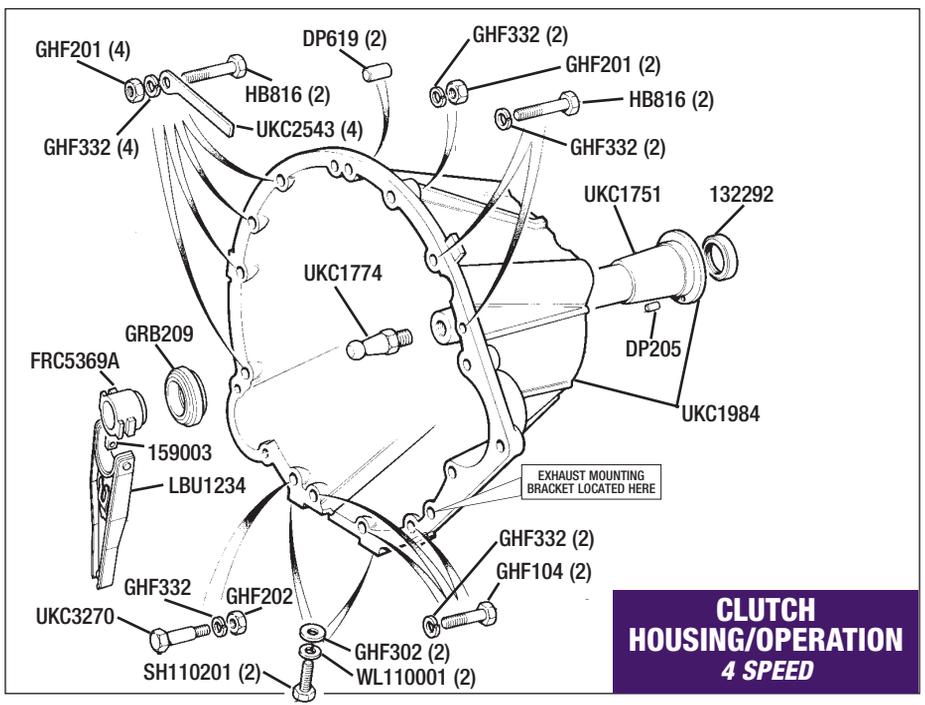

Description Qty Req. Part No. Description Qty Req. Part No.

Clutch Housing/Operation

4 Speed Manual
 See also; ENGINE & CLUTCH-Clutch Pedal & Mounting.

Bellhousing	(1)	UKC1984
Clutch Operating Lever**	(1)	LBU1234
Slipper Pad	(2)	159003
Carrier/Sleeve**	(1)	FRC5369A
<i>Clutch release bearing carrier.</i>		
<i>**NOTE: on early vehicles LBU1234 and FRC5369 MUST be fitted as a pair.</i>		
Clutch Release Bearing	(1)	GRB209
Fulcrum Pin (Clutch operating lever)	(1)	UKC1774
Bolt	(4)	HB816
Cable Tie	(4)	UKC2543
Washer-Spring	(4)	GHF201
Nut	(4)	GHF201
Dowel	(1)	DP619
Nut	(2)	GHF201
Washer-Spring	(2)	GHF332
Bolt	(2)	HB816
Washer	(2)	GHF332
Front End Cover (Oil seal housing)	(1)	UKC1751
Dowel	(1)	DP205
Oil Seal (Front end cover)	(1)	132292
Bolt	(1)	BH605141
<i>Locates exhaust mounting bracket.</i>		
Washer-Spring (For BH605141)	(1)	GHF332
Washer-Flat (For BH605141)	(1)	GHF301
Bolt	(3)	GHF104
Washer-Spring	(3)	GHF332
Setscrew	(2)	SH110201
Washer-Spring	(2)	WL110001
Washer-Flat	(2)	GHF302
Bolt (Special)	(1)	UKC3270
Washer-Spring	(1)	GHF332
Nut	(1)	GHF202

RELATED COMPONENTS

If you are installing a 4 speed gearbox you may also require the following items;
 Gasket (bellhousing to gearbox), Tension Springs (3), Oil Seal (bellhousing), Gearbox Mounting, Reverse light Switch.
 It is also worth checking the condition of the Clutch Cover, Plate & Release Bearing.

Gasket Set & Overhaul Kit

4 Speed Manual
 Not Illustrated.

Gasket Set	(1)	RB7069
<i>Includes bellhousing, top cover, and rear casing gaskets.</i>		
Gearbox Overhaul Kit	(1)	RB7075
<i>Includes items marked + in the following sections, ie: countershaft, front & rear countershaft washers, synchro rings, bearings, circlips, needle rollers, gasket set & rear oil seal.</i>		
Unipart EP90 Gear Oil (0.5 litre)	(a/r)	GGL190
<i>Gearbox capacity - 1.1 Litre.</i>		

4 Speed Gearbox & Re-fitting the Bellhousing

There are 2 very important points to note when re-fitting the bellhousing to the gearbox;

- 1) Ensure the 3 tension springs (137532) are inserted in the front lower section of the gearbox casing.
- 2) Ensure the correct length bolts are fitted, if they are too long it may result in them protruding and fouling the internals.

Re-fitting the 4 speed Propshaft

As recommended by British Leyland, when replacing or re-fitting the propshaft on vehicles fitted with 4 speed manual gearbox, the propshaft should be 'reversed', ie CV joint to the rear axle.

Speedo Cable & Drive

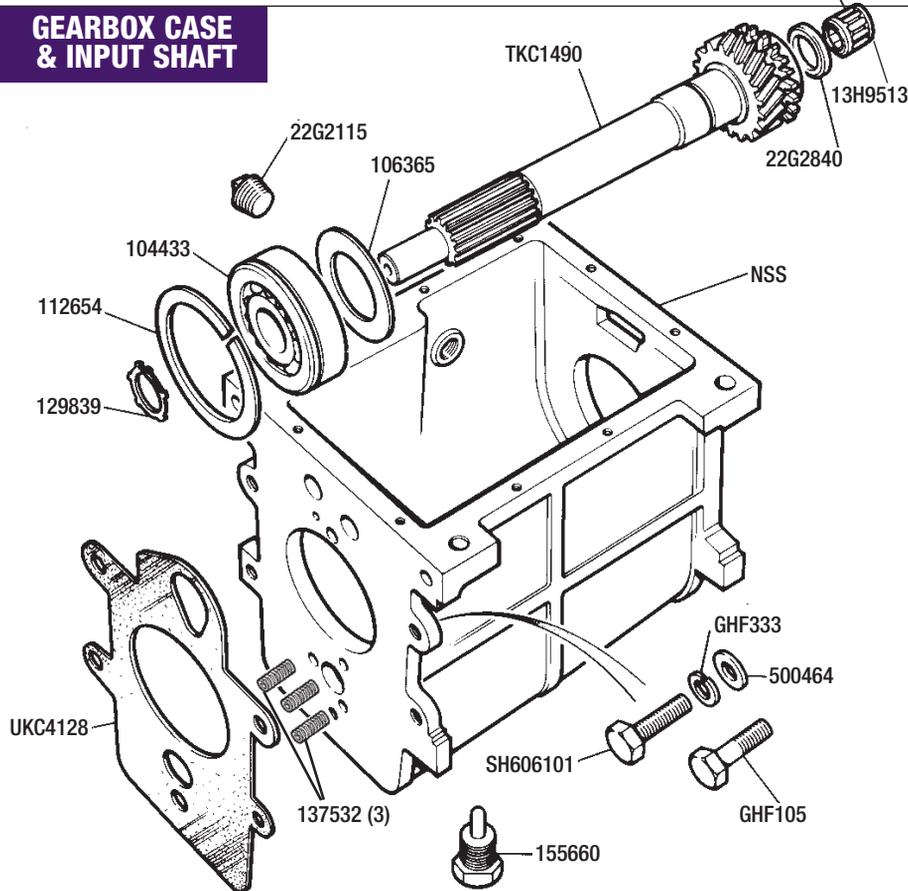

4 Speed Manual
 Not Illustrated.

Speedometer Cable	(1)	GSD287
Speedo Drive Pinion	(1)	219004
<i>23 teeth, colour code-Black.</i>		
'O' Ring/Seal	(1)	TRS1620
Housing/Bearing (Speedo drive pinion)	(1)	22G1486
Oil Seal (Speedo drive pinion)	(1)	NKC105A

REAR GEARBOX EXTENSION

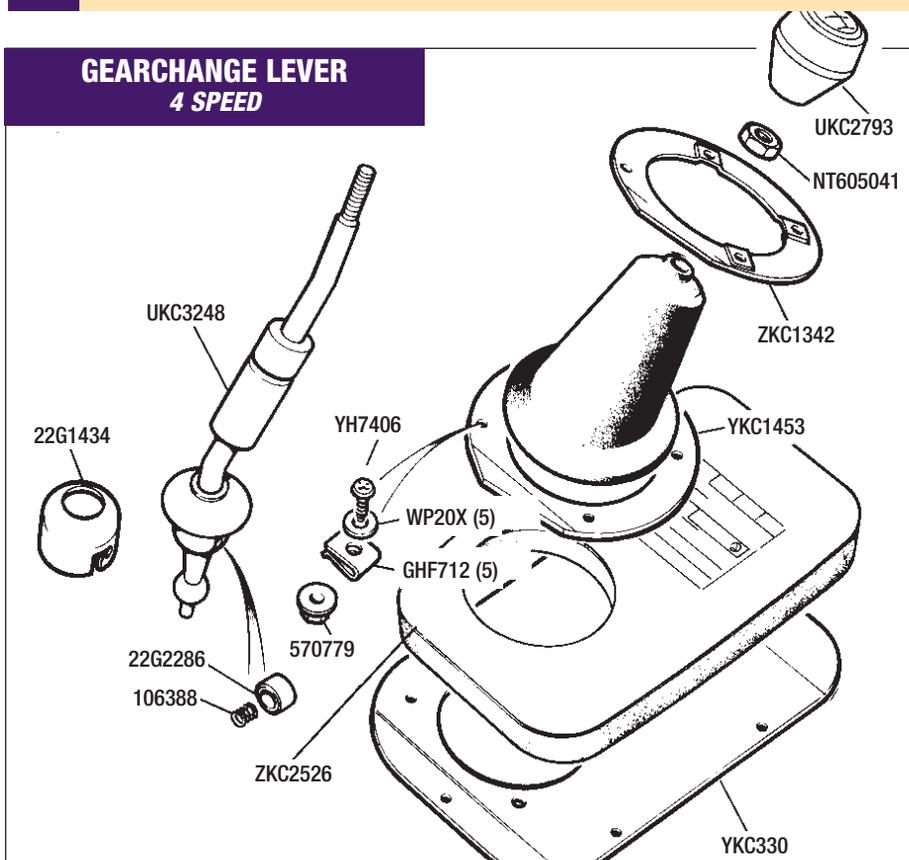

TECHNICAL JOTTINGS

4 Speed Gearbox & Re-fitting the Rear Casing

Ensure the correct length bolts/setscrews are used when either mating the rear extension to the main casing, or when fitting the exhaust hanger bracket. If the bolts/setscrews are too long it may result in them protruding and fouling the internals.

TECHNICAL TOTTINGS & RELATED COMPONENT

5 Speed Gearbox - Re-builds!

The 5 speed gearbox requires specialist tools & knowledge to dismantle and re-build, and it is normally beyond the ability of the DIY enthusiast, we therefore recommend the fitting of an exchange Gearbox unit. However, we have listed and illustrated the 5 speed gearbox components should you wish to re-build your own gearbox.
If you require further assistance, please contact us with your gearbox number.

If you are installing a Gearbox to your car you may also require the following item; Gearbox Mounting (TKC1044).
It is also worth checking the condition of the Clutch Cover, Clutch Plate & Release Bearing.

5 SPEED RECONDITIONED GEARBOX

Manual Gearbox

5 Speed Manual

Layshaft Service Kit (1) **RTC2562**
 This Factory kit replaces TKC1577 if unavailable. Includes: Laygear cluster (RKC5415), 2 bearings (ULC1796) & 5th speed gear (TKC5317).
NB: if fitting this service kit to vehicles from VIN 402028 onwards, you need to replace 5th gear (RKC5098) on mainshaft with the early type TKC1195.

Layshaft Gear Cluster;

To Gearbox No CL45500C* (1) **TKC1577**
 *Can be replaced by using Layshaft service kit RTC2562, as listed above.
 From Gearbox No CL45501C (1) **RKC5415**
 RKC5415 is included in layshaft service kit RTC2562.

Bearing (Laygear);

To Gearbox No CL45500C (2) **GHB101**
 From Gearbox No CL45501C (2) **ULC1796**
 2 ULC1796 bearings are included in layshaft service kit RTC2562.

Layshaft Gear (5th Speed);

To Gearbox No CL45500C (1) **TKC63**
 If TKC63 is no longer available, use layshaft service kit RTC2562.
 From G/box CL45501C to VIN 402027 **TKC5317**
 TKC5317 is included in layshaft service kit RTC2562.
 From VIN 402028 (1) **RKC5099**

Washer

(1) **UKC1689**

Circlip

(1) **CCN114**

4) Selective Washer

For Layshaft, to gearbox CL22476C

(See separate Panel)

5) Selective Washer

For Layshaft, from gearbox CL22477C

(See separate Panel)

Reverse Idler Gear & Bush

(1) **UKC1644**

Spacer (Reverse Idler)

(1) **UKC683**

Shaft & Pin Assembly

(1) **UKC3152**

TECHNICAL JOTTINGS

Re-fitting the 4 speed Propshaft

As recommended by British Leyland, when replacing or re-fitting the propshaft on vehicles fitted with 4 speed manual gearbox, the propshaft should be 'reversed', ie CV joint to the rear axle.

REAR AXLE ASSEMBLY
4 SPEED MANUAL & EARLY AUTO

Rear Axle Assembly
4 Speed Manual & Automatic to VIN 402000

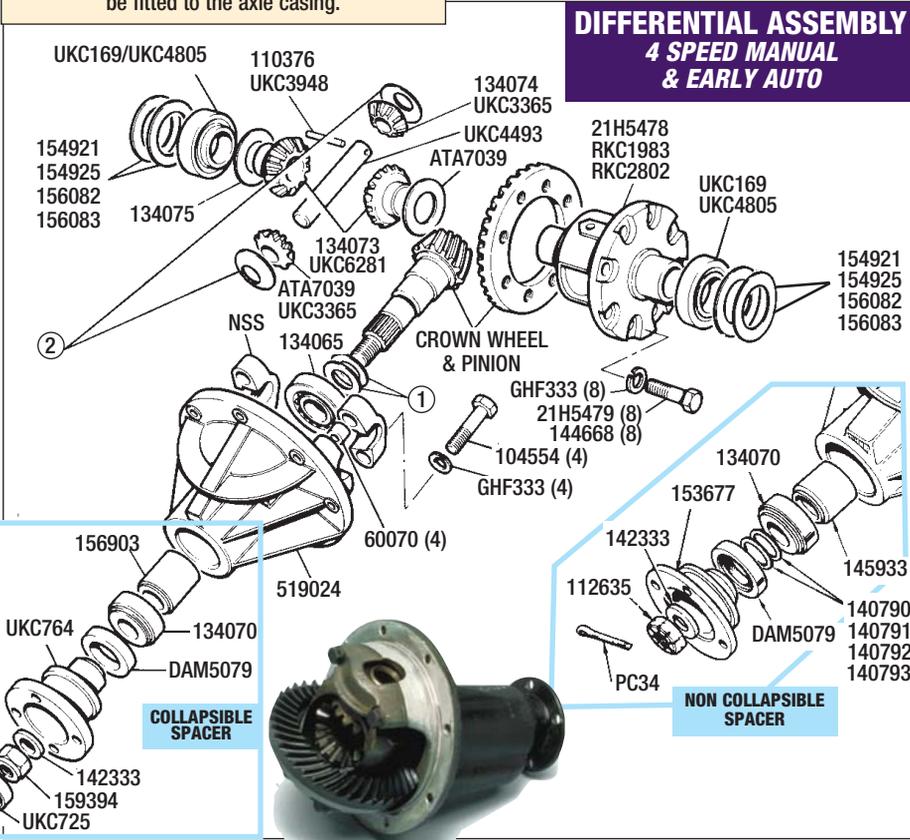

- Rear Axle Assembly (Reconditioned);
New axle casing with diff' unit, less Halfshafts.
- 4 Speed Manual (3.63:1) (1) **UKC6761R**
 - Automatic (3.27:1) (1) **UKC6762R**
 - Unipart EP90 Gear Oil (0.5 litre) (a/r) **GGL190**
- Rear axle capacity - 1.3 Litre.

REAR AXLE & RATIO IDENTIFICATION
The axles & differentials listed in this section, are as originally fitted by the factory to all 4 speed Manual and all Automatics up to VIN 402000. Axles for vehicles with 4 speed manual gearboxes are prefixed 'CG' (diff ratio 3.63:1), and automatic's are prefixed 'CT' (diff ratio 3.27:1). Original factory replacement Differential units were supplied with either 'collapsible' or 'non collapsible' type spacer. Factory specification changes were made (at axle numbers CG51494 & CT2054) to the diff' carrier & planet gear etc, so if you are considering rebuilding your own differential, note that early components cannot be interchanged with the later specification parts. However, if replacing the diff' as a complete unit, then either type may be fitted to the axle casing.

Differential Assembly
4 Speed Manual & Automatic to VIN 402000

- Differential Assembly;
Ready to bolt to axle case, less gasket 114749.
- 4 Speed (New) (3.63:1) (1) **TKC2619**

Rear Axle

5 Speed Manual & Automatic from VIN 402001

Rear Axle (Reconditioned);

5 Speed Manual Less Halfshafts.

3.90:1 Ratio ('CH' prefix) (1) **TKC3553**
Factory recon' unit.

3.90:1 Ratio ('CH' prefix) (1) **TKC3553R**
Rimmer Bros recon' unit.

3.90:1 Ratio ('CH' prefix) (1) **TKC3553R/Ncwp**
Rimmer Bros recon' unit fitted with New Crownwheel & Pinion.

3.45:1 Ratio ('CL' prefix-optional ratio) (1) **ULC3005R**
Rimmer Bros recon' unit.

3.45:1 Ratio ('CL' prefix-optional ratio) **ULC3005R/Ncwp**
Rimmer Bros recon' unit fitted with New Crownwheel & Pinion.

Unipart EP90 Gear Oil (0.5 litre) (a/r) **GGL190**
Rear axle capacity - 1.1 Litre.

Rear Axle (Reconditioned);

Automatic Less Halfshafts.

3.08:1 Ratio ('CM' prefix) (1) **TKC3554R**
Rimmer Bros recon' unit.

3.08:1 Ratio ('CM' prefix) (1) **TKC3554R/Ncwp**
Rimmer Bros recon' unit fitted with new crownwheel & pinion.

Unipart EP90 Gear Oil (0.5 litre) (a/r) **GGL190**
Rear axle capacity - 1.1 Litre.

AXLE ASSEMBLIES WITH STANDARD DIFF' OR QUAIFE LSD UNIT

QUAIFE LSD

Rear Axle & Limited Slip Diff'

(5 Speed Manual & Automatics from VIN 402001)

Rear Axle with New Quaife LSD unit;

Reconditioned axle, less halfshafts.

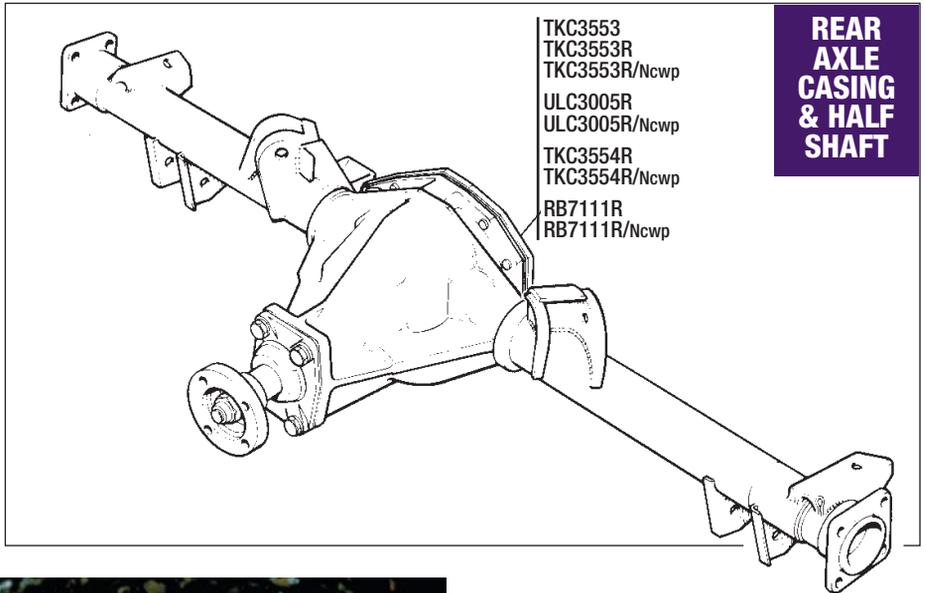

All Models (3.08:1 Ratio) (1) **RB7111R**

All Models (3.08:1 Ratio) (1) **RB7111R/Ncwp**
With new & Crownwheel & Pinion.

Note: we can supply (to special order) 3.90:1 or 3.45:1 ratio axles with LSD unit. Please contact our sales team for details.

Limited Slip Diff' Unit only (Quaife) (1) **RB7003**

Unipart EP90 Gear Oil (0.5 litre) (a/r) **GGL190**
Rear axle capacity - 1.1 Litre.

REAR AXLE CASING & HALF SHAFT

DIFFERENTIAL SERIAL NUMBERS
Where Differential serial numbers (CH, CL & CM) are quoted in the 'Rear Axle' & 'Differential Gear' Sections (to help identify Factory Specification changes), they relate to the Original units as fitted when the vehicle was new, and not subsequent replacements.

DIFFERENTIAL RATIO IDENTIFICATION
Rear Axles & Diff' gears listed in this section, are as originally fitted by the factory to all 5 speed Manual, and all Automatics from VIN 402001.
Axles for vehicles with 5 speed Manual gearboxes are prefixed 'CH' (diff ratio 3.90:1), and 'CL' (optional diff ratio 3.45:1). Automatics are prefixed 'CM' (diff ratio 3.08:1).

ANTI-ROLL BAR

Anti-Roll Bar - Front

- Anti-Roll Bar**
- Standard (1) **RKC30**
 - Upated (1) **RKC30UR**

See also: 'Upated front & rear anti-roll bar kit' - page 53.
Increased roll stiffness (30%) for improved handling.
Powder coated. Uses original mountings (front bushes UKC210 require reaming out from 19mm to 22.5mm).

Anti-Roll Bar Bush Kit;
See also; SUSPENSION PACKAGES-Bush & Bolt Packs.
Kit inc 4 TKC6097 & 2 UKC210 bushes.

- Standard Bushes (1) **RB7045**
 - Upated (Hard) Bushes (1) **RB7045H**
 - Poly Bushes (1) **RB7045P**
- Anti-Roll Bar Bolt Kit** (1) **RB7348**

Kit includes all items marked +.
See also; SUSPENSION PACKAGES-Bush & Bolt Packs.
Front 'Anti-Dive' Kit (1) **RB7100**

See also; SUSPENSION PACKAGES- Shock Absorber & Spring Packages.
Kit includes 2 aluminium spacer blocks, extra long bolts (& nuts).
Aluminium blocks fit between subframe & anti-roll bar, to increase resistance of car front end 'diving' under heavy braking. For use with standard roll bar only.

- Mounting Bush;**
- Standard (2) **UKC210**
 - Upated (Hard) (2) **UKC210H**

FRONT LEG KITS - PAIR

These wonderful kits allow you to build up a brand new pair of complete front suspension legs at a significant saving - all new components with the choice of standard, spax, koni or gaz inserts (uprated/lowered road springs are supplied with the spax, koni & gaz kits). Please note that if choosing the spax/koni/gaz inserts/uprated springs option, then you will also require the corresponding rear units (see 'Rear Shock & Spring Kit - following page).

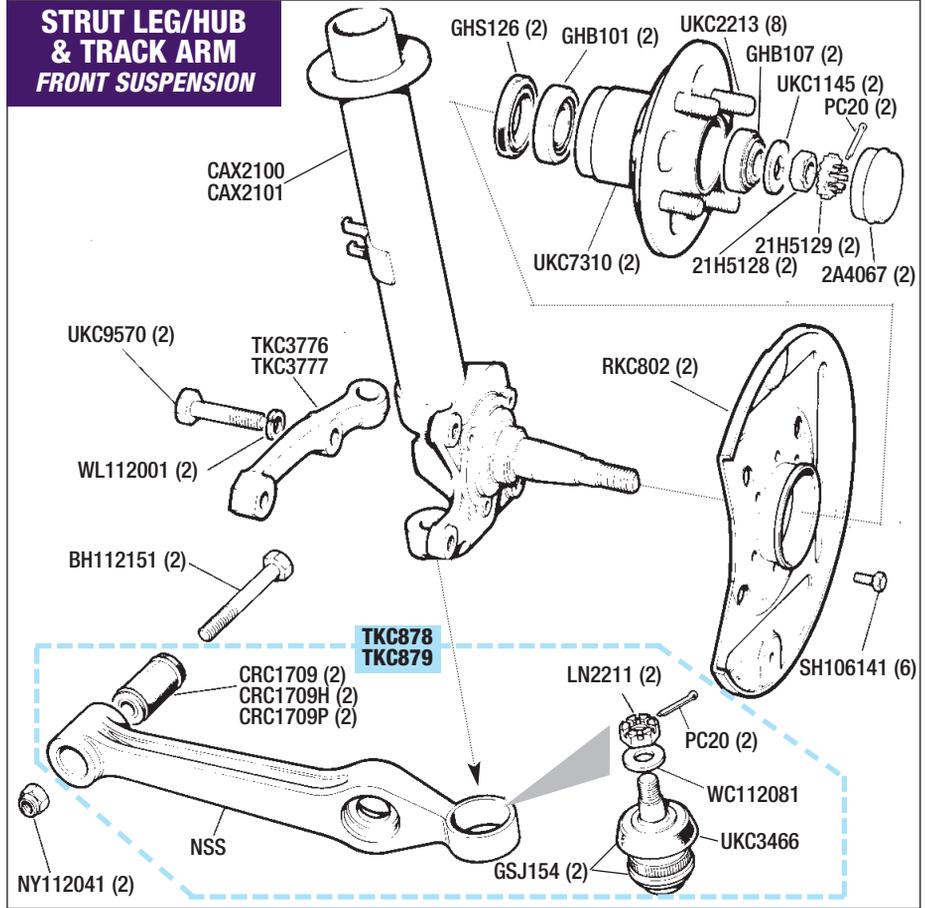

The kits include (all new parts), 1-pair strut legs, inserts, springs, insulators, bump stops, gaiters/ties, spring pans, thrust washers/seals, top mountings, upper spring pan & top dust cover.

Front Leg Kits Complete (pair)

Standard	RB2009
Spax (Upated - non adjustable)	RB2009SPAX
Spax (on car adjustable)	RB2009SPAXTA2
Koni (off car adjustable)	RB2009KONI
Gaz (on car adjustable)	RB2009GAZ

Description Qty Req. Part No. Description Qty Req. Part No.

STRUT LEG/HUB & TRACK ARM FRONT SUSPENSION

Strut Insert & Spring

Front Suspension

Strut Insert (Shock absorber);
SAFETY NOTE: we recommend fitting strut inserts in pairs.
See also; 'Shock Absorber & Spring Packages'.

Standard Insert (each)	(2)	GSA2024
Spax Insert (Heavy Duty) (each)	(2)	GSA2024S
Spax Insert TA2 (pair)	(1)	GSA2024STA2
On Car Adjustable.		
Koni Insert (pair)	(1)	GSA2024K
Off Car Adjustable.		
Gaz Insert (pair)	(1)	GSA2024G
On Car Adjustable.		

Front Spring;

See also; 'Shock Absorber & Spring Packages'.
Standard (Fit in pairs) (2) **TKC1328**
Upated (2) **TKC1328UR**
Upated to 200lb, 1" lowered ride height. Bump stop should be shortened when fitting lowered front springs. Upated springs should only be fitted in vehicle sets, 2 front & 2 rear.

Spring Compressor Tool	(1)	RX1328
Spring Insulator Rubber (Upper)		
Standard	(2)	UKC5615
Poly	(2)	UKC5615P
Spring Insulator Rubber (Lower)		
Standard	(2)	UKC628
Poly	(2)	UKC628P
Strut Gaiter	(2)	UKC4981
Tie Strap (Gaiter)	(2)	BMK1900
Bump Stop	(2)	UKC1101

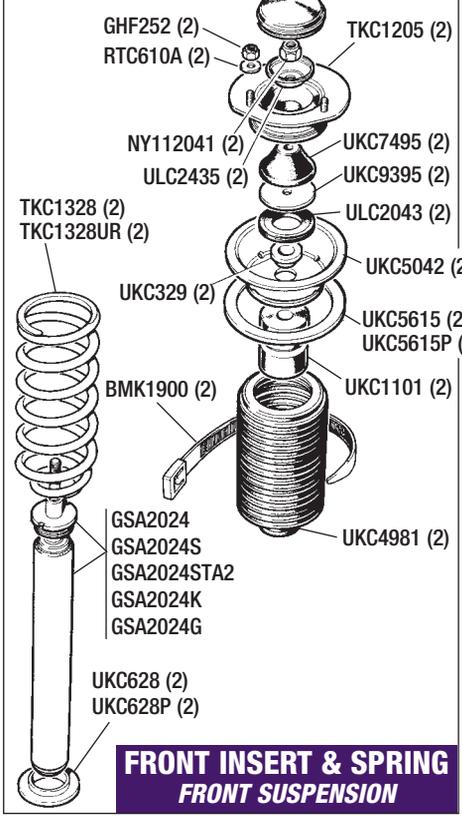

Bump stop UKC1101 should be shortened when fitting TKC1328UR lowered springs.

Spring Pan-Upper	(2)	UKG5042
Needle Roller Bearing Kit	(1)	RB7709

Car Set. Allows strut to pivot on needle bearings allowing smooth rotation. Will not seize! Kit replaces thrust washers (UKC9395), thrust collars (UKC329) & sealing washers (ULC2043).

Thrust Collar (Nylon)*	(2)	UKC329
Sealing Washer (Rubber)*	(2)	ULC2043
Thrust Washer (Steel)*	(2)	UKC9395

ANTI-DIVE KIT

Kit includes
2 aluminium spacer blocks, extra long bolts (& nuts).

Aluminium blocks fit between subframe & front anti-roll bar to increase resistance of car front end 'diving' under heavy braking. For use with standard front anti-roll bar only.

FRONT 'ANTI-DIVE' KIT (1) RB7100
Why not fit this Anti-Dive Kit with one of our up rated Suspension packs?

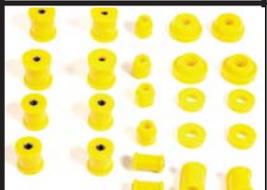

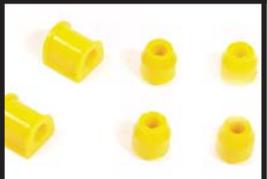

UPRATED FRONT & REAR ANTI-ROLL BAR KIT

Transform the handling of your TR7 or TR8 by fitting a pair of up rated anti-roll bar's. Increased roll stiffness (30%) and powder coated for meaningful appearance. Kit is supplied complete with polyurethane mounting bushes (UKC210 front bushes require reaming out from 19mm to 22.5mm) and mounting kit.

UPRATED FRONT & REAR ANTI-ROLL BAR KIT (1) RB7695
Includes front & rear roll bars, polyurethane mounting bush kit and mounting bolt kit.

Wheel Nut only (16) **RB7349**

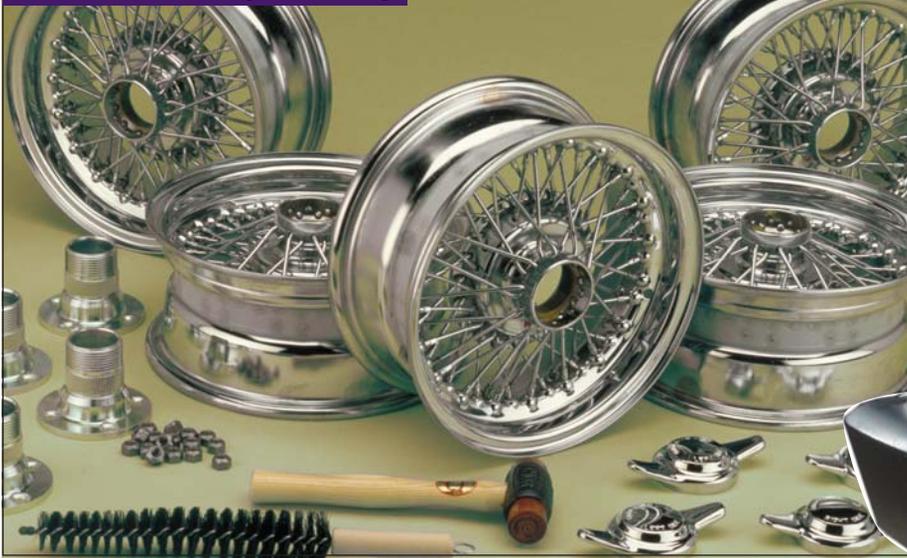

Wheel Centre only (plain) (4) **RL1472**

Badge - Triumph (stick-on) (4) **RL1472B**

Autoglym 'Clean Wheels' (300ml) (A/R) **RX1322**

WIRE WHEELS (CHROME)

GO ON - BE DIFFERENT!

Why not fit a set of our Chromed Wire Wheels.

Wire wheels are available with either 'Eared' knock caps or 'Octagonal' centre knock caps.

OPTIONAL OCTAGONAL CENTRE LOCK NUTS

Wire Wheels (Chrome)

Chrome Wire Wheel Set with -

'2 Eared' Chromed Knock Caps (1) **RB7005**

Set inc 5 wheels (5.5J x 13" - 60 spoke),
4 splines, 4 '2 eared' knock caps,
16 nuts, cleaning brush & hammer.
Eared caps not allowed in all countries.

'Octagonal' Chromed Knock Caps (1) **RB7383**

Set inc 5 wheels (5.5J x 13" - 60 spoke),
4 splines, 4 octagonal knock caps,
16 nuts, cleaning brush & spanner.

FITTING WIRE WHEELS

When fitting Wire Wheels it is important that you check the length of the wheel studs (and shorten if necessary) to ensure they do not stand proud of the Hub Adaptors and foul the backs of the wheels.

Please read the fitting instructions supplied.

Hub Adaptor/Spline (Bolt on);

Right Hand (2) **RSSPR**

Left Hand (2) **RSSPL**

Description	Qty Req.	Part No.	Description	Qty Req.	Part No.	Description	Qty Req.	Part No.
-------------	----------	----------	-------------	----------	----------	-------------	----------	----------

UPRATED BRAKE KIT (FRONT)

We now supply one type of front Up-rated Brake Kit (RB7117) for all TR7 & TR8 conversion applications. This utilises large calipers derived from the Rover SD1 Vitesse and adapted for use with special vented brake discs suitable for mounting to the 4-stud TR7 hub. This kit **cannot** be used with standard TR7 (13") wheels because of insufficient running clearance inside the wheel due to the larger calipers. It is therefore necessary to fit a minimum 14" diameter wheel (see 'Roadwheels' for details on our Minilite Replica Wheel Sets) with this kit.

For our long standing customers who have previously purchased an up-rated brake kit (solid or vented) using the smaller 4 - pot calipers (RB7090 or RB7137) - retaining the 13" wheels - then we still supply service items for these kits (eg discs, pads, caliper repair kit etc) as listed below.

UPRATED BRAKE KIT

This kit is comprised of components derived from the Rover Vitesse, adapted to fit the standard TR7 4-stud hub, it includes:
 2 vented brake discs, 2 large '4-pot' calipers, brake pads, 2 braided brake hoses, fittings & instructions.

Up-rated Brake Kit (1) **RB7117**
 This kit cannot be used with standard 13" TR7 wheels, minimum 14" wheels must be used for internal clearance. See Road Wheels section for details of 14" Minilite (Replica) wheel sets.

REAR DRUM BRAKES 4 SPEED & EARLY AUTO

5 SPEED & LATE AUTOMATIC

Automatics from VIN402001.
9" x 1 3/4"

- Brake Drum;
 - New (2) **RKC1818**
 - Reconditioned (2) **RKC1818R**
- Screw (Drum Retaining) (2) **800007**
- Back Plate (Rh) (1) **AAU2214**
- (Lh) (1) **AAU2215**
- Bolt (Backplate to axle) (8) **SH110281**
- Nut (For SH110281) (8) **GHF233**
- Brake Shoe Set (Per car) (1) **GBS813**
- Front/Rear Brake Kit (Standard)
 - Standard TR7 (1) **RB7076**
 - Upated TR7 Discs/Pads (1) **RB7076UR**
 - Standard Shoes.
- Brake Shoe Adjusting Kit (1) **AAU8994**
- Spring (Brake shoe Pull-Off);
 - Upper (Rh) (1) **AAU6241**
 - (Lh) (1) **AAU6242**
- Tension Spring (2) **AAU6247**
- Spring - Lower (Brake shoe Pull-Off); (2) **AAU2210**
- Pin (Brake shoe retaining) (4) **518724**
- Spring (For 518724) (4) **606747A**
- Cup/Seat (For 518724) (4) **27H8426**

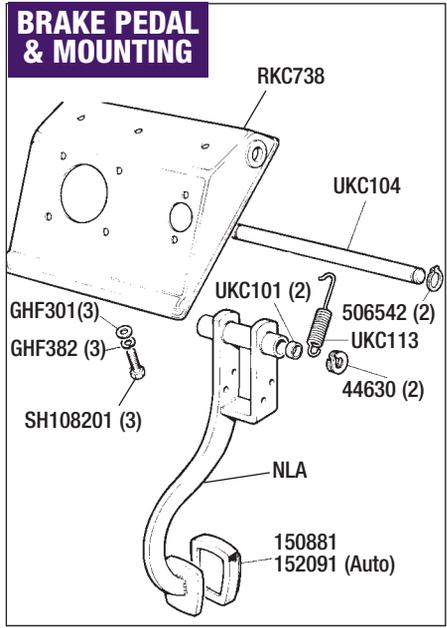

REAR DRUM BRAKES 5 SPEED & LATE AUTO

- Brake Shoe Retaining Kit (1) **RB7274**
- Per car & includes; 4 pins, 4 springs & 4 cup/seat.
- Operating Lever-Handbrake (Rh) (1) **AAU2212**
- (Lh) (1) **AAU2213**
- Wheel Cylinder (2) **GWC1212**
- Inc retaining circlip & bleed nipple.
- Cylinder Repair Kit (Kit is per cylinder.) (2) **GRK2004**
- Gasket (Cylinder to back plate) (2) **37H4642**
- Circlip (Cylinder to back plate) (2) **17H7949**
- Bleed Screw (2) **RTC1526A**
- Dust Cover (2) **17H8057**
- Brake Hose (Flexible);
 - Standard (1) **GBH219**
 - Stainless Steel (Braided) (1) **GBH219GR**
- Nut-Locking (For brake hose) (1) **FAM3658**
- Washer-Shakeproof (1) **WE110001**
- Washer-Flat (1) **WB110061**
- Brake Fluids;
 - Standard (Dot 3) (1 Litre) (a/r) **GBF103**
 - Silicone (0.5 Litre) (a/r) **RX1327**
 - Silicone (1 Litre) (a/r) **RX1326**

Silicone (0.5 Litre)	(a/r)	RX1327
Silicone (1 Litre)	(a/r)	RX1326

SILICONE BRAKE FLUID

Unlike normal brake fluids, Silicone fluid does not absorb moisture, so avoiding corrosion in the system. Under strenuous braking conditions it tends not to 'Boil', and it does not harm paintwork if spilt. Note; before filling with Silicone brake fluid, the entire brake hydraulic system should be flushed out.

FLUIDS SHOULD ALSO BE CHANGED!

Brake Hydraulic System

Pipes/Hoses/Valve (All Models)

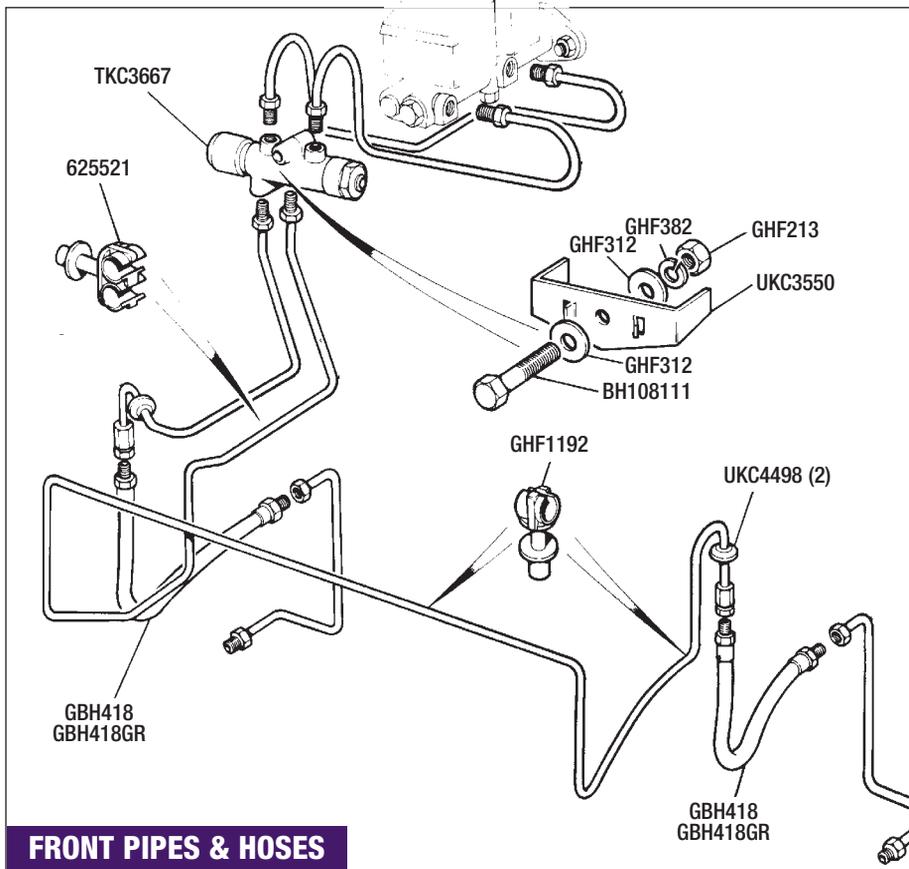

Although we have illustrated the brake hydraulic system (to show the pipe/hose arrangement, and how it relates to the vehicle), we generally only supply brake pipes as complete kits, which are listed here.

FRONT BRAKE PIPES & HOSES

Brake Pipe Kit (Copper);

Car set; includes all brake pipes fully made-up to correct length.

RHD Vehicles	(1)	RB7146
LHD Vehicles	(1)	RB7140
'Pressure Reducing' Valve	(1)	TKC3667
Bracket (Valve Mounting)	(1)	UKC3550
Bolt (Bracket mounting)	(1)	BH108111
Washer-Flat	(2)	GHF312
Washer-Spring	(1)	GHF382
Nut		GHF213
Brake Hoses-Front (Flexible);		
Standard	(2)	GBH418
Stainless Steel (Braided)	(2)	GBH418GR
Nut-Locking (For brake hose)	(2)	FAM3658
Washer-Shakeproof	(2)	WE110001
Washer-Flat	(2)	WB110061
Grommet	(2)	UKC4498
<i>Located in body to protect pipes.</i>		
Clip-Brake Pipe* (Double)	(a/r)	625521
Clip-Brake Pipe* (Single)	(a/r)	GHF1192
<i>*Use as required.</i>		
Brake Fluids;		
Standard (Dot 3) (1 Litre)	(a/r)	GBF103
Silicone (0.5 Litre)	(a/r)	RX1327
Silicone (1 Litre)	(a/r)	RX1326
Brake Cleaner (Unipart-aerosol)	(a/r)	GBF901

FRONT PIPES & HOSES

REAR BRAKE PIPES & HOSE

Brake Pipe Kit (Copper);

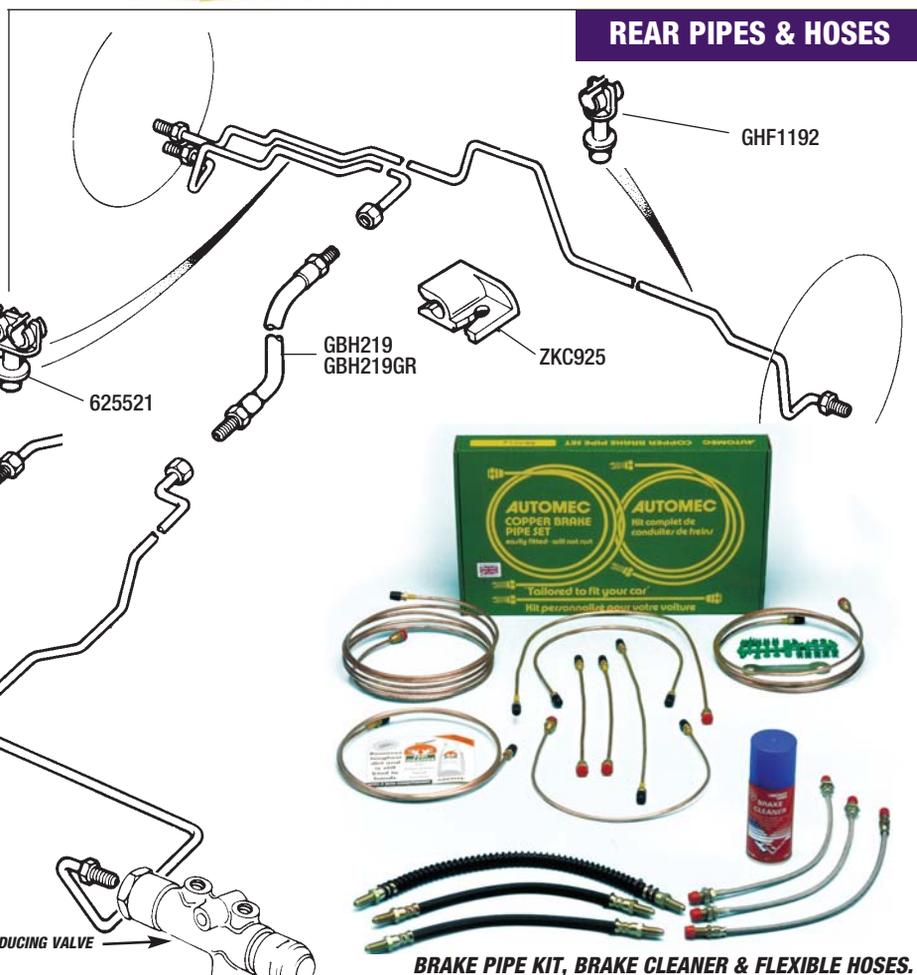

Car set; includes all brake pipes fully made-up to correct length.

RHD Vehicles	(1)	RB7146
LHD Vehicles	(1)	RB7140
Brake Hose-Rear (Flexible);		
Standard (1)		GBH219
Stainless Steel (Braided)	(1)	GBH219GR
Nut-Locking (For brake hose)	(1)	FAM3658
Washer-Shakeproof	(1)	WE110001
Washer-Flat	(1)	WB110061
Clip-Brake Pipe		ZKC925
<i>Clip is fixed to floor pan.</i>		
Clip-Brake Pipe (Double)	(a/r)	625521
Clip-Brake Pipe (Single)	(a/r)	GHF1192
Pipe Connector (Female/Female)	(1)	UKC8430
<i>If fitted.</i>		
Brake Fluids;		
Standard (Dot 3) (1 Litre)	(a/r)	GBF103
Silicone (0.5 Litre)	(a/r)	RX1327

- +Threaded end rack mounting.

STANDARD TR7

- Steering Wheel (Standard UK Spec) (1) **RKC2110**
UK Vehicles to VIN402000.
Also fitted to USA spec' vehicles.
- Centre Boss (Standard UK Spec) (1) **UKC3016**
UK Vehicles to VIN402000.
- Centre Boss (USA Spec) (1) **RKC82**
Fitted to USA vehicles with RKC2110.
- Screw* (3) **SE105201**
- Washer-Spring* (3) **WM105001**
- *Locates Boss RKC82 to wheel, USA Spec only.
- Steering Wheel (Standard UK Spec) (1) **PKC1551**
UK Vehicles from VIN402001.
- Centre Badge ('Triumph') (1) **ULC3153**
UK Vehicles from VIN402001.

STANDARD TR8

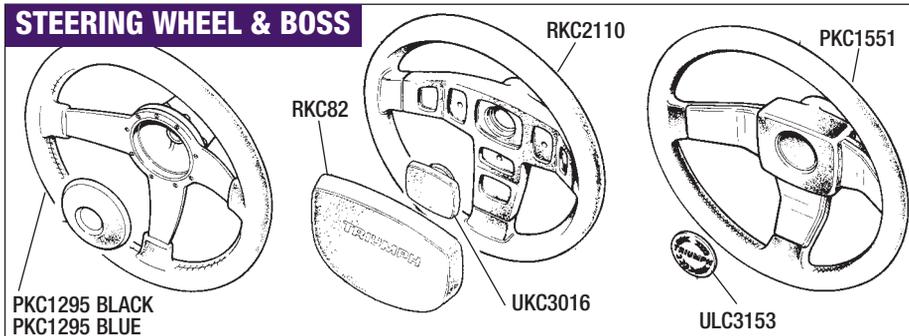

- TR8 Steering Wheel (Original spec);
Leather (Moto-Lita) wheel. Fits all models.
Complete with Boss & Wheel Centre.
- 1) Black Leather (1) **PKC1295Black**
- 2) Blue Leather (1) **PKC1295Blue**

AFTERMARKET TR7 & TR8

- Moto-Lita Steering Wheel & Boss;
3-spoke (drilled & polished), 13" dia, dished.
- 3) Wood-Rimmed (1) **RB7698**
- 4) Leather-Rimmed (1) **RB7699**
- Mountney Steering Wheel & Boss;
13" dia, semi-dished.
- 5) Wood-Rimmed (1) **RL1467**

- Shim (1) **UKC6163**
- Heat Shield (1) **UKC3492**

STARTER MOTOR IMMOBILISER

HOW DOES 'DIS-CAR-NECT' WORK?

When leaving your car, simply remove the knob to isolate the starter circuit. The 16 amp by-pass fuse will maintain current to all other electrical circuits (stereo memories, alarm etc). Because the starter motor draws over 150 amp's, any attempt to connect (hot wire) the starter motor will instantly cause the fuse to blow. This immobilises the car until the knob is replaced. If this should happen, simply replace the 16 amp fuse at a convenient time.

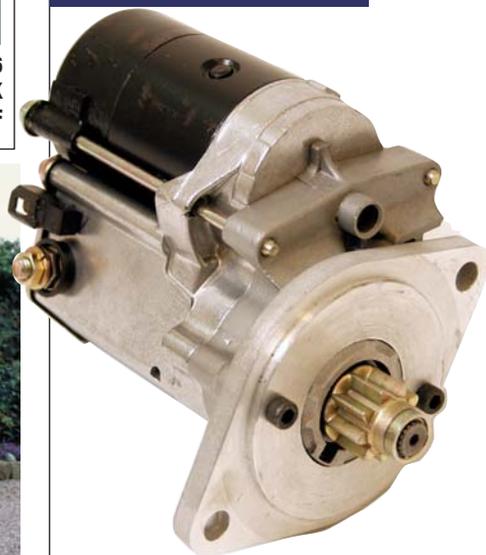

As an added advantage, the 'Dis-Car-Nect' will also prevent battery drain if you intend to store your car, simply unscrew the knob and remove the fuse. For extra security, unscrew and remove the immobiliser knob completely.

A SIMPLE WAY TO PREVENT YOUR CAR BEING STOLEN BY HOT WIRING.

- 'Dis-Car-Nect' Immobiliser (1) **RX1356**
- Replacement Screw Knob (1) **RX1356K**
- Replacement Fuse (1) **RX1356F**

UPRATED HI-TORQUE STARTER MOTOR

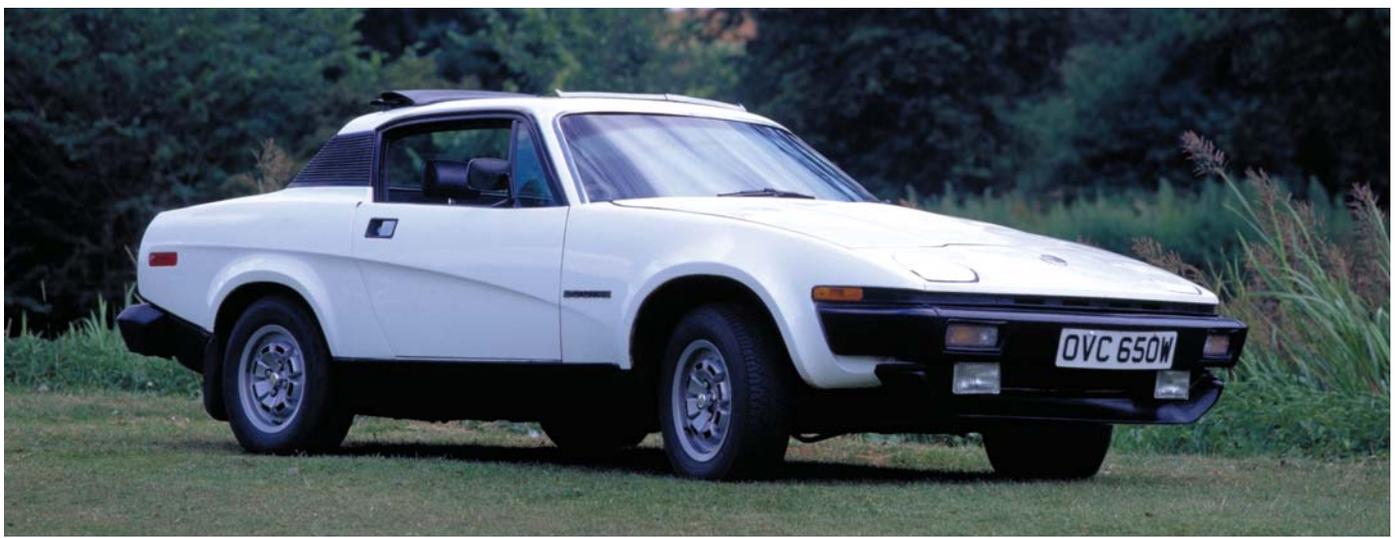

Fits as direct replacement. Starts engines regardless of compression or temperature. Up to 200% more cranking power using up to 50% less current. No exchange required.

TR7 Uprated Hi-Torque Starter Motor (1) **GEU4471UR**

- Dowel Pin (1) **517914**
- Vacuum Unit (1) **516867**
- Vacuum Pipe (1) **UKC2110**
- Rubber Elbow (for pipe) (2) **128262**
- Bolt (Distributor to block) (2) **GHF117**
- Washer-Spring (2) **GHF331**
- Washer-Flat (2) **WC701121**
- 'O' Ring Distributor Body (1) **517913**

ELECTRONIC IGNITION KITS;

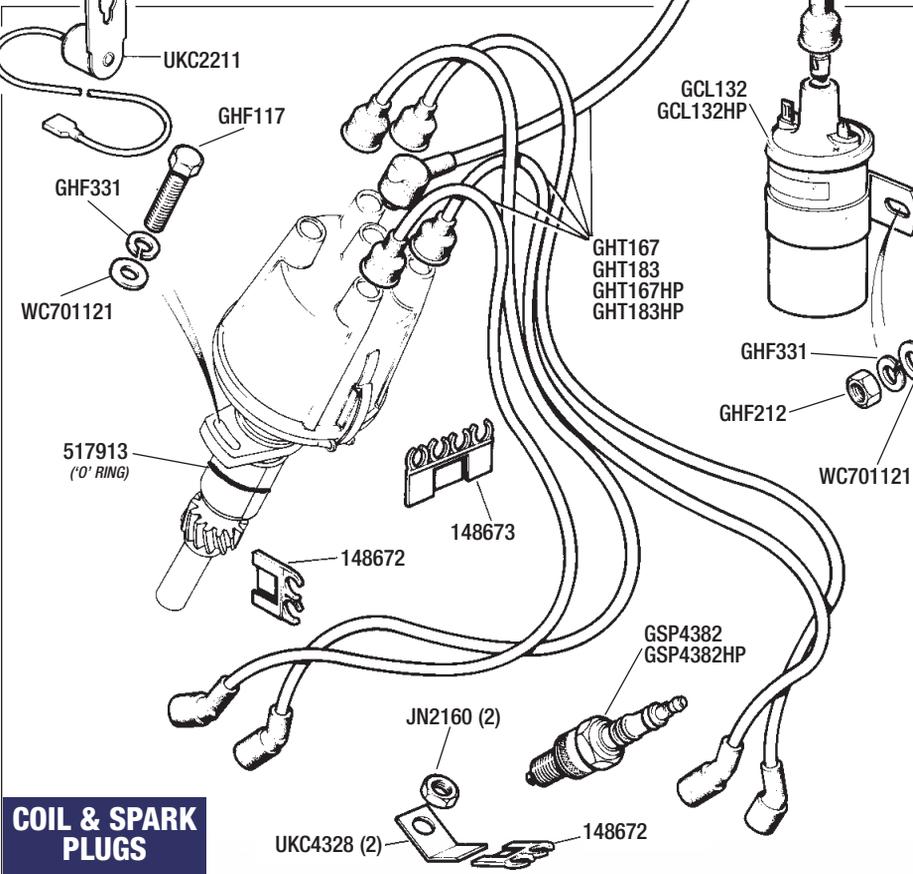

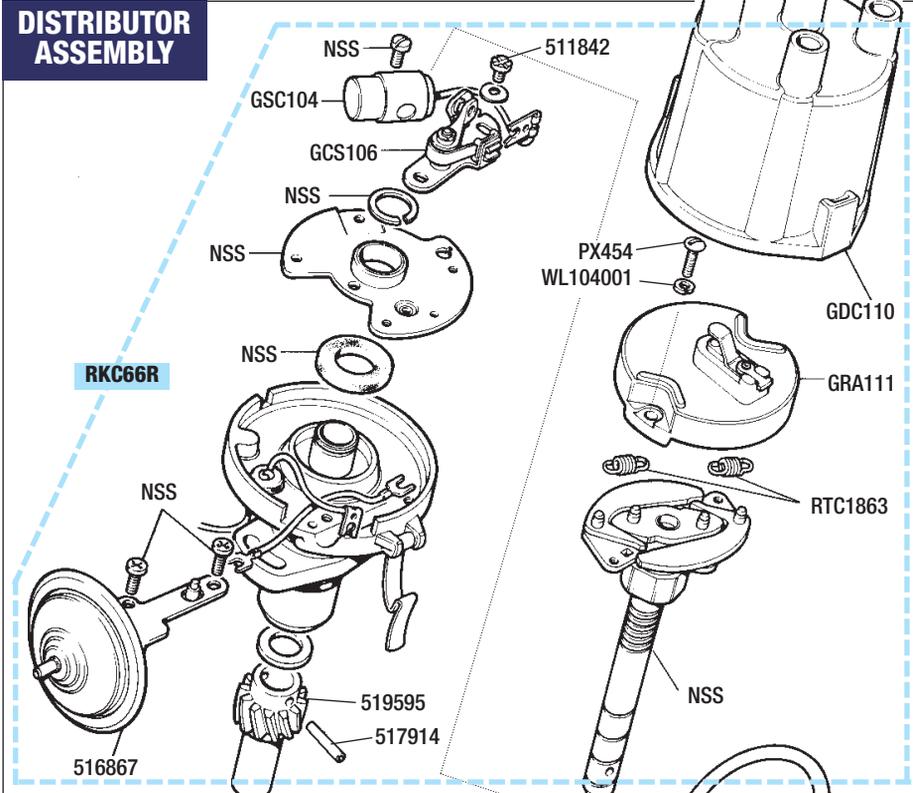

Both kits offer maintenance free ignition systems (in place of contact points), with improved performance and fuel economy.

- Lumenition Electronic Ign Kit (1) **RB7133**
- Newtronic Electronic Ign Kit (1) **RB7168**

PLUGS/LEADS/COIL

- Spark Plugs;
 - Standard (4) **GSP4382**
 - High Performance (4) **GSP4382HP**
- Spark Plug Spanner (1) **GAT140**
- Plug Lead Set (Standard);
 - To VIN 200000 (41 cm coil lead) (1) **GHT167**
Coil mounted on bulkhead.
 - From VIN 200001 (71 cm coil lead) (1) **GHT183**
Coil mounted on Rh inner wing.
- Plug Lead Set (High performance);
 - Silicone leads.
 - To VIN 200000 (41 cm coil lead) (1) **GHT167HP**
Coil mounted on bulkhead.
 - From VIN 200001 (71 cm coil lead) (1) **GHT183HP**
Coil mounted on Rh inner wing.
- Clip-Plug Lead (1) (Holds 4 cables) (1) **148673**
- Clip-Plug Lead (Holds 2 cables) (2) **148672**
- Bracket (For 148672 clips) (2) **UKC4328**
- Nut (For UKC4328) (2) **JN2160**
- Ignition Coil;
 - Standard (1) **GCL132**
 - High Performance (1) **GCL132HP**
- Suppressor (Ignition coil) (1) **UKC2211**
Radio anti-interference.
- Coil Mounting;
 - Nut (2) **GHF212**
 - Washer-Spring (2) **GHF331**
 - Washer-Flat (2) **WC701121**
 - Bracket (1) **TKC5632**
Not Shown.

Headlamp Lift System

Headlamp Lift Motor;

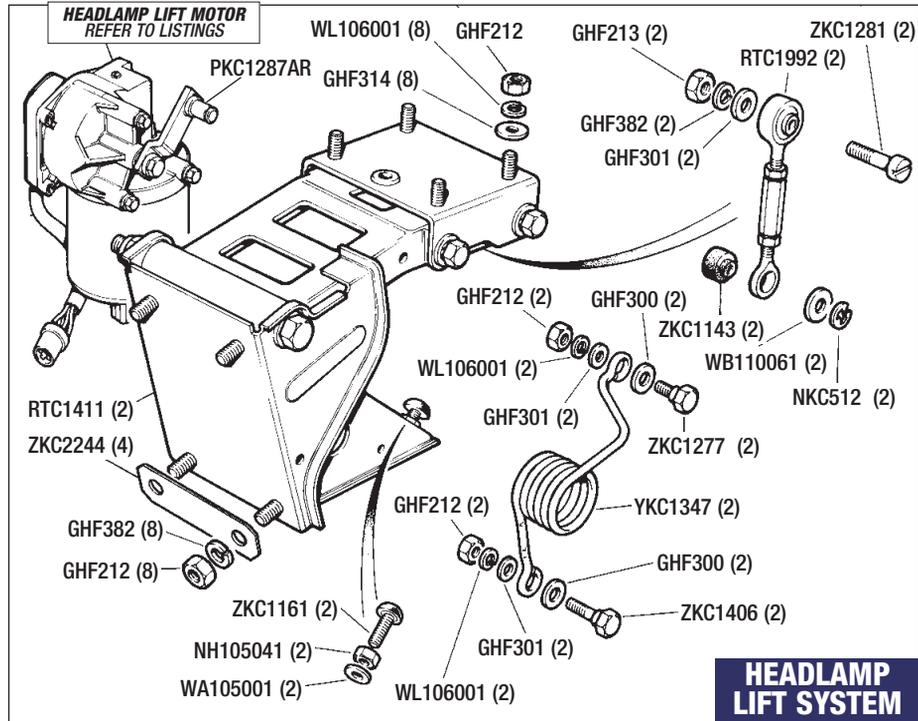

- Round Electric Plug type* (Recon) (1) **RKC822R**
Vehicles to approx 1978/ACG25000.
*See note; 'Round Electrical Plugs Fitted'.
- Square Electric Plug type (New) (1) **PKC1287**
- Square Electric Plug type (Recon) (1) **PKC1287R**
Vehicles from approx 1978/ACG25001.

***Round Electrical Plugs Fitted ?** The availability of reconditioned 'Round Plug' headlamp motors is sometimes limited. If we do not have stock when you enquire, we can supply a 'Square Plug' motor together with a conversion kit to adapt your existing wiring - part number RKC822RKit. Alternatively we can supply a conversion kit separately (part number RB7088), listed next in this section.

- Headlamp Motor Plug**
- Conversion Kit (2) **RB7088**
Converts round to square electrical plug.
- Headlamp Motor Lift Arm** (2) **PKC1287AR**
Connects to link rod.
- Headlamp Motor Relay** (2) **DRC1820**
Headlamp lift system.
- Circuit Breaker (Headlamp lift) (1) **151244**
- Relay-Day Headlamp Flash (Pektron) (1) **UKC7341**
- Relay-Headlamp Flash (1) **DRC1820**
- Information Label-**
- Headlamp Lift Instructions (1) **RB7186**
Manual operation.
- Information Label Kit** (1) **RB7091**
Car set includes; Tyre pressures, Engine Data, E11, Air Box, Headlamps, Unipart, Brake Data, & Hood instructions. The labels are also available separately.

- Bracket & Hinge Assembly** (2) **RTC1411**
Unbelievably Low Price!
- Clamping Plate (4) **ZKC2244**
- Nut (8) **GHF212**
- Washer-Spring (8) **GHF382**
- 'Bump-Stop' (2) **ZKC1161**

CRUISE LIGHT & INDICATOR REPEAT LAMP

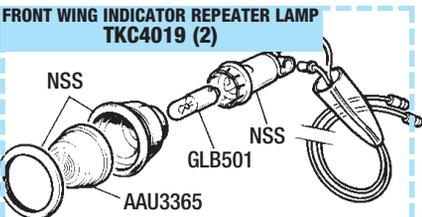

CRUISE LIGHT FRONT UKC5936 AMBER

CRUISE LIGHT REAR UKC519 RED

FRONT WING INDICATOR REPEAT LAMP TKC4019 (2)

Cruise Light (Side Marker) & Indicator Repeater Lamp

CRUISE LIGHTS

These are a very popular accessory for UK & European vehicles. They replace the black plastic blanking plates which are located on the front wing (above the corner bumpers), and the rear wing. They offer improved night time safety, particularly when manoeuvring, and can be wired (wiring not supplied) into the sidelights (front & rear) or indicators (front only), or used purely as reflectors.

Cruise Light Kit (USA style) (1) RB7143

See photo. Includes 2 amber (front), 2 red (rear) lights, bulbholders, bulbs, 2 gaskets (rear lamp only), screws & clips.

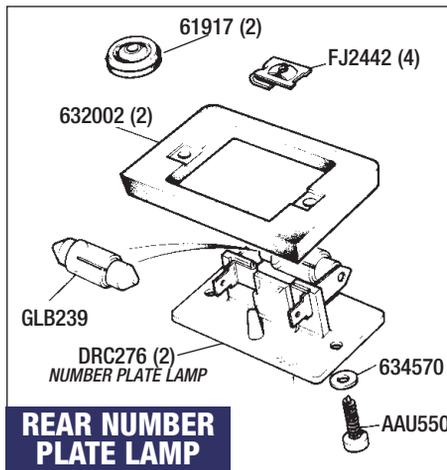

Cruise Light only; Inc bulb & bulb holder.

The Last TR

FEW TR traditionalists were happy when BL launched the TR7 in January 1975. Compared to previous TRs - right back to the Standard-Triumph prototype and the hugely successful TR2 - the newcomer was slower, quieter, looked “pretty”, and had a hard top!

Yet the car was good to drive, a possession to be proud of... and just right for its market. The TR7 introduced many newcomers to sportscar ownership, and its concept has since been proven and exploited by other (sadly foreign) manufacturers.

Admittedly, the original fixed-head design was dictated by the American market, without which no specialist car can be commercially viable. Proposed USA legislation would have outlawed open cars, and by the time this was quashed the TR designers were committed.

Market research in the USA showed that simplicity and reliability were the key factors - nothing exotic please - and the price had to be keen. The latter was achieved by using existing components.

Another apparent disadvantage (again a concession to America conservatism) was the live rear axle, but at least it was done well, and special attention was given to all other aspects of suspension and steering. Roadholding and comfort were exceptional. Other saving graces were the high degree of built-in safety and the eye-catching styling. The car looked faster than it was.

Strengths obviously outweighed weaknesses; the car sold so fast in the USA that the European launch was held until October, with a further delivery delay of many months.

From then, development in both finish and engineering was continuous. Although this transition did not become final until January 1978, the 5-speed SD1 gearbox was replacing the 4-speed as early as October 1976, and Borg-Warner automatic transmission was also available. In June 1979, the TR7 drophead was launched in the USA, and in March 1980 it became the first mass-produced sports convertible to be launched in Britain since the TR6 in 1969.

The car was getting better and better, until finally the TR8 was evolved and ready in 1980. Some 2,500 TR8's were exported to the USA that year, with the Rover 3.5 litre V8 engine producing startling performance. In British spec, (only 18 Rhd versions were produced) 60 mph would be reached in under 8 seconds, with 155bhp produced at 5250rpm.

It was not to be. The strength of the pound was now making the car too expensive for the vital America market. To sustain its market share it would have to be sold at a loss for some time, and BL's appalling financial position made this impossible.

The last TR rolled off the production line on October 5th 1981. The culmination of nearly 7 years work was never sold in the UK.

It wasn't the car's fault!

THE HARRIS MANN STORY

The TR7 Design Evolution

HE started with buses. He now works on trains. He's created a best-selling watering can. And in between, his design credits include what was one of the British motor industry's most controversial cars, perhaps better loved by enthusiasts today than it was when launched in 1975. Introducing the designer of the TR7, Harris Mann.

"Stylist", rather than designer, is in fact the job description they give to the person who creates the bodywork of cars. Harris Mann is among the best of these fairly unusual animals ...but the fact that he became one was not in itself a product of some grand design. Harris began his working life with a 4-year apprenticeship at coach-builders Duple, where buses were the No 1 product. "A good grounding," he says, mainly in mechanics but also touching on the styling side of things. When he 'came out of his time', there was a 6-months period before his obligatory spell in HM's armed forces. He was able to fill it productively by spending time in the States with the design outfit, Raymond Lowey.

"Jobs were easier to get then," Harris reminds us. After his forces stint he was able to resume his life at Duple, then move on to Commer to work on vans and trucks - a blend of styling and engineering responsibilities. This proved an ideal preparation for a move to Ford, basically an engineering job, doing feasibility studies, but within the styling department. After 6 months he won a transfer to styling on a full-time basis.

Four years at Ford were both interesting and useful. Mann worked on the Capri, various truck programmes, the Transit and the Escort. Then came the chance to move to the Austin Morris organisation. A colleague at Ford was appointed Director in the design department at the AM group's Pressed Steel Fisher body plant. Harris was among a small coterie of people who took the chance to go with him.

After working initially on projects such as Marina and Allegro, the new team was

moved to Longbridge where the ex-Ford influence proved less than popular. The colleague who had brought Harris into the fold then left in protest, and the team remained without a titular head, under the general wing of the engineering dept. "It was good fun, though," says Harris.

MEANWHILE, BACK AT THE RANCH...

In 1969, the search had started at sister company Triumph for a car to replace the TR6. The selection decision, as with so many others during this period of the British motor industry, would be influenced almost totally by the needs of the American market. At the time, it was believed the car might not appear in Europe at all.

Across the Atlantic, the profile of the "sports car buyer" had become older... a person far more accustomed to his creature comforts. The competition included the mid-engined Porsche 914 and even the Datsun 240Z, with its coupe body and air-conditioning!

It was apparent that, if it were to succeed, the new car would have to discard the spartan image of its predecessors. The project to define it was named "Bullet", which gives a clue as to the direction in which the powers-that-be were aiming. And in 1971, the job dropped in the lap of Harris Mann.

Some of Mann's earliest sketches are shown on these pages (his illustration work is self taught - incidentally). Quite clearly the car

would be very different from anything seen to date, and the initial designs established the ground very positively. Work would commence from the most challenging starting point possible. "It's much harder to take a mundane vehicle and try to make it look a lot more exciting," says Mann, "So much better to take something very exciting and then water it down if you have to. You end up with a more individual product at the end of the day."

This is what happened with Harris Mann's TR7, the one truly fundamental change being to produce the car as a fixed head vehicle when the original designs (as the sketches clearly show) were for a T-bar. The inescapable reason for this was the tightening mass of American safety legislation, with uncertainty bordering on fear about the volume and content of further regulations which lay ahead. Open cars could well be outlawed. The Datsun 240Z, "selling like stink" in the States at the time, was after all a completely enclosed car. So the TR7, too, would launch as a fixed-head.

Apart from this, Harris tells us of relatively few significant compromises between first designs and the production model. As the pictures show, the team would

sketches clearly show) were for a T-bar. The inescapable reason for this was the tightening mass of American safety legislation, with uncertainty bordering on fear about the volume and content of further regulations which lay ahead. Open cars could well be outlawed. The Datsun 240Z, "selling like stink" in the States at the time, was after all a completely enclosed car. So the TR7, too, would launch as a fixed-head.

Apart from this, Harris tells us of relatively few significant compromises between first designs and the production model. As the pictures show, the team would have liked the bumpers to be colour-coded into the body, but production line difficulties allied to fears (again) over legislation defaulted the decision back to the familiar black plastic. The forward placing of the windscreen was also influenced by fears about legislation ... this time regarding headswing clearances proposed in the USA. These fears eventually proved groundless, because as the driver was moved back from the windscreen it was found that he could not see the overhead traffic lights so familiar to anyone who's driven Stateside. The legacy of this concern, however, lived on; the driver did still end up further than usual from the windscreen, which gives the illusion of a roomy interior but achieves it at the expense of space in the rear.

SELECTION PROCESS

The design which Mann's team took to the full-size mock-up stage was not, in fact, the only one considered within the company. The Italian designer, Michelotti, who takes the credit for much of Austin Morris and BL's design work during this period, had also been asked to work on the project, and his design too had reached model stage.

Finally the two cars were taken to a meeting at Triumph in Coventry, where Lord Stokes and others viewed them side by side. Mann was asked to remodel the swage line which was originally down the side of the car, and when this was done his design was given the green light.

This was in the summer of 1971, and the car did not come to the market until January 1975. Apart from modifications, however, the

car would now pass from the control of Harris Mann and his team. One modification, he recalls, removed a concertina feature behind the bumper, intended to help take up impact. Another involved the rear wheel arch, where extra-long suspension movement created too large a visual gap in the unladen condition.

For the record, a styling team was not generally involved in engineering decisions such as these, it was merely required to take engineering factors into account in its work. As a prime example, Mann and his colleagues designed the TR7 without knowing what engine would go into it; the team was merely given an engine size and silhouette to enable it to style the body properly.

Engineering factors could sometimes make a designer's work a nightmare, Mann tells us, but it sounds as if the TR7 project ran more smoothly than most. Obviously the mechanicals constrained the designer as to what sort of body shape could be put around them, but Mann's complaints centre around smaller items like the front flashers (from the Marina), the door handles (left and right hand to become a common design), and the windscreen surround which changed from black to stainless.

In fact, Mann seems to have found the TR7 more satisfying than frustrating. "The fact that the front of the car effectively tapered right down was just what us designers wanted. We didn't want high bonnets, we wanted flat, flowing fronts. ... the Dolomite engine being half the Stag V8 engine, the height aspect was very good, so from the screen onwards you can start going downwards rather than outwards. That was something car designers always wanted."

Prior to the TR7, Mann had created the Austin Princess, which had introduced the wedge theme to UK motor design, and certainly he was able to develop the theme further with the TR7. It established a pattern which has been continued by others to this day... though latterly perhaps influenced more by CD factors than by creative considerations.

Mann at one time ran a company TR7 (a drop-head). It was an enjoyable car, he recalls, "I thought the lines of the convertible were great and I feel that we would have been happier back in 1971 designing a soft-top version of the Bullet than the fixed head we were instructed to do." Other if-onlys include a wish that the car could have seen more development during its lifetime, also that the TR8 should have been further modified from the TR7. Sentiments which are echoed by so many today.

There is no business in which a designer can be trained to accept imposed change and compromise with a philosophical outlook, but today, Harris Mann's regrets are more for the British motor industry than about the past commercial realities of Austin Morris and BL. The automotive side in this country, he says with classic understatement, "has dropped off a lot".

Many years ago Mann designed a watering can which is still being made by the thousand. He wishes he had a royalty on it. He admits he'll dabble in anything. He's "done industrial robots, bits for cycles," but it's mainly transportation. "I like all forms of transport and I like designing anything that runs along and carries people around."

Mann now works by providing his expertise to a variety of consultants in the transport field, also by part time lecturing at university, and tells us that his recent involvement has been with trains rather than cars. Back to his first job ... public transport. "If I did cars all the time, as I sat in the traffic jam I would probably ask myself if it wasn't morally right for more people to be using public transport. Come to think of it, that would probably make motoring exciting again."

BODY RESTORATION KIT

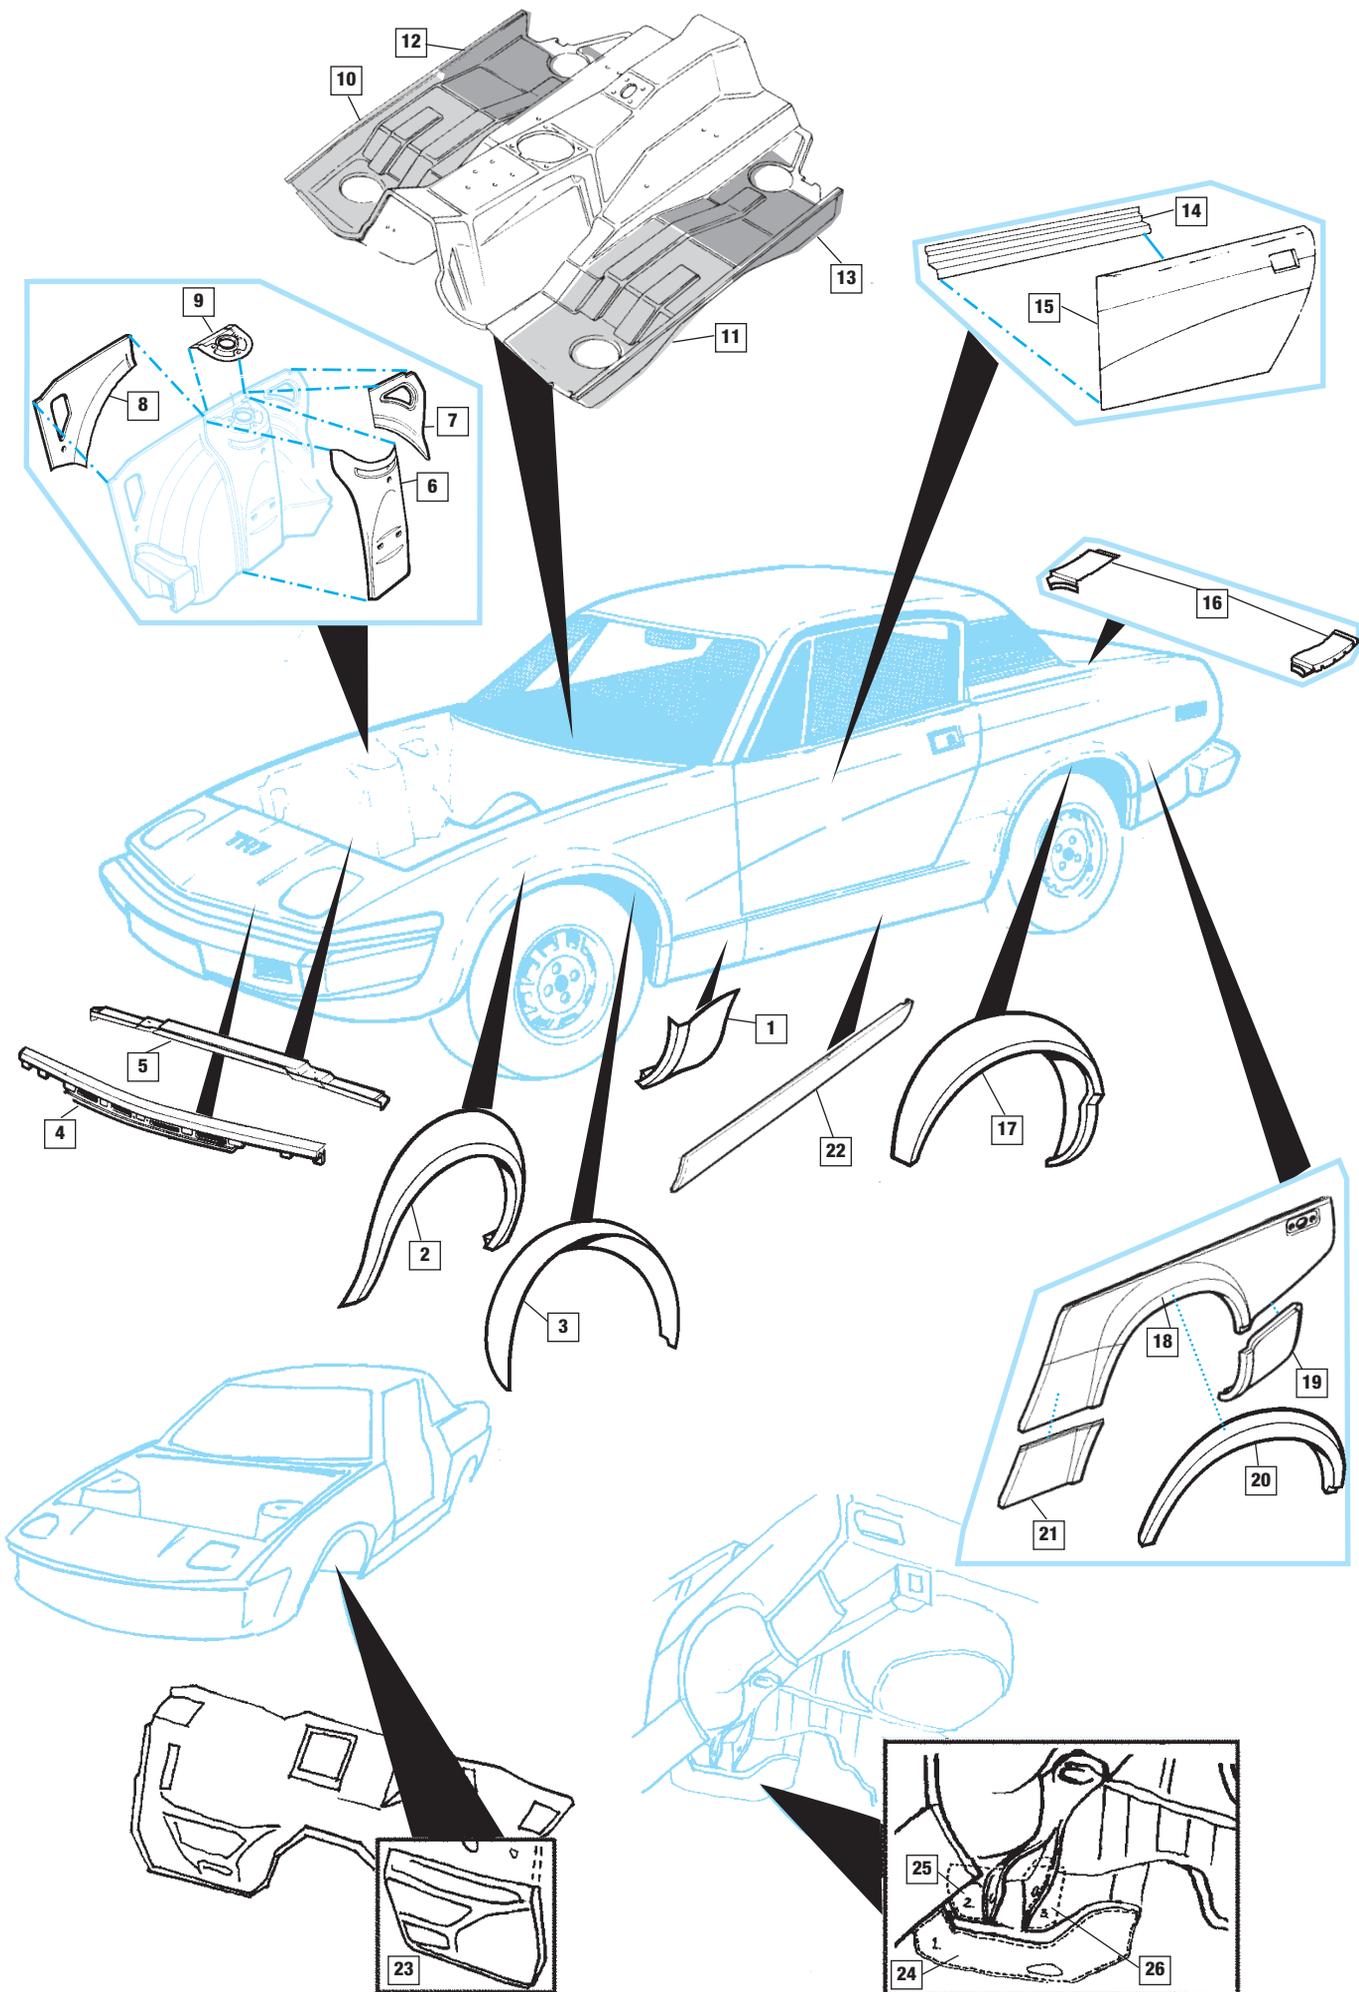

We have put together an excellent restoration kit which will help you get started and make substantial savings!

- The kit includes:-
- 1 pair front wings (original)
 - 1 pair front inner wheel arch repair panels
 - 1 headlight panel (original)
 - 1 set of 4 front inner flitch repair panels (front and rear of turret)
 - 1 pair door skins (original)
 - 1 pair full sills (original)
 - 1 pair rear wing outer arch repair panels
 - 1 pair rear lower (outer) sill panels

FRONT & REAR BUMPER COVERS - UK/USA Specification

UK Original specification TR7 bumper bars (front & rear) were fitted with 3 separate plastic covers, held in position by nuts, bolts, and special retaining clips. The centre plastic section is also held underneath by a metal retaining strip, which forms part of the bumper bar. USA original specification bumper bars (front & rear) were fitted with a one-piece rubber cover, held by clips & bolts to the bumper bar.

IMPORTANT CUSTOMER NOTICE
INTERIOR TRIM
If You modify it - Then you own it!
 All our original & re-manufactured Interior Trim is produced to the highest standard. If you genuinely believe that any of our trim (seat covers/carpets etc) does not/will not fit, then we will either exchange it, or offer a full refund (in line with our normal procedure).
 If however, any item of trim has been 'modified' in any way whatsoever (ie cut, trimmed, unstitched, etc) by the purchaser in an attempt to 'rectify' any problem, then any claims for 'faulty goods' will be "Null & Void".

INTRODUCTION & SUMMARY TO TR7 INTERIOR TRIM
 (ORIGINAL AND RE-MANUFACTURED)

ORIGINAL TRIM SPECIFICATION & AVAILABILITY
 The TR7 ceased production in 1981, consequently, original factory interior trim is something of a rarity, which poses quite a few problems for those owners who wish to restore their car to original showroom condition - though we do hold limited stocks of certain factory trim, both in range & colours.

RE-MANUFACTURED TRIM
 To overcome this supply problem we have re-manufactured virtually the entire range of TR7 interior trim items, though for the foreseeable future, not in the full range of colours or specification originally issued by the factory. This will compliment the Blue with Blue check, and Tan with Tan Check seat trim that we re-manufactured and re-introduced in 1993.

PARTS LISTINGS & PART NUMBERS
 We are a company dedicated to preserving the Triumph marque, and to that end we will endeavour, wherever possible, to re-introduce interior trim items that are currently unobtainable. Throughout the 'Interior & Trim' section we have retained wherever possible, the original factory part numbering/colour identification system, this will prove useful if you are using our catalogue in conjunction with a BL parts book, and help you identify the trim fitted to your vehicle.

We have listed the most popular (original) TR7 trim, as well as the items that we have had re-manufactured. Under each individual section heading, where the factory implemented a change of trim specification, we have shown the approximate year/range, commission/VIN number, and/or the trim characteristics, ie; material, colour, pattern etc.

Although we have listed Rh & Lh items individually (with their own part number/colour), we strongly recommend you fit all trim items in pairs or vehicle sets to ensure a colour match as your old trim has probably faded. There are a few exceptions due to manufacturing restrictions, where parts are only available in pairs or vehicle sets.

COMPLETE INTERIOR KITS
 For those who are contemplating a complete vehicle restoration, or would prefer a colour change (and/or upgrade) of interior trim, we have a full range of Complete Interior Re-Trim Kits available for both Convertible & Coupe models. The kits (which cover manual & automatics, RHD & LHD - Please state exact model when ordering), come in a choice of 5 colours; Black, Beige, Biscuit, Blue and Tan.

Description Qty Req. Part No.

ORIGINAL FACTORY TRIM COLOURS & TRIM CODES
 All items of 'coloured' interior trim, have a colour code suffix to help identify trim type/specification.
 The codes - which are stamped on the Commission/VIN plate - have 3 letters, but this is abbreviated to 2 to simplify the part number listings, IE only the 1st & 3rd code letters follow the part number,
 eg:- WKC4796RG = Tan/Tan Check.
The Commission/VIN plate can be found either on the rear of the passenger door, or on the front suspension strut mounting (Rh top).

COMPLETE INTERIOR TRIM KITS FOR TR7 & TR8

Renovation - Upgrade - or Colour Change ?

If you are considering a complete re-trim of your TR7/TR8 interior, to either change the colour or upgrade to the later trim specification, or even fit Leather trim, then our complete Interior Trim Kits will make such a daunting task so much easier! And by using just one part number you'll have everything you need.

ONE NUMBER = 1 KIT - AND THEY SAVE YOU MONEY!
 By purchasing one of our trim kits, not only are you assured of ordering everything, but they also cost less than if you bought the corresponding trim items individually!

WHAT MODELS DO WE HAVE KITS FOR ?
 We have kits available for both Convertible and Coupe, covering manual & automatics, RHD & LHD models.

TRIM TYPE & COLOUR - NUMEROUS COMBINATIONS!
 Our interior trim kits are available in the 5 most popular colours, Black, Beige, Blue, Tan (or Biscuit in Leather). They cover both early & late type door trim panels (early = round locking hole, late = square locking hole).
 Vinyl seat covers with Cloth Insert are available in Black, Blue and Tan, or Plain all Vinyl covers in Black & Beige. Our Leather covers are available in Black, Blue, Tan and Biscuit.
 You can even choose between Tufted or Wool carpets.
 Of course, if you can't find the kit of your choice, you can always order the parts separately!

THIS IS WHAT OUR KITS CONTAIN
 2 Door trim panels and armrests, 'A' post trim (pr), 4 seat covers, seat side trim/covers (2 Prs), 2 headrest covers, 2 knee pads, gearlever gaiter, centre console lid, handbrake gaiter, full carpet set (Convertible inc hood stowage area carpets), rear bulkhead trim panel, 'B' post trim (Pr) (*none pocket type-Coupe*) & rear deck material (Pr) (Convertible). They also include rear parcel shelf (Coupe), windscreen trim material and trim strip (Convertible) and rear screen trim (Coupe).

NB: Sunvisors are not included in our trim kits at present due to supply problems. If you are contemplating a colour change please refer to 'Sunvisors & Interior Mirror', or contact us for current information & availability.

SPECIAL NOTE-DOOR TRIM PANELS
 Due to a small internal modification to the door frame to accommodate the later type square locking knob door trim panel, it is not possible to fit the late type door trim panels to the early type doors (round locking knob), unless a recess is fabricated.

HOW TO ORDER THE KIT OF YOUR CHOICE
 1) Decide which colour of interior you require; Black, Beige, Blue, Tan (or Biscuit in Leather).
 2) Choose the trim type/spec ie; door trim panels with early (round locking hole) or late type (with square locking hole), and whether you want seat covers in either Vinyl with Cloth insert, Plain Vinyl, or Leather.
 3) Refer to your vehicle model.
 4) Choose either Tufted or Wool carpets.

Door Trim Panels & Fittings

See also: **BODY PARTS & FITTINGS.**

Note: Due to limited availability of original spec door panels, certain door panels (remanufactured) are now supplied in pairs only (using an RB number). Where original stock is still available (ie only one side), the original part number is still shown. Note that blue and tan are now also available in plain vinyl (without check pattern) as an alternative if so desired. We strongly recommend door panels are fitted in pairs to ensure colour and trim-type match.

1. DOOR TRIM PANEL & FITTINGS

1975 - 1978

TR7 SEAT COVERS

(Original and Re-manufactured)

During its period of manufacture, the TR7 was supplied with a variety of seat trim - both in material and pattern, and the changeover periods are not very well documented.

ORIGINAL SEAT COVER SPECIFICATION

The most popular original seat trim specification ranged mainly from a plain 'Ribbed Velour' (and sometimes plain Vinyl) in Black & Beige for early vehicles, to vinyl covers with a 'checked' cloth insert (Black with a Red check insert, Black with Green check, Tan with Tan, & Blue with Blue), and for late European TR7's and TR8's, a plain 'Velour' type material in Tan or Blue. There were a few other trim combinations (for export markets), such as Chestnut, Emerald Green, Grey etc, but these trim colours were not fitted in great numbers, and so the likelihood of finding original covers is virtually nil.

AVAILABILITY OF ORIGINAL COVERS

For those people who wish to use nothing other than original factory trim, we do have limited stocks of certain seat covers in plain 'Ribbed Velour' (and plain vinyl) in Black & Beige, vinyl covers with check cloth inserts in Black with Red check and Black with Green, and a few plain 'Velour' covers. Please refer to current price guide or phone for availability.

RE-MANUFACTURED SEAT COVERS

To overcome the supply situation, we have re-manufactured TR7 seat covers in Blue with Blue check and Tan with Tan check and they are virtually identical to the original upholstery (supplied in car sets only). As an alternative to our Blue & Tan check, we also offer Black vinyl covers with an alternative Black Cloth insert, and plain vinyl covers with vertical pleats in Black, Beige, Blue & Tan. For that real touch of luxury - consider Leather covers in Black, Blue or Tan. (Note: Beige leather covers are supplied in a lighter shade - 'Biscuit', which is only available in our complete Interior Trim Kits.

We urge you to fit covers in car sets, as it is difficult to colour match seat covers that have probably faded after many years of use!

UPGRADE TO THE LATER TRIM SPECIFICATION

If we are unable to offer you the original factory trim covers that you require in sets (eg; Red or Green check), then why not consider a colour change and/or bring your early TR7 trim up to the later model specification by fitting one of our comprehensive Interior re-trim kits which include seat covers, headrest trim, door trim panels, armrests, interior trim panels, carpets etc.

We have kits available for both Convertible & Coupe models (covering manual & automatics, RHD & LHD), and they come in a choice of 5 trim colours; Black, Beige, Biscuit, Blue and Tan, with additional Leather options.

For full details (and photograph) of our Interior Trim Kits please refer to page 101 & 102.

Special note-Door trim panels

Due to a small internal modification to the door frame to accommodate the later type square locking knob door trim panel, it is not possible to fit the late type door trim panels to the early type doors (round locking knob), unless a recess is fabricated.

PARTS LISTINGS & PART NUMBERS

We are a company dedicated to preserving the Triumph marque, and to that end we will endeavour, wherever possible, to reintroduce interior trim items that are currently unobtainable.

To help you identify the trim fitted to your vehicle, we have listed the most popular (original) TR7 seat trim, as well as the trim covers that we have had re-manufactured, and wherever possible we have utilised the original BL factory part numbering/colour identification system.

We strongly recommend you fit all items of trim in pairs or vehicle sets, to ensure a colour match.

RE-TRIM YOUR TR7 WITH ONE OF OUR COMPREHENSIVE TRIM KITS. VEHICLE SHOWN IS TRIMMED IN BISCUIT LEATHER - SEE PAGE 101/102. STEERING WHEEL IS TR8 (PKC1295) - SEE PAGE 64.

Description Qty Req. Part No.

Seat Covers & Kits

Although we can supply some seat trim covers individually, we **strongly recommend** that seat trim is fitted in **vehicle sets**, to ensure colour match. We also suggest that you check the condition of the seat frame/foam/diaphragm /straps etc.

ORIGINAL SEAT TRIM COVERS DESIGN & MATERIAL

SEAT BELT KIT - RB7355.
OUR REPLACEMENT SEAT BELT KITS FIT BOTH CONVERTIBLE & COUPE MODELS.

Seat Belts & Fittings

Original & Replacement Seat Belts

AVAILABILITY OF ORIGINAL SEAT BELTS
Inertia reel units for the Convertible are no longer available. We currently hold limited stocks of inertia reel units for the early Coupe (vertical mounted), and also original seat mounted belt stalks (which fit all models). Once these stocks are exhausted, we recommend that you fit a pair of our replacement seat belt kits.

REPLACEMENT SEAT BELTS
Our universal mounting seat belt kits are suitable for all Convertible and Coupe models. The kits (per seat), comprise of an inertia reel unit, stalk and fittings. Our kits must be installed as a seat set, because the belt fastener (buckle) will not fit the original type seat mounted stalk since the fittings differ. For this reason (and for appearance's sake) we recommend fitting our seat belt kits as a car set (2 kits).

SEAT BELT KIT (Convertible & Coupe)

Seat Belt Kit (2 per car)
Replacement type. Fits All Models, see photo.
Comprises 1 inertia reel belt, 1 stalk & fittings.
Stalks can be floor mounted.
Note: 2 lengths of stalk are offered. The 15cm stalk should be used where the seats are normally positioned fully back. The 30cm stalk offers more convenient useage if the seats are usually positioned forward.
Recommended to fit in car sets.

- With 15cm Stalk (2) **RB7355**
- With 30cm Stalk (2) **RB7355A**

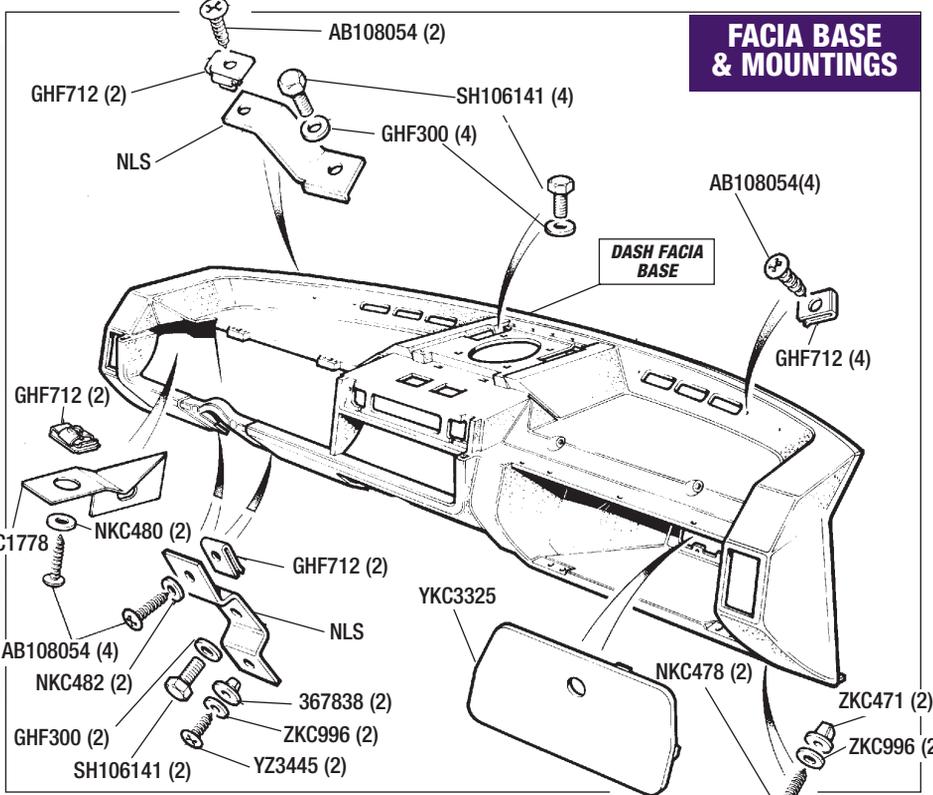

SEAT BELT - INERTIA REEL (Coupe only)

Seat Belt - Inertia Reel (2 per car) (2) **RB7275**
Original Factory type. Fits all Coupe models to 1978 with vertical mounting. Comprises 1 inertia reel belt only.

SEAT BELT FITTINGS

- For original specification belts.
- Seat Belt Stalk (2 per car) (2) **RB7378**
Original type seat mounted stalk, fits all models.
 - Belt Retaining Clip (2) **YKC1343**
 - Screw (Clip locating) (4) **AB610051**
 - Guide-Seat Belt
 - Rh (1) **XKC2718**

CARPET SETS

High Quality Tufted Pile or Luxury Wool

A FULL RANGE OF CARPETS FOR THE TR7

Original factory carpet sets for the TR7 have been unavailable for many years. Although it may still be possible to obtain the odd carpet piece for floor or tunnel, achieving a true colour match with your existing carpets (which have probably faded), would be virtually impossible.

We overcame this supply problem in 1982 when we developed a full range of tailored carpet sets for the Convertible & Coupe models, for both RHD & LHD versions.

(Note: Convertible carpet sets also include the carpets for the rear cockpit/hood stowage area).

You can choose between High Quality Tufted Pile carpet, or Luxury Wool. All our carpet sets - which come with large sewn in heel mats and bound leathercloth edges - are available in a large choice of colours.

HIGH QUALITY TUFTED PILE CARPETS

These carpets are made from a high quality tufted pile material, and are excellent value for money. Since 1982 we have supplied countless numbers of these ever popular carpet sets.

LUXURY WOOL CARPETS

For something that little bit special, treat yourself (and your TR7) to a set of our Luxury Wool carpets. They are made from 80% wool with a mixture of 20% nylon (for extra toughness). They may seem a little extravagant, but you really do get what you pay for!

CARPET UNDERFELT KIT

If you are fitting new carpets, or just refitting your own, we recommend you also fit carpet underfelt for improved sound proofing and prolonged carpet life.

OVERMATS

To protect your front footwell carpets, fit a pair of overmats.

ALL OUR HIGH QUALITY CARPET SETS ARE AVAILABLE IN THE FOLLOWING COLOURS

HIGH QUALITY TUFTED CARPETS	COLOURS AVAILABLE	LUXURY WOOL CARPETS
	BLACK	
	BEIGE	
	GREEN	
	RED	
	BLUE	
	BROWN	
	GREY	

CARPET SETS FOR CONVERTIBLES. CHOOSE HIGH QUALITY TUFTED PILE CARPETS, OR LUXURY WOOL. PHOTO SHOWS LUXURY WOOL CARPET SET RB7387, PLEASE REFER TO LISTINGS FOR FULL INFORMATION AND DETAILS. CARPET SETS FOR THE CONVERTIBLE ALSO INCLUDE CARPETING FOR THE REAR COCKPIT AREA. WHY NOT REPLACE THE UNDER FELT, IT WILL HELP TO PROLONG CARPET LIFE.

PHOTO IS NOT INTENDED TO REPRESENT HOW INDIVIDUAL CARPET SECTIONS FIT THE CAR.

Carpets Sets - Convertible

Universal Fitting for RHD & LHD Models (Including rear cockpit area)

A 13 piece carpet set which includes footwells, floor, sills, centre tunnel, carpet for the rear shelf/wheelarches, and to re-cover the 3 existing (vertical) hood stowage boards.

If your existing boards are in a poor condition, we supply a '3 piece' hood stowage board kit. Don't forget we also supply a Carpet Underfelt kit.

Description Qty Req. Part No.

Hood Covers

WHICH HOOD/MATERIAL ?

The Choice is yours!

We stock a comprehensive range of hoods/materials to suit all budgets and requirements. They include re-manufactured hoods to factory specification by Tickford (black only) - using the original Coventry Hood & Seating production jigs, a range of Top Quality replacement Hoods in 'Everflex' (Pvc) with a choice colours, a 'Vynide' (Pvc) Hood with a 'BL' type grain in black, 'Double Duck' (black canvas) Hoods, and for that real touch of class, 'Mohair' Hoods, again with a choice of colours. Our Hood Stowage and Tonneau Covers compliment our range of Hood covers.

HOOD COVER & FRAME ASSEMBLY

Hood & Frame (Assy - Reconditioned);

COMPLETE, READY TO FIT.

Supplied with reconditioned frame (complete with fittings/seals) fitted with new vinyl cover (black, tan or blue). Other colours and mohair or double duck (canvas) supplied to special order. Supplied on strict exchange basis. Old unit must be complete and serviceable.

Black (Hood & recon frame)	(1)	WKC3665PAR

SUNROOF (TUDOR WEBASTO)

(Dealer fitted - 2/3 Length)

Vehicles approx 1976 to 1977

Before the optional factory full length sunroof was introduced in approx 1977, Unipart offered a sliding sunroof kit (GLZ314), as a dealer fitted option prior to delivery, or fitted as an accessory to a customer's vehicle at a later date. Easy to recognise, it is 1/3 smaller (in length and width) than the later factory fitted sunroofs (IE, it does not take-up all the available roof space). Unfortunately, neither the sun-roof or its service items are now available (or even listed). It may be possible for us to recover your Tudor Webasto sunroof - providing it is serviceable.

Sunroof (Edrose)

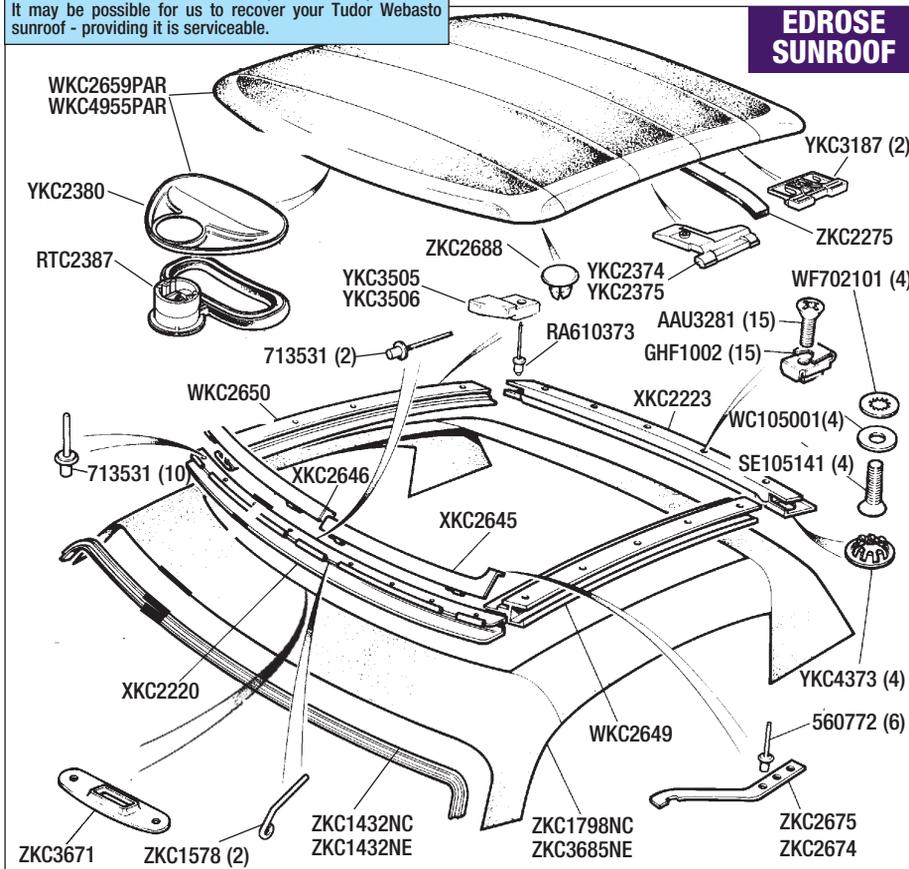

(Factory Fitted - Full Length)

Vehicles approx 1980 onwards

TR8

TR8 - TR7

PARTS COMPATIBILITY

There are many components that are common to TR7's and TR8's, and clearly others which are not. Sometimes the difference is obvious, in TR8 Engine & Clutch for instance there is clearly no common parts usage, so the listings in this section are extremely comprehensive. In other areas however, the differences are not so prominent or numerous (because only minor changes or modifications are required from the standard TR7 specification), rear axle ratio, fuel system, battery location, interior mats etc. So here we have only listed the parts that relate solely to the TR8. Where appropriate we have indicated when you will need to refer to the main TR7 section.

We have been careful to distinguish between Factory changes, and used illustrations where practicable which have been re-drawn from original British Leyland parts books.

Please remember, if you have any difficulty whatsoever you only have to phone, our staff are here to help you.

**IMPORTANT
INFORMATION**

MODIFICATIONS

If you modify your standard TR7 to TR8 specification by using separate components rather than using one of our TR8 Conversion Kits, it is essential to up-rate the Braking System. We strongly recommend you also check & ensure that the Body, Suspension, Steering, Transmission etc, are capable of coping with the increased power of the V8 engine.

INSURANCE

You must inform your insurance company of ANY vehicle modifications. If you have problems insuring your TR8 please contact us, we have details of insurance companies and brokers who specialise in modified and classic cars.

TR8 & TR7-V8 Conversion Parts Line drawings & illustrations.

The vast majority of line drawings and illustrations used in the following sections are taken from the 'TR7 & TR8' British Leyland parts catalogue (part No RTC9020B).

AN INTRODUCTION TO THE TR8 CONVERSION

The conversion of a standard TR7 to TR8 specification (TR7-V8) is relatively straightforward and can be carried out by any competent DIY car enthusiast.

The basic components to substitute are: Engine, Subframe, Propshaft, Brakes and Exhaust, with the option of fitting Uprated Suspension to improve handling, and changing the 5-speed rear axle Ratio to improve gearing.

At Rimmer Bros, we believe original is best (i.e. what the factory actually designed), so we strive to supply as many original parts as possible. One area where we do believe it is important to use the original component is the subframe. Our TR8 conversion kits include a Brand New original subframe with the original type brackets, - designed to cope with the stress and torque of the V8 engine, unlike some types that are on the market. Another bonus with the original subframe is that when used as a datum, everything else in the drive train, i.e. Gearbox, Propshaft, Rear Axle, all line-up. This is not the case when non-standard parts are purchased separately in an attempt to save money. The end result could well be clearance, vibration, and fitting problems, resulting in false economy.

Ultimately, the value of your car will be enhanced by using original specification components when converting your TR7 to a TR8, and if you ever decide to sell, prospective purchasers will soon identify (and value higher), a car that has been converted correctly opposed to one that has just had a V8 engine 'thrown in'.

Generally, it is best to start with a 5-speed car (the 4 speed gearbox and rear axle are not sufficiently robust). If you have a 4-speed or an automatic TR7, we will be pleased to quote for a package to supply the necessary parts to give you a 5-speed TR8. The 5 speed TR7 gearbox can be re-used but it must be fitted with the V8 bellhousing and clutch release arm pivot pin (and bearing carrier). We also supply a TR8 propshaft (for use with the original TR8 subframe & engine/gearbox mountings), it is shorter and stronger than the TR7 propshaft. The 5-speed rear axle can also be re-used, though you may find the ratio (usually 3.9:1) too high, resulting in a low top-end. We supply exchange axles with either standard or Limited Slip Diff's, fitted with the 3.08:1 ratio if required. (NB - larger wheels/tyres can also affect final gearing).

It goes without saying that the entire exhaust system will need to be replaced, and it is essential you uprate the braking system. We also recommend the fitting of uprated springs and shock absorbers - to improve handling, and that you check the condition of bushes, ball joints, steering etc, for wear.

Last but not least is the engine. The Rover (3.5 Litre) SD1-V8 unit is a reliable and robust unit which can be easily adapted to fit the TR7. It provides increased power and torque, with an almost unlimited capacity for modification and tuning. Indeed, fitting a 3.9, 4.6 or even a 5.2 litre Rover V8 engine can offer many 'smiles per mile'! Probably the best starting point for the conversion is for you to obtain a used SD1 3.5 litre engine unit - complete with all the ancillaries, which you can then use in the purchase of an exchange reconditioned engine. We supply a range of V8 engines, new & reconditioned. Another popular option is to rebuild the used engine yourself - which is relatively inexpensive if you purchase a rebuild kit.

Finally, depending upon the type of carburetors used in the conversion, it may be necessary to use the later type 'double bulge' bonnet (if not already fitted).

It is impossible to list here all the different combinations of parts to carry out a TR7-V8 conversion. We have selected the most popular for our conversion kits, offering the best value for money coupled with simplicity.

How far you wish to take the project is entirely your choice!

ORIGINAL IS BEST
ORIGINAL TR8 SUBFRAME, DESIGNED TO FIT.

Our TR8 Conversion Kits Make it Easy

3 Kits to choose from

We have tried to make it as easy as possible for you to select and order the kit that best suits your budget and requirements, so we have created 3 starter kits for you to choose from to convert your TR7 to a TR8.

How to choose your starter Kit

Starting with the basic kit, we have listed the major components required to do the job.

Kits A, B & C are based on the basic kit, but offer different combinations of exhaust systems.

For example, you can have a 'quieter' twin centre box system (in lieu of the 'H' pipe) or the 'loud drainpipe' large bore single exhaust.

All systems are supplied with a pair of stainless steel tubular manifolds for improved performance.

The uprated brake kit supplied with all three kits uses calipers derived from the Rover Vitesse, adapted for use with special vented discs that can be bolted direct to the TR7 4-stud hub.

A minimum 14" diameter road wheel is required to clear the calipers (see Minilite Replicas in roadwheel section).

WHY STOP HERE ?

Our Starter Kits give you the basic parts needed to initiate the TR8 conversion, but there are many other parts (listed throughout this catalogue) you may wish to consider fitting to further improve your TR8 in the future, such as; uprated anti-roll bars, front anti-dive kit, uprated/lowered road springs, uprated shock absorbers such as Spax, Koni or Gaz, uprated suspension bushes (hard and polyurethane), power steering, rear axle/ratio, body styling kit, and if the standard 3.5 V8 is not powerful enough for you we have larger capacity engines as well as performance components for standard units.

See *ROAD WHEELS* (in the main TR7 section) for details on 14" Minilite Replica wheels, and *ACCESSORIES* for body kits/wheel arches/spoilers.

Full details of our Uprated Brake Kit can be found in *V8 BRAKE SYSTEM*, and Uprated front/rear Suspension kits under *V8 SUSPENSION PACKAGES*.

Note; your old TR7 rev' counter and radiator is required in exchange for the units that we supply in our conversion kits. Although we don't apply a surcharge, we would ask for your cooperation by returning these items so we can continue the service for other customers.

TR8 CONVERSION KIT 'A'

WITH PERFORMANCE (LOUD) TWIN PIPE/EXIT EXHAUST SYSTEM.

Kit 'A' includes:

Basic Conversion Kit (as listed on previous page) and a Stainless Steel Exhaust System comprising of Tubular Manifolds, Adaptor Pipes, 'H'-Pipe, Twin Outlet tailpipes & Exhaust Fitting Kit.

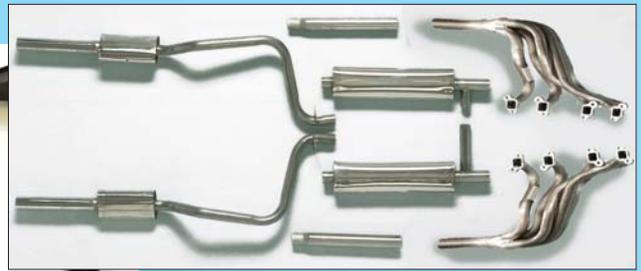

See also: V8 exhausts for details of our Exhaust Manifold Insulating wrap.

Conversion Kit 'A'

RB7705

TR8 CONVERSION KIT 'B'

WITH PERFORMANCE (QUIET) TWIN BOX/EXIT EXHAUST SYSTEM.

Kit 'B' includes:

Basic Conversion Kit (as listed on previous page) and a Stainless Steel Exhaust System comprising of Tubular Manifolds, Adaptor Pipes, Twin Centre Boxes, Twin outlet Tailpipes & Exhaust Fitting Kit.

See also: V8 exhausts for details of our Exhaust Manifold Insulating wrap.

Conversion Kit 'B'

RB7706

TR8 CONVERSION KIT 'C'

WITH PERFORMANCE (LOUD) SINGLE PIPE/SINGLE OUTLET EXHAUST SYSTEM (LARGE BORE).

Kit 'C' includes:

Basic Conversion Kit (as listed on previous page) and a Stainless Steel Exhaust System comprising of Tubular Manifolds, Large Bore 'Y' Pipe, Link Pipe & Single Outlet Exhaust Box (Race/Rally Spec) & Exhaust Fitting Kit.

See also: V8 exhausts for details of our Exhaust Manifold Insulating wrap.

Conversion Kit 'C'

RB7707

TR8

4.6 Litre Convertible

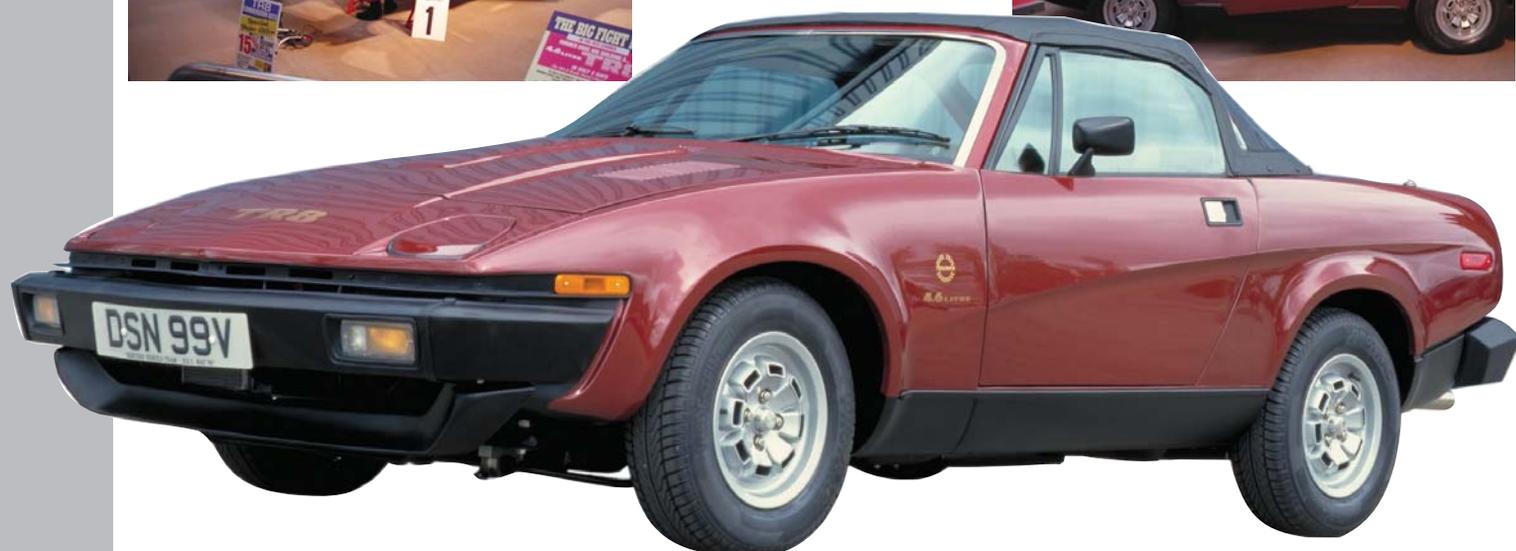

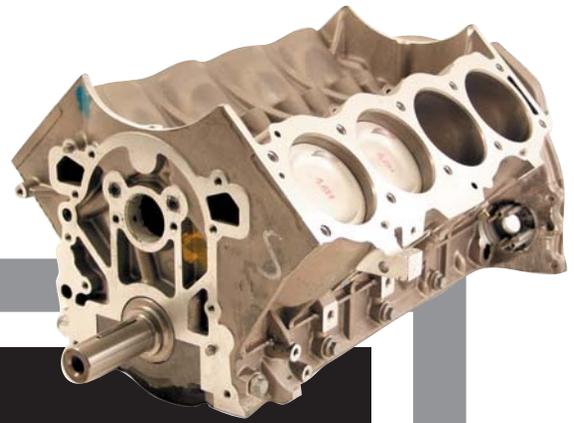

Built in 3 days during the Classic and Sports car show, NEC Birmingham, May 1996.

Just to show how easily it can be done(!), Rimmer Bros staged a TR8 rebuild on the British Motor Heritage stand.

Starting with a fully painted (Bordeaux Red) and prepared bodyshell, the car was assembled over the 3 days using a Rimmer Bros V8 Conversion Kit, modified 4.6 Litre V8, uprated suspension, new interior trim and hood.

The car was completed on time, started (first time!) and driven off the stand by Tony Pond. This photographic record is in memory of him.

TR8 & TR7-V8 OWNERS

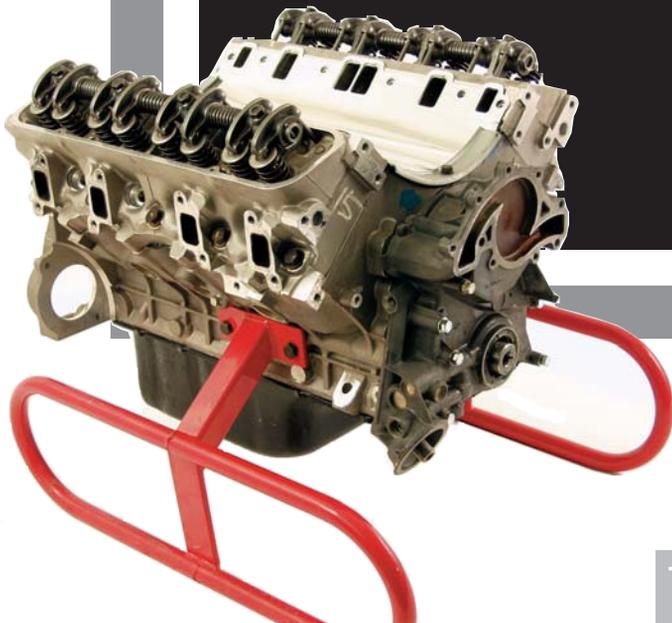

V8 ENGINE & COMPONENTS

This section (page 130 to page 149) covers MOST applications for Rover V8 engines, including TR8 & TR7-V8.

We have reproduced a modified version of our V8 ENGINE CATALOGUE (edition 2.2) which is very comprehensive.

Please use this section to select the engine or component(s) you need by referring to the relevant description and part number.

Many owners will also find this section useful as a reference when perhaps considering a TR8 conversion using an engine from another vehicle since it covers many different specification combinations dependent upon application.

RIMMER BROS V8

Built by Race Engineers

**QUALITY, PERFORMANCE
& ENGINEERING EXCELLENCE
AT AN AFFORDABLE PRICE.**

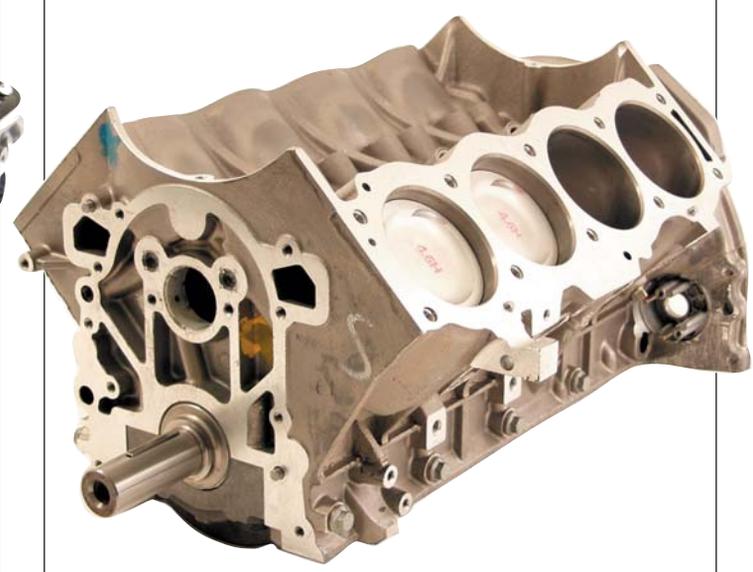

Engine Definitions

LONG ENGINE

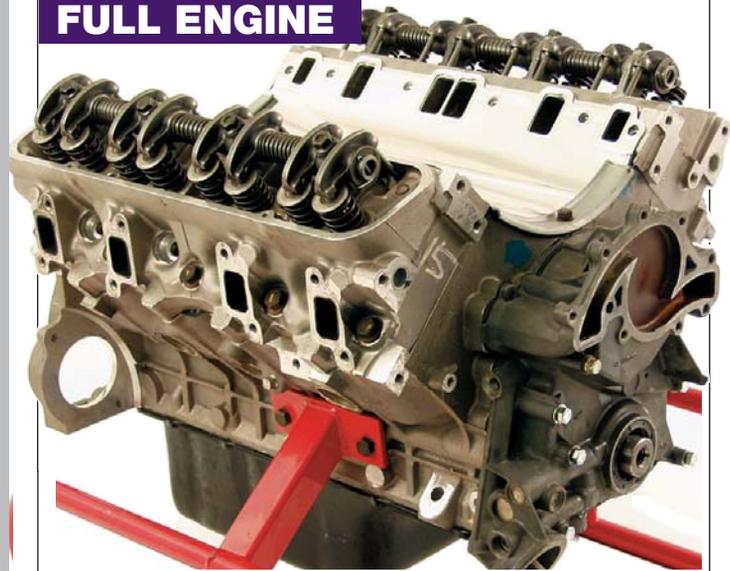

Long engine - Built-up block & cylinder heads assembly, including crank, rods & pistons, valves, guides & springs (less rocker gear), plus camshaft, followers & timing gear.

SHORT ENGINE

Short engine - Built-up block assembly, comprising crank, rods & pistons.

FULL ENGINE

Full engine - Built-up engine assembly, comprising block (crank, rods & pistons), cylinder heads (valves, guides & springs), camshaft & timing gear, rocker gear, pushrods and fitted sump, timing cover and oil pump. Full engines are either bench-run or dyno tested and built using customers own unit. Prices on application.

TURN-KEY ENGINE

Turn-key engine - Ready-to-install, built-up engine assembly, complete with all ancillary components, fuel system & engine mountings. Turn-key engines can also be supplied dyno-run. Please contact us for a quotation based on either one of our Standard or Performance Long engines with your choice of fuel system and ancillary components.

Engine Types

All long engines - Standard or Performance - are suitable for all applications - both saloon car (including TR8) and 4x4 vehicles.

Standard engines are the choice for anyone wishing to replace a worn-out engine with one of a similar type. These engines are a straight swap, enabling the existing ancillary components and fuel system to be retained. Please note that if installing a 'Standard' engine of higher capacity than that fitted, modifications to the fuel system may be required (including ECU if applicable).

Performance engines incorporate modifications designed to increase horsepower & torque - such as big-valve cylinder heads and fast-road camshafts - and usually require modifications to the fuel system (including ECU if fitted).

To gain maximum benefit from our Performance engines, we also recommend fitting tubular manifolds (Sports exhaust system) and K&N air filter(s).

Please note: certain 3.9 & 4.2 litre engines fitted to Range Rover and Discovery models from 1994 onwards are fitted with an "intermediate" type timing cover, incorporating a distributor (as fitted to earlier engines), a crank-driven oil pump and a single, "serpentine" ancillary drive belt. These timing covers require a long-nose crankshaft and are therefore unsuitable for fitting to certain engines. However, they are available to special order at a small additional cost - please inform the sales department at the time of ordering.

ENGINE NUMBER IDENTIFICATION

We have included a reference chart of Rover V8 engine numbers from 1970 onwards, which will help you to identify the engine fitted to your vehicle. The engine number of most Rover V8s is stamped on the left hand side of the block deck, adjacent to the dipstick tube, although some very early engines had the number stamped on the bellhousing flange at the rear of the block. The chart also contains a brief description of features, such as compression ratio and gearbox type and also the approximate year of production. Therefore, if your engine has been changed at some time, it should still be possible to correctly identify it.

To ensure you receive the correct parts, please have your engine number ready before ordering.

Note: "Pulsair" and "Air Injection" are terms applied to engines equipped with Air Rail type cylinder heads; ie cylinder heads with steel pipes located in holes just above the exhaust ports (fitted to carb Range Rover & TR8 engines only). 'Detoxed' refers to a variety of emission control devices - including Air Rails - fitted to carb engines.

ENGINE fitting SERVICE

We are pleased to be able to offer a fitting service for either our full or short engines. Please contact us for a quotation or to discuss your requirements.

OUR CHARGES ARE VERY REASONABLE!

Engine Cradles

All engine assemblies are bolted to a steel cradle, for ease of handling and to minimise the risk of damage whilst in transit.

There is a surcharge for the cradle, refundable on its return. When returning an exchange engine, use the cradle for sending the old unit back and we will then refund both surcharges together.

Engine cradles can also be bought outright.

Engine cradle - Part No.

S005000EC

TO ORDER: 01522 568000
www.rimmerbros.co.uk

V8 Engines - Standard 'Long' Units

ALL APPLICATIONS.

Supplied less timing cover, sump, & rocker gear.

Exchange unit must be 'Like for Like'.

Surcharge will only be refunded upon receipt & inspection of suitable old unit.

3.5 Litre Long Engine (1) **RB8000R**
Exchange.

Includes recon block, small journal crank (short keyway), 3/3 cylinder heads, cam, followers and timing gear.

Installation Kit (1) **RB8003**

Includes oil, filter, gaskets etc.

3.9 Litre Long Engine (1) **RB8001R**

Exchange.

Includes recon/relined block (not cross bolted), small journal crank (long keyway), 3/4 cylinder heads, cam, followers and timing gear.

Installation Kit (1) **RB8003**

Includes oil, filter, gaskets etc.

4.0 Litre Long Engine

GEMS' type (1) **ERR5012STRG**

Exchange.

Suitable for Series 2 (P38A) Range Rover/Discovery/TVR/Morgan etc ('95 on).

Non 'GEMS' type (1) **ERR5012STRNG**

Exchange.

Suitable for all **Non** Series 2 (P38A) Range Rover/Discovery/TVR/Morgan etc (to '95).

IDENTIFICATION: 'GEMS' Efi uses a crank sensor pick-up on rear of engine block (1995 on).

SPECIFICATION: Exchange. Rebuilt large journal cross bolted block with 'Top Hat' liners, large journal crank, cylinder heads, cam, followers and timing gear. Crank spacer STC1893SPACER is required for non-serpentine timing covers.

Installation Kit (1) **RB8003**

Includes oil, filter, gaskets etc.

4.6 Litre Long Engine

GEMS' type (1) **ERR5013STRG**

Exchange.

Suitable for Series 2 (P38A) Range Rover/Discovery/TVR/Morgan etc ('95 on).

Non 'GEMS' type (1) **ERR5013STRNG**

Exchange.

Suitable for all **Non** Series 2 (P38A) Range Rover/Discovery/TVR/Morgan etc (to '95).

IDENTIFICATION: 'GEMS' Efi uses a crank sensor pick-up on rear of engine block (1995 on).

SPECIFICATION: Exchange. Rebuilt large journal cross bolted block with 'Top Hat' liners, large journal crank, cylinder heads, cam, followers and timing gear. Crank spacer STC1893SPACER is required for non-serpentine timing covers.

Installation Kit (1) **RB8003**

Includes oil, filter, gaskets etc.

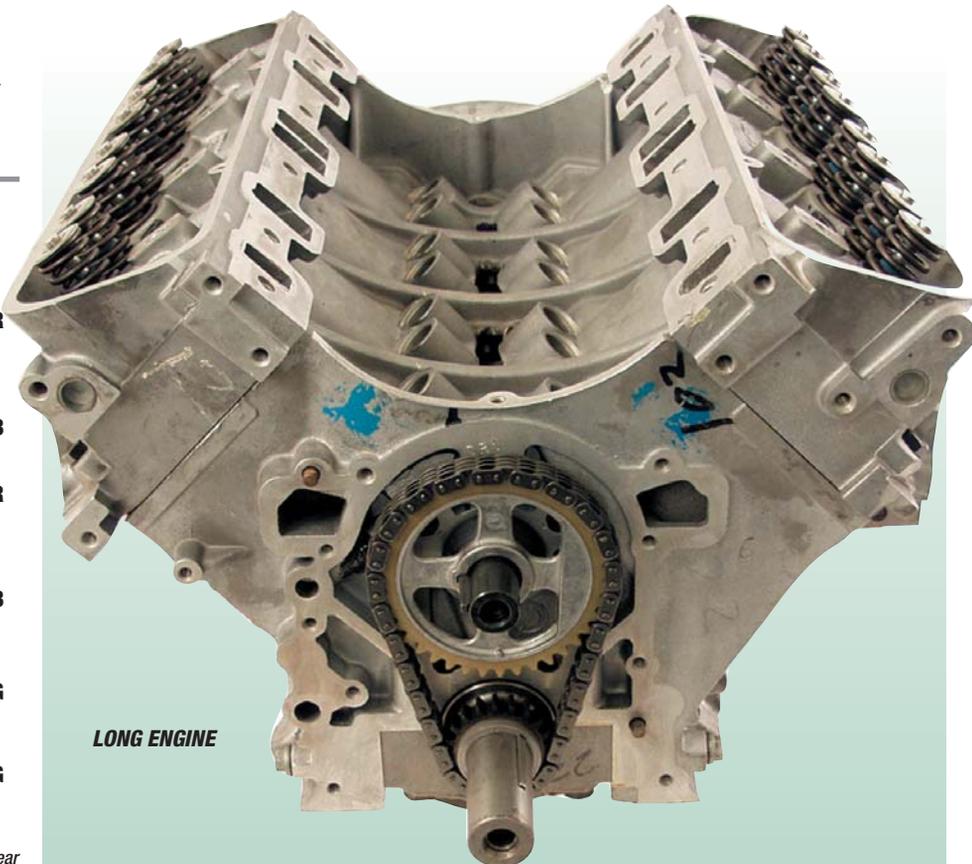

All long engines, including 4.6 litre, are suitable as direct replacements (as appropriate) for any Rover V8 engine. However, modifications to the fuel system (including ECU if fitted) may be required when replacing a 3.5 or 3.9 litre engine with a larger capacity unit.

All **Standard** engines are compatible with unleaded petrol/lpg and are bench run.

For manual transmission vehicles, we recommend fitting a new clutch while the engine is being replaced.

V8 Engines - Standard 'Full' Units

We will be pleased to recondition customer's own units to 'full' engine specification on request and can quote to do so on an individual basis.

LONG ENGINE

IMPORTANT NOTES - LONG & FULL ENGINES

Please note the following important points regarding engine assembly:

Long Engine Build-up.

These engines are supplied less rocker gear, pushrods, sumps & timing covers. It is absolutely essential that these items are checked, cleaned and correctly assembled prior to running your engine.

Check for wear on the underside of rocker shafts, on either side of the pedestals.

Check for wear on the valve tips of rocker arms.

Check pushrods for straightness and equal length.

Clean the sump and oil pick-up pipe.

Clean the timing cover and check the oil pump housing for wear and damage.

Replace all seals and gaskets.

If in any doubt, always replace with new components.

Long & Full Engines - Ancillary Components.

If you are re-fitting ancillary components - water pump, alternator, distributor, carburettors or fuel injection - check that they are suitable for re-using.

We recommend having carburettors serviced and fuel injectors cleaned/replaced before re-fitting.

The cooling system - including the radiator and heater - should be flushed through with clean water and the hoses checked before re-using.

The correct ratio (minimum 33%) of antifreeze must be maintained at all times.

Oil coolers should be flushed of old engine oil.

Engine & gearbox mountings should be checked and renewed as necessary.

The clutch operating system should be checked for wear.

Rocker covers should be cleaned internally.

All engines - oil pump priming.

All engines **not** fitted with crank-driven oil pumps should have their oil pumps primed before initial start-up. Please consult a workshop manual for this procedure.

Failure to observe these points may lead to engine damage and may also invalidate the engine's warranty.

FULL ENGINE

V8 Engines - Performance 'Long' Units

Performance Long engines are available in 4.0, 4.6, 4.8 & 5.2 litre capacities, giving a broad range of power and torque outputs to suit every budget. They are built to an extremely high specification, which guarantees maximum power and long life. Please note: specifications can be altered to suit your individual requirements - from ultra-big valve cylinder heads and solid-lifter camshafts to full turn-key Performance engines - phone us to discuss your needs.

Performance Engine Basic Specifications

All Performance Long engines are built around a rebuilt cross-bolted, large-journal block; all feature a Performance camshaft (the type depends on the intended application) and double roller timing chain sets. Finally, Performance engines are all fitted with fully ported and polished, big valve cylinder heads, to Stage 3 specification or above (See **Performance Cylinder Heads** for details).

Performance 'Long' engine;
See our **Power Outputs** table, right.

ALL APPLICATIONS.
Supplied less timing cover, sump, & rocker gear.
Exchange unit must be 'Like for Like'.
Surcharge will only be refunded upon receipt & inspection of suitable old unit.

4.0 Litre Performance Long Engine (1) RB8004R

Exchange.
Please specify if 'GEMS' or Non 'GEMS' block required and intended vehicle application. Rebuilt large journal cross bolted block with 'Top Hat' liners, large journal crank, cylinder heads, cam, followers and timing gear. Crank spacer STC1893SPACER is required for non-serpentine timing covers.
Note: all units neutrally balanced. Crank pulley & flywheel can also be balanced at extra cost.

Installation Kit (1) **RB8003**
Includes oil, filter, gaskets etc.

4.6 Litre Performance Long Engine (1) RB8005R

Exchange.
Please specify if 'GEMS' or Non 'GEMS' block required and intended vehicle application. Rebuilt large journal cross bolted block with 'Top Hat' liners, large journal crank, cylinder heads, cam, followers and timing gear. Crank spacer STC1893SPACER is required for non-serpentine timing covers.
Note: all units neutrally balanced. Crank pulley & flywheel can also be balanced at extra cost.

Installation Kit (1) **RB8003**
Includes oil, filter, gaskets etc.

4.8 Litre Performance Long Engine (1) RB8006R

Exchange.
Please specify if 'GEMS' or Non 'GEMS' block required and intended vehicle application. Rebuilt large journal cross bolted block with 'Top Hat' liners, large journal crank, cylinder heads, cam, followers and timing gear. Crank spacer STC1893SPACER is required for non-serpentine timing covers.
Note: all units neutrally balanced. Crank pulley & flywheel can also be balanced at extra cost.

Installation Kit (1) **RB8003**
Includes oil, filter, gaskets etc.

5.2 Litre Performance Long Engine (1) RB8007R

Exchange.
Please specify if 'GEMS' or Non 'GEMS' block required and intended vehicle application. Rebuilt large journal cross bolted block with 'Top Hat' liners, large journal crank, cylinder heads, cam, followers and timing gear. Crank spacer STC1893SPACER is required for non-serpentine timing covers.
Note: all units neutrally balanced. Crank pulley & flywheel can also be balanced at extra cost.

Installation Kit (1) **RB8003**
Includes oil, filter, gaskets etc.

All long engines, including 5.2 litre, are suitable as direct replacements (as appropriate) for any Rover V8 engine. However, modifications to the fuel system (including ECU if fitted) may be required when replacing a 3.5 or 3.9 litre engine with a larger capacity unit.

All **Performance** engines are compatible with unleaded petrol and lpg.
For manual transmission vehicles, we recommend fitting a new clutch while the engine is being replaced.

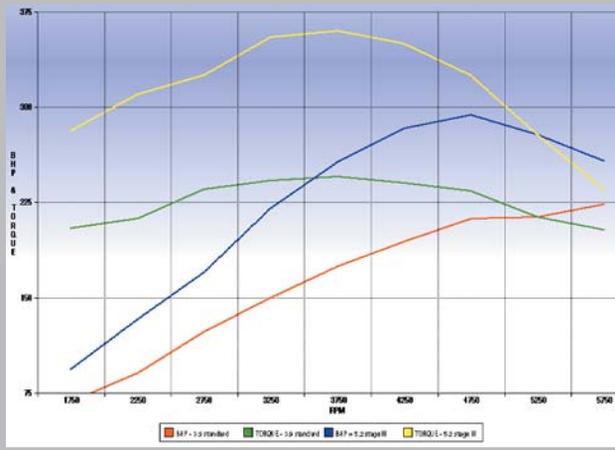

FORGED PISTON & H-BEAM CON ROD

Power Outputs

The table below is a guide to typical power & torque outputs of our range of V8 Full engines. Please note that these figures are intended only as an indication of the performance potential of each engine. In reality, power figures may vary considerably depending on final application; choice of induction system, exhaust and intended RPM range all have a significant effect on final power output. To achieve the required power, it may be necessary to modify the fuel system - particularly on fuel injection engines. See **Fuel** section for details, or speak to our **Sales Department** for advice. Each Performance Full engine is supplied with a dyno test sheet, giving actual power figures obtained on the dyno. All Long engines are bench run.

Standard Engines

Engine Size	PEAK POWER (bhp)	PEAK TORQUE (lb/ft)
3.5 litre	165	190
3.9 litre	200	240
4.6 litre	220	290

Performance Engines

4.6 litre	260	300
4.8 litre	290	330
5.2 litre	310	350

NOTES - ENGINE BALANCING

All Performance engines are dynamically balanced (ie their rotating components are balanced individually and not as one assembly). The benefit of balancing in this way is that individual components can be replaced, if need be, without upsetting the balance of the whole engine. However, the benefits of balancing the engine are lost if any of the associated rotating parts are not also balanced; therefore, we strongly recommend that your crankshaft pulley and flywheel (manual transmission vehicles) are neutrally balanced before being fitted to your engine.

As there are numerous variations of crankshaft pulley and flywheel, the easiest way to make sure you have the correct, balanced components for your needs is to send us your original crank pulley and flywheel for balancing at the time of placing your engine order. These items will then be balanced (at extra cost) and returned to you with your engine.

V8 Full Engines - Performance

We will be pleased to recondition customer's own units to 'full' engine specification on request and can quote to do so on an individual basis.

BIG VALVES

VERNIER TIMING CHAIN SET

CROSS-BOLTED BLOCK

TO ORDER: 01522 568000
www.rimmerbros.co.uk

Description Qty Req. Part No.

V8 Short Engines

Short engines are sold on an exchange basis. The old unit must be a suitable type (1980 onwards) otherwise a surcharge will apply.

3.5 litre - new short engine

Comprises new block/crank/bearings/pistons/rods (assembled). Less cam & followers.

- low compression (8.13:1) (1) **ETC7714**
- high compression (9.35:1) (1) **RB7121**

3.5 litre - recon short engine

Comprises recon block, rebored with new pistons/cam bearings/reground crank & new bearings (assembled). Less cam & followers.

- low compression (8.13:1) (1) **ETC7714R**
- high compression (9.35:1) (1) **RB7121R**

3.9 litre - new short engine (1) **RB7487**

Comprises new block/crank/bearings/pistons/rods (assembled). Less cam & followers.

3.9 litre - recon short engine (1) **RB7487R**

Comprises recon block, relined with new pistons/rings/cam bearings/reground crank & new bearings (assembled). Less cam & followers.

3.9 litre - up-rated short engine (1) **RB7487UR**

Comprises recon, large journal block, cross-bolted & ARP mains studs. Crank/rods & pocketed pistons. Lightened & balanced assembly. Less cam & followers.

4.2 litre - short engine (1) **ERR4171**

Comprises block/crank/bearings/pistons/rods (assembled). Less cam & followers.

4.0 litre - new short engine

Series 2 Range Rover application.

NB. Unsuitable for use with pre '95 heads as low compression ratio results.

Large journal, cross-bolted type.

Comprises new block/crank/bearings/pistons/rods (assembled). Less cam & followers.

- low compression* (8.13:1) (1) **STC1890**
- high compression* (9.35:1) (1) **STC1891**

*Please see Note regarding "Compression Ratios - Cylinder Heads & Short Engines", right.

4.6 litre - new short engine

Series 2 Range Rover application.

NB. Unsuitable for use with pre '95 heads as low compression ratio results.

Large journal, cross-bolted type.

Comprises new block/crank/bearings/pistons/rods (assembled). Less cam & followers.

When using this short engine to replace earlier type (3.5 or 3.9) engines, a crank spacer - part no. **STC1893SPACER** - may be required. Please enquire for details.

Sump pan may also require relieving to allow swing clearance for front web of crank.

- low compression* (8.13:1) (1) **STC1892**
- high compression* (9.35:1) (1) **STC1893**

*Please see Note "Compression Ratios - Cylinder Heads & Short Engines", right.

4.6 litre - rebuilt short engine - high compression

Pre-Series 2 Range Rover applications.

Suitable for use with pre-Series 2 Range Rover cylinder heads (see Notes "Compression Ratios, Cylinder Heads & Short Engines", right).

Large journal, cross-bolted type.

Comprises rebuilt block/crank/bearings/pistons/rods (assembled). Less cam & followers.

When using this short engine to replace earlier type (3.5 or 3.9) engines, a crank spacer - part no. **STC1893SPACER** - may be required. Please enquire for details.

Sump pan may also require relieving to allow swing clearance for front web of crank.

- high compression* (1) **STC1893HCR**

*Please see Note regarding "Compression Ratios, Cylinder Heads & Short Engines".

4.8 litre - rebuilt short engine (1) **RB7676R**

Comprises rebuilt large journal, cross-bolted block & long stroke (86mm) crank. ARP mains studs, new pistons & rings. Less cam & followers.

When using this short engine to replace earlier type (3.5 or 3.9) engines, a crank spacer - part no. **STC1893SPACER** - may be required. Please enquire for details.

Sump pan may also require relieving to allow swing clearance for front web of crank.

5.2 litre - rebuilt short engine (1) **RB7682R**

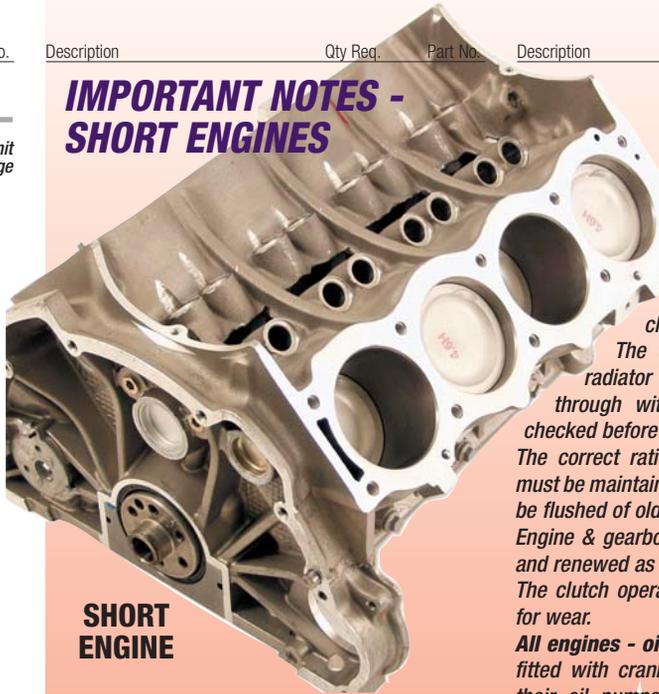

Comprises rebuilt large journal, cross-bolted block, fitted with special 96mm bore liners, long stroke (90mm) cross-drilled crank, steel rods & new pistons (90mm stroke). Lightened & balanced assembly. Less cam & followers.

When using this short engine to replace earlier type (3.5 or 3.9) engines, a crank spacer - part no. **STC1893SPACER** - may be required. Please enquire for details.

Sump pan may also require relieving to allow swing clearance for front web of crank.

IMPORTANT NOTES - SHORT ENGINES

SHORT ENGINE

SHORT ENGINE BUILD-UP

When building up a short engine to a complete assembly, it is essential to thoroughly examine every part you intend to re-use. We recommend that you pay special attention to the camshaft, followers, pushrods & rocker gear, checking carefully for signs of wear; re-using worn parts is false economy and you risk contaminating your new engine with abrasive particles.

The following parts MUST be meticulously cleaned prior to fitting:

- sump & oil pick-up pipe
- timing cover & oil pump assembly
- cylinder heads
- rocker covers

Failure to observe these points may lead to engine damage and may invalidate the engine's warranty.

Short Engines - Ancillary Components. If you are re-fitting ancillary components - water pump, alternator, distributor, carburettors or fuel injection - check that they are suitable for re-using. We recommend having carburettors serviced and fuel injectors cleaned/ replaced before re-fitting.

The cooling system - including the radiator and heater - should be flushed through with clean water and the hoses checked before re-using.

The correct ratio (minimum 33%) of antifreeze must be maintained at all times. Oil coolers should be flushed of old engine oil.

Engine & gearbox mountings should be checked and renewed as necessary.

The clutch operating system should be checked for wear.

All engines - oil pump priming. All engines not fitted with crank-driven oil pumps should have their oil pumps primed before initial start-up. Please consult a workshop manual for this procedure.

TIMING COVERS

If the timing cover you intend to fit to your short engine incorporates a crank-driven oil pump, please inform the Sales Department at the time of ordering (3.5 & 3.9 litre Standard Short Engines only).

Up-rated 3.9 litre Short engines, as well as all Short Engines of 4.0 litres and above, are suitable for timing covers which incorporate crank-driven oil pumps. If fitting the earlier type of timing cover - with camshaft-driven oil pump - to a short engine of 4.0 litres or above, please also request crank spacer, part no. **STC1893SPACER**, which will ensure the crankshaft pulley is securely fitted.

If in any doubt, a member of our Sales Department will be pleased to help you.

COMPRESSION RATIOS - CYLINDER HEADS & SHORT ENGINES

There are various different Rover V8 cylinder heads available, with different combustion chamber sizes, giving a variety of compression ratios when fitted to a short engine. Therefore, you will need to know the combustion chamber size of the cylinder heads that you intend to use in order to be able to calculate the engine's compression ratio.

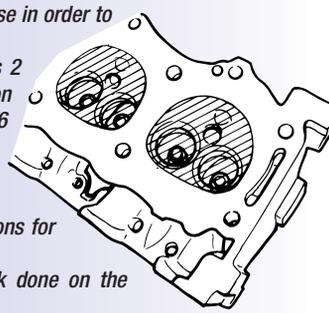

As a general rule, cylinder heads up to the introduction of Series 2 Range Rover (1994) have approximately 34-36cc combustion chambers. From the introduction of Series 2 Range Rover (4.0 & 4.6 litre engines), they have approximately 28cc combustion chambers (if in doubt, cylinder heads fitted to 4.0 & 4.6 litre engines have only two rows of cylinder head bolts; earlier engines have three rows).

Refer to the table below of Short Engine & Cylinder Head Applications for more detailed information.

This information does not take into account any machining work done on the cylinder heads in the past.

In certain circumstances, it may be cheaper to purchase a pair of reconditioned cylinder heads than to try to match a pair of unknown heads to a Short Engine.

Alternatively, it may be worth considering a Full Engine, which is supplied complete with fitted cylinder heads.

NOTES - CYLINDER HEAD IDENTIFICATION

See also: 'Compression Ratios - Cylinder Heads & Short Engines' page 135.

There are various types of cylinder heads available for the Rover V8, with only subtle differences between them. Not all are suitable for every application, so care must be taken when ordering replacement heads for your vehicle. Please note that reconditioned cylinder heads are only sold on an exchange basis (in pairs) and that we require similar type cylinder heads in return, otherwise a surcharge will apply.

Early Cylinder Heads

Early cylinder heads - as fitted to Rover P5B, P6, MGB V8 and early Range Rover - are fitted with small (38mm inlet, 33mm exhaust) valves and may not be suitable for use with unleaded fuel. These heads can be identified most easily by removing one of the spark plugs and measuring the length of the threaded section of the plug. If it measures 12.5mm, the cylinder head is an early type and is **not suitable for exchange**. If it measures 19mm, the cylinder head is post-1976 (SD1 or later).

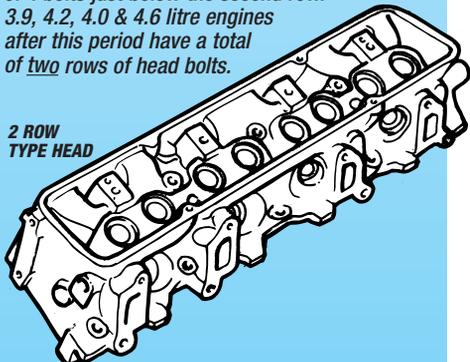

Later Cylinder Heads

Identify later cylinder heads as follows:

1. Count the rows of cylinder head bolts. All cylinder heads have a row of head bolts inside the rocker covers; they also have a second row of 5 head bolts just below the spark plugs. Finally, cylinder heads up to around 1994 have a third row of 4 bolts just below the second row. 3.9, 4.2, 4.0 & 4.6 litre engines after this period have a total of two rows of head bolts.

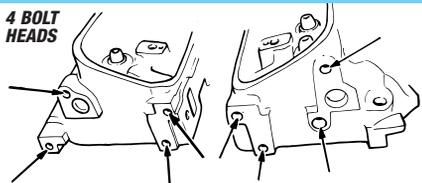

2 ROW TYPE HEAD

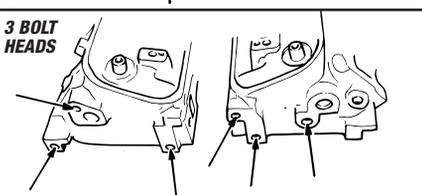

2. Look at the ends of the cylinder heads, as fitted to the engine. There are tapped holes in the ends of each cylinder head, to which the ancillary component brackets are bolted. The number of holes determines which type you have, as follows:

- 3/3 bolt (3 bolt holes in each head)
- 3/4 bolt (3 bolt holes in one head, 4 in the other)
- 4/4 bolt (4 bolt holes in each head)

4 BOLT HEADS

3 BOLT HEADS

It is important that the cylinder heads you order are similar to the ones you have removed, otherwise your ancillary components may not fit.

STANDARD CYLINDER HEADS

V8 Standard Cylinder Heads

*PLEASE REFER TO NOTES - CYLINDER HEAD IDENTIFICATION. See also 'V8 Performance Cylinder Heads'.

Standard Cylinder heads (pair) - reconditioned; Exchange - all engines.

Complete with new valves, valve guides, springs & valve stem oil seals. Less rocker gear.

Reconditioned cylinder heads are sold only in matching pairs, with the actual combustion chamber size marked on them.

with 3 rows of head bolts
Pre-'95 applications. 34-36cc combustion chambers.

3/3 end bolt type (pr) **RB7095RA**

3/4 end bolt type (pr) **RB7095RB**

4/4 end bolt type (pr) **RB7095RC**

with 2 rows of head bolts (pr) **RB7095RD**
'95-on applications. 28cc combustion chambers. All 4/4 end bolt.

Standard cylinder heads are sold on an exchange basis: the old units must be serviceable and of a suitable type otherwise a surcharge will apply. If preferred, we can recondition your existing cylinder heads. Please note that early type (pre 1976) heads are not suitable as exchange units - please refer to 'Notes Cylinder Heads Identification'.

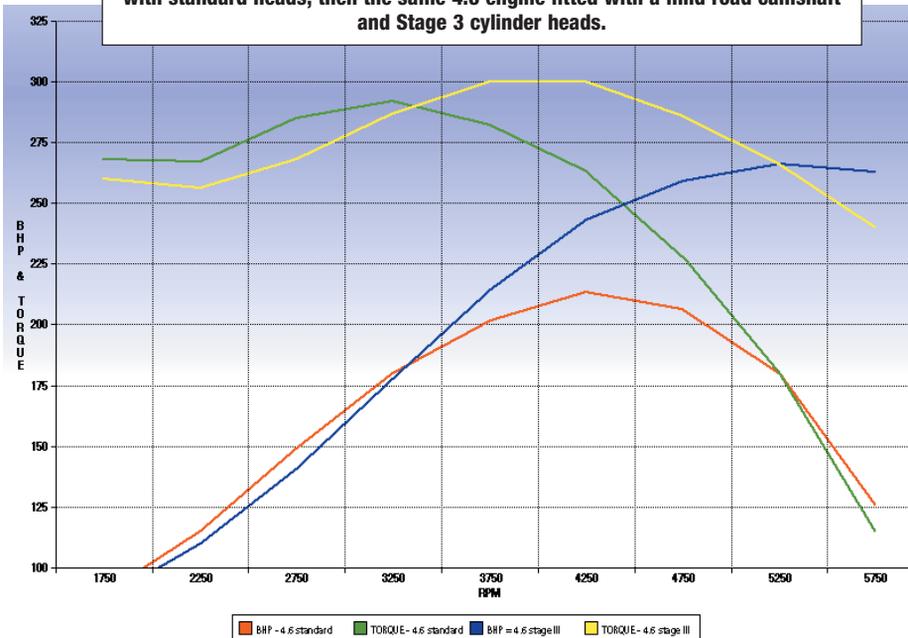

Cylinder heads - new

Due to the numerous variations of cylinder heads and the complexity of part number supersessions, it would be too complicated to list a full range of new cylinder heads in this catalogue. However, if you require **new** cylinder heads, please contact our Sales Department for price & availability.

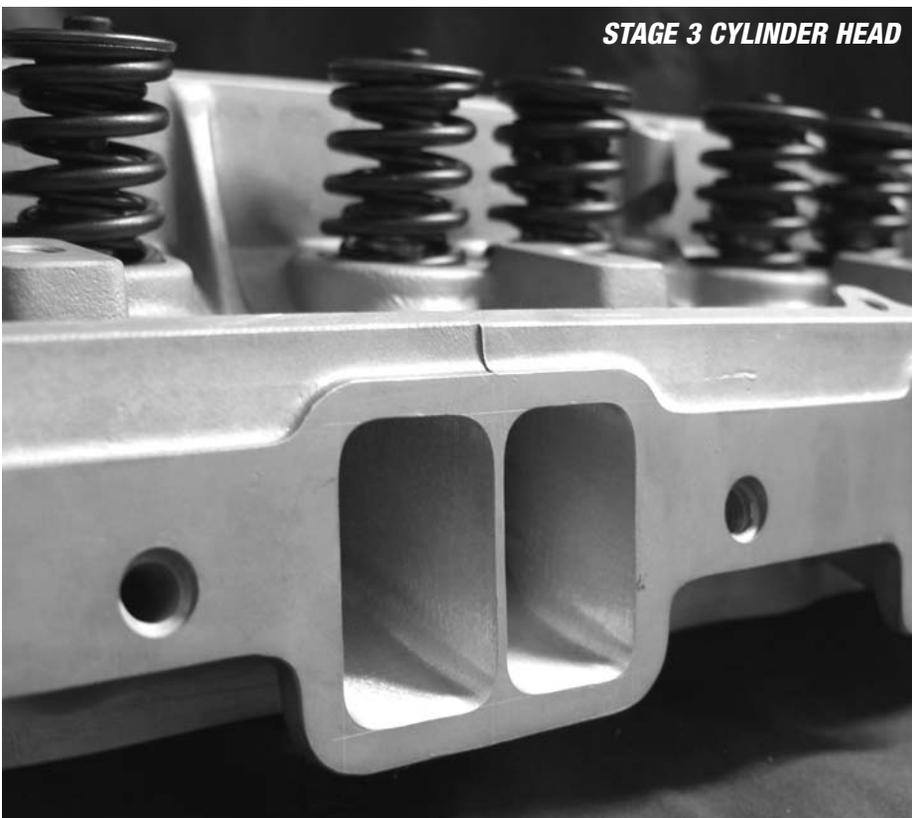

CYLINDER HEAD SPECIFICATION

All our cylinder heads - both Standard and Performance types - are based on late-type (19mm spark plug) head castings. All are compatible with unleaded fuel and LPG and are suitable for carb or efi applications.

Dyno graph showing the power & torque of a 4.6 litre engine fitted with standard heads, then the same 4.6 engine fitted with a mild road camshaft and Stage 3 cylinder heads.

-------------	----------	----------	-------------	----------	----------

STAGE 3 CYLINDER HEAD

V8 Performance Cylinder Heads

We offer three stages of modified Performance cylinder head, designed to suit different requirements and budgets.

Stage 1 - polished and lightly ported cylinder heads featuring bulleted guides and standard size valves.

Suitable for standard and mildly tuned 3.5 to 4.6 litre engines.

Stage 3 - fully polished & ported, gas-flowed cylinder heads, featuring bulleted & shortened guides and fitted with Big Valves (41.45mm inlet, 36.5mm exhaust).

Together with the right camshaft and fuel system, these heads offer a substantial power and torque increase, and are suitable for Performance engines up to 5.2 litres. See Comparison Chart, previous page.

Stage 4 - Ultra Big Valve heads. Fully polished & ported as Stage 3, but featuring 43.11mm inlet and 38.1mm exhaust valves.

These cylinder heads are suitable for serious Performance applications, in engines of 4.6 litres and above, and require suitably modified fuel systems.

Performance cylinder heads (pair);
Please refer to 'Notes - Cylinder Head Identification'.

Exchange - all engines.
Complete with new valves, valve guides, springs & valve stem oil seals. Less rocker gear.

Performance cylinder heads are sold only in matching pairs, with the actual combustion chamber size marked on them.

Stage 1

with 3 rows of head bolts

Pre - '95 applications. 34-36cc combustion chambers.

3/3 end bolt type (1) **RB7467R S1A**

3/4 end bolt type (1) **RB7467R S1B**

4/4 end bolt type (1) **RB7467R S1C**

with 2 rows of head bolts(1) **RB7467R S1D**

'95 on applications. 28cc combustion chambers.

4/4 end bolt type.

Stage 3

with 3 rows of head bolts

Pre - '95 applications. 34-36cc combustion chambers.

3/3 end bolt type (1) **RB7467R S3A**

3/4 end bolt type (1) **RB7467R S3B**

4/4 end bolt type (1) **RB7467R S3C**

with 2 rows of head bolts(1) **RB7467R S3D**

'95 on applications. 28cc combustion chambers.

4/4 end bolt type.

Stage 4

with 3 rows of head bolts

Pre - '95 applications. 34-36cc combustion chambers.

3/3 end bolt type (1) **RB7467R S4A**

3/4 end bolt type (1) **RB7467R S4B**

4/4 end bolt type (1) **RB7467R S4C**

with 2 rows of head bolts(1) **RB7467R S4D**

'95 on applications. 28cc combustion chambers.

4/4 end bolt type.

Performance cylinder heads are sold on an exchange basis: the old units must be serviceable and of a suitable type otherwise a surcharge will apply. If preferred, we can modify your existing cylinder heads. Please note that early type (pre 1976) heads are not suitable as exchange units - please refer to 'Notes Cylinder Heads Identification'.

V8 Head Gaskets

Head gasket set - V8;

3.5 litre (88.9mm bore)

tin head gaskets

to 1976 (pre SD1) (1) **GEG165**

1976 on (1) **GUG1066HS**

composite head gaskets* (1) **GUG1066HSC**

3.9/4.2 litre (94mm bore)

3 rows of cylinder head bolts.

tin head gaskets (1) **RB7447**

composite head gaskets* (1) **RB7447C**

3.9/4.2/4.0/4.6 litre

(94mm bore) (1) **RA1233**

2 rows of cylinder head bolts.

Composite head gaskets.

5.2 litre (96mm bore) (1) **RB7684**

Composite head gaskets*.

Head gasket only- V8;

3.5 litre (88.9mm bore)

tin gasket (2) **GEG340**

composite gasket* (2) **GEG340C**

3.9/4.2 litre

3 rows of cylinder head bolts.

tin gasket (2) **RB7448**

composite gasket* (2) **RB7448C**

3.9/4.2/4.0 & 4.6 litre

2 rows of cylinder head bolts.

tin gasket (2) **ETC7819**

composite gasket* (2) **ERR7217**

5.2 litre (96mm bore)

(2) **RB7685**

Composite gasket*.

*Composite head gaskets are thicker than standard tin gaskets and will therefore lower the engine's compression ratio. Ideal for correcting compression ratio when heads/ block faces have been skimmed. (Not applicable 1995 on).

Approximate gasket thicknesses are as follows:

Standard (tin) gaskets 0.5mm

Composite gaskets 1.2mm

Typical effect on compression ratio:

Standard (tin) gaskets 3cc

Composite gaskets 10cc

V8 Cylinder Head Bolts

All parts listed are suitable for saloon, sports & 4x4 applications unless otherwise stated.

Bolt - cylinder head;

all engines up to 1995 (except late 3.9, 4.0 & 4.6).

(See note below).

centre (long) (7/16" UNC x 3.9") (6) **602193A**

outer (medium) (7/16" UNC x 2.7") (14) **602192A**

Order 13 if your engine has a dipstick retainer clamp

on the head bolt adjacent to the dipstick.

tapped bolt (7/16" x 2.7") (1) **602450A**

For dipstick retainer, if fitted.

double-ended bolt (1) **602200**

Fitted to some Range Rovers.

outer (short) (7/16" x 2 1/4") (8) **602191A**

1995 onwards (late 3.9, 4.0 & 4.6).

Note: These bolts can be identified by their flanged head.

They do not need a separate washer and can be used on

earlier engines. However, they are not re-useable and

must be replaced once removed.

long (96mm) (6) **ERR2944**

medium (66mm) (14) **ERR2943**

Note: the outer row of short bolts, or "outrigger" bolts,

has not been used since the introduction of the Series

2 Range Rover.

Washer - cylinder head bolts

standard (28) **602098A**

uprated (28) **602098UR**

Cylinder head stud kit (1) **RB7680**
Engine set of ARP cylinder head studs, washers and nuts to replace original bolts. Studs improve cylinder head sealing & prevent damage to block threads.

Description Qty Req. Part No.

V8 Valves, Guides & Springs

All parts listed are suitable for saloon, sport & 4x4 applications unless otherwise stated.

Various different valves have been used since the Rover V8's introduction; most having the standard "Rover SD1" head diameter: inlet - 40mm, exhaust - 34mm. However, early engines (pre 1976) were fitted with smaller diameter valves - 38mm inlet, 33mm exhaust - which are less efficient. In order to benefit from the larger valve sizes, it would be more practical to fit a pair of later cylinder heads than to attempt to fit the larger valves to early heads.

Vitesse specification valves are of standard SD1 head-diameter, with waisted stems just behind the valve head.

The largest valves that can be fitted to the existing valve seats (later heads only), without the need for extensive machining, are our Big Valves (Inlet - 41.4 mm, exhaust - 35.5 mm, with waisted stems). These valves are particularly suited to large capacity engines. (Note: some machining is required to the valve guide and seat).

Finally, the latest factory valves, as fitted to 3.9 & 4.2 engines since 1993, as well as the Series 2 Range Rover (4.0 & 4.6 engines), feature the same head diameter as SD1-type valves.

Note: all parts supplied are suitable for unleaded applications.

Inlet valve;

carburettor engines

early engines (pre 1976) (8) **602166**
Head diameter: 38mm.

V8 ROCKER GEAR OVERHAUL KIT - 611660K

Inc: rocker arms (8), rocker shaft, springs etc.
2 required per engine.

V8 Rocker Gear

The following parts are suitable for all engines unless otherwise stated.

Rocker shaft assembly (2) **611660A**

Assembled, ready to fit.

Rocker build kit (2) **611660K**

Includes parts ready for assembly.

Rocker shaft only (2) **606661A**

Pedestal - rocker shaft (8) **603734A**

Pedestal shims (1) **603734SH**

Includes three sets of shims of different thickness. Use to set "lifter preload" when fitting a new cam with higher lift than standard. See also adjustable push rods, below.

Rocker arm;

original spec (alloy)

right hand (8) **602153**

left hand (8) **602154**

universal (16) **602154ALT**

Alternative steel arm - non handed.

Spacer spring - rocker shaft (6) **602142A**

End spring - rocker shaft (4) **602148A**

Wavy washer.

End washer - rocker shaft (4) **602186A**

Split pin - rocker shaft (4) **PC34**

Push rod;

standard (16) **603378**

heavy duty (16) **603378HD**

Larger diameter shaft. Cylinder head guide holes may need enlarging accordingly.

adjustable (engine set) (1) **603378ADJ**

Set of pushrods, adjustable for length at the rocker end,

allowing the lifter preload to be precisely set without shims.

WHAT IS LIFTER PRELOAD?

"Lifter preload" refers to the position of the pushrod seat in the lifter (cam follower) when the engine has been assembled and the lifter is positioned on the heel of the cam. Lifter preload must be checked whenever a non-standard component which alters the distance between the rocker arm and the lifter - such as a high lift camshaft or performance cylinder head - has been fitted. Incorrect lifter preload will cause poor running, premature wear or, at worst, engine failure.

Check the lifter preload as follows:

With the lifters empty of oil, assemble the rocker shaft & pushrod components, making sure there is no wear in the rocker shafts, rocker arms & pushrods.

Checking each lifter in turn, positioned on the heel of the cam, measure the gap between the pushrod seat and the bottom of the circlip groove. There must be a clearance of .020" minimum and .060" maximum at this position.

If the clearance is greater than .060", use pedestal shims (603734SH) to decrease. Remember to use equal thickness shims under each pedestal of a shaft to avoid distortion or breakage.

V8 Camshaft

We stock a full range of **Standard** camshafts, which represent good value for money. In addition, we offer a choice of **Performance** camshafts - available either as complete kits or on their own - which are designed to improve torque and horsepower when fitted to standard or uprated engines.

Our **Mild Road** camshaft gives a noticeable increase in low-rev torque, with smooth idle characteristics and good fuel economy. The Mild Road is a hydraulic camshaft, available on its own or as part of a kit, including followers, single valve springs and fitting instructions.

Fast Road camshafts are available separately as a hydraulic type only, or in complete kits as hydraulic or solid camshafts. All Fast Road camshafts are suitable for engines right up to 5.2 litres. They are particularly effective when used as part of a complete Performance package with our Stage 1, 3 or 4 cylinder heads, uprated fuel systems and Sports Exhausts.

Fast Road Hydraulic is a hydraulic camshaft which boosts top-end power whilst retaining low-end torque and good fuel economy.

Fast Road Solid is a solid-lifter camshaft available only as a complete kit, which includes lifters, adjustable timing chain set, adjustable pushrods, all necessary gaskets and full instructions. The Fast Road Solid camshaft is designed for serious performance applications, where maximum top-end power is required, whilst still being suitable for the road.

Note: Fast Road Solid Camshafts can only be fitted to engines which have valve cut-outs in the pistons (pocketed pistons) as fitted to our performance engines.

All parts listed are suitable for Saloon/Sports and 4x4 applications unless otherwise stated.

Camshaft only - standard;

See also Camshaft Kits.

saloon/sports applications (1) **ERC2003A**
Carb & efi.

Note: some later Rover Vitesses, notably twin plenum models, were fitted with alternative camshafts, double valve springs, larger diameter rocker shafts and adjustable rocker gear. These parts are now generally unavailable but may be replaced using parts listed below.

Range Rover - 1970 to 1986
low compression engines (1) **ERC2003A**
Compression ratios: 8.13, 8.25, 8.5:1.

high compression engines (1) **ETC6849**
Compression ratio: 9.35:1.

Range Rover - 1986 onwards
carburettor engines
- low compression (8.13:1.) (1) **ERC2003A**
- high compression (9.35:1.) (1) **ETC6849**

efi engines

Holds 4 leads.		

**PERFORMANCE SOLID LIFTER
CAMSHAFT KIT - RB7442S**

CAMSHAFT KITS;

Standard

Suitable for all engines except Series 2 Range Rover.

kit 1 (1) **RB7125**
Includes ERC2003A cam & 16 standard followers.

kit 2 (1) **RB7489**
Includes ERC2003A cam, 16 standard followers, timing chain, timing cover gasket & oil seal, 2 x rocker cover gaskets, inlet manifold gasket & 2 x inlet manifold seals.

Performance

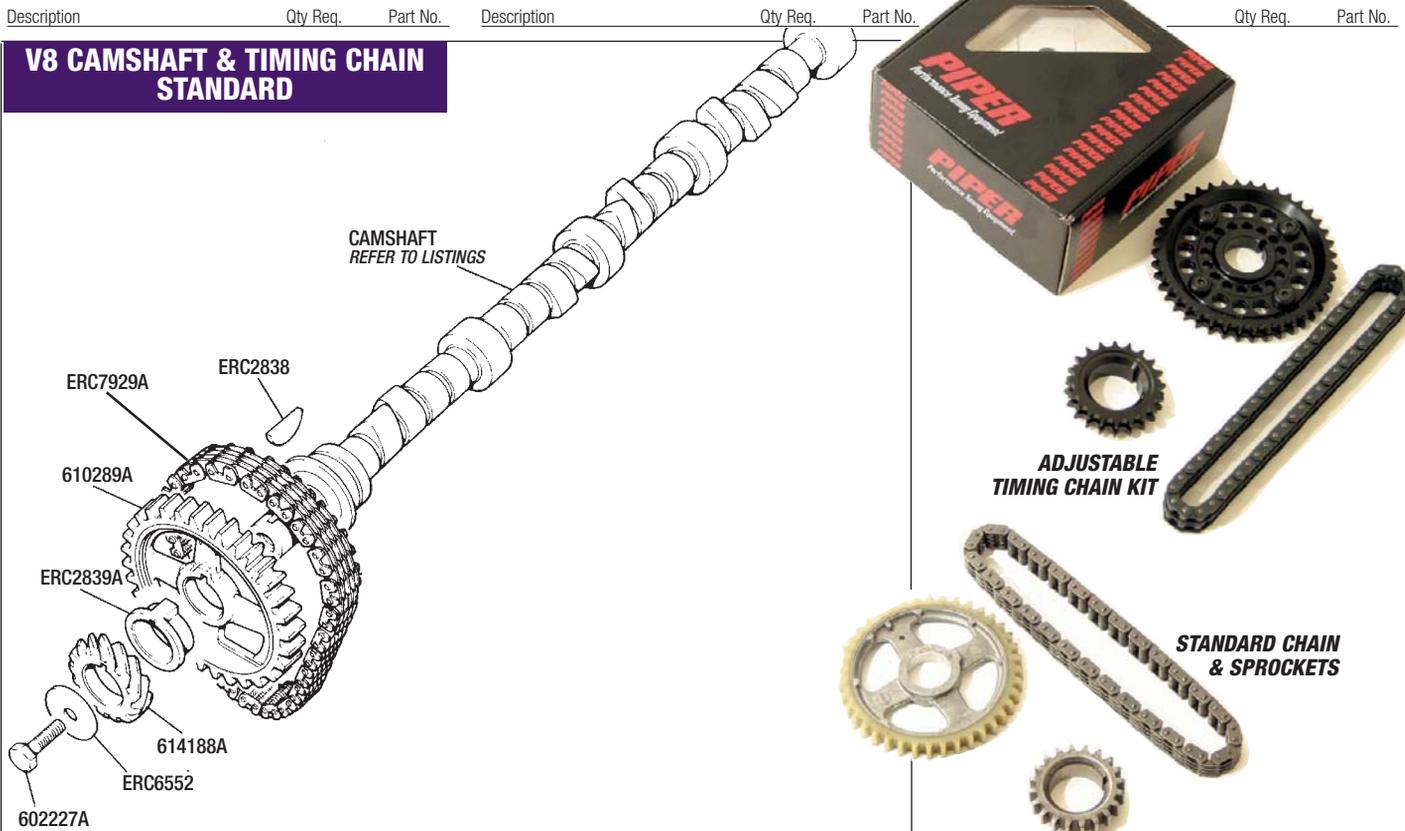

We offer two Performance cam kits:- a hydraulic cam kit and a solid lifter cam kit. Both kits are complete and offer a simple job for the competent DIY mechanic and both offer a worthwhile performance gain, either on their own or with our Performance cylinder heads.

Suitable for all engines except Series 2 Range Rover.

Fast Road Hydraulic (1) **RB7442HYD**
Kit includes special grind hydraulic cam, 16 performance followers, adjustable timing chain set, all necessary gaskets & full instructions.

Fast Road Solid (1) **RB7442SOLID**
Kit includes special grind solid cam, 16 solid lifters, adjustable timing chain set, adjustable pushrods, all necessary gaskets and full instructions.

Note: Fast Road Solid Camshafts can only be fitted to engines which have valve cut-outs in the pistons (pocketed pistons) as fitted to our performance engines.

V8 Timing Cover & Fittings

Timing Cover Identification (to 1994)

There are 2 main types of timing cover, fitted up to late 1994:

1. saloon/sports, as fitted to Rover saloons and Triumph TR8s.
2. 4x4, as fitted to Range Rovers and Land Rovers.

The saloon/sports version has a more compact water pump, mounted lower down for improved bonnet clearance. The 4x4 version has a water pump mounted higher up. In addition, the 4x4 timing cover usually has a mud shield to protect the front crank oil seal.

Both types will fit all versions of the engine (providing suitable ancillaries are available) and both types are further categorised as follows:

The timing cover fitted to early vehicles (prior to 1976) incorporates an oil pump gear-housing designed for the early, "short" oil pump gears (refer to Oil Pump).

Later timing covers have a deeper gear-housing, accommodating the longer pump gears used from the SD1 (1976) until the introduction of the crank-driven oil pump (late 1994 - see below). Although the two types of timing cover are interchangeable, the oil pump gears and distributor would also need to be changed.

If, however, upgrading the early (pre 1976) oil pump is your intention, purchase Oil Pump Kit **RB7480**, which contains a spacer plate and longer gears, along with the correct distributor drive, designed specifically for the early timing cover. (RB7480 is not suitable for later timing covers, 1976 onwards).

Timing Cover Identification (1994 on)

The timing cover fitted to the Series 2 Range Rover is of an updated design, unsuitable for earlier models due to the fact that there is no provision for a distributor.

There is, however, an "intermediate" timing cover, fitted to late 3.9 and 4.2 models immediately prior to the introduction of the Series 2 Range Rover, which includes a combination of features from both types, such as the crank-driven oil pump and conventional distributor. Although this timing cover will fit earlier models, it can be considered as unsuitable, as the oil pump drive requires a "long-nose" crank, not fitted to earlier engines.

Timing cover;

saloon/sports - 1976 on (1) **ERC418**
Deeper oil pump gear housing.

Range Rover Classic
short-gear oil pump engines(1) **613260**

Stud (2) **ERC1188**

Dowel - water pump locating (2) **602201**

All engines except Series 2 Range Rover.

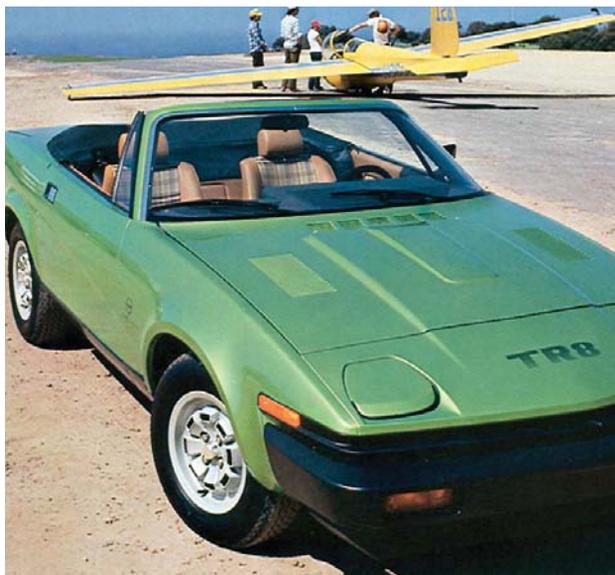

Blanking plate - fuel pump (1) **610030**

Early engines fitted with electric fuel pump.

Gasket - blanking plate (1) **602180**

Oil pressure switch (1) **STC4104**

Series 2 Range Rover only - fitted to timing cover.

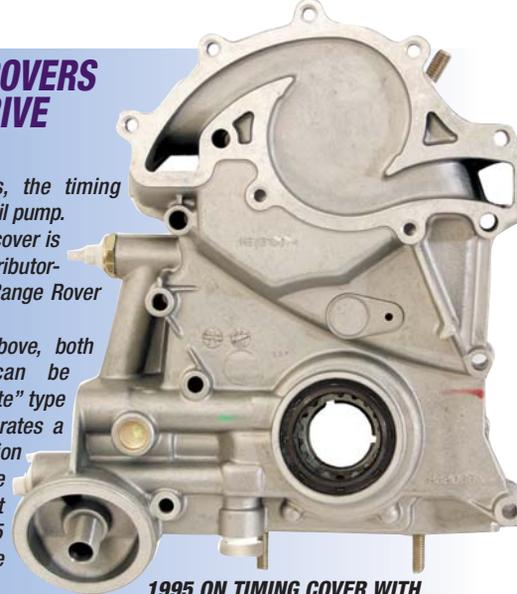

NOTES - TIMING COVERS & SERPENTINE DRIVE BELTS

For 'Saloon/sports' engines, the timing cover has a distributor-driven oil pump.

For '4x4' engines, the timing cover is the Land Rover type, with distributor-driven oil pump (as fitted to Range Rover up to 1994).

For 3.9 litre engines and above, both types of timing cover can be exchanged for the "intermediate" type timing cover - which incorporates a crank-driven oil pump, provision for a distributor and serpentine ancillary drive belt. Note that ancillaries fitted to pre '95 vehicles may not be compatible with serpentine timing covers.

1995 ON TIMING COVER WITH CRANK-DRIVEN OIL PUMP

V8 ENGINE REBUILD KIT

3.5 OR 3.9 LITRE

ALSO CONVERT YOUR ENGINE FROM 3.5 LITRE TO 3.9 LITRE USING OUR PISTONS AND LINERS!

FOR THE DIY ENTHUSIAST!

These kits include everything you are likely to need for a 3.5 litre engine rebuild or conversion to 3.9 litres. We assume you'll have the block rebores (in the case of the 3.9, re-sleeved using the liners supplied) and any other machining work done as required.

Please note that your crankshaft is required in exchange. For export customers, the crank can be removed from the kit, a price adjustment made, allowing you to have the re-grinding done locally.

We can also offer kits using performance components. Please enquire.

REBUILD KIT	3.5 LITRE	3.9 LITRE
PART NUMBER	RB2028/3.5	RB2028/3.9

Kit Contents:-

- Crankshaft - reground (*exchange*)
- Bearing shells to suit
- Piston set including rings and pins:
 - 3.5 litre (+ 0.020") (9.75:1)
 - 3.9 litre (standard) (9.35:1)
- Piston liner set (*3.9 litre only*)
- Oil Filter
- Sump gasket set inc oil seals
- Timing chain, crank sprocket, cam sprocket
- Camshaft and 16 followers
- Valves - Engine set (16)
- Valve guides (16)
- Valve stem oil seal (inlet) (8)
- Valve springs (16)
- Rocker shaft (2)
- Rocker arms (16)
- Head gasket set
- Core plug engine set

V8 ENGINE COMPONENTS

V8 Cylinder Block Components

All parts listed are suitable for saloon, sports and 4x4 applications unless otherwise stated.

Cylinder block - bare;

Suitable for all applications. Bare cylinder blocks are supplied with main bearing caps, cam bearings, core plugs and cylinder liners but less crankshaft, pistons etc.

3.5 litre	(1)	ERC6934
3.9 & 4.2 litre	(1)	ERR7350
4.0 & 4.6 litre	(1)	ERR7349

Series 2 Range Rover type.

Cylinder liner set - 3.9 litre (1) **RB7486**

Set of 8 liners for converting 3.5 engines to 3.9 litre bore. Also suitable for replacing the liners in an existing 3.9 litre (or larger capacity) engine.

Liner & piston set - 3.9 litre (1) **RB2029**

As above, but kit includes standard size 9.35:1 compression pistons and rings for 3.9 conversions.

Head gasket set - V8;

3.5 litre (88.9mm bore)		
tin head gaskets		
to 1976 (pre SD1)	(1)	GEG165
1976 on	(1)	GUG1066HS
composite head gaskets*	(1)	GUG1066HSC

3.9/4.2 litre (94mm bore)
3 rows of cylinder head bolts.

tin head gaskets	(1)	RB7447
composite head gaskets*	(1)	RB7447C

3.9/4.2/4.0/4.6 litre (94mm bore)
2 rows of cylinder head bolts.

Composite head gaskets.	(1)	RA1233
-------------------------	-----	---------------

5.2 litre (96mm bore)
Composite head gaskets*.

	(1)	RB7684
--	-----	---------------

Head gasket only - V8;

3.5 litre (88.9mm bore)		
tin gasket	(2)	GEG340
composite gasket*	(2)	GEG340C

3.9/4.2 litre
3 rows of cylinder head bolts.

tin gasket	(2)	RB7448
composite gasket*	(2)	RB7448C

3.9/4.2/4.0 & 4.6 litre
2 rows of cylinder head bolts.

tin gasket	(2)	ETC7819
composite gasket*	(2)	ERR7217

5.2 litre (96mm bore)
Composite gasket*.

	(2)	RB7685
--	-----	---------------

*Composite head gaskets are thicker than standard tin gaskets and will therefore lower the engine's compression ratio. Ideal for correcting compression ratio when heads/block faces have been skimmed. (Not applicable 1995 on).
Approximate gasket thicknesses are as follows:

Standard (tin) gaskets 0.5mm

Composite gaskets 1.2mm

Typical effect on compression ratio:

Standard (tin) gaskets 3cc

Composite gaskets 10cc

Sump gasket set (inc. seals);
all engines up to 1991 (1) **GUG1538CS**

all engines 1992 onwards (1) **STC1639**

Sump gasket only (All engines) (1) **AJM539**

Seal - rear main bearing cap (2) **611089A**

Cruciform seal.

Crankshaft oil seal - rear;

early (rope type) (1) **613855**

Very early engines only.

all other engines (1) **ERR2640**

Timing cover oil seal - front;

saloon/sports (1) **ERC7987A**

4x4

early type (1) **602178**

Press-fit seal with no retainer.

all other models (1) **ERR6490**

With Screw-on retainer.

Core plug set - all engines (1) **RB7105**

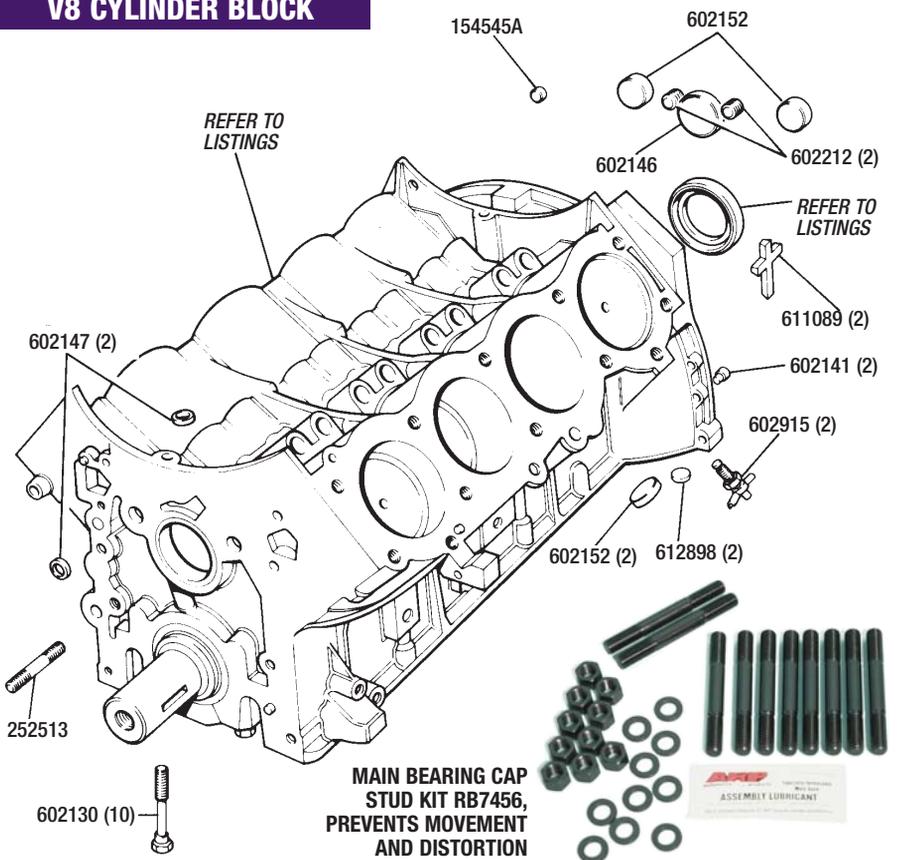

Cam bearing set;

all engines except 4.0 & 4.6 (1) **RTC5918**

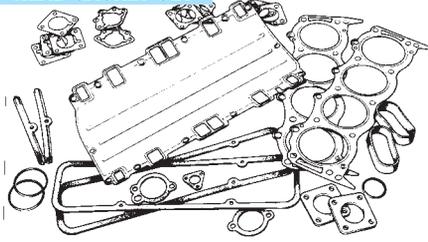

4.0 & 4.6 models (1) **STC1961**

Series 2 Range Rover type engines.

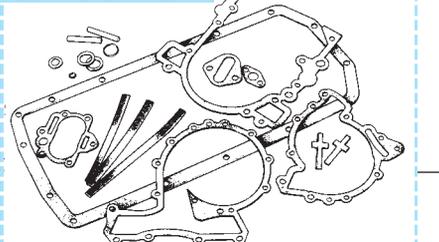

V8 CYLINDER BLOCK

HEAD GASKET SET

SUMP GASKET SET

Dowel - bellhousing flange	(2)	602141

Description Qty Req. Part No.

V8 Sump Pan & Oil Pick-up Pipe

Standard sumps are available in Saloon/Sports and 4x4 types.

Performance sumps are available for Saloon/Sports applications. Based on the Rover SD1-type sump, these are specially designed, enlarged sumps, with extra baffles to prevent oil starvation during high-speed cornering.

Sump pan - standard;

Saloon/Sports

SD1/TR8-type sump.

- without oil level sensor (1) **ERC2776**
- with oil level sensor (1) **ERC8544**

4x4

Land Rover/Range Rover sump.

- except Series 2 Range Rover (1) **ERR4633**
- Series 2 Range Rover (1) **ERR5220**

Sump pan - Performance;

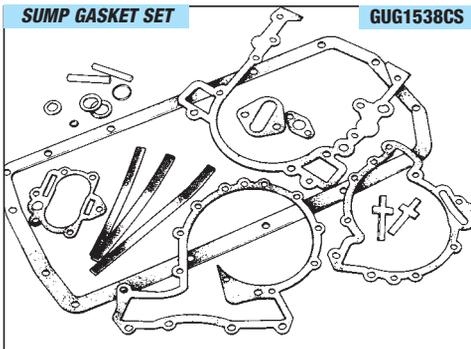

Performance sumps are exchange.

Saloon/Sports applications (1) **ERC2776PERF**

Oil level sensor - saloon sump (1) **DRC8005**

SUMP GASKET SET

GUG1538CS

Sump gasket set (inc. seals);

- all engines up to 1991 (1) **GUG1538CS**
- all engines 1992 onwards (1) **STC1639**

Spring washer* (2) **GHF332**

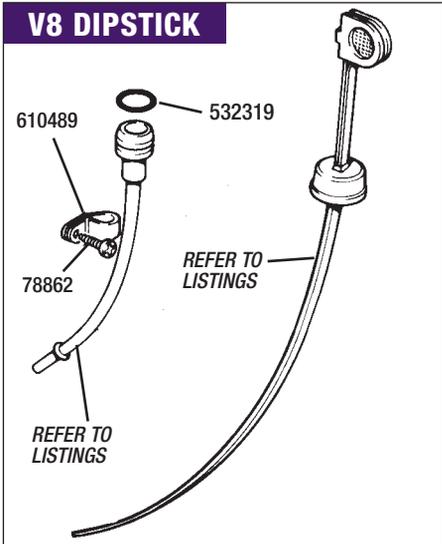

Nut* (2) **GHF201**

*Pick-up pipe to steady bracket.

PERFORMANCE SUMP

Description Qty Req. Part No.

V8 Dipstick

The length of the dipstick tube varies considerably depending on application: SD1 saloons have a long dipstick tube and Range Rovers a much shorter one. To get an accurate oil level reading, therefore, the dipstick & tube must match the engine.

Dipstick;			
SD1 saloon	(1)	ERR1922	
TR8 (original)	(1)	614293	
Range Rover			
all models 1970 - 1985	(1)	603173	
1986 (up to Series 2 Range Rover)	(1)	ERR1922	
Series 2 Range Rover	(1)	ERR4905	
Dipstick tube;			
SD1 saloon	(1)	ERC6437A	
TR8 (original)	(1)	ERC2690	
Range Rover			
all models 1970 - 1985	(1)	ERC2571	
1986 (up to Series 2 Range Rover)	(1)	ERR4556	
Series 2 Range Rover	(1)	ERR4550	
O-ring - dipstick tube			
saloon/sports	(1)	532319	
Range Rover	(1)	602545	
<i>Except Series 2 Range Rover.</i>			
Retaining clip - dipstick tube	(1)	610489	
<i>Screws to rocker cover. Suitable for all engines.</i>			
Clamp - dipstick tube	(1)	602449	
<i>Screws to adjacent cylinder head bolt. Suitable for all engines where fitted.</i>			

Description Qty Req. Part No.

V8 Crankshaft

All parts listed are suitable for Saloon/sports and 4x4 applications unless otherwise stated.
 Note: Around mid 1994, Land Rover introduced a crankshaft-driven oil pump - built into the timing cover - for certain 3.9 litre and larger engines. These engines required a crankshaft with a longer 'nose' than previous engines. For this reason, crankshafts are available with two different nose lengths, as follows:

All 3.5 litre engines, plus factory 3.9 & 4.2 litre engines up to around mid-1994 (exact engine numbers listed below), are fitted with **short-nose** (70.6mm) cranks. These engines have camshaft-driven oil pumps and separate drivebelts for ancillary components.

3.9 & 4.2 litre engines from around mid-1994 (engine numbers listed below) onwards are fitted with **long-nose** (90.3mm) cranks. These engines have crank-driven oil pumps and a single, 'serpentine' drivebelt for the ancillary components.

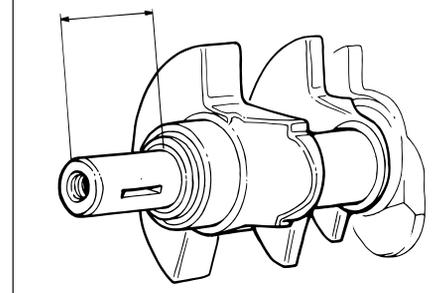

Please check your engine number before ordering. The exchange unit must be a similar type, otherwise a surcharge will apply.

Crankshaft;
 Reconditioned units are exchange.

3.5 litre (short nose)			
new, less bearings	(1)	612989	
reground, inc. bearings	(1)	612989R	
3.9 litre			
short nose			
<i>Factory 3.9 engines up to engine nos: 35D08966, 36D25523, 37D01931 & 38D27330.</i>			
new, less bearings	(1)	612989	
reground, inc. bearings	(1)	612989R	
long nose			
<i>Factory engines, above engine nos onwards.</i>			
new, less bearings	(1)	ERR4060	
reground, inc. bearings	(1)	ERR4060R	
4.2 litre			
<i>New, less bearings.</i>			
up to eng.no.40D09581	(1)	ERR3037	
<i>Short nose.</i>			
eng.no.40D09582 on	(1)	ERR4152	
<i>Long nose.</i>			
4.3 & 4.8 litre stroker kits;			
<i>See 'Stroker Kits' panel.</i>			
<i>Includes new 86mm stroke crankshaft, con rods, pistons/rings & bearings. Not suitable for 4.0 or 4.6 litre blocks.</i>			
4.3 litre kit	(1)	RB7678	
4.8 litre kit	(1)	RB7677	
Series 2 Range Rover engines			
<i>New, less bearings.</i>			
4.0 litre	(1)	ERR5090	
4.6 litre	(1)	ERR5091

LENGTH OF CRANK NOSE

Main bearing set - Standard;
 all engines except Series 2 Range Rover.

standard size	(1)	RTC1718
oversize + 0.010"	(1)	RTC1718.010
oversize + 0.020"	(1)	RTC1718.020
oversize + 0.030"	(1)	RTC1718.030
oversize + 0.040"	(1)	RTC1718.040
oversize + 0.060"	(1)	RTC1718.060

Series 2 Range Rover engines(1) STC1425
 4.0 & 4.6 Litre.
 Note: The latest bearing sets feature thrust plates **only** on the upper half of centre bearing.

Main bearing set - heavy duty;
 all engines except Series 2 Range Rover.

standard size	(1)	RB7452
oversize + 0.010	(1)	RB7452.010
oversize + 0.020	(1)	RB7452.020

Bolt - main bearing cap (10) 602130A
 All models.

Stud kit - main bearing cap (1) RB7456
 (Engine set) Used instead of standard main bearing bolts, these ARP studs provide superior clamping for main bearing caps, preventing them from working loose. Recommended for Performance Engines.

Cross-bolt - main bearing cap (9) FB110137
 3.9, 4.0 & 4.6 litre cross-bolted engines.

Hex-screw - main bearing cap (1) SS110555
 3.9, 4.0 & 4.6 litre cross-bolted engines.

Oil seal;
 for FB110137 (9) **ERR3330**
 for SS110555 (1) **ERR3331**

Crankshaft oil seal (rear);
 rope type (very early engines)(1) **613855**
 lip type (1) **ERR2640**

Cruciform seal (2) 611089A
 Rear main bearing cap.

Timing cover oil seal (front);
 saloon/sports (1) **ERC7987A**
 4x4
 early type (1) **602178**
Press-fit seal with no retainer.
 all other engines (1) **ERR6490**
With screw-on retainer.

Spigot bush - crankshaft;
 saloon/sports
 manual transmission (1) **614263**
 automatic transmission (1) **610196**
 4x4 - manual & auto (1) **549911**

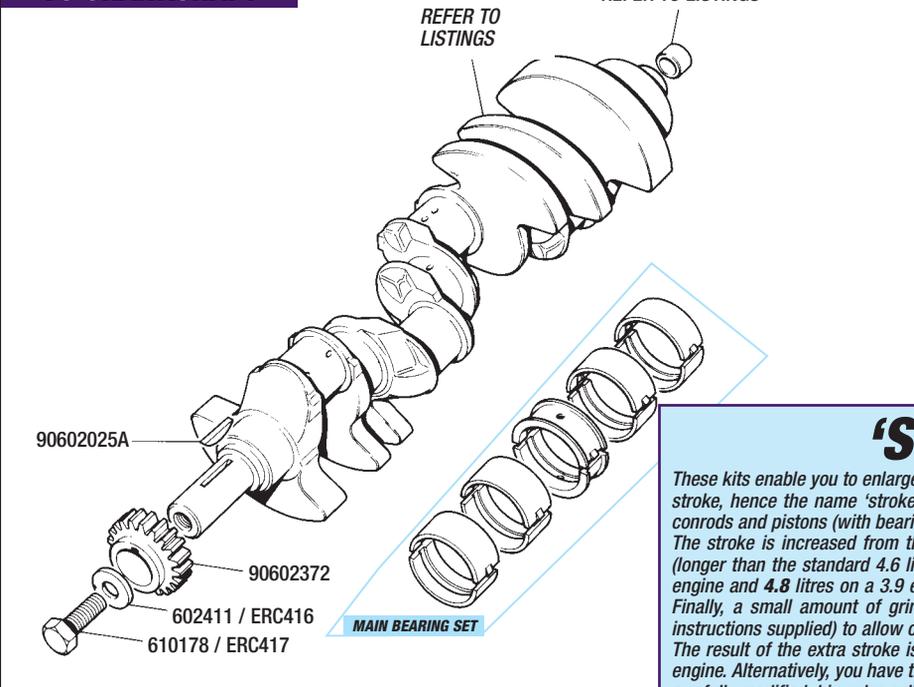

Woodruff key;
 all 3.5, 3.9 & 4.2 up to 1992(1) **90602025A**
 3.9 & 4.2 1992 onwards (1) **ERR2846**
Also 4.0 & 4.6 Series 2 Range Rover type.

Crankshaft sprocket - all models(1) 90602372

Bolt - crankshaft pulley;
 starting dog type (1) **610178**
Fitted to some 4x4 engines.
 standard bolt (1) **ERC417A**

Washer - crankshaft pulley;
 starting dog type (1) **602411**
 standard bolt type (1) **ERC416A**

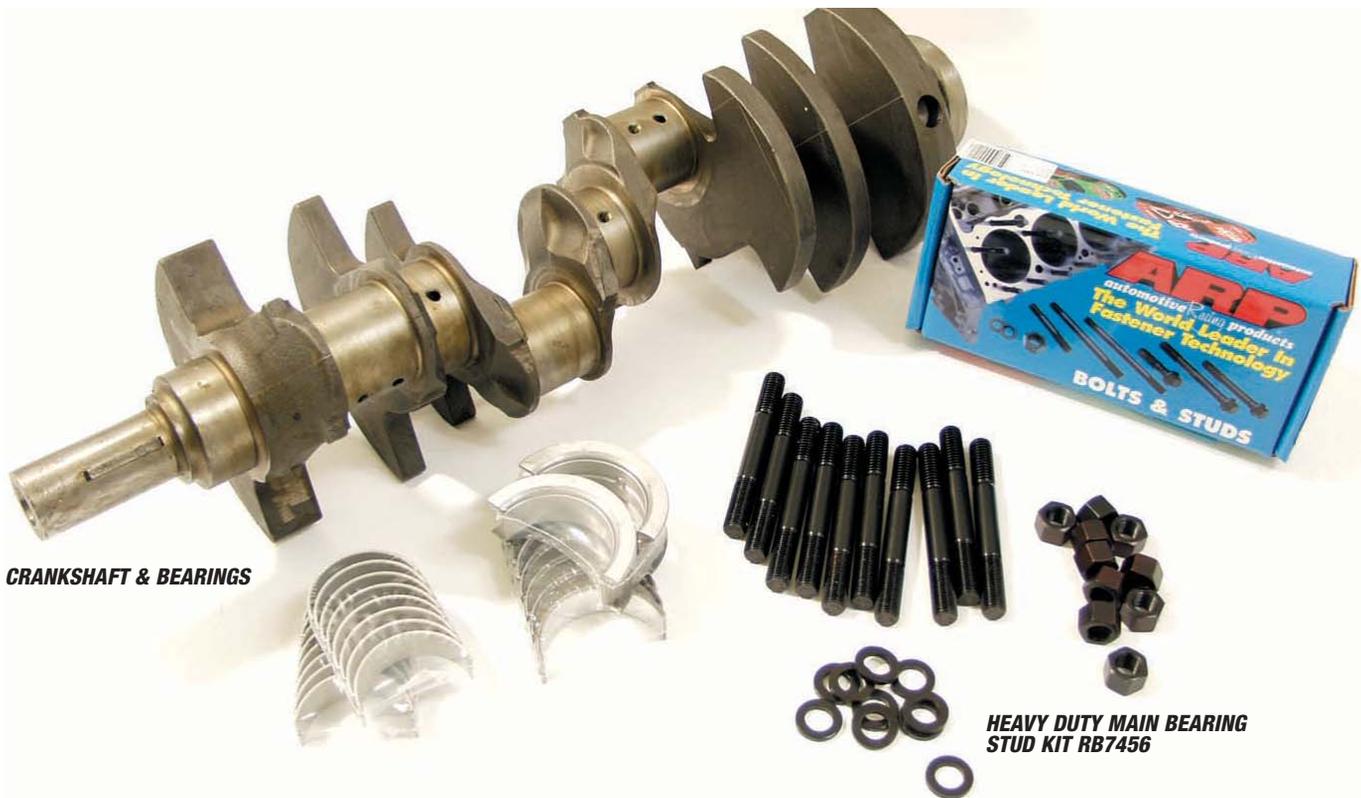

V8 CRANKSHAFT

'Stroker' Kits

These kits enable you to enlarge the cubic capacity of your existing engine by increasing the stroke, hence the name 'stroker'. The kits comprise a brand new, high quality crankshaft, conrods and pistons (with bearings and piston rings supplied). The stroke is increased from the standard 3.5/3.9 engine's 71.1mm to a massive 86mm, (longer than the standard 4.6 litre stroke of 82mm) giving a capacity of 4.3 litres on a 3.5 engine and 4.8 litres on a 3.9 engine. Both engines require a 20 thou rebore before fitting. Finally, a small amount of grinding is required to the bottom of two cylinder liners (full instructions supplied) to allow clearance for crank rotation. The result of the extra stroke is a huge increase in torque, even on an otherwise standard engine. Alternatively, you have the basis of a high performance engine, to which you can add our fully modified, big valve cylinder heads, uprated camshaft and sports exhaust system.

FLYWHEEL - MANUAL

Description Qty Req. Part No.

V8 Pistons

Piston set;
Piston sets comprise 8 pistons complete with rings & gudgeon pins.

- 3.5 litre
low compression (8.13:1 cr) - TR8 USA.
See Single Piston section for other low comp pistons.
- standard size (1) **RB7104**
 - oversize + 0.020" (1) **RB7104.020**
 - oversize + 0.040" (1) **RB7104.040**
- standard compression (9.35:1 cr) - SD1 carbs.
- standard size (1) **RB7246**
 - oversize + 0.020" (1) **RB7246.020**
 - oversize + 0.040" (1) **RB7246.040**
- Vitesse compression (9.75:1 cr) - SD1 Injection.
- standard size (1) **RB7342**
 - oversize + 0.020" (1) **RB7342.020**
 - oversize + 0.040" (1) **RB7342.040**
- high compression (10.5:1 cr) - TR7 V8 & P6.
- standard size (1) **RB7309**
 - oversize + 0.020" (1) **RB7309.020**
 - oversize + 0.040" (1) **RB7309.040**

- 3.9 litre
Standard size, oversize also available.
- low compression (8.13:1 cr)(1) **RB7485KLC**
 - high comp (9.35:1 cr) (1) **RB7485KHC**
- 4.2, 4.0 & 4.6 litre **See Single Pistons**

- Single Piston;
Supplied with rings & gudgeon pin.
- 4.2 litre - 8.94:1 cr (8) **STC1191S**
 - 4.0 litre Series 2 Range Rover type
Offset gudgeon type - standard size only.
 - low comp (8.13:1 cr) (8) **ERR5555**
 - high comp (9.35:1 cr) (8) **ERR5553** - 4.6 litre Series 2 Range Rover type
Offset gudgeon type - standard size only.
 - low comp (8.13:1 cr) (8) **ERR5556**
 - high comp (9.35:1 cr) (8) **ERR5554**

Cylinder liner set - 3.9 litre (1) **RB7486**
Set of 8 liners for converting 3.5 engines to 3.9 litre bore. Also suitable for replacing the liners in an existing 3.9 litre (or larger capacity) engine.

Piston & liner set - 3.9 litre (1) **RB2029**
As **RB7486**, but kit also includes standard size 9.35:1 compression pistons and rings, for 3.9 conversions.

4.3 & 4.8 litre stroker kits;
Includes new 86mm stroke crankshaft, con rods, pistons/rings & bearings. 4.3 kit fits to 3.5 litre engine (20 thou rebore required) for 4.3 litres. 4.8 kit fits 3.9 litre engine (94mm bore) for 4.8 litres.

- 4.3 litre kit (1) **RB7678**
- 4.8 litre kit (1) **RB7677**

V8 Piston Rings

Piston rings;
Supplied as engine set.

- 3.5 litre
8.13, 8.25, 9.35 & 9.75:1 compressions
- standard size (1) **RB7358**
 - oversize + 0.020" (1) **RB7358.020**
 - oversize + 0.040" (1) **RB7358.040**
- 10.5:1 compression (P6)
- standard size (1) **RB7421**
 - oversize + 0.020" (1) **RB7421.020**
 - oversize + 0.040" (1) **RB7421.040**
- 3.9 & 4.2 litre;
High & low compression ratio.
- standard size (1) **RB7538**
 - oversize + 0.020" (1) **RB7538.020**
- 4.0 & 4.6 (standard size) (1) **STC1427**
High & low comp ratio.

Description Qty Req. Part No.

V8 Oil Pump & Filter

Differences Between Oil Pumps

The oil pump of the Rover V8 engine, from its introduction in the 1960s until late 1994, comprises a pair of pump gears which rotate inside a housing in the timing cover. One gear - the idler - is driven by the other, which includes a shaft that is driven off the end of the distributor. The distributor, in turn, is driven by a skew gear on the end of the camshaft.

Pre SD1-era Rover V8 engines (including Rover P5, P6 and early Range Rover) feature a pair of "short" oil pump gears, the driven shaft of which has a slot into which the tooth of the distributor shaft engages.

From 1976 (SD1-era), the oil pump is improved by longer gears, the driven shaft of which is now toothed to engage in a slot in the distributor shaft.

For two reasons, the two types are not interchangeable:

1. the longer gears of a post-1976 engine will not fit into the housing of a pre-76 timing cover.
2. the pre-76 distributor will not engage with the shaft of a later oil pump gear.

However, timing covers are fully interchangeable, which means that an early engine can benefit from the later oil pump arrangement as long as the whole timing cover, complete with distributor, is fitted.

Alternatively, we supply an oil pump uprating kit (RB7480), specifically for pre-76 engines, which features a spacer for the oil pump cover in order to accommodate the longer gears supplied in the kit. The gears also feature the early type of distributor engagement slot.

From late 1994, a redesigned timing cover, incorporating an integral crank-driven oil pump, is fitted to Land Rover V8 engines. This supersedes the earlier, distributor-driven oil pump. However, the later arrangement, while more efficient, is **not** a straight swap for the earlier timing cover, as a longer crankshaft nose is required to drive the oil pump. In addition, ancillaries, such as water pump, alternator and power steering pump would have to be changed.

Oil filter;

saloon/sports		
up to 1976 (pre SD1 type)	(1)	GFE145
1976 onwards (TR8/SD1)	(1)	GFE187
4x4		
early engines	(1)	RTC3186
Engine nos: 341,355 & 359.		
all other engines	(1)	ERR3340
Including Series 2 Range Rover.		

Oil pump cover;

early engines	(1)	602485
Pre SD1-type engines.		
all other engines	(1)	BHM1554
Up to late 1994.		
Complete with relief valve & spring, plus oil pressure switch.		

REMOTE TAKE OFF

Oil pump cover/remote take-off(1) **RO1105**
Very low profile oil pump cover & relief valve housing for maximum clearance. Use with remote oil filter mounting kit.

REMOTE OIL FILTER KIT

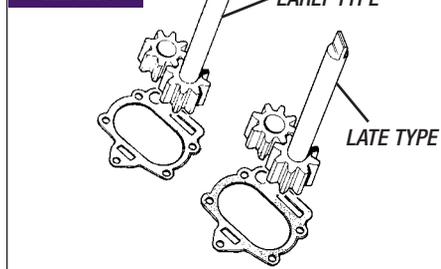

Remote oil filter mounting kit (1) **RB7116**
Allows mounting of oil filter away from engine (Rt inner fliitch). Kit includes filter housing, hoses & mountings. Not suitable for Series 2 Range Rover.

COMPONENT & COMMISSION NUMBERS

Where commission and/or component serial numbers are quoted in this parts catalogue (to help identify factory specification changes), they refer to components and/or parts when the vehicle was new, and not subsequent replacements.

Description Qty Req. Part No.

OIL PUMP GEARS

Oil pump repair kit (1) **RTC2044**
Suitable for all engines with separate oil pump (pre-1994). Includes pressure relief valve, spring & gasket.

Uprated pressure relief valve spring (1) **RB7457**
For all separate oil pump models (pre-1994). Increases oil pressure by approx. 10 psi.

Gear with shaft - oil pump;

early engines	(1)	602018
Short gear with slotted shaft (rigid).		
all other engines	(1)	ERC1351A
Longer gear with toothed shaft (floppy).		

Idler gear - oil pump;

early engines	(1)	602017
Short gear.		
all other engines	(1)	614037
Longer gear.		

Uprating kit - oil pump

Early models only (pre-SD1).
Kit includes spacer plate and longer gears to uprate early pumps to later specification. Increases pressure and volume.

Gasket - oil pump cover (1) **90602072A**

Bolt - pump mounting;		
7/8"	(3)	ERR7370
1 1/4"	(2)	602912
1 9/16"	(1)	602913

Blanking plug - oil pump (1) **151203**
Pressure switch outlet.

Washer (1) **243967**
For blanking plug.

Oil pressure switch;		
TR8	(1)	GPS117
SD1		

3 prong type	(1)	GPS123
single prong type	(1)	GPS110
Range Rover	(1)	STC4104

Washer (For pressure switch) (1) **243967**

Oil pressure transmitter - early vehicles;		
SD1 engines		
'0 - 100' psi gauge	(1)	DRC242
'0 - 60' psi gauge	(1)	DRC2479

Range Rover		
early engines	(1)	555947
Engine nos: 341,355 & 359		
other engines (where fitted)(1)		DRC2479

Washer (Pressure transmitter) (1) **243967**

Oil temperature transmitter;		
Where fitted.		
for 120°C gauges	(1)	560794
for 140°C gauges	(1)	623050
for 'C - MAX' gauges	(1)	PRC2236

Adaptor - oil temperature transmitter;		
Range Rovers up to 1982	(1)	611514
Range Rovers from 1982 on(1)		273166

Oil pressure gauge kit (1) **RX1351**
Aftermarket capillary type. Includes gauge & fittings.

Oil pressure/water temp gauge kit (1) **RX1351W**
As above, Dual function gauge.

Bracket - oil pressure gauge (1) **RB7050**

Oil pump priming tool;
For efficient priming of the oil pump before initial start-up. Priming tool engages with the oil pump shaft through the distributor aperture in the timing cover (requires removal of distributor). Oil pump can then be primed using an electric/cordless drill. No need for petroleum jelly!
Nb. with the rocker covers removed, a visible oil supply to the rocker gear is confirmation that the system is primed.

early type oil pump shaft	(1)	RX1431E
Slotted shaft (see illustration above).		
late type oil pump shaft	(1)	RX1431L
Toothed shaft (see illustration above).		

Description Qty Req. Part No.

V8 Oil Cooler (Engine)

If high oil temperatures are a problem, for example when towing, the V8 engine will benefit from the fitting of an oil cooler. We recommend fitting a thermostat at the same time, to avoid overcooling.

Note: An oil cooler was incorporated into the Range Rover's coolant radiator with the introduction of the 3.9 litre engine. The Series 2 Range Rover has a separate oil cooler.

UNIVERSAL OIL COOLER

Oil cooler kit;		
Includes radiator, hoses and all fittings.		
saloon/sports	(1)	RB7260
Range Rover	(1)	RA1089
All models up to 1990.		
Thermostat - oil cooler	(1)	RS1456

RANGE ROVER 3.9 OIL COOLER & COMPONENTS

Oil cooler take-off - 3.9 engine;		
up to VIN JA624755 (1992)	(1)	ERC8501
from VIN KA624756 (1993)	(1)	ERR2490
Adaptor - oil filter	(1)	ERC2226
O-ring	(1)	ERR852

Oil cooler hose;

V8 Water Pump/Pulley/Cooling Fan

TR8 CONVERSIONS

Water Pump & Fan Clearance

To allow sufficient clearance for the water pump, we supply the brackets required to move the radiator forward. It is usually not possible to re-use the SD1 carb engine fan assembly due to clearance problems, so we recommend the fitting of the TR8 water pump (GWP204) in conjunction with a heavy duty Kenlowe Electric Fan Kit (RS1537) - which mounts in front of the radiator.

WATER PUMPS & FITTINGS

Water Pump (Inc gasket less pulley)

'P6 3500'	(1)	GWP310
<i>Short nose pump, suitable for confined spaces. Use with matching pulley and crank pulley.</i>		
TR8 Original type	(1)	GWP204
<i>Bolt-on type Viscous coupling/extension.</i>		
SD1 type	(1)	GWP2150
<i>All SD1 carb (non a/c) engines, 1976 on.</i>		
SD1 Efi type	(1)	GWP2149
<i>All SD1 Efi engines. Screw on viscous coupling (LH thread). Shorter nosed than GWP2150.</i>		
SD1	(1)	GWP2148
<i>All SD1 carb (a/c) engines, 1982 on.</i>		

Gasket (Pump to timing cover)	(1)	610756
Bolt (Pump to timing cover)	(5)	BH504091
Washer (For BH504091)	(5)	2203

Please enquire for SD1 type viscous couplings and cooling fans.

HOSES-HEATER FEED/RETURN

From/To Water Pump/Steel Pipes (in engine 'V'). See also; V8 Radiator Hoses & V8 Heater Hoses/Pipes.

Feed Hose	(1)	ERC2278
<i>From water pump to straight steel pipe 90611532.</i>		
Return Hose	(1)	ERC2279
<i>From cranked steel pipe 603049 to water pump.</i>		
Hose Clips	(4)	GHC709
<i>For ERC2278/ERC2279.</i>		

PULLEY/FITTINGS & FAN BELT

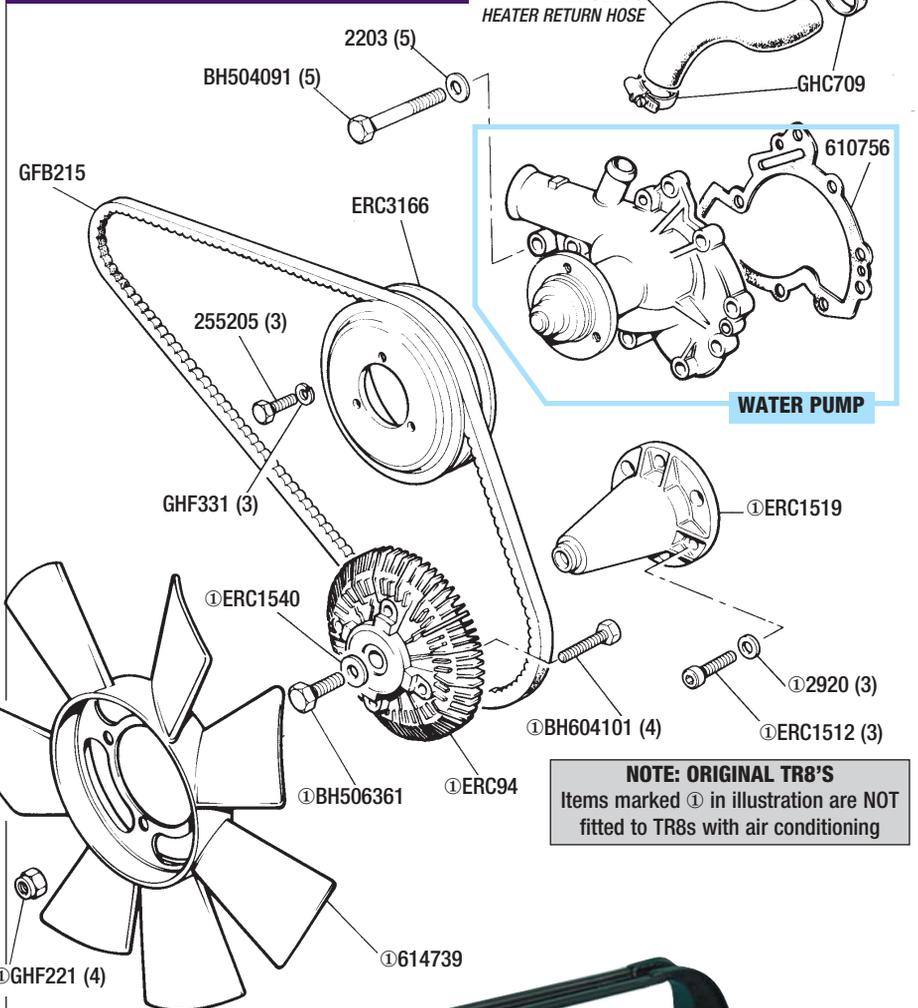

Pulley (Original) (1) **ERC3166**
For use with water pumps GWP310, GWP204 & GWP2150 when original TR8 water pump extension drive/viscous/fan is fitted.

Pulley (Alternative) (1) **ERC5792**
For use with water pumps GWP2148, GWP2149 and GWP2150 if fitting Kenlowe Electric fan, and when the original TR8 water pump extension drive/viscous/fan is **not** fitted.

Setscrew*	(3)	255205A
Washer-Locking*	(3)	GHF331
<i>*Pulley to water pump.</i>		
Fan Belt	(1)	GFB215

V8 Radiator & Hoses

IMPORTANT NOTE;

When converting a TR7 to TR8 specification, it is essential that the TR8 radiator is fitted which can adequately cope with cooling the V8. Our TR8 radiators are fitted with the correct core and neck diameters with hose inlet/outlets positioned correctly to match the engines cooling system. To allow sufficient clearance for the water pump the radiator has to be moved forward by using the TR8 upper and lower mounting brackets.

We will accept a standard TR7 radiator in exchange for a TR8 spec.

RADIATOR & FITTINGS

Radiator (TR8 specification);

- New (1) **RKC3114**

V8 HEATER HOSES/PIPES

CARB IDENTIFICATION

In order to select the correct parts, this section will help to identify the type of carbs fitted to your engine. It is for identification purposes only.

Carb Identification - Stromberg CD175 & SU HIF.

Both makes of carburettor have a silver tag - stamped with an identification number - which is attached to the carb by one of the dashpot retaining screws.

(Note: both rh & lh carbs have the same number but with an r or l suffix as appropriate). However, if the tag is missing, the engine number will help you to identify the carburettors, providing they have not been replaced by a previous owner. (For detailed information & specification of engine numbers, please refer to the 'V8 ENGINE' section on Page 132).

TR8

Original carb TR8s are fitted with a pair of Stromberg 175CDE carb, with an automatic choke.

ROVER SD1

All Rover SD1 3500 saloons from 1976 to 1981 were equipped with a pair of SU HIF6 carburettors with a manual choke. The tag number on these carbs is **FZX1316R** (right hand carb) or **FZX1316L** (left hand).

From 1982 until 1985, SD1 3500 carb engines were fitted with Stromberg CD175 carbs, incorporating a FASD (Fully Automatic Starting Device) on the side of the left hand carb. Easily identified by its blue plastic cover, the FASD is essentially a cold-start enrichment device.

Stromberg carbs have a stubby dashpot, compared to the SU's taller version.

Finally, from 1985, the SUHIF6 was again fitted to some 3500 models. However, these were not the same carbs as the earlier ones, being considerably more complex in their cold-start enrichment operation. The tag numbers for these carbs are **FZX1456R & L**.

RANGE ROVER

Two makes of carburettor are fitted to Range Rovers as standard equipment: the Zenith Stromberg CD175 - used exclusively from 1970 to 1986 - and the SU HIF, which was fitted for a short period (alongside the Stromberg) from 1986 until carb were replaced by fuel injection.

The most obvious visual difference between the two types of carb is the dashpot; Strombergs having a stubby dashpot with the 'Zenith' name cast into it, while the SUs have a much taller dashpot without any markings.

INTRODUCTION

TR8 - TR7 V8 Fuel Section

This section covers most applications for Rover V8 - including TR8 & TR7 V8 where relevant (since many parts for factory TR8's are no longer available). Please use this section to identify and select the parts you need by referring to the relevant sub-section, description & part numbers. Many owners will find this section useful as a reference especially if owning a converted TR7-V8 where parts have been transplanted from an SD1, Range Rover or similar.

Carbs

Though various other carbs have been used from time to time, by far the most common carburettors to be found supplying fuel to the Rover V8 are Zenith Stromberg CD175s and SUHIFs. Chosen for their combination of economy, low emissions and simplicity of operation (plus, of course, availability in large quantities), they are an excellent choice. Nevertheless, the SUHIF6 with manual choke, as fitted to SD1 3500 saloons from 1976 to 1981, is probably the most popular, due to the fact that it can be "tuned" to suit other engine upgrades.

Efi (Electronic Fuel Injection)

Electronic fuel injection first appeared on production Rover V8 engines as early as 1977, bound for the emissions-sensitive Australian market. Subsequently, it was fitted to TR8s and Rover SD1s sold in North America. However, these early systems were designed specifically to meet emissions requirements; it was the Rover SD1 Vitesse, introduced in 1982, that boasted the first efi system designed to increase power output. Vitesse produced 190bhp from a 3.5 litre engine which was otherwise largely similar to the carburettor version, producing 155bhp.

Three years later, in October 1985, the Range Rover V8 followed suit: efi replaced carbs for Vogue models initially, and for all V8 4-dr models from November 1986.

There are two basic types of efi system fitted to the Rover V8. Similar in operation, they both use solenoid injectors - one per cylinder - operating directly into the inlet ports. They both respond to information from sensors relating to temperature, throttle position and engine speed, but neither has any control over ignition. The differences between the systems are as follows:

The first system - Lucas L-Jetronic - uses an airflow meter, inside which is a hinged flap that measures, by deflection, the flow of air into the engine, thus varying the voltage signal to the ECU.

The second system - Range Rover/Discovery only, introduced to coincide with the 'new' 3.9 litre engine in 1988 but also fitted to some 3.5 litre engines - incorporates a

'hotwire' air metering system, which contains no moving parts. Instead, it employs two sensor wires - one of which is heated - to measure air mass as it passes over the wires and into the engine. A voltage signal is then sent to the ECU proportionate to the voltage required to maintain the temperature of the heated wire as it is cooled by the air flow.

The earlier type, which was fitted to the first 3.5 efi (non cat'-equipped) Range Rovers from 1986, is similar (though not identical) to the system fitted to the Rover SD1 Vitesse, the main difference being the ecu (electronic control unit). The hotwire type, fitted to later Range Rover 3.5, 3.9 & 4.2 vehicles (with or without cat's), despite appearing quite similar, shares few parts with the flap type system.

Twin plenum injection

Twin plenum, or twin-throttle plenum injection, was a variation of the Lucas-L system, produced for a short period in the mid 1980s. It was intended primarily for the Group A racing Vitesse's being campaigned by BL Motorsport, but found its way onto a small number of production Rover Vitesse's for homologation purposes. In road-car form, it is similar to the single-throttle type in every way except for the plenum chamber and associated air inlet trunking. Of the parts that are different, most are now unavailable.

Holley & Weber 4 barrel carbs

Finally, we supply two 4 barrel carburettor conversion kits for the Rover V8 engine (carb or efi, all engine sizes):

1. The legendary Holley 390cfm carburettor. The kit includes a 390cfm 4 barrel Holley carb, with vacuum secondaries and electric choke, an Offenhauser inlet manifold and choke cable kit, chrome plated pancake filter kit and full instructions.

2. The Weber 4-barrel carb kit. The kit includes a Weber 4 barrel 500cfm carb (bright finished), complete with Edelbrock Performer dual plane inlet manifold, chrome plated pancake air filter kit and all gaskets, cables and instructions for fitting. Ideal for on or off road, these replacement carbs both represent good value as performance upgrades. Use them on their own or, for maximum benefit, in conjunction with our Performance cylinder heads, uprated camshafts and stainless steel tubular manifolds. They work just as well (or better) with larger capacity engines and are the perfect solution for limited under-bonnet space, as with TR8 conversions.

K&N Filters

We also supply a range of K&N Air Filters for most applications including 4-Barrel pancakes. Refer to separate panel for details.

Inlet Manifold Fittings - V8 (Carbs) - All applications

All parts listed are suitable for saloon, sports and 4x4 applications unless otherwise stated.

Inlet manifold - carburettor;

SD1

1976 - 1982, SU carbs (1) **ERC5484**

1982 on - Stromberg carbs

<i>Allows clearance on Weber/Edelbrock linkage.</i>		

Description Qty Req. Part No. Description Qty Req. Part No.

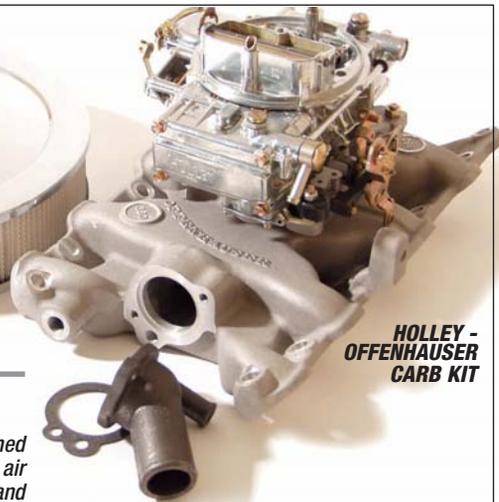

Air cleaner base to flame trap/breather.

4 Barrel Carb Conversion Kits

Suitable for all engine sizes. Complete conversion kits for all V8 engines. Kits include: 4 barrel carb, inlet manifold, chromed 14" air cleaner (can be substituted with K&N air cleaner at extra cost), thermostat housing and accelerator cable kit. See also fuel pump section for details of our Facet type electric fuel pump, which may be required in addition to the 4 barrel carb kits, depending on application.

WEBER-EDELBROCK PERFORMER CARB KIT

HOLLEY - OFFENHAUSER CARB KIT

Holley/Offenhauser conversion;
390cfm Holley carb with auto choke, Offenhauser manifold, air cleaner, thermostat housing & accelerator cable kit.

- Kit 1 (1) **RB7262**
With 3" deep air cleaner.
- Kit 2 (1) **RB7262L**
With 2" deep air cleaner for extra bonnet clearance.

Weber/Edelbrock Performer conversion;
500cfm Weber carb with manual choke, Edelbrock manifold, air cleaner, thermostat housing & accelerator cable kit.

- Kit 1 (1) **RA1323**
With 3" deep air cleaner.
- Kit 2 (1) **RA1323L**
With 2" deep air cleaner for extra bonnet clearance.

PANCAKE AIR CLEANERS FOR HOLLEY OR WEBER CARBS

4 Barrel Air Cleaners

Air cleaner kit;
14" diameter chromed 'pancake' type, complete with filter, suitable for Weber & Holley. See also K&N filter assys.

standard - 3" deep	(1)	RB7438
'low-rider' - 2" deep	(1)	RB7439
<i>For extra bonnet clearance.</i>		
Replacement element - air cleaner;		
standard element		
3" deep	(1)	RB7438EL
2" deep	(1)	RB7439EL
K&N element		
3" deep	(1)	RB7438ELK
2" deep	(1)	RB7439ELK

Adaptor - breather pipe (1) **RB7654**

K&N 4 Barrel Air Cleaners

See following pages for other K&N applications.

K&N Filter - Holley & Weber 4 barrel carbs
Pancake (14") filter assembly, bolts directly on to carb. May also be fitted with 'X-stream' filter top (lid).

- recessed type (assembly) **RA1397**
Sits low on carb for extra bonnet clearance. N.B. for use with manual choke only.
- flat type (assembly) **RA1398**
2 1/4" deep, fits either manual or automatic choke.
- 'X-stream' air flow (lid only) **RA1399**
For maximum air flow. Replaces standard pancake K&N lid. Available in black, blue, red or polished. N.B. K&N filter assembly (recessed or flat type) must be purchased separately.

ELECTRONIC FUEL INJECTION

Inlet Manifold Fittings - Airflow Meter efi (3.5 litre)

All parts listed are suitable for most TR8 efi, Rover SD1 Vitesse, VDP efi and Range Rover/Discovery 3.5 efi unless otherwise stated.

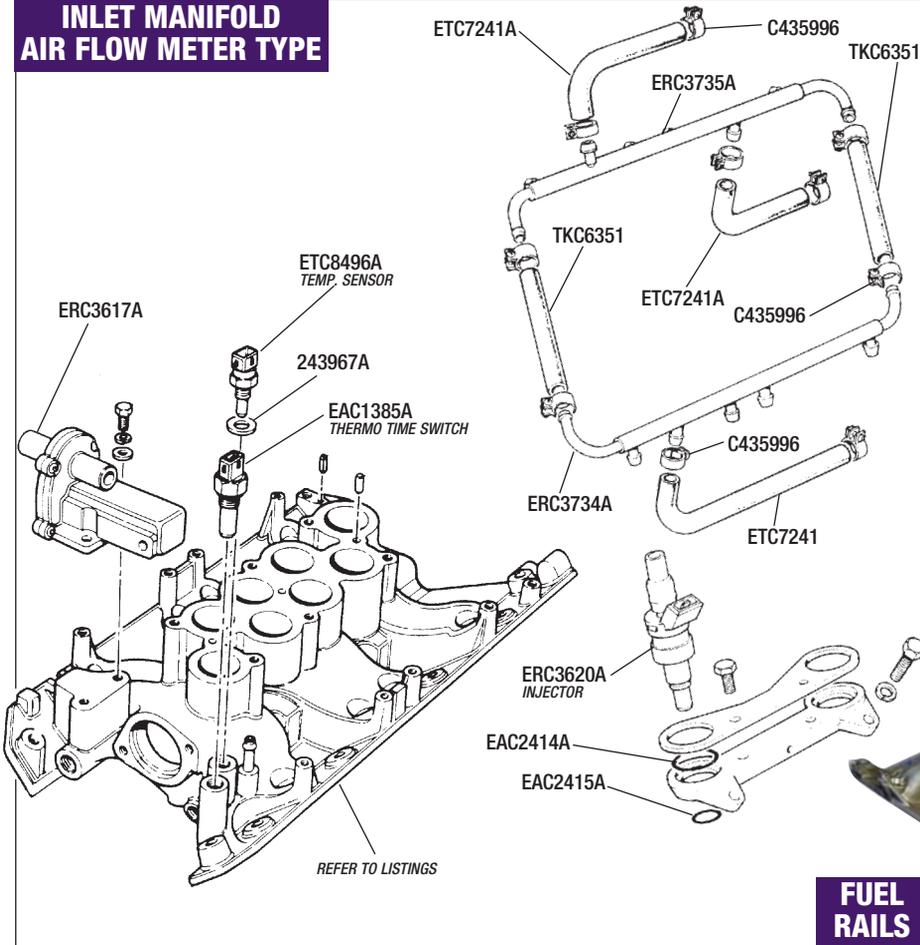

Inlet manifold - 3.5 efi SD1 Vitesse & VDP efi. Please contact our sales department for price & availability of inlet manifolds for Range Rover efi.	(1)	ERC9194
Bolt - inlet manifold (all engines); 3/8"UNC x 11/2"	(9)	BH506121
3/8"UNC x 2"	(3)	BH506161
Washer - manifold bolt	(12)	2204
Gasket - inlet manifold - all models; tin	(1)	ERC3990
composite	(1)	ERR7306
End seal - manifold gasket for tin gasket	(2)	AJM645
for composite gasket	(2)	ERR7283
Clamp - end seal	(2)	602076
Screw - seal clamp	(2)	602236
Auxiliary air valve	(1)	ERC3617A
Thermotime switch	(1)	EAC1385
Temperature sensor Next to thermotime switch.	(1)	ETC8496A
Sealing washer (Temp sensor)	(1)	243967

Injector	(8)	ERC3620A
O-Ring seal - injector; large (upper)	(8)	EAC2414A
small (lower)	(8)	EAC2415A
Fuel pressure regulator; standard	(1)	ERR268
SD1/TR8/Range Rover adjustable	(1)	EAC1284UR
<i>Recommended for performance applications. Increases fuel pressure, according to inlet manifold demand, by a greater ratio than standard item.</i>		
Uprated fuel pump resistor	(1)	DRC3017HP
<i>Use in conjunction with adjustable pressure regulator. Enables fuel pump to cope with extra fuel demand.</i>		
Fuel rail;		
right hand	(1)	ERC3735A
left hand	(1)	ERC3734A
Fuel hose (8cm length) <i>High pressure efi hose to join fuel rails.</i>	(2)	TKC6351
Fuel hose - cold start injector <i>Also suitable for pressure regulator.</i>	(1)	ETC7241A
Clamp - efi hoses	(a/r)	C435996
Overrun fuel cut-off switch	(1)	ETC6143

Thermostat

Thermostat; <i>Suitable for all engines.</i>		
74°	(1)	ETC4761
82°	(1)	GTS104
88°	(1)	GTS106
Gasket - thermostat; SD1/TR8	(1)	GTG125
Range Rover	(1)	ERR2429
Thermostat housing; saloon/sports Aluminium.	(1)	RB7211
Range Rover without electric fan switch eng nos: 341, 355, 359 only(1)		RB7322
all other models	(1)	ERC2139
with integral electric fan switch <i>For air con fans. Switch not included.</i>		
air con	(1)	ETC6135
non air con	(1)	ETC4596
Fan switch - thermostat housing Range Rover.	(1)	PRC3505
Washer - fan switch	(1)	C457593
Temperature transmitter	(1)	GTR138
Non-return valve - brake servo	(1)	ETC6143

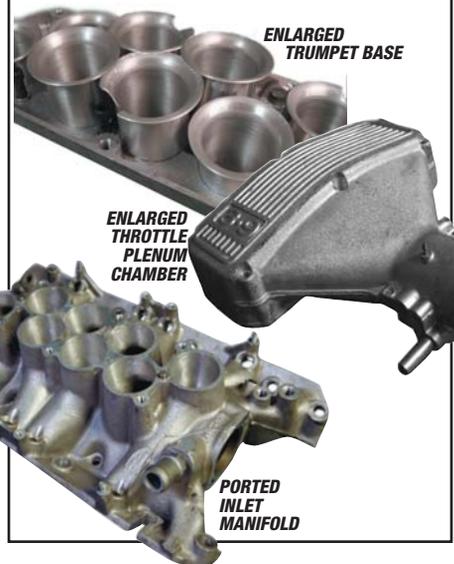

INLET MANIFOLD AIR FLOW METER TYPE

Efi Upgrade Kit

For larger capacity (4.6 litre and above) Performance engines using the original fuel injection system, considerable gains in torque and horsepower are attainable by fitting an **Efi Upgrade Kit**. Kits are available for both Flap-type and Hotwire efi systems and comprise a ported and enlarged inlet manifold (inlet tracts opened out to 45mm diameter), trumpet base with enlarged (45mm diameter) intake trumpets and plenum chamber with enlarged (72mm diameter) throttle body. These components help to remove the restriction in air flow, which can strangle your engine's power potential. Efi Upgrade Kits are sold on an exchange basis. See also our Re-mapped & Re-chipped ECUs.

Efi upgrade kit;		
flap-type efi	(1)	RB7691
hotwire efi	(1)	RB7692

Inlet Manifold Fittings - Hotwire efi (3.5, 3.9 & 4.2)

Parts listed are suitable only for Range Rover/Discovery (plus other vehicles - such as TVR etc - fitted with Land Rover engines) equipped with hotwire efi systems, unless otherwise stated. Items not illustrated.

Inlet manifold - 3.9 efi Please contact our sales department for price & availability of 3.9 hotwire inlet manifolds.		
Bolt - inlet manifold (all engines); 3/8"UNC x 1 1/2"	(9)	BH506121
3/8"UNC x 2"	(3)	BH506161

Washer - manifold bolt	(12)	2204
Gasket - inlet manifold - all models; tin	(1)	ERC3990
composite	(1)	ERR7306
End seal - manifold gasket for tin gasket	(2)	AJM645
for composite gasket	(2)	ERR7283
Clamp - end seal	(2)	602076
Screw - seal clamp	(2)	602236
Temperature sensor	(1)	ETC8496A
Sealing washer (Temp sensor)	(1)	243967A

Injector;		
3.5	(8)	ETC6264
3.9 & 4.2	(8)	ERR722
O-Ring - injector	(16)	RTC5679
Clip - injector	(8)	ETC6375
Fuel pressure regulator 3.5, 3.9 & 4.2	(1)	ETC8494
Fuel temperature sensor <i>Front of fuel rail.</i>	(1)	ETC6661

Electronic Components - efi

ECU - new

Please contact our sales department for availability & price of new ECUs.

ECU - reconditioned/recalibrated/re-chipped;

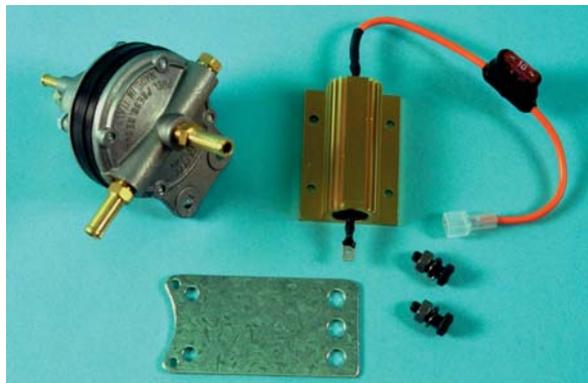

We can recondition your existing Lucas 4CU (flap-type) or 14CUX (hotwire type) ECU to original specification.

Alternatively, our fuel injection expert can recalibrate both types of ecu for more power and economy, on either standard or modified engines. For instance, re-chipping a hotwire ecu can give your 3.9 an extra 20bhp with no other modifications; driveability and cruise economy are similarly improved. Or, if you are considering a large capacity engine for your fuel injected car, a recalibrated ecu will provide the correct fuelling essential for the engine, giving you full power with no loss of fuel economy.

Please contact our sales department to discuss your requirements.

All ECUs are guaranteed for 1 year.

Except North America.		
TR8/SD1 North America	(1)	GFE1093
Range Rover		
to 1994 (VIN LA)	(1)	RTC4683
1995 (VIN MA) onwards	(1)	ESR1445

V8 Air Filters - K&N All Applications

For 4-Barrel filter see page 156.

K&N offer superior filtration, an improvement in air flow and many times longer life than standard elements. In addition, they can be cleaned and re-used.

Available for both carburettor and efi petrol models, they replace the original air intake box and paper element and require no alterations to the fuel system on a standard engine (with standard exhaust).

K&N Filters are proven in both competition and off-road environments.

Air filter - K&N;

carb vehicles	(2)	RB7296
Stromberg & SU.		
efi vehicles -		
flap type	(1)	RA1063
Length 170mm, flange ID 73mm		
Clamps to air flow meter.		
hotwire type	(1)	RA1060
Length 180mm, flange ID 85mm		
Clamps to air flow meter.		

Carb Needles - TR8/SD1;

Richer needles. Use as required if fitting K&N filters and/or Tubular Exhaust manifolds.

SU Applications		
BAF Needle	(2)	CUD1105
Standard exhaust manifold.		
BAC Needle	(2)	CUD1102
Tubular exhaust manifold.		
Stromberg Applications		
B1FB Needle	(2)	RB7465
Standard exhaust manifold.		
B1AW Needle	(2)	RB7468
Tubular exhaust manifold.		

Cleaning fluid (1 litre)

For cleaning filter element.

Element oil (For re-oiling element);		
1 fl oz sachet	(a/r)	RX1347
250ml bottle	(a/r)	RX1348
400ml aerosol	(a/r)	RX1349

V8 Fuel Pump All Applications

Rover SD1 and original TR8 carb vehicles both have in-tank fuel pumps, which deliver approximately 4.5psi pressure (ie. usually sufficient for a Holley or Weber carb but inadequate for efi).

Rover SD1 efi vehicles have a high pressure fuel pump (delivering around 40psi), mounted very close to, but outside, the base of the fuel tank.

Early, non power steering, V8 engines have a mechanical fuel pump bolted to the timing cover and driven by a lobe on the camshaft spacer.

Power steering equipped cars usually have an electric fuel pump (due to the location of the p.a.s. pump where the fuel pump had previously been).

Early pas-equipped Range Rovers have an electric pump in the engine bay.

From 1986, the fuel pump for both carb and efi Range Rovers is fitted inside the fuel tank. However, the two types are not interchangeable, as the efi pump is a high pressure type not suitable for carb vehicles.

Up to approximately 1991, the in-tank fuel pump is separate from the fuel level sender. From 1991 onwards, the pump and sender unit are combined.

We also stock non standard electric fuel pumps, designed to fit in the engine bay. The 'Universal' pump is suitable for all carb engines (excluding 4-barrel). The Facet pump is suitable as a replacement for any carb vehicle, including Weber or Holley-equipped, it delivers 4-5psi pressure. It is not suitable for efi. See below for listings. These pumps are ideal for TR8 conversions.

CARB ENGINES

Description Qty Req. Part No.

V8 Exhaust Systems

Designed to fit

All our exhausts in this section are manufactured from stainless steel, and are designed to fit correctly when the original TR8 specification subframe is used (which acts as a datum for engine/transmission position). Please Note: to enable correct fitting of manifolds and exhaust system, ensure engine mountings/brackets fit behind (and not in front of) subframe support brackets. If a modified TR7 subframe is fitted then you will only overcome fitting/clearance problems by modifying the exhaust system.

Which system?

Twin exit? Single exit? Standard manifolds? Tubular manifolds? The choice is yours! To achieve maximum performance from any engine modifications you may have carried out, it is recommended that the exhaust system is selected accordingly. Along with silencer requirements - quiet or noisy! The following pages show the options available.

TWIN EXIT EXHAUST

SINGLE EXIT EXHAUST

Description Qty Req. Part No.

ENHANCEMENTS FOR SPORTS EXHAUST

Our Sports Exhaust Systems are designed to give an increase in power & torque on an otherwise unmodified vehicle. The way this is achieved is by helping the engine to 'breathe out' more efficiently. Naturally, it works just as well (or even better) on modified engines, since most modifications are designed to make the engine breathe more efficiently.

Fitting K&N air filters at the same time as one of our Sports Systems will help the engine to 'breathe in' more efficiently - by removing the restrictive standard air filter - yielding even better results. (For K&N filters, see our V8 Fuel Section).

To gain maximum benefit from our Sports Systems, particularly in large capacity V8s (3.9 or even 4.6 litre versions), fit our Big Valve Performance cylinder heads. These heads are ported and gas-flowed to help the engine achieve optimum efficiency. (For Performance cylinder heads, refer to our V8 Engine Section).

Finally, don't forget your fuel system: all this extra efficiency will be lost if your carbs are worn out or your injection system is not up to scratch! The original carbs should be adequate for an otherwise unmodified 3.5 engine fitted with a Sports System and K&N filters (provided they are correctly set up). For the same vehicle fitted with modified cylinder heads or a bigger engine, however, we would recommend fitting either a Holley or Weber 4 barrel carb (see our V8 Fuel Section).

Similarly, standard Efi vehicles will need no modifications to the injection system when fitting a Sports System and K&N. If further modifications are being considered, such as a change of camshaft, Performance cylinder heads or a bigger engine, we strongly recommend a remapped ecu to provide the correct fuelling. We can remap your existing ecu to suit your engine's requirements exactly, giving crisper throttle response, more power and torque and better fuel efficiency.

Cast Iron Manifolds & Fittings

TR8 ORIGINAL CAST IRON MANIFOLDS

Cast Iron Manifold	(2)	ERC2901
<i>Please refer to Price Guide for current availability.</i>		
Gasket (Manifold to head)	(8)	AJM692
Setscrew (Manifold to head)	(16)	GHF165
Lock Plate (For setscrew)	(8)	90613659
Stud (Manifold to down pipe)	(6)	TE108051
Nut (Manifold to down pipe)	(6)	GHF213
Gasket (Manifold to down pipe)	(2)	GEG745

SD1 TYPE CAST IRON MANIFOLDS

Although not recommended for the TR8 conversion, it is possible to fit the SD1 type manifolds (using the downpipes listed over the page), to couple to one of our TR8 twin outlet exhaust systems. However, clearance problems usually necessitates modification of the down pipes and/or bulkhead. We recommend Tubular Extractor manifolds for easy installation.

Cast Iron Manifold		
Rh	(1)	ERC428

Description Qty Req. Part No.

TR8 - ORIG. MANIFOLDS EXHAUST SYSTEMS (S/S) STANDARD - TWIN

The following systems are a direct replacement for the standard (non catalyst) original (twin) TR8 exhaust which uses original TR8 cast iron manifolds. Available in stainless steel only ('Lifetime' Guarantee). See also: 'Sport Exhausts'.

TR8 - ORIGINAL MANIFOLDS- QUIET
Full System (4-Box) (1) **RB7294**
Includes downpipes, centre silencers & tailpipes. Excludes fitting kit. Offers refined and subtle exhaust note.

- Individual components:
- Downpipe
 - Rh (1) **RB7493**
 - Lh (1) **RB7494**
 - Centre Silencer
 - Rh (1) **GEX3680SS**
 - Lh (1) **GEX3681SS**
 - Tailpipe & Silencer
 - Rh (1) **GEX3683SS**
 - Lh (1) **GEX3684SS**
 - Fitting Kit (1) **RB7294FK**
Includes rear mounting brackets, assembly fittings and jointing compound.

TR8 - ORIGINAL MANIFOLDS - NOISY
Full System - 'H'-Pipe (2-Box)(1) **RB7301**
Identical to standard system except for an 'H'-Pipe that replaces the centre silencers for a more noisy exhaust. Includes downpipes, H-pipe & tailpipes. Excludes fitting kit.

- Individual components:
- Downpipe
 - Rh (1) **RB7493**
 - Lh (1) **RB7494**
 - Centre 'H'-Pipe (1) **RB7297**
 - Tailpipe & Silencer
 - Rh (1) **GEX3683SS**
 - Lh (1) **GEX3684SS**
 - Fitting Kit (1) **RB7301FK**
Includes rear mounting brackets, assembly fittings and jointing compound.

Description Qty Req. Part No.

TR8 - SD1 MANIFOLDS EXHAUST SYSTEMS (S/S) STANDARD - TWIN

The following systems can be used when utilising the cast iron manifolds from the SD1. We can not guarantee that the system will be a straight forward fit since many converted TR7 V8's that have SD1 manifolds may have been fitted with a non standard subframe and/or mounted with the engine lower in the engine bay. Customers should be aware of this when purchasing such a system and be prepared to modify/adapt to suit. Available in stainless steel only ('Lifetime' Guarantee). See also: 'Sport Exhausts'.

TR8 - SD1 MANIFOLDS - QUIET
Full System (4-Box) (1) **RB7703**
Includes 2 - twin downpipes, link pipes, centre silencers & tailpipes. Excludes fitting kit. Offers refined and subtle exhaust note.

- Individual components:
- Downpipe
 - Rh (1) **RB7339**
 - Lh (1) **RB7340**
 - Link Pipe (Rh/Lh) (2) **RB7495**
 - Centre Silencer
 - Rh (1) **GEX3680SS**
 - Lh (1) **GEX3681SS**
 - Tailpipe & Silencer
 - Rh (1) **GEX3683SS**
 - Lh (1) **GEX3684SS**
 - Fitting Kit (1) **RB7703FK**
Includes rear mounting brackets, assembly fittings and jointing compound.

TR8 - SD1 MANIFOLDS - NOISY
Full System - 'H'-Pipe (2-Box)(1) **RB7704**
Identical to system listed above except for an 'H'-Pipe that replaces the centre silencers for a more noisy exhaust. Includes 2 - twin downpipes, link pipes, H-Pipe & tailpipes. Excludes fitting kit.

- Individual components:
- Downpipe
 - Rh (1) **RB7339**
 - Lh (1) **RB7340**
 - Link Pipe (Rh/Lh) (2) **RB7495**
 - Centre 'H'-Pipe (1) **RB7297**
 - Tailpipe & Silencer
 - Rh (1) **GEX3683SS**
 - Lh (1) **GEX3684SS**
 - Fitting Kit (1) **RB7704FK**
Includes rear mounting brackets, assembly fittings and jointing compound.

Description Qty Req. Part No.

TR8 - PART SYSTEMS (S/S) TWIN EXIT

The following systems are ideal if downpipes or manifolds are not needed and a replacement is required for the standard original (twin) TR8 exhaust. Supplied as either a 'Quiet' (4-box) or 'Noisy' (2-Box) system. They can also be coupled to a pair of tubular manifolds using link pipes RB7495. Available in stainless steel only ('Lifetime' Guarantee).

TR8 - PART SYSTEM - QUIET
Part System (4-Box) (1) **RB7312**
Includes: centre silencers & tailpipes. Excludes fitting kit.

Fitting Kit (1) **RB7312FK**
Includes rear mounting brackets, assembly fittings and jointing compound.

TR8 - PART SYSTEM - NOISY
Part System - 'H'-Pipe (2-Box)(1) **RB7303**
Includes: H-Pipe & tailpipes. Excludes fitting kit.

Fitting Kit (1) **RB7303FK**
Includes rear mounting brackets, assembly fittings and jointing compound.

Description Qty Req. Part No.

TR8 - SPORTS EXHAUST SYSTEMS (S/S) PERFORMANCE - TWIN

The following systems are supplied with a pair of tubular manifolds to extract more power from the V8. Coupled (using link pipes) to the original (twin) TR8 exhaust system. Available in stainless steel only ('Lifetime' Guarantee).

Note: The manifolds and systems listed are designed to fit correctly when the original spec TR8 subframe is used (which acts as a datum for engine position), note that engine mountings should fit behind subframe brackets. If a modified TR7 subframe is fitted then you will only overcome fitting/clearance problems by modifying the exhaust system.

TR8 - PERFORMANCE - TWIN EXIT - QUIET

Full System (4-Box) (1) **RB7269**

Includes: pair tubular manifolds (fits Rhd & Lhd), link pipes, centre silencers & tailpipes, excludes fitting kit. Offers performance with refined & subtle exhaust note.

Individual components:

Manifold (pair)	(1)	RB7030SS
Link Pipe (Rh/Lh)	(2)	RB7495
Centre Silencer		
Rh	(1)	GEX3680SS
Lh	(1)	GEX3681SS
Tailpipe & Silencer		
Rh	(1)	GEX3683SS
Lh	(1)	GEX3684SS
Fitting Kit	(1)	RB7269FK

Includes manifold gaskets, rear mounting brackets, assembly fittings and jointing compound.

TR8 - PERFORMANCE - TWIN EXIT - NOISY

Full System - 'H'-Pipe (2-Box)(1) **RB7264**

Identical to system listed above except for an 'H'-Pipe that replaces the centre silencers for a more noisy exhaust. Includes tubular manifolds (fits Rhd & Lhd), link pipes, H-pipe & tailpipes. Excludes fitting kit.

Individual components:

Manifold (pair)	(1)	RB7030SS
Link Pipe (Rh/Lh)	(2)	RB7495
Centre 'H'-Pipe	(1)	RB7297
Tailpipe & Silencer		
Rh	(1)	GEX3683SS
Lh	(1)	GEX3684SS
Fitting Kit	(1)	RB7264FK

Includes manifold gaskets, rear mounting brackets, assembly fittings and jointing compound.

Description Qty Req. Part No.

TR8 - SPORTS EXHAUST SYSTEM (S/S) PERFORMANCE - SINGLE EXIT - LARGE BORE

The following system is supplied with a pair of tubular manifolds to extract more power from the V8. Coupled to a large bore rally type exhaust system (2 1/4" bore) with single exit straight through silencer and 3" dia tailpipe, this system is very noisy - pure V8! Available in stainless steel only ('Lifetime' Guarantee).

Note: The manifolds and systems listed are designed to fit correctly when the original spec TR8 subframe is used (which acts as a datum for engine position), note that engine mountings should fit behind subframe brackets. If a modified TR7 subframe is fitted then you will only overcome fitting/clearance problems by modifying the exhaust system.

TR8 - PERFORMANCE - SINGLE EXIT - NOISY

Full System - Large Bore (1) **RB7279**

Includes: pair tubular manifolds (fits Rhd & Lhd), 'Y' pipe, axle pipe and straight through rear silencer (3" tailpipe). Excludes fitting kit.

Offers performance with race/rally type exhaust note.

Individual components:

Manifold (pair)	(1)	RB7030SS
Y-Pipe (A)	(1)	TH801
Y-Pipe (B)	(1)	TH802
Axle Pipe	(1)	TH803
Tailpipe & Silencer	(1)	TH804
Fitting Kit	(1)	RB7279FK

Includes manifold gaskets, assembly fittings and jointing compound.

TR8 - PART SYSTEM SINGLE EXIT - LARGE BORE

The following system is designed to be fitted to a pair of tubular manifolds. This large bore rally type exhaust system with single exit straight through silencer and 3" dia tailpipe is very noisy - pure V8! Available in stainless steel only ('Lifetime' Guarantee).

Note: This system will fit directly on to Rimmer Bros tubular manifolds (when using original spec TR8 subframe). Modification may be required for other applications.

TR8 - PART SYSTEM - SINGLE EXIT - L/BORE

Part System - Large Bore (1) **RB7317**

Less manifolds. Includes: 'Y' pipe, axle pipe and straight through rear silencer (3" tailpipe). Excludes fitting kit.

Fitting Kit (1) **RB7317FK**

Includes manifold gaskets, assembly fittings and jointing compound.

Description Qty Req. Part No.

TR8 - SPORTS TUBULAR MANIFOLDS (S/S) & COMPONENTS

Fitting a pair of tubular manifolds allows the engine to 'breathe', by extracting the exhaust gasses more efficiently. Noticeable improvements in power and mid-range torque can be expected - especially when combined with Thermo-Tec manifold insulation wrap and a pair of K&N filters. Please refer also to the various exhaust systems listed which include these manifolds. Manifolds fit both RHD and LHD vehicles.

Note: The manifolds listed are designed to fit correctly when the original spec TR8 subframe is used (which acts as a datum for engine position), note that engine mountings should fit behind subframe brackets. If a modified TR7 subframe is fitted then you will only overcome fitting/clearance problems by modifying the manifolds.

TR8 SPORTS TUBULAR MANIFOLDS (S/S)

Tubular Manifolds (pair) (1) **RB7030SS**

Fits both Rhd & Lhd vehicles.

Link Pipe (Rh/Lh) (2) **RB7495**

If coupling to twin exhaust system.

COOL ITTM Thermo-Tec

EXHAUST INSULATING WRAP

Thermo-Tec exhaust insulating wrap reduces under bonnet temperatures by as much as 70%, this increases air intake and exhaust gas velocity which adds performance. Retaining the heat in the exhaust protects you from mechanical burns and it will also help to prevent under bonnet fires. Any electrical

components which are close to the manifold will be less prone to heat failure, increasing their life and performance. As an added benefit, under bonnet noise is also reduced! Thermo-Tec contains no asbestos or carcinogens.

The Snap Strap Installation Kit secures Thermo-Tec exhaust insulation wrap to your tubular manifold/s. A stainless steel high temperature material designed better than hose clamps and is easier to use.

Also recommended is Hy-cote paint. This preserves and protects the exhaust wrap after installation. Extra resins and binders seal the pores, toughen the surface and help extend the life of the wrap.

Insulation Wrap (2" x 50' roll) (2) **RX1382**

Snap - Strap Kit (1) **RX1383**

Hy-cote Paint, Aerosol (400ml) (1) **RX1432**

Manifold Fitting Kit (1) **EF1001**

Replaces original manifold bolts with studs to enable easier installation of manifolds. Inc. 16 studs, nuts & washers.

Gasket - Manifold to head (4) **AJM692S**

Twin port gasket.

Jointing Compound (1) **GCH112**

TR8 Transmission Details
 In this TR8 Transmission & Axles section, apart from listing parts/components that relate solely to the TR8, we have also listed a 5 speed (heavy duty) gearbox, and rear axle units, that you may wish to consider fitting when converting your TR7 to TR8, especially if you are fitting or have fitted an uprated or large capacity engine.

V8 Gearbox - 5 Speed (Heavy duty)

Although you can re-use your existing TR7 5sp gearbox in the TR8 conversion, we offer a Heavy Duty V8 5sp gearbox which is a more robust unit to cope with the power increase. Please refer to main TR7 5 speed gearbox section for all gearbox internals, gear selector shafts & gearchange not listed here.

- Gearbox-Heavy Duty (5 Sp) (1) **UKC9076RHD**
Recon. Supplied Less bellhousing, speedo pinion & gearchange remote assembly.
- Gearbox Mounting (TR8) (1) **TKC2642**
Original TR8 Spec, harder than standard.
- Gear Oil (ATF) (0.5 Litre) (a/r) **GGL175**
- Gear Oil (ATF) (5 Litre) (a/r) **GGL505**
Gearbox capacity - 1.5 Litre.

V8 MANUAL GEARBOX ASSEMBLY 5 SPEED

TR8 (TR7) SUSPENSION DETAILS

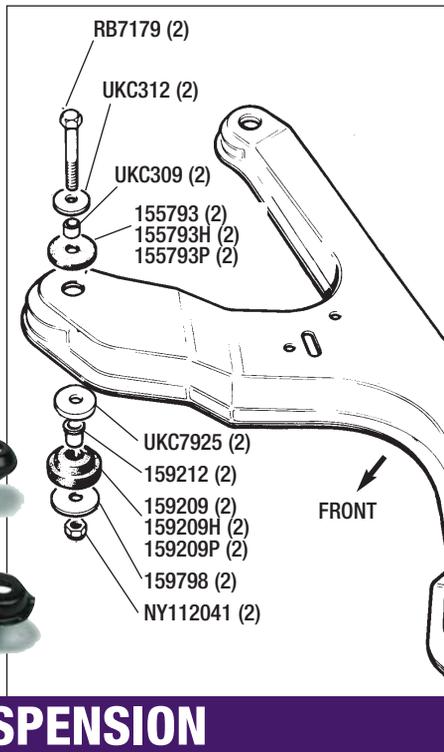

With the exception of the TR8 front subframe, and its mounting bolts & spacers, this section is virtually identical to the uprated TR7 suspension listed earlier in the catalogue.

As we recommend that the suspension is uprated when converting to TR8 spec, we have listed the necessary kits & individual parts again for ease of reference.

Please also refer to following page for details of uprated suspension components and kits.

Description Qty Req. Part No.

Description Qty Req. Part No.

TR8 SUBFRAME IDENTIFICATION;
Photo shows original TR8 subframe.
Illustration shows standard TR7 subframe.
The TR7 subframe line drawing is shown to identify the mounting bolts/bushes etc, and where they are located.

FRONT SUSPENSION

V8 Front Subframe

For engine mountings & brackets, please refer to; **V8 Engine & Gearbox Mountings.**

Front Subframe - New	(1)	RKC927
<i>Original TR8 Specification.</i>		
Subframe Bush Kit;		
<i>Includes; 2-159209, 2-UKC307 & 4-155793 bushes.</i>		
Standard bushes	(1)	RB7061
Uprated (Hard) bushes	(1)	RB7061H
Uprated (Poly) bushes	(1)	RB7061P
Subframe Bolt Kit	(1)	RB7102
<i>Includes nuts/bolts/spacers/washers marked +</i>		
<i>Note; Includes subframe mounting spacers & longer bolts - for additional engine to bonnet clearance. If spacers are not required order the standard TR7 subframe bolt kit (RB7025), which contains standard length bolts.</i>		
Subframe Spacer Kit only	(1)	RB7135
<i>Includes spacers/nuts/bolts marked * in subframe text. Increases engine/bonnet clearance.</i>		

FRONT MOUNTINGS

V8 Anti-Roll Bar - Front

Items listed here are those we recommend when converting to TR8 specification. All other parts as standard TR7.

Anti-Roll Bar - Uprated	(1)	RKC30UR
<i>See also 'Uprated Anti-roll Bar Kit' page 168.</i>		
<i>Increased roll stiffness (30%) for improved handling.</i>		
<i>Powder coated. Uses original mountings.</i>		
<i>(Front Bushes UKC210 require reaming out from 19mm to 22.5mm).</i>		
Anti-Roll Bar Bush Kit;		
<i>Includes; 4-TKC6097 & 2-UKC210 bushes.</i>		
Standard bushes	(1)	RB7045
Uprated (Hard) Bushes	(1)	RB7045H
Uprated (Poly) Bushes	(1)	RB7045P
Anti-Roll Bar Bolt Kit	(1)	RB7348
Front 'Anti-Dive' Kit	(1)	RB7100
<i>Kit includes 2 aluminium spacer blocks, extra long bolts (& nuts). Aluminium blocks fit between subframe & anti-roll bar to increase resistance of car front end 'diving' under heavy braking. For use with standard roll bar only.</i>		

V8 Track Arm Bushes

Items listed here are those we recommend when converting to TR8 specification. All other parts as standard TR7.

Track Arm Mounting Bush;		
Standard	(2)	CRC1709
Uprated (Hard)	(2)	CRC1709H
Uprated (Poly)	(2)	CRC1709P

V8 Strut Insert & Spring

See also; **TR8 SHOCK ABSORBER/SPRING PACKAGES.**
Items listed here are those we recommend when converting to TR8 specification. All other parts as standard TR7.

SAFETY NOTE: we recommend fitting strut inserts in pairs.

Strut Insert (Shock absorber);		
Spax Insert (Each)	(2)	GSA2024S
Heavy Duty		
Spax Insert TA2 (Pair)	(1)	GSA2024STA2
On Car Adjustable		
Koni Insert (Pair)	(1)	GSA2024K
Off Car Adjustable		
Gaz Insert (Pair)	(1)	GSA2024G
On Car Adjustable.		
Front Spring-Uprated	(2)	TKC1328UR
<i>Fit in pairs. Uprated to 200lb, 1" lowered ride height.</i>		
<i>Bump stop should be shortened when fitting lowered front springs.</i>		
<i>Springs should only be fitted in vehicle sets, 2 front/2 rear.</i>		

REAR SUSPENSION

V8 Anti-roll Bar - Rear

Anti-Roll Bar - Uprated	(1)	TKC253UR
<i>See also 'Uprated Anti-Roll Bar Kit' page 168.</i>		
<i>Increased roll stiffness (30%) for improved handling. Powder coated.</i>		

V8 Trailing Arm & Tie Bar Bushes

See also; **TR8 SUSPENSION BUSH/BOLT KITS.**
Items listed here are those we recommend when converting to TR8 specification. All other parts as standard TR7.

Trailing Arm Bush;		
Standard	(4)	ULC1580
Uprated (Hard)	(4)	ULC1580H
Uprated (Poly)	(4)	ULC1580P
Tie Bar Bush;		
Standard	(4)	UKC5514
Uprated (Hard)	(4)	UKC5514H
Uprated (Poly)	(4)	UKC5514P

V8 Shock Absorber & Spring

See also; **TR8 SHOCK ABSORBER/SPRINGPACKAGES.**
Items listed here are those we recommend when converting to TR8 specification. All other parts as standard TR7.

SAFETY NOTE: we recommend fitting shock absorbers in pairs.

Shock Absorber (Inc bushes);		
Spax (Pair)	(1)	GSA374S7
On Car Adjustable.		
Koni (Pair)	(1)	GSA374K7
Off Car Adjustable.		
Gaz (Pair)	(1)	GSA374G7
On Car Adjustable.		
Rear Spring-Uprated	(2)	TKC3300UR
<i>Uprated to 200lb, 1" lowered ride height. Note: when fitting uprated rear springs, install with retaining kit (TKC3300URFK) to hold springs in position. Springs should only be fitted in vehicle sets, 2 front/2 rear.</i>		
Retaining Kit (Uprated Rear Springs)	(1)	TKC3300URFK
<i>For 2 springs.</i>		
<i>Kit includes retaining plates/hooks, bolts, nuts & washers.</i>

ANTI-DIVE KIT

Kit includes
2 aluminium spacer blocks,
extra long bolts (& nuts).

Aluminium blocks fit between subframe & front anti-roll bar to increase resistance of car front end 'diving' under heavy braking. For use with standard front anti-roll bar only.

FRONT 'ANTI-DIVE' KIT (1) RB7100

Why not fit this Anti-Dive Kit with one of our up rated Suspension packs?

UPRATED FRONT & REAR ANTI-ROLL BAR KIT

Transform the handling of your TR7 or TR8 by fitting a pair of up rated anti-roll bars. Increased roll stiffness (30%) and powder coated for meaningful appearance. Kit is supplied complete with polyurethane mounting bushes (UKC210 front bushes require reaming out from 19mm to 22.5mm) and mounting kit.

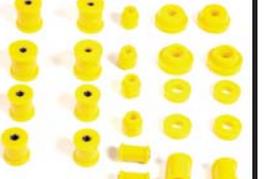

UPRATED FRONT & REAR ANTI-ROLL BAR KIT (1) RB7695

Includes front & rear roll bars, polyurethane mounting bush kit and mounting bolt kit.

Anti-Roll Bar BOLT KIT E	Car set. Bolt set includes all necessary nuts, bolts & washers. For kit contents see Front 'Anti-Roll Bar'. <i>To fit Anti-Roll Bar Bush Kit 'E' (RB7045 - RB7045H - RB7045P)</i>	 RB7348	 RB7348	 RB7348

UPRATED BRAKE KIT (FRONT)

We now supply one type of front Up-rated Brake Kit (RB7117) for all TR7 & TR8 conversion applications. This utilises large calipers derived from the Rover SD1 Vitesse and adapted for use with special vented brake discs suitable for mounting to the 4-stud TR7 hub. This kit **cannot** be used with standard TR7 (13") wheels because of insufficient running clearance inside the wheel due to the larger calipers. It is therefore necessary to fit a minimum 14" diameter wheel (see 'Roadwheels' for details on our Minilite Replica Wheel Sets) with this kit.

For our long standing customers who have previously purchased an up-rated brake kit (solid or vented) using the smaller 4 - pot calipers (RB7090 or RB7137) - retaining the 13" wheels - then we still supply service items for these kits (eg discs, pads, caliper repair kit etc) as listed below.

UPRATED BRAKE KIT

This kit is comprised of components derived from the Rover Vitesse, adapted to fit the standard TR7 4-stud hub, it includes:
2 vented brake discs, 2 large '4-pot' calipers, brake pads, 2 braided brake hoses, fittings & instructions.

Up-rated Brake Kit (1) **RB7117**

This kit cannot be used with standard 13" TR7 wheels, minimum 14" wheels must be used for internal clearance. See Road Wheels section for details of 14" Minilite (Replica) wheel sets.

Description Qty Req. Part No.

V8 Manual Steering Rack

The standard TR7 steering rack (& couplings) can be used on a TR8 conversion, we do however recommend that you fit either a new or reconditioned steering rack - especially if the condition/state of your existing steering rack is unknown or suspect. Please refer to TR7 Steering section.

V8 Power Rack Conversion (RHD)

Our Power Steering Conversion Kit has been developed specifically for the TR7 to TR8 conversion. You will need to purchase the power steering rack, installation kit, 2 track rod ends and steering shaft.

- Power Steering Rack (1) **RB7316R**
Inc gaiters. Less track rod ends.
- Installation Kit (Power rack) (1) **RB7298**
Inc; mounting brackets, pump, pipes/hoses & drive belt.
- Steering Shaft (Power Rack) (1) **UKC7951**
Not included in PAS installation kit.
- Track Rod End (2) **GSJ185**
Not included with PAS rack.
- Nut-Locking (2) **NT114040**
Track rod end to track rod.

REPLACEMENT/SERVICE ITEMS FOR RHD PAS CONVERSION

- Seal Kit (1) **RB7501**
For power steering rack RB7316R.
- Rack Gaiter (Steering rack) (2) **RTC2219**
Replacement for PAS rack.
- Fasteners-Rack Gaiter;
 - Wire Tie (Inner-large) (2) **512781**
 - Clip (Outer-small) (2) **UKC5533**
- Drive Belt-PAS Pump (1) **GFB20864**
Replacement.

TR8 Original Power Rack (LHD)

See Illustration.

- Power Steering Rack (LHD) (1) **CAX2170R**
Recon. Inc gaiters. Less track rod ends.
- Steering Shaft (1) **UKC7951**
- Track Rod End (2) **GSJ185**
Not included with PAS rack.
- Nut-Locking (2) **NT114040**
Track rod end to track rod.
- Seal Kit (1) **RTC2393A**
For power steering rack CAX2170R.
- Rack Gaiter (Steering rack) (2) **RTC2219**
Replacement for PAS rack.
- Fasteners-Rack Gaiter;
 - Wire Tie (Inner-large) (2) **512781**
 - Clip (Outer-small) (2) **UKC5533**
- Drive Belt-PAS Pump (1) **GFB20864**
Replacement.

V8 Steering Wheel & Boss

See also; **TR7 STEERING** for other steering wheels.

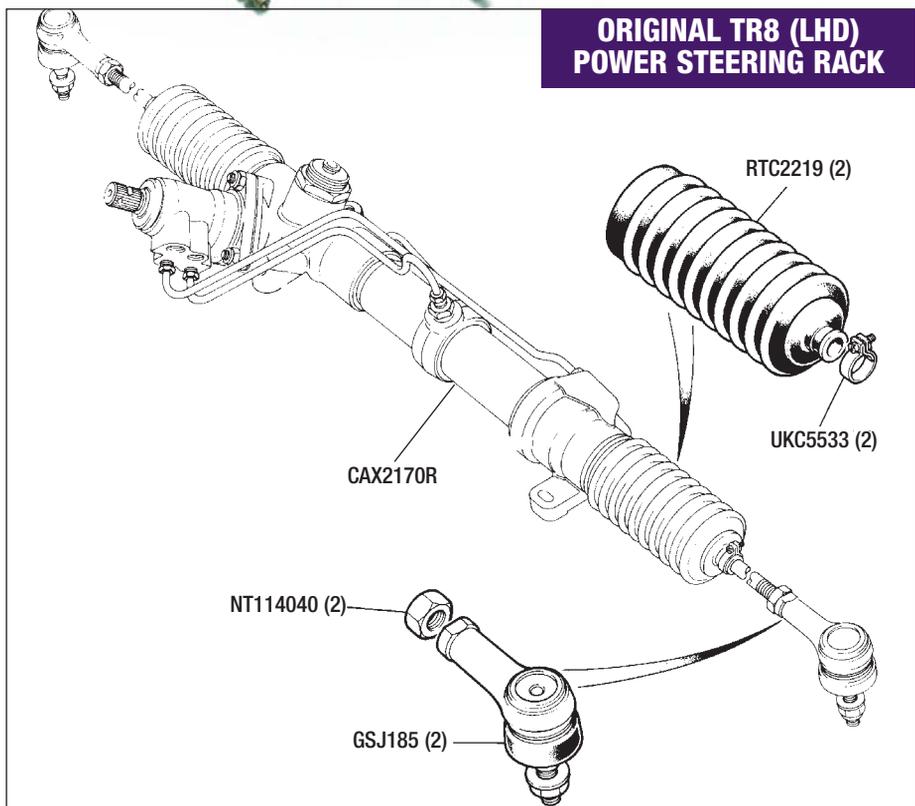

Steering Wheel - TR8 Original;

Leather (Moto-Lita) wheel fits all models.
Complete with boss & wheel centre.

- Black Leather rim (1) **PKC1295Black**
- Blue Leather rim (1) **PKC1295Blue**
- Wheel Centre (Original TR8) (1) **ULC2999**

TR7 SPRINT

16V

16V CONVERSION

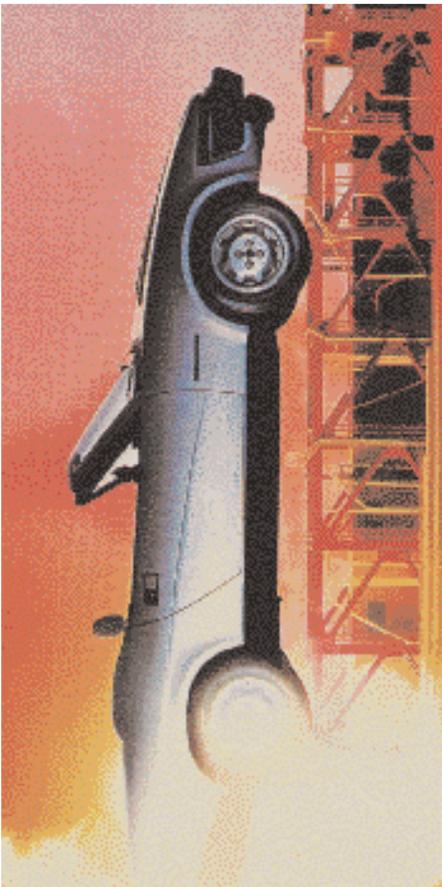

TR7 16v SPRINT

TR7 - TR7 16v SPRINT PARTS COMPATIBILITY

The main differences between the TR7 and the TR7 16v Sprint are engine components, carburettors, exhaust, and the ignition system. The TR7 5 speed gearbox (4 speed not recommended), clutch, flywheel and engine adaptor plate along with the propshaft and rear axle can be re-used since all the mounting points are the same. The TR7 cooling system is also retained although a modification is required to the jacket plate at the rear of the Sprint cylinder head to allow a take-off for the heater. We have created a cross-reference table in the engine section which directs you to the appropriate section of either this catalogue or our Dolomite catalogue which should be obtained from us (free of charge), prior to commencing work.

Please remember, that if you have any difficulty whatsoever you only have to phone, our staff are here to help you.

A VERY INTERESTING ALTERNATIVE!

The 16 valve Twin Carb Sprint engine was first introduced to the Dolomite range in the early 1970's. It was way ahead of its time (for a production vehicle) in terms of design and the fact there were 4 valves per cylinder. This is something we take for granted these days, but in the early 1970's, this was really something.

The unique design of the cylinder head with its ingenious single camshaft & separate rocker shaft allowed easy maintenance and was readily adapted by Leyland engineers to the slant-4 cylinder block of the 1850, which was bored out to 2 litres and fitted with high compression pistons.

When the TR7 was in early production, plans were already made to offer a 16 valve engine option. Unfortunately the 'TR7 Sprint' (as it was to be called), never went into production, although Leyland actually went to the trouble of printing an owners handbook! A few prototypes were built which 'escaped' on to the market in 1977 in coupe form. These particularly rare vehicles are readily identified by a unique cast iron exhaust manifold which has a twin vertical downpipe outlet (the Dolomite Sprint manifold exits at approximately 45°), and of course, by chassis number.

If you are looking for something a little different in 2 litre form rather than going for the 'V8' option, then you should consider converting to the 16 valve Sprint specification.

Although a popular conversion, it is not quite as straightforward as "just bolting a 16 valve Sprint head to a TR7 cylinder block" as so many people believe, in fact, there are very few engine similarities, for example;

BASIC DIFFERENCES

Between the 2 Litre '8 Valve' & 2 Litre '16 Valve' Engines

Cylinder Head	Rocker Cover (Cam Cover)
Cylinder Head Gasket	Oil Filler Cap
Rear Transfer Housing	Spark Plugs and HT Leads
Pistons	Spark Plug Tubes
Timing Chain and Sprockets	Distributor
Timing Chain Guides and Tensioner	Inlet Manifold
Timing Cover	Exhaust Manifold
Crankshaft Pulley	

However, this does not mean that the 16v conversion is difficult. It can be carried out by any competent DIY car enthusiast.

One option is to rebuild your own TR7 engine with sprint pistons, cylinder head, timing gear etc, ensuring that the 'bottom end' (crankshaft, bearings, etc) are in good order, as extra demands are made and it wouldn't take long to "finish off a tired crank". But, if you sit down and work out the cost before you start, it will probably make sense to purchase a reconditioned full engine (giving your TR7 engine in exchange).

The exhaust manifold is of particular relevance since the Dolomite Sprint manifold will not clear the TR7 bulkhead (without awkward modification to the bodywork) and because the factory TR7 sprint manifold has never been available, the only sensible solution is to fit the specially designed tubular extractor manifold - which also gives an increase in power.

You can expect an extra 25-40 BHP from the 16 Valve Sprint engine over the standard 8 valve TR7 engine, depending on whether the Tubular Extractor Exhaust Manifold is fitted or not.

While carrying out this conversion, you should also consider uprating the brakes and the suspension (springs, shock absorbers, bushes etc) to improve handling (please refer to TR7 suspension packs/kits in the main part of this catalogue for full details).

OUR TR7 16V SPRINT CONVERSION KIT MAKES IT EASY.

The easiest (and most cost effective) option is to purchase our 16v conversion kit. It contains all the basic parts & components required (but not every single nut & bolt!), including a Reconditioned Full Engine, Vented disc 4-pot uprated brake kit (14" min dia Roadwheels required), Tubular exhaust Manifold, Sports exhaust system etc. We will accept your old TR7 engine, distributor & carbs in exchange against the 16v Sprint units.

Note: Your old TR7 (or Sprint) engine, distributor and inlet manifold/carbs is required in exchange for the units we supply in our conversion kit. Please note that some (minor) ancillary parts can be supplied as used/checked where not available new.

IMPORTANT INFORMATION

MODIFICATIONS

If you modify your standard TR7 to TR7 16v Sprint specification by using separate components rather than using one of our 16v Conversion Kits, it is essential to uprate the Braking System. We also recommend you modify the Suspension by fitting uprated springs, shock absorbers, hard bushes etc, to improve handling. (Refer to TR7 Suspension Packs/Kits for full details).

INSURANCE

You must inform your insurance company of ANY vehicle modifications. If you have problems insuring your TR7 please contact us, we have details of insurance companies and brokers who specialise in modified and classic cars.

TR7 16v Sprint CONVERSION KIT

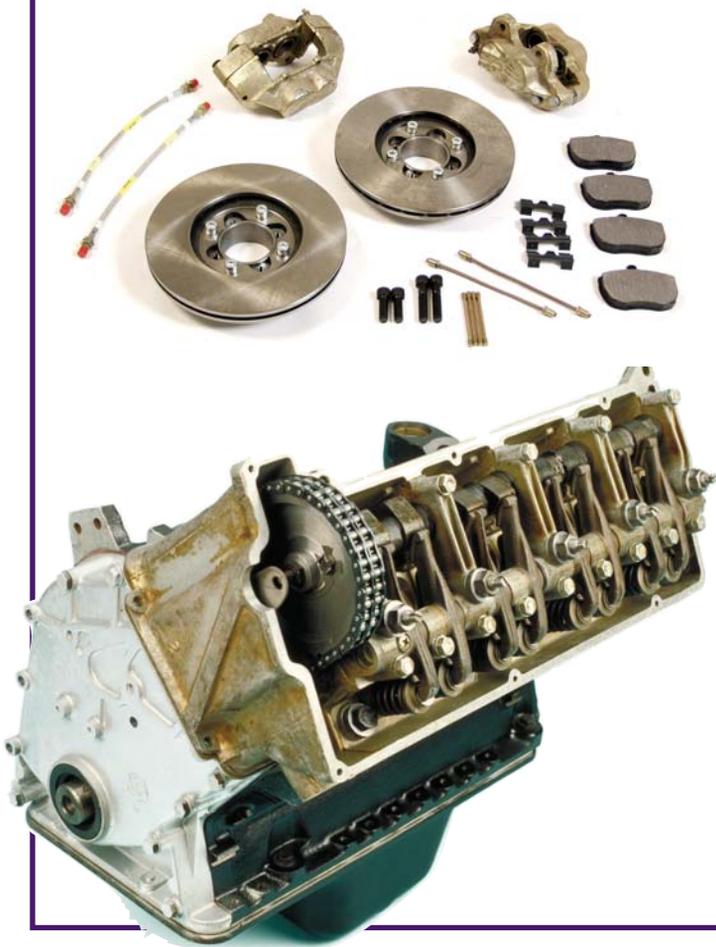

(Basic kit as listed)

Part No - RB7710

TR7 16v Sprint Conversion Kit RB7710 includes;

- Full Engine (16 valve)
Reconditioned. Standard TR7 engine accepted in exchange.
Note: Engine supplied fitted with Dolomite sump.
Customer to refit TR7 Sump using new gasket supplied.
- New Oil Pump (fitted)
- New 12 Vane Water Pump & Cover
- Camshaft Cover & Retaining Screws
- Cylinder Head Water Jacket Adaptor (RB7240)
For heater take-off. Includes Sprint head rear blanking plate, water take-off adaptor and elbow. Allows 90° exit for heater hose.
- Crankshaft Pulley & Bolt
- Distributor (Recon), Cap & Mounting Plate
TR7 Distributor accepted in exchange.
- Plug Leads & Plug Tubes (New O' rings)
- Up-rated ('Big') Brake Kit (RB7117)
Includes specially adapted Rover Vitesse 4-pot calipers and special vented brake discs, pads, braided brake hoses, fittings and instructions. See page 59 for more information.
Note: This kit can not be used with standard 13" TR7 wheels. Minimum 14" wheels must be used for internal clearance. See roadwheels section.
- Inlet Manifold Complete with cleaned and checked Carburettors
TR7 manifold and carbs accepted in exchange.
- K+N Air Filters & Carb Needles
- Tubular Exhaust Manifold (Stainless Steel) & Gasket
- Stainless Steel Sports Exhaust System (RB7049)
Including fitting kit.
- Oil Filter & all necessary Gaskets.

Note: Some ancillary parts supplied as used/checked where not available new.

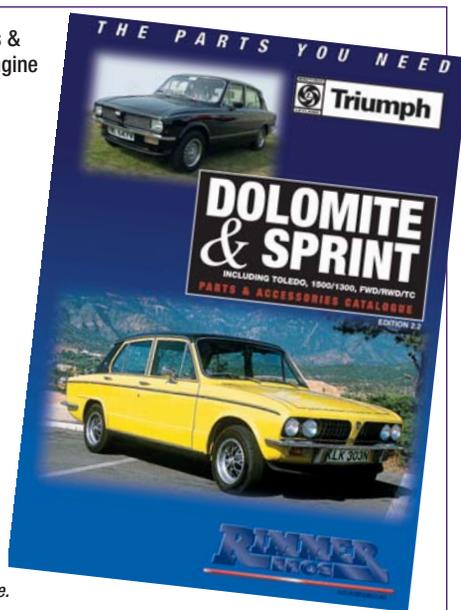

16V ENGINES & COMPONENTS

Please request your free copy of our Dolomite Parts & Accessories Catalogue which covers all 16 valve engine components (including full and short engines).

Dolomite Factory Parts Catalogue - **RTC9822CB**
A useful addition to cross reference parts to our TR7 catalogue.

5 speed/Late Auto (EP90)	1.1 Litre

TYRE PRESSURES - Standard 13" Wheels (185/70 HR13 tyres)

Front (Cold)	24 Lbs Psi
Rear (Cold)	28 Lbs Psi

IMPORTANT INFORMATION Idler Pulley

The existing TR7 fan idler pulley (UKC1626) can be fitted to the 16v Sprint timing cover (RKC776), with the 4-hole type fixing. Using the 16v Sprint idler pulley will result in the cooling fan being further back from the radiator leading to possible overheating problems when the vehicle is stationary.

Link/Tube Pipe	(1)	UKC2538
'O' Ring	(2)	TRS1114

16v Sprint Inlet Manifold Conversion

The inlet manifold on the 16v Sprint engine is different to the TR7, so if you carry out the conversion without using one of our TR7 16v Sprint conversion kits, it will be necessary to fit a Sprint inlet manifold complete with carbs, or, adapt your existing standard TR7 HS6 carbs to suit the Sprint manifold. This is a fairly straightforward procedure as the standard TR7 carbs will fit the Sprint manifold, but, because they sit further apart you will have to modify the linkage to suit.

Apart from purchasing a complete 16v conversion kit, the easiest option is to fit one of our TR7 Carb/Sprint Manifold sets, which come pre-assembled with TR7 carb's (checked & cleaned) mounted to a Sprint manifold, with the correct linkage. For fully reconditioned carburettors and overhaul/service items for TR7 carb's, please refer to TR7 FUEL SYSTEM. If you require overhaul components for original Sprint carbs, we stock a full range, so please phone with full details or refer to our Dolomite Catalogue.

AIR CLEANERS/FILTERS

The original TR7 air cleaner cannot be re-used in the conversion as the carburettors are spaced further apart. You can of course fit an original Dolomite Sprint air cleaner, but, to optimise the conversion we recommend you fit a pair of K&N air filters to improve engine breathing - whilst enhancing the appearance of the engine bay.

16v Carb/Manifold Conversion

For Carb Components please refer to main TR7 section or Dolomite Catalogue.

Carb & Manifold Set;

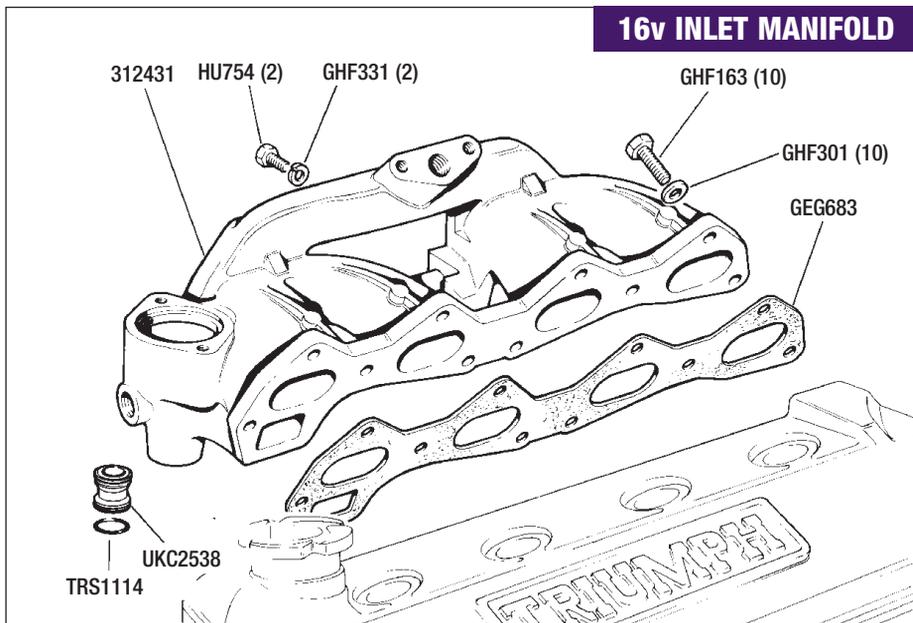

Comprises Sprint inlet manifold fitted with TR7 HS6 carbs & linkages. Carbs are cleaned & checked and sold on an exchange basis.

with Non Waxstat carb's	(1)	RB7372
with Waxstat carb's	(1)	RB7372WAX

16V SPRINT EXHAUST MANIFOLDS & CONVERSION

The very few original TR7 16v Sprints that were produced by the factory featured a unique cast-iron exhaust manifold which had 'Twin Vertical exits' (similar to TR7), and it has never been available as a replacement part. For those people who own such a vehicle, we can supply a stainless steel downpipe that couples directly to the original manifold.

The question often asked is... "will the Dolomite Sprint exhaust manifold fit a 16v engine installed in a TR7?" - many people say yes - but, unless you modify the Lh engine bay bulkhead, it will foul in a big-way!, and because of this problem, we Do Not recommend it being used.

The most satisfactory solution (for cost, performance & fit) is the Tubular Extractor manifold, designed specifically for the 16v Sprint conversion, it will give you a respectable power increase of approximately 15 Bhp, and it will avoid any modification of the bodywork - it looks better too!

Although the tubular manifold is intended to be fitted with our Sports exhaust system (Large bore-Stainless Steel), it can be adapted to fit any existing standard exhaust system.

EXHAUST INSULATING WRAP

COOL IT
Thermo-Tec

Thermo-Tec exhaust insulating wrap reduces under bonnet temperatures by as much as 70%, this increases air intake and exhaust gas velocity which adds performance. Retaining the heat in the exhaust protects you from mechanical burns and it will also help to prevent under bonnet fires. Any electrical components which are close to the manifold will be less prone to heat failure, increasing their life and performance. As an added benefit, under bonnet noise is also reduced! Thermo-Tec contains no asbestos or carcinogens.

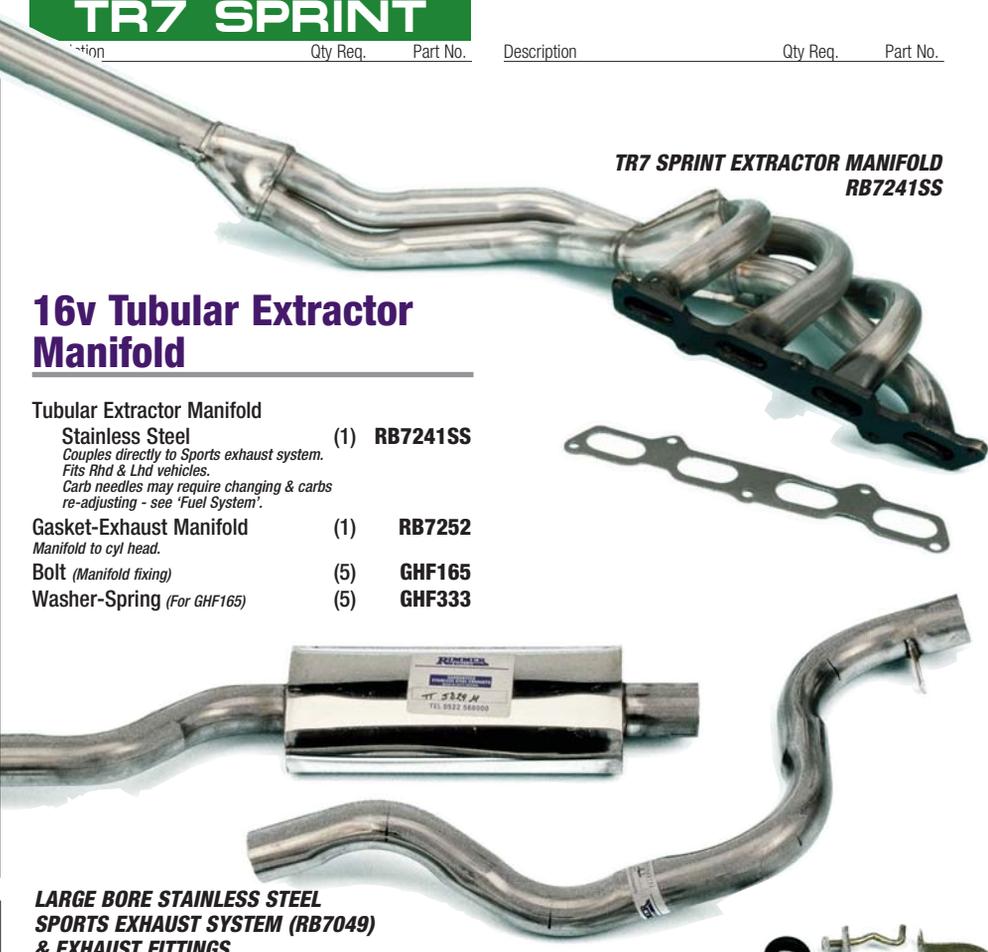

The Snap Strap Installation Kit secures Thermo-Tec exhaust insulation wrap to your tubular manifold/s. A stainless steel high temperature material designed better than hose clamps and is easier to use.

Also recommended is Hy-cote paint. This preserves and protects the exhaust wrap after installation. Extra resins and binders seal the pores, toughen the surface and help extend the life of the wrap.

- Exhaust Insulating Wrap - 2" x 50' (1) **RX1382**
- Snap Strap Exhaust Wrap Installation Kit (1) **RX1383**
- Hy-Cote Paint, Aerosol (400ml) (1) **RX1432**
Available in black or aluminium.

16v Tubular Extractor Manifold

- Tubular Extractor Manifold
Stainless Steel (1) **RB7241SS**
Couples directly to Sports exhaust system. Fits Rhd & Lhd vehicles. Carb needles may require changing & carbs re-adjusting - see 'Fuel System'.
- Gasket-Exhaust Manifold (1) **RB7252**
Manifold to cyl head.
- Bolt (Manifold fixing) (5) **GHF165**
- Washer-Spring (For GHF165) (5) **GHF333**

TR7 SPRINT EXTRACTOR MANIFOLD RB7241SS

LARGE BORE STAINLESS STEEL SPORTS EXHAUST SYSTEM (RB7049) & EXHAUST FITTINGS.

16v Sports Exhaust System

- Stainless Steel (Large bore)
- Sports Exhaust System (1) **RB7049**
Couples directly to Tubular manifold. Less extractor manifold.
- Exhaust Fitting Kit (1) **RB7049FK**
Includes clamps, rear hanger, support rings and jointing compound.
- Adaptor Sleeve (1) **RB7024**
Allows sports system RB7049 to couple to factory TR7 Sprint down pipe.

USE ADAPTOR SLEEVE RB7024, WHEN FITTING SPORTS SYSTEM RB7049 WITH ORIGINAL TR7 16v SPRINT DOWN PIPE RB7385.

16v Standard Exhaust & Components

- Down Pipe (Stainless steel) (1) **RB7385**
For Factory TR7 16v Sprints ONLY. Does NOT fit with Dolomite Sprint manifold.

16V ELECTRICAL & TRANSFERS

ENGINE

TR7 & SPRINT SPIN-ON OIL FILTER CONVERSION

This kit converts the standard 'Bowl' type Filter to the more efficient 'Spin-on' Cartridge type which makes filter changing easier & cleaner.
RECOMMENDED FOR ALL TR7 & SPRINT OWNERS!

- Adaptor (1) **RB7016**
TR7 & Sprint vehicles without engine oil cooler
- Adaptor (1) **RB7048**
TR7 & Sprint vehicles with engine oil cooler.
- Oil Filter Cartridge (1) **RR1243**
- Service kit for adaptor (1) **RB7016SK**
Replacement O' rings.

TR7 & SPRINT OIL COOLER KIT

- Oil Cooler Kit (TR7 & Sprint) **RB7060**
Includes radiator, hoses & fittings. Thermostat available separately.
- Thermostat **RS1456**

KENLOWE ELECTRIC FAN KIT

- Kenlowe Electric Fan Kit **RB7065**
Not suitable for A/C vehicles.
- TR7/TR7 16v (13" Fan) **RS1537**
- TR8/TR7 V8 (16" Fan)

OIL PRESSURE GAUGE KIT

- Oil Pressure Gauge Kit (All models) **RX1351/0**
- 'T' Piece **RX1352**
- Use if retaining oil pressure warning light.
- Bracket (for remote mounting of gauge) **RB7050**

KENLOWE ENGINE HOT START & INTERIOR PRE-HEATER SYSTEM

The ultimate in comfort & convenience: Kenlowe Engine Hotstart is a mains-powered pre-heater and coolant pump. Fitted in a convenient position in the engine bay, Hotstart rapidly heats the engine to operating temperature and holds it there, eliminating the engine wear, extra fuel costs and de-icing associated with cold winter mornings. The Kenlowe Interior Pre-Heater, working in conjunction with Hotstart, pre-heats the car's interior (as well as demisting iced-up windows) before you even turn on the ignition, making the start of your journey safer and more comfortable.

- Kenlowe 'Hotstart' engine & interior pre-heater **RX1361**

AIR FILTER - K&N

K&N offer superior filtration, an improvement in airflow and many times longer life than standard elements. In addition, they can be cleaned and re-used. Available for both carb and Efi petrol models, they replace the original air intake box and paper element and require no alterations to the fuel system on a standard engine (with standard exhaust). K&N filters are proven in both competition and off-road environments.

K & N FILTERS ARE RE-USABLE & HELP IMPROVE PERFORMANCE

- K&N Replacement Air Filter; **RB7070**
TR7/TR7 Sprint (2 required)
- TR8/TR7 V8 **RB7296**
3500 Caburettor (2 required) **RA1063**
3500 EFi **RA1060**
3900 EFi
Larger diameter for Hotwire systems

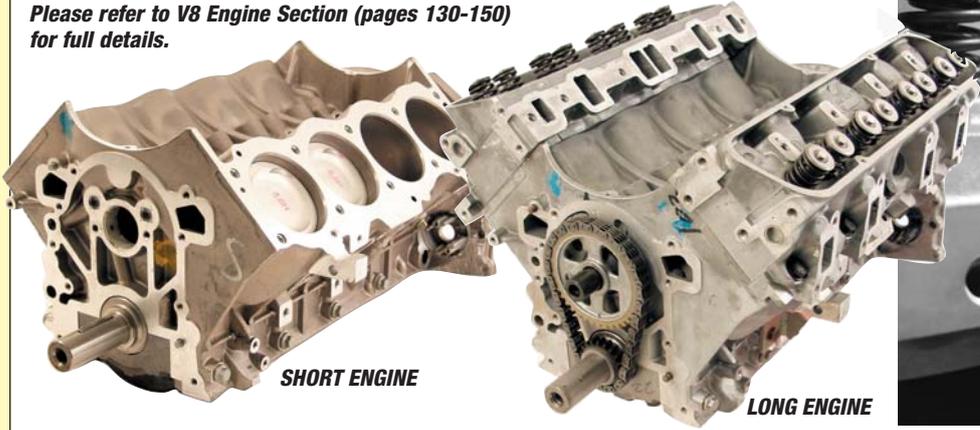

- K&N Cleaning Fluid - 1 Litre **RX1346**
Use to Clean Elements

- K&N Element Oil; **RX1347**
Use to re-oil elements after cleaning.
- 1 fl. ounce sachet **RX1348**
- 250 ml bottle **RX1349**
- 400 ml aerosol **RX1349**

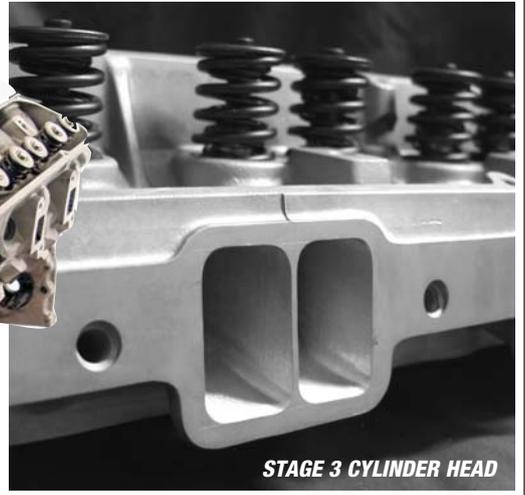

V8 - ENGINES & PERFORMANCE PARTS

Please refer to V8 Engine Section (pages 130-150) for full details.

SHORT ENGINE

LONG ENGINE

STAGE 3 CYLINDER HEAD

V8 SILICONE PLUG LEAD SET

V8 Silicone HT Lead Set

GHT182S

V8 CYLINDER HEAD STUD KIT

V8 Cylinder head stud kit

Engine set of ARP cylinder head studs, washers and nuts to replace original bolts. Studs improve cylinder head sealing & prevent damage to block threads.

RB7680

V8 PERFORMANCE SUMP

V8 performance sump

ERC2776P

V8 OIL COOLER (ENGINE)

If high oil temperatures are a problem, for example when towing, the V8 engine will benefit from the fitting of an oil cooler. We recommend fitting a thermostat at the same time, to avoid overcooling.

V8 Oil cooler kit

Includes radiator, hoses and all fittings.

RB7260

Thermostat - oil cooler

RS1456

V8 REMOTE OIL FILTER KIT

V8 Remote oil filter mounting kit

Allows mounting of oil filter away from engine. Kit includes filter housing, hoses & mountings.

RB7116

V8 REMOTE TAKE OFF

V8 Oil pump cover/remote take-off

Very low profile oil pump cover & relief valve housing for maximum clearance. Use with remote oil filter mounting kit.

RO1105

V8 - 4 BARREL CARB CONVERSION KITS

HOLLEY - OFFENHAUSER CARB KIT

Suitable for all engine sizes. Complete conversion kits for all V8 engines. Kits include: 4 barrel carb, inlet manifold, chromed 14" air cleaner (can be substituted with K&N air cleaner at extra cost), thermostat housing and accelerator cable kit. See also fuel pump section for details of our Facet type electric fuel pump, which may be required in addition to the 4 barrel carb kits, depending on application.

Holley/Offenhauser conversion; 390cfm Holley carb with auto choke, Offenhauser manifold, air cleaner, thermostat housing and accelerator cable kit.

Kit 1
With 3" deep air cleaner.

RB7262

Kit 2
With 2" deep air cleaner for extra bonnet clearance.

RB7262L

WEBER- EDELBROCK PERFORMER CARB KIT

Weber/Edelbrock Performer conversion; 500cfm Weber carb with manual choke, Edelbrock manifold, air cleaner, thermostat housing and accelerator cable kit.

Kit 1
With 3" deep air cleaner.

RA1323

Kit 2
With 2" deep air cleaner for extra bonnet clearance.

RA1323L

STAINLESS STEEL EXHAUSTS

UPDATED FRONT & REAR ANTI-ROLL BAR KIT

SEE PAGE 53 (TR7) AND PAGE 168 (TR8) FOR DETAILS.

ALLOY WHEELS

SEE PAGES 55 & 56 FOR DETAILS.

'CONCOURS' SPECIALIST WHEEL CLEANER

The 'Concours' specialist wheel cleaning system will help you care for your Classic's wheels.

Suitable for all Steel, Alloy and Wire wheels (including painted & chromed), 'Concours' wheel cleaning system uses a unique 2-stage process that not only cleans, but gives wheels a superb lasting finish that helps to protect them, making them easier to care for and clean in the future.

'Concours' Wheel Cleaning Kit **RX1405**
Kit includes; special cleaning solution (580ml), wooden handled cleaning brush & dispenser, finishing/protection solution (180ml), 2 pair of disposable gloves.

Cleaning solution breaks down brake dust & road grime. Brush & dispenser gets into all those awkward places. Finishing/protection solution leaves wheels like new.

UPDATED TR7 DISCS & PADS

If you wish to uprate your standard TR7 brakes, purchase these handed discs (lh/rh) with curved grooves and dimples to offer superb stopping power when combined with the Kevlar 'Green Stuff' pads.

See also; 'Stainless Steel Braided Brake Hoses' for a firmer brake pedal!

Up-rated Brake Discs (pair)	(1)	TKC780UR
'Green Stuff' Kevlar Pads		
Pads only	(1)	GBP281GS
Pads & Fittings	(1)	GBP281GSK

UPDATED BRAKE KIT

This kit is comprised of components derived from the Rover Vitesse, adapted to fit the standard TR7 4-stud hub, it includes:

2 vented brake discs, 2 large '4-pot' calipers, brake pads, 2 braided brake hoses, fittings & instructions.

Up-rated Brake Kit **RB7117**

This kit cannot be used with standard 13" TR7 wheels, minimum 14" wheels must be used for internal clearance. See Road Wheels section for details of 14" Minilite (Replica) wheel sets.

See also; **Service Items-Updated Brake Kits**

GOODRIDGE BRAKE HOSE SET

Replace those bulging rubber flexible hoses with these stainless steel braided hoses for firmer brake pedal pressure. Kits include front & rear flexible brake hoses.

Goodridge Brake Hose - car set
All Models (3 hoses) **RB2011GR**

GOODRIDGE CLUTCH HOSE

Goodridge Clutch Hose;
Fit between clutch master and slave cylinder.

BODY STYLING KITS

MK3 BODY STYLING KIT
RB7313

TR7 BODY STYLING

Rimmer Bros designed and introduced the first ever Body Style kit for the Triumph TR7/TR8 in 1984. In 1987 we introduced an improved kit (the Mk2) as a replacement, which has stood the test of time so well, it is still available today. Both were the result of a natural progression of improved design and fit.

The next step was to design a kit with cleaner, sharper lines, which led us to develop our Mk3 Body Style kit. However, this time we coupled 'natural development' with drawing board/styling studio techniques to create an elegant body style kit that is not only easy to install, but practical for every day use.

It is a functional, well designed kit that compliments and enhances the classic lines of the Triumph TR7/TR8 - at an affordable price.

- Top quality manufacture, easy to fit
- Excellent value for money
- Full or part kits available
- Optional rear boot spoiler
- Retains original bumpers
- Two fitment options:-
 - 1) Colour code and fit straight onto existing bodywork
 - 2) Blend panels to body (see main photo) as part of full bodywork restoration/rebuild.
- Fitting kit & full instructions supplied.

OUR MK3 BODY KIT (RB7313) INC FRONT SPOILER, REAR SKIRT, SIDE SKIRTS & WHEEL ARCHES. BOOT SPOILER (RB7223) IS OPTIONAL, AND IS PURCHASED SEPARATELY.

MK3 STYLING KIT

Full Mk3 Body Kit

RB7313

Kit includes front spoiler, side skirts, front/rear wheel arches, rear skirt, fitting kit, and comprehensive fitting instructions. Components supplied unpainted, 'direct from the mould'. Boot lid spoiler supplied separately. All items are also available separately.

ALEY ROLL BAR

THE ALEY 'AERO' ROLL-BAR IS NOT ONLY AN ESSENTIAL PIECE OF SAFETY EQUIPMENT FOR ALL CONVERTIBLE OWNERS, BUT ALSO ENHANCES THE CLASSIC LINES OF THE TR7.

REPLACEMENT COVER ALSO AVAILABLE SEPERATELY - RB7271C

PADDED ALEY ROLL-BAR RB7271

OUR 'RALLY' TYPE FLARED WHEEL ARCHES WILL COMPLIMENT ANY TR7/TR8, AND WILL KEEP YOU 'LEGAL' IF YOU INTEND TO FIT WIDE-BOOT WHEELS & TYRES!

WIND DEFLECTOR

Do you enjoy driving with the hood down? If so, then enhance your motoring pleasure with this wind deflector. A simple device, easily fitted behind the seats, it effectively stops the buffeting you receive from air being forced back into the cabin - year round open top driving is suddenly an option! Easy to fit & remove.

Wind Deflector

RB7679

FRONT BODY PROTECTOR

HELP PREVENT STONE CHIPS

You can protect your treasured TR7's front bodywork panels from flying stone damage by fitting our Front Body Protector (with embossed logo). Fitted in a just few moments with stretch rubber/clip fasteners that will not damage your paintwork.

Front Body Protector

RB7300

Not recommended for use in damp conditions.

BOOT RACK

RX1330

RX1330A

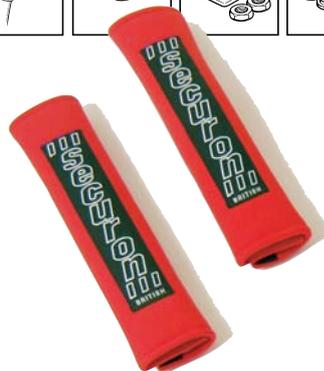

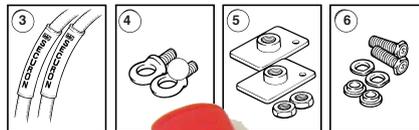

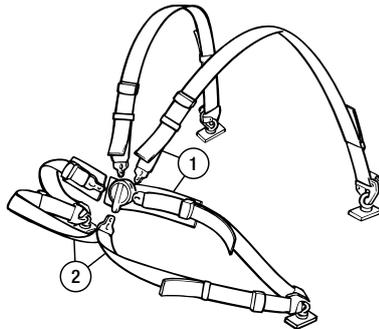

OUR BOOT RACKS ARE EASY TO FIT & REMOVE AND WILL COME IN HANDY WHEN SHORT OF LUGGAGE SPACE.

COMPETITION TYPE HARNESS

A popular alternative to standard seat belts - these really do look the part!

The 4-point harness shown (no. 1) can be converted to the 6-point type by the inclusion of the crotch strap listed (no. 2). Note that fittings (eye bolts, reinforcement plates & bolts/spacer sets) are supplied separately. Harnesses are supplied singularly in 2" wide red webbing (black or blue webbing supplied to special order). This harness is designed for road use - please contact us if you have specific FIA/RAC approved type requirements.

POWER SOURCE INVERTER

Great for in car entertainment and leisure use!

Power Source Inverter

A power source inverter converts car battery voltage (12v) into a 240v output. You can plug in a variety of mains voltage appliances into the standard UK socket. Three different inverters are available to suit a range of power requirements. There is overload, overheat and short circuit protection on all models.

150 WATT MODEL **RX1551-150**
 Continuous power: 150w. Peak power: 300w
 Cigar lighter plug connection. 15A fuse.
 Suitable applications: TV, DVD, Video, Computer Consoles, Lights (not fluorescent) Phone charger etc.

300 WATT MODEL **RX1551-300**
 Continuous power: 300w. Peak power: 660w
 Cigar lighter or battery clip connection. 40A fuse.
 Suitable applications: as 150w model plus small power tools, small fridges, stereo etc.

500 WATT MODEL **RX1551-500**
 Continuous power: 500w. Peak power: 800w
 Battery clip connection only. 70A fuse.
 Suitable applications: as 300w model plus medium power tools, colour TV's with DVD's, battery chargers etc.

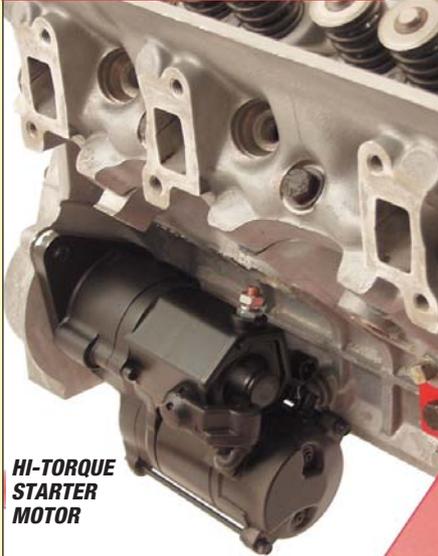

BATTERY ISOLATER SWITCH

Battery isolater switch **LL1171**
 Essential for off-road competition, this isolater switch is simple to fit and features removeable key.

UPRATED HI-TORQUE STARTER MOTOR

HI-TORQUE STARTER MOTOR

Fits as direct replacement to original starter. Starts engine regardless of compression or temperature. Up to 200% more cranking power using up to 50% less current.

Up-rated Hi-torque Starter Motor
 Outright sale, no exchange.
TR7 **GEU4471UR**
TR8/TR7 V8 **GXE4442UR**

BATTERY CONDITIONER & CHARGER

The battery charger that turns on and off, automatically.
 Suitable for all 12 volt batteries (from 5AH to 100AH), this superb product constantly revitalises the battery cells - helping to extend cell life, without the danger of overcharging.

Battery Conditioner Kit **RX1410**
 Comes complete with all fittings, connector kit and operating instructions.

LOOK AT THESE BENEFITS;

- Designed to be left connected for long periods.
- Use without disconnecting vehicle electrics.
- L.E.D. battery condition display.
- Thermal cut-out facility.
- 12 month guarantee.

Can also be used for these applications providing they use a 12 volt battery;
 Caravans, lawn mowers, motorbikes, motor boats, wheel chairs and general leisure use.

Battery Charger (6v/12v) **GAC7106**
 Standard Battery charger

ELECTRONIC IGNITION KITS

We offer Electronic Ignition Kits for all models which bring the benefits of a maintenance free ignition system (in place of contact points) with improved starting and on-road performance. Kits are available for the standard TR7, Sprint TR7 and a lumenition kit for the V8 Opus distributor, fitted from '76-'85. This kit converts the magnetic pick-up type electronic distributor to the simpler and more reliable optical triggering system.

No kit is available for the V8 35DM8 distributor (1985 on).

DIS-CAR-NECT

'Dis-Car-Nect'
 Starter Immobiliser **RX1356**
 Replacement Screw Knob **RX1356K**
 Replacement Fuse **RX1356F**

HOW DOES 'DIS-CAR-NECT' WORK?

When leaving your car, simply remove the knob to isolate the starter circuit. The 16amp by-pass fuse will maintain current to all other electrical circuits - stereo memories, alarm etc. Because the starter motor draws over 150amps, any attempt to connect (hot-wire) the starter motor will instantly cause the by-pass fuse to blow, this immobilises the car until the knob is replaced. If this should happen, simply replace the 16amp fuse at your convenience. As an added advantage, the 'Dis-Car-Nect' will also prevent battery drain if you intend to store your car, simply unscrew the knob and remove the fuse. For extra security you can unscrew and remove the immobiliser knob completely.

TRAILER BOARD

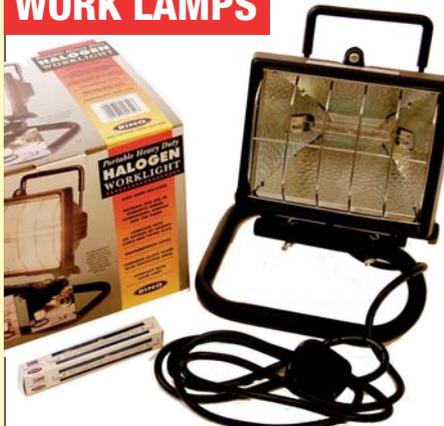

Trailer board (4') (Including 4m cable) **RX1513**

AIR HORNS

Air horns (pair) **RX1381**

WORK LAMPS

Portable Halogen Worklight (500w) **RX1263**
Replacement Bulb **RX1263B**

Ideal for working on you car or for jobs around the house.
Inc. 240v-500w tungsten halogen lamp, 2m cable and BS plug.

Inspection Lamp/Halogen **RX1424**
Plugs into cigar lighter.

HI-TEMP SHRINK TUBES

These shrink tubes are already supplied with the HT lead kits listed on the next page.

They can also be used for many other applications such as an enhanced appearance to any hose or wire, bundle wires as alternative to plastic ties or protecting electrical connections. Available in grey, black, red, blue and in 2 sizes, with a shrink ratio of 3 to 1.

Easily installed with naked flame. 18mm size shrinks to 6mm and 12mm size shrinks to 4mm. Supplied in packs of 25.

HI-TEMP SHRINK TUBES

18mm dia x 38mm long (Pack of 25) **RX1468**
 12mm dia x 38mm long (Pack of 25) **RX1469**

UNIVERSAL HEAT SHIELD

This multi-purpose heat shield can be used to protect starter motors, carbs, fuel pups, electrical boxes, instruments and hydraulic cylinders from intense heat. Easily cut to shape (scissors or knife) it attaches to itself with velcro material. Simply cut off excess material.

UNIVERSAL HEAT SHIELD

7" wide x 24" long **RX1470**

HEAT & SOUND INSULATION MATERIAL

Designed for insulating floors, bulkheads, transmission tunnels and many other applications from the effects of heat, road noise, engine and transmission noise. Made from an aluminium face bonded to a 1/8" composite fibreglass insulation, then backed to an aggressive adhesive. Tough enough for under vehicle applications and harsh environments where high heat can be a problem. Can also block out up to 50% of unwanted noise. Self adhesive, can be cut with tin snips to any shape.

INSULATION MATERIAL

RX1473

Supplied in 3 sizes: 2' x 21" (3.5sq ft), 4' x 21" (7sq ft), 4' x 42" (14 sq ft).

COOL TAPE

Consists of a 1mm aluminised material bonded to a lightweight, woven fibreglass with super strong adhesive backing. Reflects radiant heat. Limitless application, but common uses include wrapping cables, hoses, fuel lines, 'spot' heat retardation areas and sealing gaps in floors or firewalls. The best product on the market!

Flexible, strong adhesive and thin for a tight wrap.

COOL TAPE

RX1474

Available in 13/8" x 15', 13/8" x 30' and 2" x 60' rolls

THERMAL HEAT SLEEVES

This high temperature sleeving will protect wiring, HT leads, hydraulic hoses and coolant hoses from radiant heat.

Two different designs are offered. The fixed tube type is designed to slide over wiring/hoses whereas the velcro type can be easily installed without having to disconnect anything. Easy to cut and shape to suit. Supplied in 3ft lengths.

FIXED TUBE SLEEVE

Supplied in diameters of 0.5", 0.75", 1", 1.25", 1.5" (all 3ft long) **RX1471**

VELCRO SLEEVE

Supplied in 1 size - 0.5"-1.5" diameter (3ft long). **RX1472**

HT LEAD & SPARK PLUG PROTECTION

Protect your HT leads and spark plugs from extreme heat and improve the appearance of your engine bay with these top quality products. Ideal for tubular extractor manifold applications where additional heat is generated, but may be fitted to a standard vehicle.

NOTE: For Manifold Insulation Wrap, refer to 'Exhausts' section in catalogue.

SPARK PLUG SLEEVES

Manufactured from a fibreglass composite material (no arcing), the sleeves slide over the ends of the HT leads, easy installation. Available in silver, black, red or blue.

SPARK PLUG SLEEVES

2 cylinder kit (Order 2 kits for 4 cylinder) **RX1462**
 8 cylinder kit **RX1463**

HT LEAD SLEEVES

Made from the same material as the spark plug sleeves - these easy install, snug - fitting sleeves will fit any HT lead up to 10mm in diameter. Also included are hi-temp shrink tubes for a sharp finished appearance. Available in silver, black, red or blue.

HT LEAD SLEEVES

2 cylinder kit (Order 2 kits for 4 cylinder) **RX1464**
 8 cylinder kit **RX1465**

HT LEAD & SPARK PLUG SLEEVE KIT

These kits comprise of both kits listed opposite in one convenient (and cost effective) kit. Colour matched sleeves available in silver, black, red or blue.

HT LEAD & SPARK PLUG SLEEVE KIT

2 cylinder kit (Order 2 kits for 4 cylinder) **RX1466**
 Includes 7ft of HT lead sleeve, 2 plug sleeves & 6 shrink tubes.
 8 cylinder kit **RX1467**
 Includes 25ft of HT lead sleeve, 8 plug sleeves & 25 shrink tubes.

HARDTOP STAND & COVER

The safe & easy way to store your hardtop

The simplest solutions are usually the best, and our stand & cover system really is the best way to store, care and protect your hardtop when it's not in use.

The frame (which is powder coated), is made from high quality steel. For manoeuvre-ability it is fitted with 4 castor's (with rubber tyres) and footbrakes, and when not in use folds flat.

The protective cover - which is fitted with adjust-able securing straps & quick release buckles, is manufactured in 'Evolution4', a 4-layer breathable fabric, giving a strong outer layer and a smooth non-scratch inner lining.

The 1-piece cover also has 2 carry handles.

Hardtop Stand & Cover (Large)

Suitable for Stag, TR6, TR7 and all similar sized hardtops.

RX1420L

Hardtop Stand & Cover (Small)

Suitable for Spitfire & early TR's.

RX1420S

INDOOR TAILORED CAR COVERS

COVER IT UP !

These quality tailored indoor car covers (with Triumph logo) are individually designed for each model to ensure a really close fit. They are manufactured to our specification in a 'Breathable Sateen Cotton' material that is strong, but yet light in weight, making them very easy to fit. They will provide ideal protection whilst your car is in the garage - whether just parked up for a few days, or stored over the winter months - from dust, bright sunlight and from those annoying little marks when people brush past. The covers, which are available in a choice of colours, are supplied with a matching storage bag.

Indoor Tailored Tailored Car Covers;
Available in red, blue & green.

TRIUMPH VIDEOS

Produced by The British Motor Industry Heritage Trust (BMIHT), these videos are compiled from archive footage from the past and remind us of how things used to be! Very entertaining.

THE TRIUMPH MARQUE

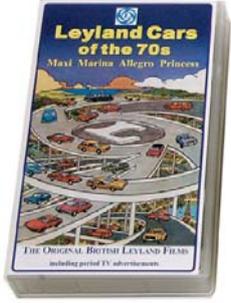

RX1436

This video shows the STANDARD-TRIUMPH film unit at its best, following the fortunes of rally and race teams, it covers the major successes of the Standards, TR's and Spitfires from 1953 to 1968 and the introduction of the TR5. Footage of the 25th Monte Carlo Rally is also included.

TRIUMPH HERALD

RX1437

This video includes the launch of the Triumph Herald in the Albert Hall, the gruelling test journey across Africa and footage of the Canley production factory. Raymond Baxter adds the informative commentary.

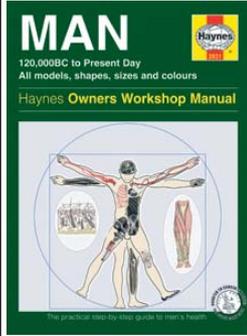

LEYLAND CARS OF THE 70's

RX1442

A celebration of those wonderful films made to launch some famous cars of the golden years at British Leyland. Includes footage of the Maxi, Marina, Allergo and Princess. (62 minutes in total).

HAYNES OWNERS WORKSHOP MANUAL - MAN

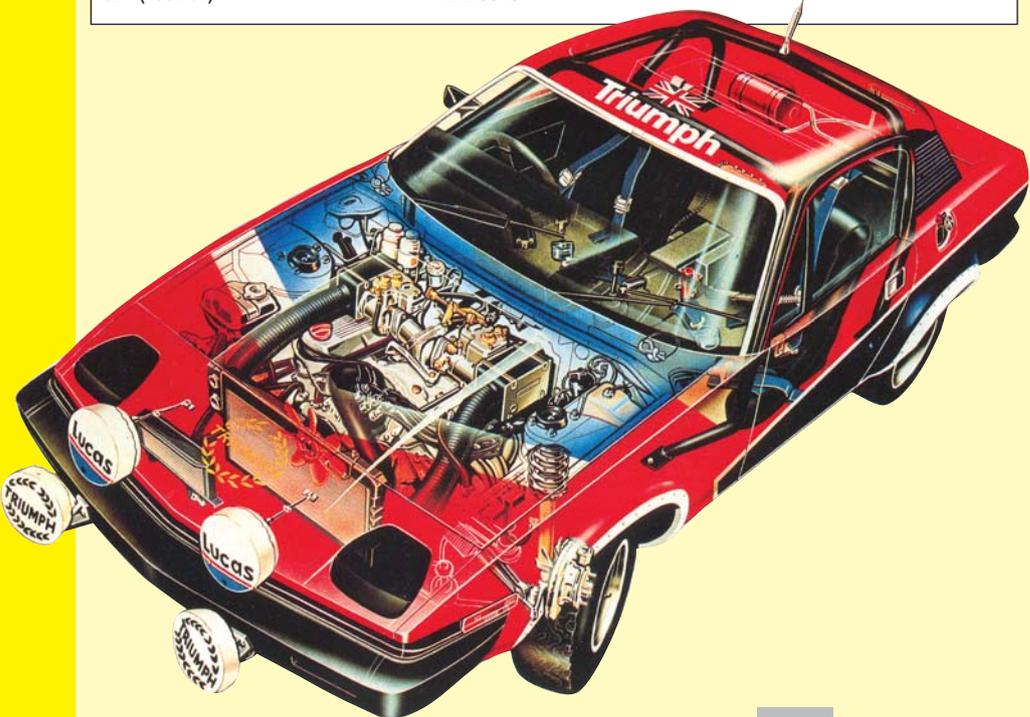

All models, shapes, sizes & colours, 120,000BC to present day. By Dr Ian Banks. 128 pages.

The practical step-by-step guide to men's health. Not a motoring manual, but a health manual presented in the style of a Haynes car repair guide! Covers basic health advice and 'trouble-shooting' with text and illustrations. Men are far more likely to look after their cars than their own bodies! Reading this could mean the difference between a healthy, high mileage life and premature breakdown.

RX1363
GGL657

UNLEADED FUEL ADDITIVES

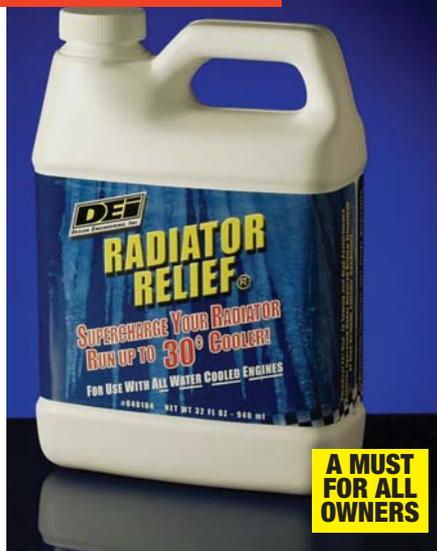

Bottled additives are available which can be mixed with either 'Premium' or 'Super' unleaded depending upon application. It usually works out cheaper to use bottled additives than leaded or LRP - work it out for yourself!

Castrol Valvemaster 250ml **RX1407VM**
Castrol Valvemaster Plus 250ml **RX1407VMP**

Endorsed by the federation of British Historic Vehicle Clubs (FBHVC), having been independently tested and approved, both products offer a high level of protection against valve seat recession under all driving conditions. In addition, castrol valvemaster plus provides an octane boost to premium unleaded petrol which reduces pinking or knocking on high compression or performance applications. This also usually avoids the need to re-tune your engine. Treats 250 litres of petrol.

RADIATOR RELIEF

A MUST FOR ALL OWNERS

COOLING SYSTEM ADDITIVE

- 30°F lower operating temperature
- 50% quicker warm up time
- Safe with water/antifreeze mixture
- Safe with cast iron, alloy engines and heads
- Increased engine life!
- 100% biodegradable, non corrosive, non toxic
- For use in all water cooled engines

Radiator relief allows your radiator to transfer heat more efficiently, reducing your engines operating temperature (which is obviously controlled by the thermostat) by up to 30 F. You therefore have 'a little bit in hand' for those hot days stuck in traffic. This proven coolant additive will also cut engine warm-up time in half which will reduce engine wear which is most extreme when the engine is cold. Fully compatible with water and anti-freeze and is safe with cast iron and all alloys.

RADIATOR RELIEF (946ml) **RX1461**
Treats 1 engine.

GEAR OIL

CAPACITIES:-
GEARBOX
4 SPEED - 1.1 LITRE (EP90)
5 SPEED - 1.5 LITRE (ATF)
AUTO - 6.96 LITRE (ATF)
REAR AXLE
4 SPEED/EARLY AUTO - 1.3 LITRE (EP90)
5 SPEED/LATE AUTO - 1.1 LITRE (EP90)

Unipart (EP90) Gear Oil
0.5 Litre **GGL190**
5 Litre **GUL805**
ATF-Auto Transmission Fluid
0.5 Litre **GGL175**
5 Litre **GGL505**

ANTIFREEZE

Unipart Antifreeze
1 Litre **GAC2018**
5 Litre **GAC2019**

GREASE & LUBE

Lithium Grease (Multi-Purpose)
Unipart 0.5 Litre (Tube) **GGL111**
Brake Rubber Grease **514578**
Cam Lube (for assembly) **RX1358**

BRAKE/CLUTCH FLUIDS

Standard (DOT 3) 1 Litre **GBF103**
Silicone 0.5 Litre* **RX1327**
Silicone 1 Litre* **RX1326**
**Do not mix with standard fluid*

OIL JUGS

Castrol Oil Jugs
1/2 Pint **RX1395**
1 Pint **RX1396**
2 Pint **RX1397**

ONLY AVAILABLE TO PERSONAL CALLERS.

New legislation from 1/1/03 states that number plates can only be sold directly to the owner of the vehicle together with proof of ownership and personal identification.

We will need sight of the following three

original documents:-

- Vehicle registration document (V5)
- Driving Licence or utility bill.
- Passport or credit card (with photo ID), or travel/works pass (with photo ID).

Number plates are made to special order.

Please note that it is also now mandatory in the UK for all new number plates to bear the originating suppliers name, postcode and telephone number (i.e. Rimmer Bros).

Vehicle Number Plate (Pair) - Black

Black background, Silver letters, Legal on Vehicles
Reg. to 1/1/73.

Pressed aluminium (PR)	RX1365
Acrylic - standard letters (PR)	RX1365B
Acrylic - engraved letters (PR)	RX1365A

Fitting Kit - number plates

Universal kit including 4 self tap screws, 2 white caps, 2 yellow caps & 8 double sided adhesive pads.	NPK

GENERAL FASTENERS

ACCESSORIES

BOLTS (Imperial)

Bolts have a NON Threaded Shoulder.

The threaded length can be calculated by multiplying the diameter by 2 and adding 1/4".

Thread Diameter	Bolt Length	Thread Type	Thread Pitch	PART NUMBER	Spanner Size
1/4"	1.5"	UNF	—	GHF102	7/16" AF
1/4"	2"	UNF	—	GHF118	7/16" AF
5/16"	1.5"	UNF	—	GHF104	1/2" AF
5/16"	2"	UNF	—	GHF121	1/2" AF
3/8"	1.5"	UNF	—	GHF106	9/16" AF
3/8"	3"	UNF	—	GHF126	9/16" AF
1/2"	2"	UNF	—	BH608161	3/4" AF
1/2"	2.5"	UNF	—	BH608201	3/4" AF
1/2"	3"	UNF	—	BH608241	3/4" AF
5/8"	3"	UNF	—	GHF11315	15/16" AF
5/8"	4"	UNF	—	BH610321	15/16" AF

BOLTS (Metric)

Bolts have a NON Threaded Shoulder.

The threaded length can be calculated by multiplying the diameter by 2 and adding 6mm.

Thread Diameter	Bolt Length	Thread Type	Thread Pitch	PART NUMBER	Spanner Size
M 6	40mm	Metric Fine	1.0	GHF132	10mm
M 8	40mm	Metric Fine	1.25	GHF134	13mm

The TR Drivers Club

The TR Drivers Club has been around for almost twenty five years now and was primarily formed to ensure preservation of the last of the TR sports car line - the TR7/8. Its membership predominantly comprises of TR7/8 owners and is widely acclaimed to have the best technical expertise and experience to support the future of this marque.

The TR Drivers Club is run by enthusiasts on a non profit basis ensuring that its members are kept in touch with the TR scene, they produce a quality bi-monthly magazine containing a good balance of technical articles, services and local group social scenes.

Local area activities include regular social gatherings, activities and drive outs for the more active club members, should you wish to get involved of course.

The TR Drivers Club annual national weekend attracts the largest gathering of TR7/8 vehicles and enthusiasts in the UK, it's the place to be if you're into TR7's and TR8's.

For membership details please contact:

Kevin Morton. TR Drivers Club. 12 Puxton Drive, Kidderminster, Worcester DY11 5DR

Club Hotline: **01562 825000.**

E-mail: TRDRIVER@btinternet.com Website: www.trdrivers.com

ACKNOWLEDGMENTS

We would like to thank the TR Drivers Club, and to its members whose cars we photographed, also to Stuart Fairwood and Wayne Walsh for providing additional photography. Special thanks must go to; 'Quadrant Picture Library' of Surrey, the 'National Motor Museum at Bealieu', and to the 'British Motor Heritage Industry Trust; at Gaydon, for permitting us to reproduce rare archive photography of TR7's and TR8's, our sincere thanks to them and members of staff for their help. Particular mention must go to Washingborough Hall, Washingborough, Lincoln, and to Fulbeck Hall, Grantham, Lincolnshire, for the location photography. Last, but not least, our thanks to John Randall for his knowledge and assistance.

DO YOU HAVE ANY OLD UNITS?

WE'RE BUYERS AS WELL AS SELLERS

Alongside our new parts, we also offer parts which have been reconditioned (to the very highest standards). Because of this, we are often in the market for engines, gearboxes and axles which are suitable for reconditioning purposes. Please give us a call.

ALL PARTS ARE GUARANTEED

"It's our objective to ensure the satisfaction of every one of our customers."

Please refer to our Price Guide for warranty information.
